THE ORIGIN OF THE EARTH. By Thomas Chrowder Chamberlin, Head of the Department of Geology in the University of Chicago.

This book, by one of the leading geologists of the world, sets forth the disclosures that led to the rejection, one after another, of the older views of the origin of our planet, the futile attempts then made to emend these or to build others upon the same foundations, the final rejection of all these, and the construction of a radically new view based on a new dynamic foundation. The later chapters of the book treat of the early stages of the earth and of the way in which its leading processes took their start from their cosmogonic antecedents, these being held to be essential factors in the genesis of the planet. The beginning of the inquiry is set forth in the Introduction; the successive chapters are entitled: "The Gaseous Theory of Earth-Genesis in the Light of the Kinetic Theory of Gases"; "Vestiges of Cosmogonic States and Their Significance"; "The Decisive Testimony of Certain Vestiges of the Solar System"; "Futile Efforts"; "The Forbidden Field"; "Dynamic Encounter by Close Approach"; "The Evolution of the Solar Nebula into the Planetary System"; "The Juvenile Shaping of the Earth"; "Inner Reorganization of the Juvenile Earth"; "Higher Organization in the Great Contact Horizons."

xii + 272 pages, 12mo, cloth; 6s net.

Volumes already Published

THE EVOLUTION OF SEX IN PLANTS. By John M. Coulter, Head of the Department of Botany in the University of Chicago. x + 140 pages, 12mo, cloth; 4s net.

INDIVIDUALITY IN ORGANISMS. By Charles Manning Child, Associate Professor of Zoology in the University of Chicago. x + 212 pages, 12mo, cloth; 5s net.

Volumes in Preparation

FINITE COLLINATION GROUPS. By Hans F. Blichfeldt.
A FACTORIAL THEORY OF EVOLUTION. By William Lawrence Tower.
CHEMICAL SIGNS OF LIFE. By Shiro Tashiro.
THE EVOLUTION OF REPTILES. By Samuel Wendell Williston.
FOOD POISONING. By Edwin Oakes Jordan.
THE LIVING CYCADS. By Charles Joseph Chamberlain.
MECHANICS OF DELAYED GERMINATION IN SEEDS. By William Crocker.
THE RIGIDITY OF THE EARTH AND OF MATERIALS. By A. A. Michelson.
THE PROBLEM OF FERTILIZATION. By Frank R. Lilie.
LINEAR INTEGRAL EQUATIONS IN GENERAL ANALYSIS. By Eliakim Hastings Moore.
Diet, influence of nature of, on retention of protein (Umeda) 245
Diglycylglycine, anaphylaxis produced by (Zunz and Diakonoff) 160
DRUEYER, G. and GARDNER, A. D. A general method of estimating the relative turbidity or opacity of fluid suspensions, including bacterial emulsions 399
DRUMMOND, J. C. Observations upon the growth of young chickens under laboratory conditions 77
DRUMMOND, J. C. The growth of rats upon artificial diets containing lactose 89
DRUMMOND, J. C. A study of the distribution of nitrogen in the proteins of tumours and normal tissues 473
Esterases, distribution of, in the animal body (Porter) 523
EWINS, A. J. Note on the isolation of methylguanidine by the silver method 103
Feeding experiments with deficiencies in the amino-acid supply (Ackroyd and Hopkins) 551
Flesh-feeding, influence of, on urinary creatinine (Burns and Orr) 495
Galactosides of the brain; phrenosin and kerasin (Rosenheim) 142
GARDNER, A. D. see DRUEYER, G.
Gels, adsorptive stratification in (Bradford) 169
Glyoxal derivatives from hydroxy- and amino-acids in presence of nitrophenylhydrazine 313
Glyoxaline derivatives (Barger and Dakin) 376
Growth of rats upon artificial diets containing lactose (Drummond) 89
Growth of rats upon diets of isolated food substances (Osborne and Mendel) 554
Growth of young chickens under laboratory conditions, observations on (Drummond) 77
HALLIBURTON, W. D. Obituary notice of C. F. Myers Ward 7
HARTLEY, P. see DALE, H. H.
HARTSHIRK, E. The viscosity and hydration of colloidal solutions 325
HAYNES, D. see SCHRYVER, S. B.
Histidine, as precursor of purines (Ackroyd and Hopkins) 551
HOMER, A. On the concentration of antitoxic sera 280
HOPKINS, F. G. Obituary notice of J. Wade 5
HOPKINS, F. G. Obituary notice of A. C. H. Rothera 11
HOPKINS, F. G. see also ACKROYD, H.
HUESTY, W. H. see CAHEN, E.
Hydration of colloidal solutions (Hatschek) 325
Hydrogen ion concentration, optimal for peptic (Okada) 126
Hydrogen ion concentration, optimal for the proteoclastic action of taka-diastase (Okada) 130
Hydroxy-acids, reaction of with nitrophenylhydrazine (Dakin) 313
Hypochlorites, action of, on proteins (Milroy) 453
Hypochlorites, behaviour of, on injection (Milroy) 453
Inositol, of brain, preparation of (Momose) 120
Kendall's solution, estimation of reducing sugars by (Wilson and Atkins) 137
Kynurenic acid, feeding experiments with (Asayama) 466
Lactic acid, decomposition of, by killed yeast (Palladin and Sabinin) 183
Lactose, growth of rats upon artificial diets containing (Drummond) 89
Laidlaw, C. G. P., obituary notice of (Blackman) 8
Leaves, foliage, presence of maltase in (Daish) 49
Lipase, pancreatic, stability of (de Souza) 188
Maltase, distribution of, in plants (Davis) 31 (Daish) 49, 56
Maltase, function of, in starch degradation (Davis) 31
Maltase, influence of, on amyloclastic activity of plant materials (Davis) 31
Maltase, presence of, in foliage leaves (Daish) 49
Maltase, presence of, in germinated barley (Daish) 56
Martin, C., obituary notice of (Russell) 9
MENDEL, L. B. see OSBORNE, T. B.
Metabolism of dog, fate of inorganic nitrogen in (Caldwell and Clotworthy) 14
Methylguanidine, note on the isolation of, by the silver method (Ewins) 103
Milk, cow's, study of proteins of (Crowther and Raistrick) 434
Mizloy, T. H. The action of hypochlorites and allied substances on proteins, and their behaviour on injection 453
Momose, G. On the inositol of brain and its preparation 120
Muscle of chick, precursor of creatine in (Burne) 263
Myers Ward, C. F., obituary notice of (Halliburton) 7
Nitrogen, distribution of, in the tissues (Cathcart) 197
Nitrogen, inorganic, fate of, in metabolism of dog (Caldwell and Clotworthy) 14
Nitrophenylhydrazine, reaction of, with hydroxy- and amino-acids (Dakin) 313
Obituary notice of C. G. P. Laidlaw (Blackman) 9
Obituary notice of C. Martin (Russell) 9
Obituary notice of C. F. Myers Ward (Halliburton) 7
Obituary notice of F. W. Pavy (Bywaters) 1
Obituary notice of A. C. H. Rothera (Hopkins) 11
Obituary notice of J. Wade (Hopkins) 5
OKADA, S. On the optimal reaction for peptic 126
INDEX

OYADA, S. On the optimal conditions for the proteoclastic action of taka-diastase 130
ONSLOW, H. On the development of the black markings on the wings of Pieris Brassicae 26
Opacity of suspensions, estimation of (Dreyer and Gardner) 399
Orr, J. B. see Burns, D.
OSBORNE, T. B. and MENDEL, L. B. The growth of rats upon diets of isolated food substances 534
"oxycholesterol," new colour reaction for (Rosenheim) 176

PALLADIN, W. and SABININ, D. The decomposition of lactic acid by killed yeast 183
Pavy, F. W., obituary notice of (Bywaters) 1
Pectic substances of plants (Schryver and Haynes) 539
Pepein, optimal reaction for (Okada) 126
Plants, pectic substances of (Schryver and Haynes) 539
PLIMMER, R. H. A. The analysis of proteins. I. The estimation of arginine by decomposition with alkali 115
PORTER, A. E. The distribution of esterases in the animal body 523
POWIS, F. and RAIFER, H. S. Creatinuria in children 363
Protein, influence of diet on retention of (Umeda) 245
Proteins, analysis of (Plimmer) 115
Proteins, of horse-serum, anaphylaxis to (Dale and Hartley) 408
Proteins, of tumours and normal tissues, distribution of nitrogen in (Drummond) 473
Proteoclastic action of taka-diastase, optimal conditions for (Okada) 130
Purines, derived from arginine and histidine in metabolism (Ackroyd and Hopkins) 551
RAISTRECK, H. see CROWTER, C.
RAIFER, H. S. see POWIS, F.
Rats, growth of, upon artificial diets containing lactose (Drummond) 89
Rats, growth of, upon diets of isolated food substances (Osborne and Mendel) 534
ROSENHEIM, M. C. A new colour reaction for "oxycholesterol" 176
ROSENHEIM, O. The galactosides of the brain. IV. The constitution of phrenosin and kerasin 142
ROTHERA, A. C. H., obituary notice of (Hopkins) 11
RUSSELL, E. J. Obituary notice of C. Martin 9
SABININ, D. see PALLADIN, W.
SCHRyVER, S. B. and HAYNES, D. The pectic substances of plants 539
Sera, antitoxic, concentration of (Homer) 280
S oi um, horse, anaphylaxis to separated proteins of (Dale and Hartley) 408
SOUZA, D. H. DE. The stability of pancreatic lipase 108
Starch degradation, influence of maltase on (Davis) 31
Stratification, adsorptive, in gels (Bradford) 169
Sugars, reducing, estimation of, by Kendall's solution (Wilson and Atkins) 137
Suspensions, estimation of turbidity of (Dreyer and Gardner) 399
Taka-diastase, optimal conditions for the proteoclastic action of (Okada) 130
Thrombin, factors concerned in formation of (Dale and Walpole) 331
Tissues, distribution of nitrogen in the (Catheart) 197
Tissues, distribution of nitrogen in the proteins of normal (Drummond) 473
Torulae, red, colouring matter of (Chapman) 548
TOTANI, G. Feeding experiments with a dietary in which tyrosine is reduced to a minimum 382
Tumours, distribution of nitrogen in the proteins of (Drummond) 473
Turbidity of suspensions, estimation of (Dreyer and Gardner) 399
Tyrosine, feeding experiments with a diet deficient in (Totani) 382
Ultrasiltration apparatus, "plate" forms of (Walpole) 254

The *Biochemical Journal* is conducted by the Biochemical Society and is published by the Cambridge University Press.

This Society has been instituted for the purpose of facilitating intercourse between those biologists and chemists who are interested in the investigation of problems common to both, such as the chemical problems connected with Agriculture, Brewing, Animal and Vegetable Physiology and Pathology, &c. Persons interested in Biochemistry are eligible for election.

Meetings are held at different centres for the communication of papers to the Society.

The annual subscription is 25s., which includes a copy of the Journal, and becomes due on January 1st. Further information may be obtained on application to the Hon. Sec., Dr R. H. Plimmer, University College, London, W.C., to whom subscriptions should be sent.

Papers for publication should be sent to Prof. W. M. Bayliss, F.R.S., University College, W.C., or to Prof. A. Harden, F.R.S., Lister Institute, Chelsea Gardens, S.W. Communications respecting the printing of the articles, or respecting the purchase of offprints should be addressed to the University Press, Cambridge.

All communications respecting the purchase of copies of the parts or volumes, whether current or back issues, or respecting subscriptions in the case of non-members of the Biochemical Society (£1. 1s. net per volume (post free) payable in advance) should be addressed to Mr C. F. Clay, Cambridge University Press, Fetter Lane, London, E.C.

The Journal is issued quarterly and the date at which each paper is received by the editors is printed at the beginning of the paper.

The Cambridge University Press has appointed the University of Chicago Press agents for the sale of the *Biochemical Journal* in the United States of America and has authorised them to fix the following subscription price. $5.25 net.

**Notice to Contributors.**

1. Contributors receive 50 copies of their papers free and can purchase additional copies if notice be given when their proofs are returned.

2. Papers forwarded to the Editors for publication are understood not to be offered to any other Journal for prior or simultaneous publication.

3. All communications intended for publication must be type-written.

4. **References.** References to literature should be arranged alphabetically according to authors' names at the end of the communication, each accompanied by the date, title of Journal, volume and page, thus: Ackermann (1912, 1), *Zeitsch. Biol.* 59, 17. In the text the reference should be indicated by the author's name and the date, enclosed in brackets, thus [Ackermann, 1912, 1]. If reference is made to several papers published by one author in a single year, these should be numbered in sequence and the number quoted along with the year both in the text and in the collected references.

5. Chemical formulae should be written, as far as possible, in a single horizontal line.

6. Illustrations and curves accompanying the papers must be carefully drawn, about twice the size of the finished block, on smooth white Bristol boards in Indian ink. Any lettering on these drawings should be lightly inserted in pencil. Further information can be obtained from the Editors.

INDEX OF SUBJECTS

VOLS. I—X

Abrus precatorius, colouring matter of the seed-coats of (Sarkar), 1914, 8, 281
Absorption of water in plants, effect of increase of osmotic strength of cell sap on (Drabble, E. and H.), 1906-7, 2, 129
— spectra of methylene blue, eosin and methylene-blue-eosin (Barratt), 1906, 1, 407
Accessory factors in diet, effect on growth (Hopkins and Neville), 1913, 7, 97
— substance, presence of a growth promoting, in impure lactose (Drummond), 1916, 10, 100
Acetaldehyde, effect on reducing enzymes of rabbit muscle (Harden and Norris), 1915, 9, 335
— produced in fermentation of glucose by B. coli communis (Grey), 1913, 7, 359
— production of, from lactic acid by killed yeast in presence of methylene blue (Palladin and Sabinin), 1916, 10, 184
Acetoacetic acid, detection by sodium nitroprusside and ammonia (Harding and Butteran), 1911-12, 6, 445
— excretion of, in acetonuria (Kennaway), 1914, 8, 355
— relation to lipoid material in diabetic blood (Wilson and Williams), 1906-7, 2, 22
Acetone bodies, the significance of (Lang), 1915, 9, 476
— excretion of, by normal individual (Lang), 1915, 9, 459
— excretion of, in experimental diabetes (Moorhouse, Patterson and Stephenson), 1915, 9, 202
— improved method for estimation of (Lang), 1915, 9, 457
— relation to lipoid material in diabetic blood (Wilson and Williams), 1906-7, 2, 22
Acetone-soluble phosphatides, the so-called (MacLean), 1914, 8, 453
Acetonuria, relative excretion of β-hydroxybutyric acid and acetoacetic acid in (Kennaway), 1914, 8, 355
Acetylcholine (Ewins), 1914, 8, 367
— occurrence in ergot (Ewins), 1914, 8, 44
Acetylphosphoinic acid (Rosenheim and MacLean), 1915, 9, 107
Acetol electrolytes (Gruner), 1906-7, 2, 384
Acidity, of blood (Moore and Wilson), 1906, 1, 301
— of gastric contents in jaundice (Sutherland), 1906, 1, 366
— of gastric contents in malignant disease (Moore, Alexander, Kelly and Roaf), 1906, 1, 274; (Palmer), 1906, 1, 398
— of urine of frogs (Bainbridge and Beddard), 1906, 1, 262
see also Hydrogen ion concentration
Acidosis, influence of nature of diet on (Lang), 1915, 9, 460
— of starvation, effect of preceding diet on (Lang), 1915, 9, 463
— relative excretion of β-hydroxybutyric acid and acetoacetic acid in (Kennaway), 1914, 8, 356
Acids, aromatic, distribution of, in plants (Wheldale), 1909-11, 5, 450
— effect of, on activity and multiplication of yeast cells (Drabble and Scott), 1906-7, 2, 340
— effect of, on autolysis of liver (Schryver), 1906, 1, 128, 149
— effect of, on growth of vegetable cells (Moore, Roaf and Knowles), 1907-8, 3, 281
— effect of, on inversion of saccharose by sucrase (Stoward), 1911-12, 6, 131
— effect of, on osmotic pressure of serum proteins (Adamson and Roaf), 1907-8, 3, 422
— effect of, on tadpole of Rana temporaria (Roaf and Whitley), 1906, 1, 88, 93
— effect of, on uterus (Fardon), 1907-8, 3, 408
— fatty, unsaturated, of butter (Smedley), 1911-12, 6, 454
— fatty, with branched chains, mode of oxidation of (Raper), 1914, 8, 320
— vegetable, as nutrients for Azotobacter (Mockeridge), 1915, 9, 277
Adamkiewicz reaction (Rosenheim), 1906, 1, 233; (Homer), 1913, 7, 116; (Motttram), 1913, 7, 249; (Breidahl), 1915, 9, 36
Adenine, occurrence in rice polishings (Drummond and Funk), 1914, 8, 605
Adrenaline, action on uterus (Fardon), 1907-8, 3, 412
INDEX OF SUBJECTS

Adrenoline, glucosuria, output of creatine in
(Tsuji), 1915, 9, 449
— influence of injection of, on output of
nitrogen (Tsuji), 1915, 9, 451
Adsorption, applications of (Bayliss), 1906, 1,
214, 215, 216, 222, 226
— by filter paper of hydrochloric acid,
Congo red, etc. (Schmidt), 1913, 7, 231
— compounds, conditions of dissociation
of (Bayliss), 1906, 1, 209
— formula applied to cotton fibre dyed
with methylene blue (Barratt and Edie),
1906-7, 2, 447
— influence of adsorptive agglutination of
bacteria by specific (Bayliss), 1906, 1, 189
— kinetics of (Bayliss), 1906, 1, 185
— law of (Bayliss), 1906, 1, 176
— nature of (Moore and Bigland),
1909-11, 5, 32
— negative, of sodium chloride by silver
chloride (Bradford), 1916, 10, 173
— of trypsin by charcoal (Hedin), 1906,
1, 486; 1906-7, 2, 57
— phenomena, action of electrolytes
and ash-constituents of proteins (Bayliss),
1906, 1, 175, 195
— specific (Bayliss), 1906, 1, 212
— specific, of enzymes (Hedin), 1906-7,
2, 112
Adsorptive stratification in gels (Bradford),
1915, 10, 109
Agglutination, of bacteria by specific sera,
mechanism of (Tulloch), 1914, 8, 293
— of bacteria, inhibition of, by alkalies
(Tulloch), 1914, 8, 299
Aggregation of soils, diagrammatic co-ordination
of phenomena relating to (Walpole),
1914, 8, 170
Alanine, deamination of (Bostock), 1911-12,
6, 53
— oxidation of, to acetonitrile by sodio-
p-toluenesulphochloroamide (Dakin), 1916,
10, 321
Albumin, coagulation of, in solutions of sodium
chloride, effect on chloride determination
(Gruner), 1906-7, 2, 387
— egg, density and solution volume of
(Chick and Martin), 1913, 7, 92
— effect of superimposition of, in
diets, on output of nitrogen and sulphur
(Tsuji), 1915, 9, 443
— from different sources, anaphylaxis
to (Dale and Hartley), 1916, 10, 429
— guanidine content of (Burns),
1916, 10, 271
— hydrolysis of (Latham), 1907-8,
3, 207
— precipitation by ammonium
sulphate (Chick and Martin), 1913, 7, 380,
548; by sodium salts and alcohol (Chick
and Martin), 1913, 7, 396
— protein catabolism of (Cathcart
and Green), 1913, 7, 8
— rate of hydrolysis of, by acid
(Pittom), 1914, 8, 157
— viscosity of solutions of (Chick
and Lubynska), 1914, 8, 60
Albumin (egg-white) excreted, properties of,
as antigen (Porter), 1915, 9, 2
— living, the synthesis of (Latham),
1907-8, 3, 241
— of cow's milk, colostrum and serum,
compared (Crowther and Raistrick), 1916
10, 439, 443
— preparation of, from cow's milk and
colostrum (Crowther and Raistrick), 1916,
10, 446
— serum, density and solution volume of
(Chick and Martin), 1913, 7, 92
— serum, of horse, anaphylaxis to
(Dale and Hartley), 1916, 10, 418, 424
— serum, of ox and horse, composition of
(Hartley), 1914, 8, 541
— serum, viscosity of solutions of
(Chick and Lubynska), 1914, 8, 65
Albuminoids, foodstuffs, function of, in general
economy of nutrition (Schryver), 1906, 1,
123, 157
Albumins, not synthesised in intestinal mucous
membrane (Schryver), 1906, 1, 143
Albuminuria in rabbits, properties of albumin
as antigen (Porter), 1915, 9, 1
Albumose, absence from serum (Schryver),
1906, 1, 137
Alcohol, action on plain muscle (Fardon),
1907-8, 3, 420
— effect of feeding, on acidosis (Lang),
1915, 9, 470
— theory of formation of, from acetaldehyde
and lactic acid in alcoholic fermentation
(Palladin and Sabinin), 1916, 10, 191,
196
Alcohols, aromatic, distribution of, in plants
(Wheldale), 1909-11, 5, 450
— as nutrients for Azotobacter (Mockeridge),
1915, 9, 275
Aldehydes, aromatic, condensation with
pyruvic acid (Lubynska and Smalley),
1913, 7, 375
— aromatic, distribution of, in plants
(Wheldale), 1909-11, 5, 450
— colour reactions with indole deriva-
tives (Homer), 1913, 7, 116
— condensation with tryptophane and
other indole derivatives (Homer), 1913, 7,
101
— fatty, condensation of, with pyruvic
acid (Smalley and Lubynska), 1913, 7,
370
Alkalies, effect of, on activity and multiplication
of yeast cells (Drabble and Scott),
1906-7, 2, 340
— effect of, on autolysis of liver (Schry-
ver), 1906, 1, 128, 149
— effect of, on growth of vegetable cells
(Moore, Roaf and Knowles), 1907-8, 3, 281
— effect of, on osmotic pressure of serum
proteins (Adamson and Roaf), 1907-8, 3,
422
— effect of, on output of uric acid and
purine bases (Umeda), 1915, 9, 429
— effect of, on tadpole of Rana temporaria (Roaf and Whitely), 1906, 1, 88, 91
— effect of, on uterus (Fardon), 1907-8,
3, 408
INDEX OF SUBJECTS

Alkalies, fixed, estimation of and daily output in urine (Edie and Whitley), 1906, 1, 11
— free, test for, in plant tissues (Hof), 1908-9, 4, 175
— inhibiting action on germination of fungi (Tulloch), 1914, 8, 299
Alkaloids, salts, 1908-9, 4, 162
— of blood and lymph, stimulation of cell-growth by (Moore, Alexander, Kelly and Roaf), 1906, 1, 294
— of blood, in malignant disease (Moore and Wilson), 1906, 1, 297
Alkaloids, in "West African Boxwood," preparation and properties (Gibson), 1906, 1, 42
Alkaloids, distribution of, in plants (Wheldale), 1909-11, 5, 456
— see also Aconitine, Atropine, Caffeine, Cocaine, Codeine, Conhydrine, Conine, Daturine, Duboisine, Ergotinine, Hyoscine, Hyoseyamine, Morphin, Muscarine, Nicotine, Physostigmine, Pilocarpine, Piturine, Pseudo-cocaine, Pseudo-muscimaurine, Quinine and Scopolamine
Alkapturinuria, a new case of (Garrod and Clarke), 1906-7, 2, 217
— H : N quotient in (Garrod and Clarke), 1906-7, 2, 220
Allantoic fluid, distribution of nitrogen in (Lindsay), 1911-12, 6, 93
Allantoin, estimation of, in urine (Lindsay), 1908-9, 4, 448
— estimation of, in urine, in the presence of glucose (Plimmer and Skelton), 1914, 8, 641
— estimation of, indirect, in urine, by means of urease (Plimmer and Skelton), 1914, 8, 70
— excretion of, effect of various dietary deficiencies on, in the rat (Ackroyd and Hopkins), 1916, 10, 551
— excretion of, effect of chloroform on (Lindsay), 1909-11, 5, 407
— excretion of, by dog, effect of carbohydrate and sodium lactate on (Umeda), 1915, 9, 433, 436
— formation of, by perfusion of dog's liver (Ackroyd), 1909-11, 5, 220
— formation of, by perfusion of rabbit's liver (Ackroyd), 1909-11, 5, 443
— influence of, on plant growth and cell division (Copin), 1911-12, 6, 417
— in foodstuffs (Ackroyd), 1909-11, 5, 400
— in rat's urine (Ackroyd), 1914, 8, 435
— Allyl oxide, in the volatile oil of leek (Carlier and Evans), 1906-7, 2, 328
— sulphide, absorption and excretion of, by animals (Carlier and Evans), 1906-7, 2, 328
— sulphide, increase of tolerance for (Carlier and Evans), 1906-7, 2, 322
— sulphide, physiological action of (Carlier and Evans), 1906-7, 2, 325
Alveolar air, in man, the effect of ingestion of urea, sodium lactate and sodium bicarbonate on the composition of (Momose), 1916, 8, 525
Alveolar air, in man, the effect of ingestion of urea, sodium lactate and sodium bicarbonate on the composition of (Momose), 1916, 10, 232
— see also Glycine and Glycocoll
Alveolar acid, effect of ingestion of, on tissue composition (Cathcart), 1916, 10, 232
Amino-acetic acid, estimation of, in urine (Lindsay), 1909-8, 4, 448
— excretion of, effect of chloroform on (Lindsay), 1909-11, 5, 407
— from caseinogen, isolation of (Dudley and Woodman), 1915, 9, 101
— Herzog and Meyer's reaction applied to (Burns), 1914, 8, 154
— mono-, in pathological urines (Hall), 1906, 1, 241
— oxidation of, to cyanides (Dakin), 1916, 10, 319
— reaction of, with nitrophenylhydroxylamine (Dakin), 1916, 10, 313
Amino-nitrogen, the free, of different proteins of ox and horse serum (Hartley), 1915, 9, 299
— Aminophenylacetic acid, deaminisation of (Bostock), 1911-12, 6, 53
— estimation of, in urine (Lindsay), 1908-9, 4, 448
— ammonia, excretion of, effect of chloroform on (Lindsay), 1909-11, 5, 407
— ammonium salts, effect of injection of, on tissue composition (Cathcart), 1916, 10, 232
— effect of, on excretion of ammonia nitrogen (Caldwell and Clotworthy), 1916, 10, 19
— fate of nitrogen of, in metabolism of dog (Caldwell and Clotworthy), 1916, 10, 25
— Amylase, behaviour in presence of specific precipitate (Porter), 1913, 7, 599
— Amyloclastic power of preparations, measurement of (Davis), 1916, 10, 46
— Anaesthesia, creatininuria following (Tsuji), 1915, 9, 454
— glycosuria following (Edie, Moore and Roaf), 1909-11, 5, 350; (Tsuji), 1915, 9, 452
— rise in output of total nitrogen following (Tsuji), 1915, 9, 453
— Anaphylaxis, liver nitrogen in (Barger and Dale), 1914, 8, 670
— produced by diglycyglycine (Zunz and Diakonoff), 1916, 10, 186
— to egg-albumins (Dale and Hartley), 1916, 10, 426
— to separated proteins of horse-serum (Dale and Hartley), 1916, 10, 408
Animal bioplasm, soluble Prussian blue as a test for reducing power of (Harris and Irvine), 1906, 1, 355
— nutrition, action of metabolites in (Schröyer), 1906, 1, 127
— autolysis in (Schröyer), 1906, 1, 126, 144
— chemical dynamics of (Schröyer), 1906, 1, 123
— distribution of nitrogen in tissues in different stages of (Schröyer), 1906, 1, 128, 134
Animals, aquatic, variation in osmotic concentration of blood and coelomic fluids of (Dakin), 1907–8, 3, 473
— Australian, osmotic pressure of blood and body fluids of (Jona), 1911–12, 6, 130
— hibernating, purine metabolism of (Kennaway), 1909–11, 5, 188
— marine, nutrition and metabolism of (Moore, Edie, and Wrathall), 1911–12, 6, 255
Anthocyanins from Antirrhinum majus (Wheddale and Bassett), 1914, 8, 204
Antibacterial sera, effect of injection of, on opsonic power of blood (Yorke and Smith), 1906, 1, 341
Anticomplementary property of liver lipoids (Wilson), 1911–12, 6, 103
Antigen, excretion of (Porter), 1915, 9, 1
Antigens, dilution and concentration of, by ultrafiltration (Glenn and Walpole), 1918, 9, 298
— see also Agglutination, Anaphylaxis, Antitoxins, Haemolysis, Immune bodies, Toxins and Vaccine
Antineuritic properties of impure lecithin (MacLean), 1911–12, 6, 361
— substance from animal tissues (Cooper), 1913, 7, 298
— from yeast (Edie, Evans, Moore, Simpson and Webster), 1911–12, 6, 240; (Cooper), 1914, 8, 250
— see also Polyanemics and Vitamins
Antirrhinum majus, flower pigments of (Wheddale and Bassett), 1913, 7, 87; (Wheddale and Bassett), 1913, 7, 441; 1914, 8, 204
Antiseptics, urinary, action of (Jordan) 1909–11, 5, 274
Antithrombin, relation of, to kinase (Dale and Walpole), 1916, 10, 356
— test for (Dale and Walpole), 1916, 10, 339
Antitoxic sera, concentration of (Homer), 1916, 10, 280
— effect of injection of, on opsonic power of blood (Yorke and Smith), 1906, 1, 341
Antitoxins, adsorption processes in (Bayliss), 1906, 1, 221
Antitrypsin (Hedin), 1906, 1, 474
— comparison of action of, with that of charcoal (Hedin), 1906, 1, 484, 491
— destruction of (Hedin), 1906, 1, 479
— neutralisation by trypsin (Hedin), 1906, 1, 476, 478
Antitrypsin (Hedin), 1906, 1, 474
— comparison of action of, with that of charcoal (Hedin), 1906, 1, 484, 491
— destruction of (Hedin), 1906, 1, 479
— neutralisation by trypsin (Hedin), 1906, 1, 476, 478
Antitrypsin, relationship to suco-lipase (Tsujii), 1915, 9, 62
— and blood coagulation (Dale and Walpole), 1916, 10, 353, 356
Antitryptic effect of charcoal (Hedin), 1906, 1, 484
Apigenin in flowers of Antirrhinum majus (Wheddale and Bassett), 1913, 7, 444
Apocodeine, action on uterus (Fardon), 1907–8, 3, 418
Apocynum cannabinum, pharmacology of (Graham), 1908–9, 4, 355
Appendicitis, concretions removed resembling intestinal sand (Williams), 1906–7, 2, 400
— incidence of (Williams), 1907–8, 3, 397
— leucocytosis and coagulation time of blood in (Coleman), 1906–7, 2, 201
— microchemical changes in (Williams), 1907–8, 3, 301
Appendix, mode of formation of concretions in (Williams), 1906–7, 2, 401
— obliteration of, as result of age (Williams), 1906–7, 2, 402
Arginine, as precursor of purines (Ackroyd and Hopkins), 1916, 10, 551
— effect of absence of, from diet on maintenance and allantoin excretion of rats (Ackroyd and Hopkins), 1916, 10, 551
— estimation of, by decomposition with alkali (Plimmer), 1916, 10, 115
— metabolic equivalence of, with histidine (Ackroyd and Hopkins), 1916, 10, 561
Arsenic, distribution of, in blood, after injection of neosalvarsan (Young), 1915, 9, 483
— of salvarsan, rate of elimination of, from blood (Young), 1915, 9, 481
— see also Atoxyl
Arterial obstruction, effect of, upon the nutrition of the liver cells (Bainbridge and Leathes), 1906–7, 2, 25
Arteries, action of pituitary extract on (Dale), 1908–9, 4, 428
Ash-constituents of organic compounds, adsorption processes in (Bayliss), 1906, 1, 214
Aspartic acid, estimation of, in the products of protein hydrolysis (Foreman), 1914, 8, 204
— in ergot (Barger and Dale), 1906–7, 2, 295
Atoxyl, composition, chemical and physical properties, and mode of action of (Moore, Nierenstein and Todd), 1906–7, 2, 316
— relation of dosage to size of animal treated (Moore), 1908–9, 4, 323
— solutions, unsafe to use after being kept (Moore, Nierenstein, and Todd), 1906–7, 2, 308
— treatment of trypanosomiasis by, followed by a mercuric salt (Moore, Nierenstein, and Todd), 1906–7, 2, 300
Atropine, action on uterus (Fardon), 1907–8, 3, 409, 418
— pharmacological action of (Webster), 1907–8, 3, 129
INDEX OF SUBJECTS

Autolysis in animal nutrition (Schryver), 1906, 4, 120, 145
—— influence of acid and alkali on (Bostock), 1911–12, 6, 398
—— influence of bacteria on (Bostock), 1911–12, 6, 403
—— influence of sulphur compounds on (Jones), 1909–11, 5, 430
—— of certain tissues (Schryver), 1906, 1, 155
Autolytic enzyme of liver, influence of various factors on (Schryver), 1906, 1, 127, 145, 148
—— products, physiological action of (Schryver), 1906, 1, 154
Auxetic action, of bases from coal-tar (Norris), 1914, 8, 253
Axi-lo-lipase, behaviour of, on dialysis (Tsuiji), 1915, 9, 60
—— of serum, non-identity of, with co-enzyme of lipase (Tsuiji), 1915, 9, 61
—— presence of, in serum (Tsuiji), 1915, 9, 54
—— relationship to antitrypsin (Tsuiji), 1915, 9, 57
Avian polynuertis, curative action of autolysed yeast in cases of (Cooper), 1914, 8, 250
Azoebacter, various substances as culture media for (Mockeridge), 1915, 9, 272
Bacilli, effect of percentage of oxygen on growth of (Moore and Williams), 1908–9, 4, 177; 1909–11, 5, 181; (Adams), 1911–12, 6, 297
Bacillus coli communis, effect of reagents on reduction by (Harden and Zilva), 1915, 9, 380
—— (Escherich) fermentation of glucose to acetaldehyde by (Grey), 1913, 7, 359
—— in urine, action of antibiotics on (Jordan), 1909–11, 5, 274
—— the reducing enzyme of (Harden and Zilva), 1915, 9, 379
—— typhosa, action of salts of heavy metals on (Moore and Hawkes), 1907–8, 3, 313
Bacteria, agglutination of, by specific sera (Tulloch), 1914, 8, 293
—— effect of oxygen on growth of various species of (Moore and Williams), 1908–9, 4, 177; 1909–11, 5, 181; (Adams), 1911–12, 6, 297
—— influence of, on liver autolysis (Bostock), 1911–12, 6, 403
—— see also Agglutination, Antigens, Antibiotics, Antitoxins, Bacilli, Disinfection, Proteolytic organism, Toxins and Vaccine
Bacterial emulsions, estimation of turbidity of (Dreyer and Gardner), 1916, 10, 399
Bang, micro-method of sugar estimation of (Gardner and MacLean), 1914, 8, 400
Barfoord’s reagent, use of (Roaf), 1907–8, 3, 182
Barium chloride, action on plain muscle (Fardon), 1907–8, 3, 410
Barley, germinated, action of, on gelatinised starch (Daish), 1916, 10, 66
—— action of, on maltose (Daish), 1916, 10, 70, 73
—— action of, on soluble starch (Daish), 1916, 10, 63
—— presence of maltase in (Daish), 1916, 10, 60, 67, 73
—— self-digestion of (Daish), 1916, 10, 65
Base, CnHnXn, formation of, from hydroxypropionic acid (Barger and Dakin), 1916, 10, 378
Bases, of coal-tar, auxetic action of (Norris), 1914, 8, 253
Bassia longifolia, sapoglucoseide of (Moore, Sowton, Baker-Young and Webster), 1909–11, 5, 94
Bence-Jones protein, nature of (Williams), 1909–11, 5, 225
Benzidine hydrochloride, use of, for the volumetric estimation of urinary sulphates (Rosembein and Drummond), 1914, 8, 143
Beri-beri, curative property of impure lecithin in (MacLean), 1911–12, 6, 361
—— influence of anti-neurtic bases of vegetable origin on (Edie, Evans, Moore, Simpson and Webster), 1911–12, 6, 254
—— see also Antineuritic substance, Poly-neuritis, and Vitamines
Bertholletia excelsa, globulin of (Moore and Bigland), 1909–11, 5, 48
Beta vulgaris, sacroelastic enzymes of (Robertson, Irvine and Dobson), 1908–9, 4, 258
Betaine, occurrence in rice polishings (Drummond and Funk), 1914, 8, 602
Bicarbonate, sodium, effect of ingestion of, on the reaction of the blood and the composition of the alveolar air (Momoie), 1915, 9, 485
Bile derivatives, haemolytic action of (MacLean and Hutchinson), 1908–9, 4, 369
—— human, composition of (Menzies), 1911–12, 6, 217
—— secretion, influence of food substances on (Menzies), 1911–12, 6, 210
Bioplasma, animal, soluble Prussian blue as a test for reducing power of (Harris and Irvine), 1906, 1, 355
Biuret reaction in recognition of protein (Norman), 1908–9, 4, 127
Blackwater fever, therapy of (Sutherland and McCay), 1909–11, 5, 18
Bladder, effect of isoquinoline alkaloids on (Laidlaw), 1909–11, 5, 264
—— relationship of diastatic efficiency to glyogen content in (MacLean), 1908–9, 4, 467
Blood, acidity and alkalinity of, in malignant disease (Moore and Wilson), 1906, 1, 297
—— alkalinity of, influence of muscular work on (Boycott and Chisolm), 1909–11, 5, 20
—— alkalinity of, method of determining (Boycott and Chisolm), 1909–11, 5, 23
INDEX OF SUBJECTS

Blood, alkalinity of, stimulating effect on cell-growth of increased (Moore, Alexander, Kelly and Roaf), 1906, 1, 294
- catalase, catalysis of hydrogen peroxide by (Evans), 1906–7, 2, 133
- coagulation, calcium salts in (Bayliss), 1906, 1, 211
- effect of certain drugs and toxins upon (Coleman), 1906–7, 2, 184
- theories of, of Morawitz and Howell (Dale and Walpole), 1916, 10, 332, 333
- time of (Coleman), 1906–7, 2, 184
- time of, effect of food, rest, and exercise on in health (Coleman), 1906–7, 2, 187
- conductivity of, in coagulation (Wilson), 1906–7, 2, 277
- Blood corpuscles, absence of sugar from (Edie and Spence), 1906–7, 2, 107
- red, action of selenium salts on (Jones), 1911–12, 6, 106
- cause of haemolysis by water (McCay), 1907–8, 3, 98
- detachment of electrolytes from, by narcotics etc. (Roaf and Alderson), 1906–7, 2, 417
- effect of evaporation on resistance to haemolysis (Brahmachari), 1911–12, 6, 76
- freezing point and electrical conductivity of (Moore and Roaf), 1907–8, 3, 69, 73
- freezing-point during haemolysis (Brahmachari), 1911–12, 6, 76
- of man and rabbit, behaviour of, to saturated sodium chloride solutions (Brahmachari), 1908–9, 4, 64
- osmotic equilibrium of (Moore and Roaf), 1907–8, 3, 55, 75
- relative haemoglobin value of resistant (Brahmachari), 1908–9, 4, 280
- resistance of, to haemolysis by sodium chloride (Brahmachari), 1908–9, 4, 63
- sensitised, conductivity of, and action of inorganic ferments and metal salts upon (Brahmachari), 1914, 8, 227
- see also Erythrocytes
- cryoscopic of (Atkins), 1909–11, 5, 215
- diabetic, lipoid material in (Wilson and Williams), 1906–7, 2, 20
- effect of alkalies on the rate of oxidation of (Kato), 1915, 9, 400
- effect of alkalies on the rate of reduction of (Kato), 1915, 9, 399
- effect of sedimentation on conductivity of (Wilson), 1906–7, 2, 379
- fixation of salvarsan and neosalvarsan by (Young), 1915, 9, 479
- gas of different animals (Kato), 1915, 9, 396
- glycolysis in (Melvin), 1911–12, 6, 422 (MacLean and Weir), 1915, 9, 412
- Blood, glyoxalase in, estimation of (Dudley), 1916, 9, 255
- haemin test for, a greatly improved (Beam and Freak), 1916, 9, 161
- haemolysis of, by hypsomotic and hyperosmotic solutions of sodium chloride (Brahmachari), 1908–9, 4, 59
- human, trimethylamine in (Dorée and Golla), 1909–11, 5, 306
- in myelogenous leukaemia, influence of X-rays on (Williams), 1906, 1, 249
- lipolytic action of (Thiele), 1913, 7, 275
- of depancreatized cats, diastatic ferment in (Bainbridge and Beddard), 1906–7, 2, 94
- of diabetic patients, diastatic ferment in (Bainbridge and Beddard), 1906–7, 2, 94
- opsonic power of, effect of injection of antitoxic and antibacterial sera on (Yorke and Smith), 1906, 1, 341
- osmotic pressure of, in Australian animals (Jona), 1911–12, 6, 130
- osmotic pressure of, in fishes (Dakin), 1907–8, 3, 288
- osmotic pressure, variations of in aquatic animals (Dakin), 1907–8, 3, 473
- oxygen and carbon monoxide dissociation curves of (Barcroft), 1913, 7, 481
- pigment, action of oxidising agents on (MacWilliam), 1907–8, 3, 155
- pressure see Pharmacological action
- ratio of resistance of entire to defibrinated (Wilson), 1906–7, 2, 380
- reaction, of the, effect of injection of urea, sodium lactate and sodium bicarbonate on the (Momose), 1915, 9, 455
- relationship of creatinuria to changes in sugar content of (MacAdam), 1915, 9, 227
- serum and its constituents, osmotic pressure of (Moore and Roaf), 1906–7, 2, 65
- solubility of gases in (Findlay and Creighton), 1909–11, 5, 294
- sugar in, a method for the estimation of (Edie and Spence), 1906–7, 2, 103; (Gardner and MacLean), 1914, 8, 391
- Teichmann's test for (Symons), 1913, 7, 596; (Sutherland and Mitra), 1914, 8, 128
- Bloodstains, "corpuscle test" for (Sutherland and Mitra), 1914, 8, 128
- Body-fluids of Australian animals, osmotic pressure of (Jona), 1911–12, 6, 130
- the electrolytes in pathological (Gruner), 1906–7, 2, 383
- Boerhaavia diffusa, composition and pharmacological action of (Ghoshal), 1907–8, 3, 28
- Boletus edulis, origin of glucosamine in hydrolysis of (Rosa), 1915, 9, 318
- Bombicossterol, presence of, in Bombyx mori (Dorée), 1908–9, 4, 105
- Bovril, action of, on plant growth and cell division (Coppin), 1911–12, 6, 418
- Boxwood, East London, synonymy and histological characters of (Gibson), 1911–12, 6, 127
INDEX OF SUBJECTS

Boxwood, “West African,” physiological properties of, and alkaloid contained in (Gibson), 1906, 1, 167

Brain, absence of cholesterol esters from (Rosenheim), 1914, 8, 75

— cholesterol content of human and animal (Rosenheim), 1914, 8, 82

— detachment of electrolytes from, by narcotics, etc. (Roaf and Alderson), 1906–7, 2, 424

— galactosides of the (Rosenheim), 1913, 7, 504; 1914, 8, 110, 121

— galactosides of the, phrenosin and keratin (Rosenheim), 1916, 10, 142

— human, fatty acids of (Grey), 1913, 7, 148

— preparation of inositol from (Momose), 1916, 10, 120

— presence of oxycholesterol and its esters in (Rosenheim), 1914, 8, 74

— pulp, removal of water from (Lochhead and Cramer), 1906–7, 2, 354

Bran, action of extract on organic phosphorus compounds (Plimmer), 1913, 7, 43

Bromates, action on haemoglobin (MacWilliam), 1907–8, 3, 157

Bromine, employment of, for estimation of mixtures of carboxydrates (Wilson and Atkins), 1916, 10, 504, 507, 516

Butter, fractionation of methyl esters of fatty acids of (Smedley), 1911–12, 6, 451

Butyric acid, reaction of, with nitrophenylhydrazine (Dakin), 1918, 10, 318

Bursa macroura, histological differentiation from Gonioma Kamassi, E. Mey (Gibson), 1911–12, 6, 127

Caffeine, effects of, upon the germination and growth of seeds (Ransom), 1911–12, 6, 151, 156

— influence of, on plant growth and cell division (Coppin), 1911–12, 6, 418

Calcium chloride, effect of, on coagulation time of blood (Coleman), 1906–7, 2, 190

— influence of, on action of haemolysins (Sutherland and McCay), 1909–11, 5, 1

— in relation to coagulation (Barratt), 1915, 8, 511

— effect of, in causation of gout and production of gouty deposits (Little), 1908–9, 4, 30

— estimation of (Cahen and Hurltley), 1916, 10, 308

— estimation of, in urine (Bell), 1911–12, 6, 205

— metabolism of (Patterson), 1907–8, 3, 39

— in gout (Mackrell, Moore and Thomas), 1909–11, 5, 161

— oxalate, in renal calculi (Rowlands), 1907–8, 3, 346

— perverted excretion of, in a factor in the pathogeny of gout (Little and Harris), 1906–7, 2, 239

— salts, action of, on inactive lipase (Umeda), 1915, 8, 48

— in coagulation of blood (Bayliss), 1906, 1, 211

Calcium salts, influence of, on heat-coagulation of fibrinogen and other proteins (Murray), 1910, 1, 167

— influence of, on precipitation of fibrinogen (Murray), 1906, 1, 171

— insoluble, in renal calculi (Mackrell, Moore and Thomas), 1909–11, 5, 161

— rôle of, in formation of soluble casein (Milroy), 1915, 9, 226

Calciuli, renal, chemical composition and physical properties of (Rowlands), 1907–8, 3, 346

— insoluble calcium salts in (Mackrell, Moore and Thomas), 1909–11, 5, 161

Camphene phosphonates of sodium, physiological action of (Gardner and Symes), 1909–11, 5, 390

Cancer, decrease in acidity of gastric contents in (Moore, Alexander, Kelly and Roaf), 1906, 1, 276

— hydrochloric acid of gastric contents in (Palmer), 1906, 1, 398; (Moore), 1907–8, 3, 449

— increase in alkalinity of serum in (Moore and Wilson), 1906, 1, 316, 323

— origin of (Jessup and others), 1908–9, 4, 191

— pitch (Norris), 1914, 8, 253

see also Malignant disease and Rous sarcoma

Capillary analysis, quantitative relations in (Schmidt), 1913, 7, 231

Carbohydrate, effect of feeding, on acidosis (Lang), 1915, 9, 467

— effect of, on excretion of allantoin and endogenous purines (Umeda), 1915, 9, 421, 433

— influence of, on protein metabolism and output of sulphur (Tejiji), 1915, 9, 439

— of photosynthesis, nature of (Parkin), 1911–12, 6, 40

— protein-sparing action of, as compared with fat (Umeda), 1915, 9, 423

Carbohydrates, estimation of, by oxidation in acid or neutral solution (Wilson and Atkins), 1916, 10, 506

— estimation of mixtures of (Wilson and Atkins), 1916, 10, 504

— of foliage leaf of snowdrop (Parkin), 1911–12, 6, 1

— production of ω-hydroxy-α-methylfururaldehyde from (Cunningham and Dorée), 1914, 8, 438

— reduction of sodium selenite by (Jones), 1908–9, 4, 409

— safranine as a test for (MacLean), 1906–7, 2, 431

Carbon dioxide, action of, on respiration of gold-fish (Osborne and Munte), 1906, 4, 377

— change in physical condition of inorganic constituents of tissue caused by (Roaf and Alderson), 1906–7, 2, 417

— formation of, during muscular contraction and rigor mortis (Latham), 1907–8, 3, 103
Carbon dioxide, in resired air, causing glycosuria (Edie), 1906, 1, 455
— interference of, with the effect of alkalis on oxidation of blood (Kato), 1915, 9, 409
— solubility of, in blood and serum (Findlay and Creighton), 1909–11, 5, 285
Carbon monoxide, combinations of, with haemoglobin (Hill), 1913, 7, 471; (Barcroft), 1913, 7, 481
— solubility of, in blood and serum (Findlay and Creighton), 1909–11, 5, 299
Carboxyhaemoglobin (Hill), 1913, 7, 471; (Barcroft), 1913, 7, 481
Carboxylase in dioxide, monoxide, combinations of, 20° from Nierenstein), and (Chick), chloride (Weizmann man), 1915, action of the (Foreman), and Macallum), (Mellanby), 1914, 10, 270
Caseinogen, composition of, and (Harden and MacLean), 1915, 9, 103, 108
— of kidney (MacLean), 1911–12, 6, 350
— preparation of, from ox-kidney (Rosenheim and MacLean), 1915, 9, 105
Casein, composition of (Geake), 1914, 8, 30; (Harden and Maclean), 1914, 8, 92
— metacasein and "natural" casein (Schryver), 1913, 7, 571
— production of, from caseinogen (Schryver), 1914, 8, 152
— (soluble), rôle of calcium salts in formation of (Milroy), 1915, 9, 226
Caseinogen (acidic), composition of (Mellanby), 1915, 9, 346
— action of coagulating enzymes on (Harden and Macaullum), 1914, 8, 90
— action of diazomethane upon (Geake and Nierenstein), 1914, 8, 287
— analogy of, to euglobulin in colloidal properties (Chick), 1913, 7, 336
— aspartic and glutamic acid content of (Foreman), 1914, 8, 475
— composition of (Geake), 1914, 8, 30; (Harden and MacLeam), 1914, 8, 92; (Mellanby), 1915, 9, 344
— constitution of (Mellanby), 1915, 9, 349
— cow's, study of (Dudley and Woodman), 1915, 9, 97
Caseinogen, osmotic pressure of, in alkaline solution (Moore, Roaf and Webster), 1911–12, 6, 110
— preparation of (Mellanby), 1915, 9, 343
— preparation of, from cow's milk and colostrum (Crowther and Raistrick), 1916, 10, 445
— rate of hydrolysis of, by acid (Pittom), 1914, 8, 157
— retention of nitrogen of, on various diets (Umeda), 1916, 10, 246
— sheep's, preparation of (Dudley and Woodman), 1915, 9, 100
— sheep's, racemisation of (Dudley and Woodman), 1915, 9, 100
— solutions, clotting of (Schryver), 1913, 7, 565
— solutions, equilibrium of, with acid and alkal (Moore and Bigland), 1909–11, 5, 44
Caseinogens, the specificity of, from cow and sheep (Dudley and Woodman), 1915, 9, 97
Castor-oil seeds, action of extract of, on organic phosphorus compounds (Plimmer), 1913, 7, 43
Catalase (Moore), 1908–9, 4, 136
— blood, catalysis of hydrogen peroxide by (Evans), 1906–7, 2, 133
— blood, destruction of, by hydrogen peroxide (Evans), 1906–7, 2, 152
— of washed zymin and dried yeast (Harden and Zilva), 1914, 8, 221
Cataphoresis of haemoylin of V. nasik (Atkin), 1914, 8, 335
Cell-division in plants, influence of purine derivatives and sodium salts of organic acids on (Coppin), 1911–12, 6, 421
— influence of salts upon (Moore, Roaf and Knowless), 1907–8, 3, 279
— of hyacinths, influence of carbonates of rare earths on (Evans), 1913, 7, 349
— see also Mitosis
Cell-growth, increase with alkalinity of blood and lymph (Moore, Alexander, Kelly and Roaf), 1906, 1, 294
Cell sap, concentration of, effect on freezing point (Drabble, E. and H.,) 1906–7, 2, 128
— osmotic pressure of, and, environment in plants, relation between (Drabble, E. and H.), 1906–7, 2, 117
— osmotic pressure of, in plants, method of determining (Drabble, E. and H.), 1906–7, 2, 118
— stimulation by ingestion of alkaline salts (Wilson), 1911–12, 6, 162
— volume, osmotic effects of salts on (Roaf), 1906, 1, 353
Cerebrin, identity of, with phrenosin (Rosenheim), 1916, 10, 160
Cerebrin, identity of, with Gamgee's pseudo-cerebrin (Lochhead and Cramer), 1906–7, 2, 351
— identity of, with phrenosin (Rosenheim), 1916, 10, 150
INDEX OF SUBJECTS

Cerebroside, from protagot, molecular weight of (Pearson), 1914, 8, 616
Cerebrospinal fluid, probable absence of choline from (Webster), 1908–9, 4, 117
—— —— trimethylamine in (Doree and Golla), 1909–11, 5, 306
Ceuriun carbonate, effect of, on growth and cell-division in hyacinths (Evans), 1913, 7, 349
Charcoal, adsorption of proteolytic enzymes of spleen by (Hedin), 1906–7, 2, 112
—— animal, reactivity of suspension of, with acid and alkali (Moore and Bigland), 1909–11, 5, 47
—— antitryptic effect of (Hedin), 1906, 1, 484, 485
—— comparison of action of, with that of tryptic antibody of serum (Hedin), 1906, 1, 484, 491
—— extraction of adsorbed trypsin from, by caseinogen (Hedin), 1906–7, 2, 81
Chemical dynamics of (Webster), 1908–9, 4, 246
—— causes of loss of, in hydrolysis of lecithin (MacLean), 1908–9, 4, 43
—— ether (Ewins), 1914, 8, 368
—— in animal tissues and fluids (Webster), 1908–9, 4, 117
—— nitrous ester (Ewins), 1914, 8, 212
—— occurrence in rice polishings (Drummond and Funk), 1914, 8, 601
—— preparation of, from lecithin (MacLean), 1915, 9, 360
—— propyl ether (Ewins), 1914, 8, 368
—— some new physiologically active ethers, esters and other derivatives of (Ewins), 1914, 8, 366
Chrysotoxin (Barger and Dale), 1906–7, 2, 244, 290, 297
Chyle, lipase in (Thiel), 1913, 7, 275
Citric acid, effect of, on coagulation time of blood (Coleman), 1906–7, 2, 191
—— effect of, on estimation of sugars by Kendall’s solution (Wilson and Atkins), 1916, 10, 138
Clavin (Barger and Dale), 1906–7, 2, 245, 288, 299
Clionasterol, presence of, in Cliona celata (Dorée), 1908–9, 4, 105
Clotting of caseinogen solutions (Schryver), 1913, 7, 568; 1914, 8, 152
Clupanodonic acid (Grey), 1913, 7, 153
Coagulating enzymes, action of, on caseinogen (Schryver), 1913, 7, 568; 1914, 8, 152; (Harden and Macallum), 1914, 8, 90
—— see also Coagulation
Coagulation of blood see Blood coagulation
—— of milk, the reaction and calcium content as factors in the (Milroy), 1915, 9, 215
Coal-tar, auxetic action of bases from (Norris), 1914, 8, 253
Cobalt salts, action of, on Bacillus typhosus (Moore and Hawkes), 1907–8, 3, 313
Cocaine, action of, on uterus (Fardon), 1907–8, 3, 414
Codine hydrochloride, physiological action of (Watkins-Thomas), 1911–12, 8, 434
Coelomic fluid, of aquatic animals, variations in osmotic concentration of (Dakin), 1907–8, 3, 473
Co-enzyme of inactive lipase (Umeda), 1915, 9, 41
—— of lipase, non-identity of, with auxolipase (Tanji), 1915, 9, 61
—— of the urose of the soy-bean (Onoda), 1915, 9, 575
Colchicine, action of, on uterus (Fardon), 1907–8, 3, 409
—— effect of, on coagulation time of blood (Coleman), 1906–7, 2, 194
Collodion membranes for ultrafiltration and pressure dialysis (Walpole), 1915, 9, 284
—— of differential permeability, preparation of (Brown), 1915, 9, 320, 501
Cholesterol of yeast (Neville), 1913, 7, 347
Cholesterol esters, absence of, from the brain (Rosenheim), 1914, 8, 75
Choline, amount of, obtained by hydrolysis of lecithin (MacLean), 1908–9, 4, 246
—— chloride, normal range of (Wilson and Williams), 1906–7, 2, 23
—— content of, in animal kingdom (Dorée), 1908–9, 4, 72
—— distribution and occurrence of, in animal kingdom (Dorée), 1908–9, 4, 72
—— estimation of, in various organs (Gardner and Lander), 1913, 7, 650
—— in lipid material in diabetic blood (Wilson and Williams), 1906–7, 2, 23
—— influence of, in food, on growth of rats (Lander), 1915, 9, 93
Cholesterol-like bodies and derivatives (Dorée), 1908–9, 4, 72
INDEX OF SUBJECTS

Coprostanone, degree of electro-osmosis obtainable through (Barratt and Harris), 1911-12, 6, 315
Colloidal properties of proteins see Albumin, Caseinogen, Eoglobulin, Pseudoglobulin, Serum globulin
Colloidal solutions, viscosity and hydration of (Hatschek), 1916, 10, 325
Colloids and crystalloids, equilibrium of (Moore and Bigland), 1909-11, 5, 32
— direct measurement of the osmotic pressure of certain (Moore and Roaf), 1906-7, 2, 34
— see also Adsorption, Capathoresis, Dialysers, Isoelectric point, Gelatinisation, Gels, Hysteresis, Sols, Solution aggregate, Solvation factors, Ultrafiltration and Viscosity
Colostrum, cow's, study of proteins of (Crowther and Raistrick), 1916, 10, 434
Colostrum, colouring matter of, red torulae (Chapman), 1916, 10, 548
— see also Pigment
Complement, relation of oxidising enzymes to (Moore), 1908-9, 4, 136
Conductivity, electrical, of blood cells and serum (Moore and Roaf), 1907-8, 3, 73
— of blood in coagulation (Wilson), 1906-7, 2, 377
— of milk (Jackson and Rothera), 1914, 8, 1
— of sensitised corpuscles (Brahmchari), 1914, 8, 227
Congo-red, adsorption of, by filter paper (Bayliss), 1906, 1, 177
— adsorption of, by filter paper, use in capillary analysis (Schmidt), 1913, 7, 231
— use of, for colorimetric demonstration of digestive enzymes (Roaf), 1907-8, 3, 189
Conhydrine, action of living cells and of tissues on (Dilling), 1908-9, 4, 297
— detection of, in urine and in animal organs (Dilling), 1908-9, 4, 295
Conine, action of living cells and of tissues on (Dilling), 1908-9, 4, 293
— detection of, in urine and in animal organs (Dilling), 1908-9, 4, 288
Consanguinity in alkaptonuria (Garrod and Clarke), 1906-7, 2, 229
Copper iodide method, for the estimation of lactose and glucose (Cole), 1914, 8, 134
— copper salts, action on Bacillus typhosus (Moore and Hawkes), 1907-8, 3, 313
— administration of, after atoxyl in trypanosomiasis (Moore, Nierenstein and Todd), 1906-7, 2, 306
— solutions, alkaline, reduction of, by sugars (Benedict), 1906-7, 2, 408
Coprostanolone, oxidation of (Gardner and Godden), 1913, 7, 589
Coprosterol, oxidation of (Gardner and Godden), 1913, 7, 588
— relation to other sterols (Dorée), 1913, 7, 616
Cork formation, rôle of phenols, tannic acids, and hydroxybenzoic acids in (Drabble and Nierenstein), 1906-7, 2, 96
Cornutine, Keller’s (Barger and Dale), 1906-7, 2, 277, 297
— “Corpuscle test” for bloodstains (Sutherland and Mitra), 1914, 8, 128
Cotton fibre, action of methylene blue upon (Barratt and Edie), 1906-7, 2, 443, 454
— seed meal, note on toxic (Symes and Gardner), 1915, 9, 15
Creatine, action of, on Fehling’s test for glucose in urine (MacLean), 1906, 1, 121
— content of milk (Powis and Raper), 1916, 10, 371
— content of muscle, effect of work on (Brown and Catheart), 1908-9, 4, 420
— content of muscle in normal state, in malignant and in other diseases (Chiscolm), 1911-12, 6, 245
— conversion of, into creatinine (Thompson, Wallace and Clotworthy), 1913, 7, 462
— conversion of, into creatinine in flesh by cooking (Burns and Orr), 1916, 10, 499
— conversion of, into creatinine in the body (Burns and Orr), 1916, 10, 495
— effect of boiling, with sodium hydroxide (MacLean), 1906-7, 2, 170
— effect of ingestion of (Burns and Orr), 1916, 10, 499
— effect of ingestion of, on creatine excretion of milk (Powis and Raper), 1916, 10, 368, 372
— estimation of (Thompson, Wallace and Clotworthy), 1913, 7, 445
— estimation of, in urine (Powis and Raper), 1916, 10, 364
— excretion of, effect of chloroform on (Lindsay), 1909-11, 5, 407
— excretion of, in diabetes (Taylor), 1909-11, 5, 362
— excretion of, in glycosuria (Tsuij), 1915, 9, 449
— excretion of, in urine, conditions favouring (Taylor), 1909-11, 5, 368
— precursor of, in chick muscle (Burns), 1916, 10, 263
Creatinine, conversion of, into methylguanidine during isolation of latter by silver method (Ewins), 1916, 10, 196
— effect of boiling, with alkali (MacLean), 1906-7, 2, 167
— effect of, on Fehling’s test for glucose in urine (MacLean), 1906, 1, 116
— estimation of (Thompson, Wallace and Clotworthy), 1913, 7, 445
— excretion of, effect of chloroform on (Lindsay), 1909-11, 5, 407
— excretion of, in a case of pseudo-hypertrophic muscular dystrophy (Spriggs), 1906-7, 2, 296
— excretion of, in diabetes (Taylor), 1909-11, 5, 362
— excretion of, on various diets (Catheart and Green), 1913, 7, 1, 15
— modification of certain reactions of sugar in urine by (MacLean), 1906-7, 2, 156
— picric acid test for (MacLean), 1906-7, 2, 164
Creatinine, reaction of, with Fehling's solution (MacLean), 1906, 1, 114; 1906-7, 2, 163

— sodium nitroprusside test for (MacLean), 1906-7, 2, 164

— urinary, influence of flesh-feeding on (Burns and Orr), 1916, 10, 495

— urinary, largely derived from muscular tissue (Spriggs), 1906-7, 2, 214

Creatinuria, following anaesthesia (Tsujii), 1915, 9, 492

— in children (Powis and Raper), 1916, 10, 371

— relationship of, to changes in sugar content of blood (MacAdam), 1915, 9, 227

— m-Cresol, nature of disinfectant and germicidal action of (Cooper), 1911-12, 6, 362

— relations of, to proteins (Cooper), 1911-12, 6, 379, 381

Critical solution point of urine (Atkins and Wallace), 1915, 7, 219

Crotroic acid, reaction of, with nitrophenyl-hydrazine (Dakin), 1916, 10, 318

Crustacea, decapod, digestive gland of (Roaf), 1906, 1, 390

Crystalllo-colloids (Moore and Bigland), 1909-11, 5, 47

Crystallloids and colloids, equilibrium of (Moore and Bigland), 1909-11, 5, 32

— in serum, method of estimating (Moore and Bigland), 1909-11, 5, 35

— f-Cumidine, auxetic action of (Norris), 1914, 8, 257

Cuorin from heart muscle (MacLean), 1908-9, 4, 49

— of kidney (MacLean), 1911-12, 6, 338

Cyanhaemochromogen (Sutherland and Mitra), 1914, 8, 228

Cyanides, oxidation of amino-acids to (Dakin), 1916, 10, 319

Cyanomethylglyoxaline, production of, from histidine by oxidation with sodio-p-toluene-sulphochloroamide (Dakin), 1916, 10, 322

Cystine, separation from tyrosine (Plimmer), 1913, 7, 311

Daturine, pharmacological action of (Webster), 1907-8, 3, 129

Deaminisation see Deamisation

Deamination in liver and intestinal mucosa (Bostock), 1911-12, 6, 48

— the bearing of the distribution of nitrogen in autolysis of liver on (Bostock), 1911-12, 6, 385

Decylenic acid, evidence of existence in butter (Smedley), 1911-12, 6, 451

Decaprectised animals, the digestion and absorption of protein and fat in (Cruickshank), 1915, 9, 138

— rats, diastatic ferment in (Bainbridge and Beddard), 1906-7, 2, 92

Deuteramine (Vernon), 1914, 8, 494

— rôle of, in the activation of trypsinogen (Vernon), 1914, 8, 504

Dextrose see Glucose

Diabetes (experimental), metabolism of dog in (Moorhouse, Patterson and Stephenson), 1915, 9, 171

— respiratory quotients and percentage energy distribution in (Moorhouse, Patterson and Stephenson), 1915, 9, 200

— islets of Langerhans in relation to (Rennie and Fraser), 1906-7, 2, 7

— mellitus, creatine and creatinine excretion in (Ros and Taylor), 1909-11, 5, 362

— diastatic ferment in tissues in (Bainbridge and Beddard), 1906-7, 2, 89

— fixed alkali and organic acids, output in urine of (Edie and Whitley), 1906, 1, 11

— relation of prosecretin and secretin in (Bainbridge and Beddard), 1906, 1, 429; (Moore, Edie and Abram), 1906, 1, 28, 446; (Bainbridge), 1907-8, 3, 82

Diabetic blood, lipoid material in (Wilson and Williams), 1906-7, 2, 20

— dog, analysis of urine of (Plimmer and Skelton), 1914, 8, 467

Diacetic acid see Acetoacetic acid

Dialysers, collodion, preparation of (Walpole), 1915, 9, 284; (Brown), 1915, 9, 320, 591

Dialysis, by means of "plate" forms of apparatus (Walpole), 1916, 10, 290

— (pressure) use of collodion membranes, in (Walpole), 1915, 9, 284

Diastase, presence of, in Beta vulgaris (Robertson, Irvine and Dobson), 1908-9, 4, 266

Diastatic efficiency, relationship to average glycogen content in tissues and organs (MacLean), 1908-9, 4, 467

— enzyme in the tissues in diabetes mellitus (Bainbridge and Beddard), 1906-7, 2, 89

— enzymes, action of, on glycogen (Norris), 1913, 7, 26, 622; 1914, 6, 421

— power of preparations, measurement of (Davis), 1916, 10, 46

Diazomethane, action of, on caseinogen (Geake and Nierenstein), 1914, 8, 287

— action of, on dl-3,4-dihydroxy-phenylalanine, glycyl-l-tyrosine and l-tyrosine (Geake and Nierenstein), 1915, 9, 311

Diazao-reactions of histidine and tyrosine (Totani), 1915, 9, 385

Dibromotyrosine (Plimmer and Eaves), 1913, 7, 299

Diet, artificial, containing lactose, growth of rats upon (Drummond), 1916, 10, 89

— artificial, containing isolated food substances, growth of rats upon (Osborne and Mendel), 1916, 10, 534

— deficient in arginine and histidine, feeding experiments with (Atkinson and Hopkins), 1916, 10, 551

— deficient in tyrosine, feeding experiments with (Totani), 1916, 10, 382

— effect on cholesterol content of cats (Gardner and Lander), 1913, 7, 576

— influence of nature of, on retention of protein (Umeda), 1916, 10, 245

— influence of, on growth (Hopkins and Neville), 1913, 7, 97
Diet, relation to lipid material in diabetic blood (Wilson and Williams), 1906-7, 2, 22
—— see also Accessory substance, Anti-neuritic substances, Growth and Vitamines
Diethylglycollic acid, reaction of, with nitrophenylhydrazine (Dakin), 1916, 10, 318
Diethylphosphoric acid, action of enzymes on (Pummer), 1913, 7, 58
Diffusion, counter, in aqueous solution (Osborne and Jackson), 1914, 8, 246; (Walpole), 1915, 9, 132
Digitonin, pharmacological action of (Cow), 1911-12, 6, 219
Digestion, gastric, part played by pylarin in aiding (Maxwell), 1915, 9, 323
—— in jaundice (Sutherland), 1906, 1, 373
Digestion of protein and fat, effect of denaturation on (Cruickshank), 1915, 9, 153
—— of the dog, partition of organic nitrogen in (Zunn), 1915, 9, 20
—— peptic, effect of gum acacia on (Maxwell), 1915, 9, 328
—— peptic, effect of starch on (Maxwell), 1915, 9, 324
—— the relation of salivary to gastric (Maxwell), 1915, 9, 323
Digestive gland in Moluscas and Decapod Crustacea (Roaf), 1906, 1, 390
Diglycylglycine, action of (Cow), 1911-12, 6, 219
Digitalis, pharmacological action on heart (Haynes), 1906, 1, 62
—— tincture, action of substitutes for (Cow), 1911-12, 6, 219
Digitol, pharmacological action of (Cow), 1911-12, 6, 219
Diglycyglycine, anaphylaxis produced by (Zunn and Diakonoff), 1916, 10, 160
dl-5:4-Dihydroxyphenylalanine, action of diacetylase on (Geake and Nierenstein), 1915, 9, 311
6:7-Dimethoxy-2-methyl-3-4-dihydroisquinolinium chloride, physiological action of (Laidlaw), 1909-11, 5, 252
N-Dimethoxyazulonin hydroxide (Ewins), 1914, 8, 370
Dimethylphosphinosine from phrenosin (Rosenheim), 1916, 10, 149
Dimethyl sulphate (techn.), colour reactions of, with cholesterol and "oxycholesterol" (Rosenheim), 1916, 10, 177, 178
Diphenylmethane from alkaline extract of cork on distilling with zinc dust (Drabble and Nierenstein), 1906-7, 2, 100
—— from condensation product of gallic acid and formaldehyde (Drabble and Nierenstein), 1906-7, 2, 101
Diphtheria toxin, effect of, on coagulation time of blood (Coleman), 1906-7, 2, 204
—— purification of (Glenny and Walpole), 1915, 9, 299
—— the immunising value of (Glenny and Walpole), 1915, 9, 304
Disaccharides, hydrolysis of, by enzymes (Roaf), 1907-8, 9, 182
Disinfection, by phenol, theory of (Cooper), 1911-12, 6, 362; 1913, 7, 175, 187
Disassociation of adsorption compounds, conditions of (Bayliss), 1906, 1, 209
Donovan's solution, administration of, after atoxyl in trypanosomiasis (Moore, Nierenstein and Todd), 1906-7, 2, 307
Dosage of drug, relation of, to size of animal (Moore), 1908-9, 4, 323
Drug, relation of dose of, to size of animal (Moore), 1908-9, 4, 323
Duboisia hopwoodii, alkaloid of (Rotheras), 1909-11, 5, 193
Duboisine, pharmacological action of (Wes- ter), 19, 9, 129
Duodenal mucous membrane, acid extract in treatment of diabetes mellitus (Moore, Edie and Abram), 1906, 1, 28, 446
—— see also Secretin
Dyeing, adsorption processes in (Bayliss), 1906, 1, 215
Dyes, behaviour to electrolytes (Bayliss), 1906, 1, 195, 230
Dynamics, chemical, studies in, of animal nutrition (Schryver), 1906, 1, 123
Dystrophy, pseudo-hypertrophic, excretion of creatin in a case of (Spriggins), 1906-7, 2, 206
Dysuria, in a case of alkapturonias (Garrod and Clarke), 1906-7, 2, 217
Echinoderm, reproductive organs of (Moore, Whitley and Adams), 1913, 7, 127
Echinus esculentus, proteins in sperm of (Moore, Whitley and Webster), 1913, 7, 142
Edestin, preparation of, from hempeed (Reeves), 1915, 9, 506
Egg albumin see Albumin, egg
—— of common fowl, osmotic pressure of (Atkin), 1908-9, 4, 480
—— yolk, monaminodiphosphatide in (MacLean), 1908-9, 4, 168
—— osmotic phenomena of (Osborne and Kincard), 1914, 8, 28
Eggs, guanidine content of, at various stages of incubation (Burns), 1916, 10, 272
Electrical conductivity, see Conductivity, electrical
—— forces of mitosis (Jessup and others), 1908-9, 4, 233
Electrode, hydrogen (Walpole), 1914, 8, 131
—— a simple (Barendrecht), 1915, 9, 66
Electrolytes, action of, in adsorption phenomena (Bayliss), 1906, 1, 175, 195
—— behaviour of dyes to (Bayliss), 1906, 1, 195, 230
—— effect of narcotic agents in detachment of, from cell proteins (Roaf and Alderson), 1906-7, 2, 412
—— in pathological body-fluids (Gruner), 1906-7, 2, 383
—— precipitation of serum proteins by, in presence of alcohol (Chick and Martin), 1913, 7, 395
—— washing out of, from gelatin (Bayliss), 1906, 1, 179
Electrometric titration (Walpole), 1913, 7, 417
Electro-osmosis through living tissues and
INDEX OF SUBJECTS

25

colloidal membranes (Barratt and Harris),
1911-12, 6, 315
Ellagic acid, formation of, from galloylglycine by Penicillium (Nierenstein), 1915,
9, 243
Emulsin, inhibitory action of, on activity of unheated (Bearn and Cramer),
1906-7, 2, 180
--- presence of, in Beta vulgaris (Robertson, Irvine and Dobson), 1908-9, 4, 265
Enterokinase, activation of pancreatic extracts by (Vernon), 1914, 8, 498
Enzymatic formation of polysaccharides by yeast preparations (Harden and Young),
1913, 7, 630
Enzyme action, adsorption processes in (Bayliss), 1906, 1, 222
--- radiation theory of (Barendrecht), 1913, 7, 549
--- lipolytic, in blood (Thiele), 7, 275; in tissues (Thiele), 1913, 7, 287
--- oxidising, in latex of Hevea brasiliensis (Spence), 1907-8, 3, 351
--- reducing nitrates in green plants (Irving and Hankinson), 1907-8, 3, 87
--- reducing of Escherichia coli communis (Harden and Zilva), 1915, 9, 379
Enzymes, a case of specific adsorption of (Hedin), 1906-7, 2, 112
--- action of, on organic phosphorus compounds (Pflumer), 1913, 7, 43
--- action of, on pituitary extract (Dale), 1908-9, 4, 439
--- coagulating, action of, on caseinogen (Schrayer), 1913, 7, 568; 1914, 8, 153;
(Harden and Macallum), 1914, 8, 90
--- diastatic, action of, on glycogen (Norris), 1913, 7, 26, 622; 1914, 8, 421
--- diastatic (amylase) behaviour of, in presence of specific precipitate (Porter),
1913, 7, 599
--- heated, inhibitory action of, upon unheated, explanation of (Bearn and Cramer),
1906-7, 2, 181
--- hydrolytic, presence of, in vertebrates (Roaf), 1907-8, 3, 462
--- of washed zymogen and dried yeast (Harden), 1913, 7, 214; (Harden and Norris),
1914, 8, 100
--- oxidising, properties and classification of (Moore), 1908-9, 4, 136
--- peptic and tryptic, colorimetric demonstration of (Roaf), 1907-8, 3, 188
--- reducing, of dried yeast (Harden and Norris), 1915, 9, 330
--- reducing, of rabbit muscle (Harden and Norris), 1915, 9, 330
--- succrolastic, of Beta vulgaris (Robertson, Irvine and Dobson), 1908-9, 4, 258
--- see also Autolytic enzymes, Amylase, Carboxylase, Catalase, Coagulating en-
yzmes, Deuterase, Diastase, Diastatic enzymes, Emulsin, Enterokinase, Esterase,
Fermentation, Glycogenases, Glycooxalase, Haemase, Inulase, Invertase, Kinase,
Lactase, Lipase, Maltae, Oxidase, Oxidising enzymes, Pepsin, Peroxidase, Ptyalin,
Reductase, Reducing enzymes, Rennin, Sucrase, Taka-diastase, Thrombin, Tryp-
sin, Tyrosinase, Urease, Yeast, Zymin, Zymoids, Zymolysis
Eosin, absorption spectrum of, and colour of (Barratt), 1906, 1, 407
Ergochrysin (Barger and Dale), 1906-7, 2, 244, 280
Ergosterol, presence of, in cryptogams (Dorée), 1908-9, 4, 105
Ergot alkaloids, their relation to other “active principles” obtained from ergot, in form of
table (Barger and Dale), 1906-7, 2, 297
Ergot, amino-acids in (Barger and Dale),
1906-7, 2, 294
--- British pharmacopoeia preparations of (Barger and Dale), 1906-7, 2, 286
--- historical account of (Barger and Dale), 1906-7, 2, 241
--- occurrence of acetylcholine in (Ewins), 1914, 8, 44
Ergotamine, clinical application of (Clark),
1909-11, 5, 236
Ergotine and ergotoxine, resemblances and
differences (Barger and Dale), 1906-7, 2, 245, 246
--- conversion of, into ergotoxine (Barger and Dale), 1906-7, 2, 271
Ergotoxine, action of, on plain muscle (Fardon),
1907-8, 3, 419
--- and ergotamine, resemblances and differences (Barger and Dale), 1906-7, 2, 245, 246
--- chemical properties of (Barger and Dale), 1906-7, 2, 245
--- effect of, after injection of pituitary
tissue (Dale), 1908-9, 4, 438
--- phosphate, formation of colloidal solutions by (Barger and Dale), 1906-7, 2, 284
--- physiological action on various animals (Barger and Dale), 1906-7, 2, 246,
249, 250, 259, 262
Erythrocytes, change of size of, induced by salmon solutions (Sutherland and McCay),
1909-11, 5, 2
--- see also Blood corpuscles, red
Erythrodextrin, diffusion through parchment
paper (Moore and Roaf), 1906-7, 2, 62
Erythromelalgia, physiological action of
(Webster), 1906-7, 2, 270
Esterases, distribution of, in animal body (Porter), 1916, 10, 523
Ether, change in physical condition of inorganic
constituents of tissues caused by (Roaf and
Alderson), 1906-7, 2, 417
--- effect of, on circulation (Embley),
1909-11, 5, 79
Ethyl bromide, physiological action of (Web-
ster), 1906, 1, 328
--- chloride, physiological action of (Webster), 1906, 1, 328
--- iodide, physiological action of (Webster), 1906, 1, 328
--- mercaptan, physiological action of
(Carlier), 1911-12, 6, 185
Ethylphosphoric acid, action of enzymes on
(Pflumer), 1913, 7, 58
--- hydrolysis by acids and alkalies
(Pflumer), 1913, 7, 75
INDEX OF SUBJECTS

Ethyl sulphide, physiological action of (Carlier), 1911-12, 6, 185
Euglobulin, colloidal properties of (Chick), 1913, 7, 318
— (horse), viscosity of solutions of, influence of various factors on (Chick), 1914, 8, 263
— of horse-serum, anaphylaxis to (Dale and Hartley), 1916, 10, 413, 421
— of ox and horse serum, composition of (Hartley), 1914, 8, 541
— relationship of, to pseudoglobulin in serum (Chick), 1914, 8, 404
— solution and precipitation of (Chick), 1913, 7, 318
Excelsin, preparation of, from Brazil-nuts (Reeves), 1915, 9, 509
Exudates, deficiency of chlorides in (Gruner), 1906-7, 2, 391
— ratio of osmotic concentration of chlorides to chlorides in (Gruner), 1906-7, 2, 391
— retarding influence of non-electrolytes on conductivity of (Gruner), 1906-7, 2, 385
Faeces, effect of selenium salts on the amount of ether-soluble substances in (Jones), 1908-9, 4, 414
— urobilin in, estimation of (Simpson), 1909-11, 5, 381
Fat, abnormal assimilation of, in some diseases of the intestine (Williams), 1906-7, 2, 395
— adsorption compound with proteins (Thiele), 1913, 7, 275
— degradation in the intestine (Williams), 1906-7, 2, 405
— digestion and absorption of, in dog (Cruickshank), 1915, 9, 145
— digestion and utilisation of, in depancreatised dog (Cruickshank), 1915, 9, 149
— in liver, after ligature of hepatic artery and of portal vein in cats (Bainbridge and Leathes), 1906-7, 2, 28
— influence of feeding, on acidosis (Lang), 1915, 9, 409
— influence of, on protein metabolism, and output of sulphur (Tsuij), 1915, 9, 439
— influence of, on the excretion of endogenous purines (Umeda), 1915, 9, 421
— of yeast (Neville), 1913, 7, 341
— so-called, of tissues and organs, nature of (MacLean and Williams), 1908-9, 4, 455
Fats, hydrolysis of vegetable, by emulsion of Ricinum communis (Sommerville), 1911-12, 6, 203
— in reproductive organs of Echinoderma (Moore, Whitley and Adams), 1913, 7, 127
— fatty acids, biochemical synthesis of (Smedley and Lubrzsynska), 1913, 7, 364
— in lipoid material in diabetic blood (Wilson and Williams), 1906-7, 2, 23
— of butter (Smedley), 1911-12, 6, 451
— of human brain (Grey), 1913, 7, 148
Fehling’s solution, reduction of, by creatinine (MacLean), 1906, 1, 114; 1906-7, 2, 163
Fehling’s test for glucose in urine, action of creatine on (MacLean), 1906, 1, 121
— test for glucose in urine, manner of its modification by creatinine (MacLean), 1916, 1, 116
Ferment see Enzyme
Fermentation, anaerobic, of glucose to acetalddehyde by B. coli communis (Grey), 1913, 7, 359
— gases of, apparatus for collection and measurement of (Harden, Thompson and Young), 1909-11, 5, 250
— rate of, by growing yeast cells (Slator), 1913, 7, 197
Fermentative formation of polysaccharides by yeast preparations (Harden and Young), 1913, 7, 630
Ferments, inorganic, action of, upon sensitised corpuscles (Brahmachari), 1914, 8, 227
Fibrinogen, heat-coagulation of, influence of calcium salts on (Murray), 1906, 1, 167
— precipitation of, influence of calcium salts on (Murray), 1906, 1, 171
— preparation of a solution of, free from prothrombin (Dale and Walpole), 1916, 10, 334
Filtration, apparatus for, under diminished pressure (Irvine), 1915, 9, 321
— as possible mechanism in living organism (Hill), 1906, 1, 55
— pressure, behaviour of opsonin and serum proteins during (Yorke), 1906-7, 2, 357
— see also Ultrafiltration
Fish, fresh water, respiratory exchange in (Gardner and Leatham), 1914, 8, 374, 591
— osmotic pressure of blood of (Dakin), 1907-8, 3, 258
— thyroids, iodine content of (Cameren), 1913, 7, 468
Flesh-feeding, influence of, on urinary creatinine (Burns and Orr), 1916, 10, 495
Foetal fluids, distribution of nitrogen in (Lindsay), 1911-12, 6, 85
Folin’s method for estimating creatine and creatinine (Thompson, Wallace and Clotworthy), 1915, 7, 445
Foods, osmotic pressure of liquid (Jona), 1908-9, 4, 462
Foodstuffs, albuminous, function of, in general economy of nutrition (Schreyer), 1906, 1, 123, 167
— presence of allantoic in (Ackroyd), 1909-11, 5, 400
Formaldehyde, colour reaction with proteins, relation to Adamkiewicz reaction (Rosenheim), 1906, 1, 233
— condensation with phenols, gallic acid, tannic acid, etc. (Drabble and Nienstein), 1906-7, 2, 97
— condensation with tryptophane (Homer), 1913, 7, 105, 112, 117
— titration of peptone (Walpole), 1913, 7, 421
Formo-choline butyl ether (Ewins), 1914, 8, 372
— ethyl ether (Ewins), 1914, 8, 371
— methyl ether (Ewins), 1914, 8, 371
— propyl ether (Ewins), 1914, 8, 372
INDEX OF SUBJECTS

Formyl-choline (Ewins), 1914, 8, 368
Freezing point, depression of, of milk (Jackson and Rothera), 1914, 8, 1
—— —— of blood cells and serum (Moore and Roaf), 1907–8, 3, 69
Frog, acidity of urine of (Bainbridge and Beddard), 1906, 1, 262
—— secretion by renal tubules in (Bainbridge and Beddard), 1906, 1, 255
—— see also Rana temporaria
Fructose, action of bromine on solution of (Wilson and Atkins), 1916, 10, 516
—— action of dilute acid on (Wilson and Atkins), 1916, 10, 519
—— amount in foliage leaf of snowdrop (Parkin), 1911–12, 6, 36
—— table of reducing power of, towards Kendall’s solution (Wilson and Atkins), 1916, 10, 140
Furfuraldehyde, a decomposition product of mowrin (Moore and Webster), 1909–11, 5, 102
—— properties and reactions of derivatives of (Cunningham and Doreé), 1914, 8, 441
č-Galactose, from keratin (Rosenheim), 1916, 10, 157
—— from phrenosin (Rosenheim), 1916, 10, 150
—— influence on lactase (Stephenson), 1911–12, 6, 250
Galactosides of the brain (Rosenheim), 1913, 7, 604; 1914, 8, 110, 121
—— of the brain, phrenosin and keratin (Rosenheim), 1916, 10, 142
Galloyl-glycerine, formation of, ellagic acid from, by Penicillium (Nierenstein), 1915, 9, 240
—— preparation of (Nierenstein), 1915, 9, 242
Gangrene in cock’s comb produced by ergotoxine (Barger and Dale), 1906–7, 2, 264, 267
—— in rabbit’s ear produced by ergotoxine (Barger and Dale), 1906–7, 2, 257
—— Raynaud’s symmetrical, and ergotoxine (Barger and Dale), 1906–7, 2, 269
Garlic, oil of, preparation of (Carlier and Evans), 1906–7, 2, 226
Gas-electrode for general use (Walpole), 1913, 7, 410
Gases, of fermentation, apparatus for collection and measurement of (Harden, Thompson and Young), 1908–11, 5, 230
—— solubility of, in ox blood and serum (Findlay and Creighton), 1909–11, 5, 294
Gastro-intestinal contents, acidity of, in jaundice (Sutherland), 1906, 1, 366
—— acidity of, variations in, in malignant disease (Moore, Alexander, Kelly and Roaf), 1906, 1, 274
—— hydrochloric acid variations in, in cancer (Palmer), 1906, 1, 398; (Moore), 1907–8, 3, 449
—— digestion, relation of, to salivary (Maxwell), 1915, 9, 323
Gelatin, effect of superimposition of, in diets, on output of nitrogen and sulphur (Tsuiji), 1915, 9, 445
Gelatin, feeding experiments with (Totani), 1916, 10, 390
—— guanidine content of (Burns), 1916, 10, 268
—— in protein catabolism (Cathcart and Green), 1913, 7, 4
—— solutions, osmotic pressure of (Moore and Roaf), 1906–7, 2, 51
—— washing out of electrolytes from (Bayliss), 1906, 1, 179
Gelatinisation of pectin (Haynes), 1914, 8, 553
Gels, adsorptive stratification in (Bradford), 1916, 10, 169
Germicidal power of phenol, theory of (Cooper), 1911–12, 6, 362
Germination of seeds, effect of caffeine upon (Ransom), 1911–12, 6, 161, 156
Gland cells, action of pituitary extract on (Dale), 1908–9, 4, 438
Globulin (euglobulin), solution and precipitation of (Chick), 1913, 7, 318
—— from Bertholletia excelsa, magnesium compound of (Moore and Bigland), 1909–11, 5, 48
—— of cow’s milk, colostrum and serum compared (Crowther and Raistrick), 1916, 10, 438, 443
—— preparation of, from cow’s milk and colostrum (Crowther and Raistrick), 1916, 10, 446
—— serum, density and solution volume of (Chick and Martin), 1913, 7, 92
Globulins, plant, a new method for preparation of (Reeves), 1915, 9, 508
—— separation of (Haslam), 1913, 7, 492, 638
Glucalic acid, reaction of, with nitrophenyl-hydrazine (Dakin), 1916, 10, 318
Glucosamine, origin of, obtained in hydrolysis of Boletus edulis (Rose), 1915, 9, 315
Glucose, action of bromine on solution of (Wilson and Atkins), 1916, 10, 516
—— amount of, in foliage leaf of snowdrop (Parkin), 1911–12, 6, 36
—— anaerobic fermentation to acetalicdehyde by B. coli communis (Grey), 1913, 7, 359
—— effect of, on autolytic enzyme of liver (Schreyer), 1906, 1, 127
—— effect of, on lactase (Stephenson), 1911–12, 5, 250
—— estimation of, by the copper iodide method (Gole), 1914, 8, 134
—— in urine, effect of creatine on Fehling’s test for (MacLean), 1906, 1, 121
—— in urine, effect of creatinine on Fehling’s test for (MacLean), 1906, 1, 116
—— in urine of suckling guinea-pig (Marshall and Kirkness), 1906–7, 2, 5
—— p-phenetidide, metabolism of (Hewitt), 1913, 7, 207
—— presence of, in germinated barley (Daish), 1916, 10, 66
—— reduction of selenium compounds in the body by (Jones), 1908–9, 4, 405
—— Rubner’s test for (Roberson), 1915, 9, 245
INDEX OF SUBJECTS

Glucocholate, distribution of, in plants (Whedale), 1909-11, 5, 445
Gluataminic acid, estimation of, in the products of protein hydrolysis (Foreman), 1914, 8, 463
— transformation of, into l-pyrrolidonecarboxylic acid (Foreman), 1914, 8, 481
Glycerol, effect of feeding, on acidosis (Lang), 1915, 9, 470
— effect of, on output of purines under various diets (Umeda), 1915, 9, 430
Glycerocephosphoric acid, action of enzymes on (Plimmer), 1913, 7, 45
— hydrolysis by acids and alkalies (Plimmer), 1913, 7, 74
Glycine, oxidation of, to hydrocyanic acid by sodio-p-toluene-sulphochloramide (Dakin), 1916, 10, 321
— see also Amino-acetic acid and Glycocoll
Glycocholate, sodium, variations in composition of (Lewis), 1907-8, 3, 119
Glycocholate, deamination of (Bostock), 1911-12, 6, 53
— in pathological urines (Hall), 1906, 1, 241
— see also Amino-acetic acid and Glycine
Glycogen, comparison of properties of, from various sources (Norris), 1913, 7, 39
— content of tissues and organs, relationship of diastatic efficiency to (MacLean), 1908-9, 4, 467
— effect of selenium salts on disappearance of (Jones), 1908-9, 4, 412
— hydrolysis of, by diastatic enzymes (Norris), 1913, 7, 26, 622
— hydrolysis of, by diastatic enzymes, factors influencing the end-point of the (Norris), 1914, 8, 421
— in reproductive organs of Echino- dermers (Moore, Whitley and Adams), 1913, 7, 127
Glycogenase (Norris), 1914, 8, 423
Glycolyl- p-nitrophenylhydrazide (Dakin), 1916, 10, 314
Glycolysis, by muscle, influence of pancreas on (Simpson), 1909-11, 5, 126
— in blood (Melvin), 1911-12, 6, 422
— part played by different blood elements in (MacLean and Weir), 1915, 9, 412
Glycosuria and oxygen lack (Edie), 1906, 1, 472
— caused by excess of carbon dioxide in respired air (Edie), 1906, 1, 455
— following anaesthesia (Tsuiji), 1915, 9, 452
— modes of production of (Edie, Moore and Roaf), 1909-11, 5, 325
— output of creatine in (Tsuiji), 1915, 9, 449
Glycyrrhizic acid, action of diazomethane on (Geake and Nierenstein), 1915, 9, 311
— hydrolysis of methyl ester of (Geake and Nierenstein), 1915, 9, 312
— oxidation of methyl ester of (Geake and Nierenstein), 1915, 9, 312
Glyoxal, colour reaction with indole derivatives (Homer), 1913, 7, 117
— condensation with tryptophane (Homer), 1913, 7, 110
— derivatives from hydroxy- and amino-acids in presence of nitrophenylhydrazine (Dakin), 1916, 10, 313
Glyoxalase, activity of, relation of, to sugar tolerance (Dudley), 1915, 9, 254
— estimation of, in blood (Dudley), 1915, 9, 255
Glyoxalinecarboxylic acid (Barger and Dakin), 1916, 10, 376
Glyoxylic acid, condensation with tryptophane (Homer), 1915, 7, 107
— reaction for indole derivatives (Homer), 1913, 7, 116
Gold-fish, respiration of, action of carbon dioxide on (Osborne and Munts), 1906, 1, 377
Gonioma Kamassii, E. Mey, histological differentiation from Buxus macowanii (Gibson), 1911-12, 6, 127
Gout, effect of vegetarian régime on (Little and Harris), 1906-7, 2, 238
— excretion of calcium in (Little and Harris), 1906-7, 2, 238
— relative importance of sodium and calcium in causation of (Little), 1908-9, 4, 30
Gouty deposits, relative importance of sodium and calcium in production of (Little), 1908-9, 4, 30
Growth, influence of cholesterol on (Lander), 1915, 9, 93
— influence of diets upon (Hopkins and Neville), 1913, 7, 97; (Ackroyd and Hopkins), 1916, 10, 551
— influence of salts upon (Moore, Roaf and Knowles), 1907-8, 3, 279
— of hyacinths, affected by carbonates of rare earths (Evans), 1913, 7, 349
— of plants, influence of purine derivatives and sodium salts of organic acids on (Coppin), 1911-12, 6, 416
— of rats upon artificial diets containing lactose (Drummond), 1916, 10, 89
— of rats upon diets of isolated food substances (Osborne and Mendel), 1916, 10, 594
— of seeds, effect of caffeine on (Ransom), 1911-12, 6, 151, 156
— of young chickens under laboratory conditions, observations on (Drummond), 1916, 10, 77
Guanoide, estimation of total, in proteins (Burns). 1916, 10, 266
Guanine hydrochloride, influence on plant growth and cell division (Coppin), 1911-12, 6, 418
Gum acacia, reactivity of solutions of, with acid and alkali (Moore and Bigland), 1909-11, 8, 47
Gums, osmotic pressure of (Moore and Roaf), 1906-7, 2, 64
INDEX OF SUBJECTS

Haemalkalimetry, in malignant disease (Moore and Wilson), 1906, 1, 297

Haemase (Evans), 1906-7, 2, 134

Haemin test for blood, a greatly improved (Beam and Freak), 1915, 9, 161

Haemoglobin, colour changes of, produced by action of Haemolysers, Haemoglobin-value of Haemolysins, Haemolysin, Haemolysis, action of Haemosozie value of blood (Beam carbon monoxide (Hill), 1913, 7, 471; (Barcroft), 1913, 7, 481

metabolism of, relation of urobin to (Simpson), 1908-11, 5, 378

oxidation of (MacWilliam), 1907-8, 3, 158

Haemoglobin-value of resistant erythrocytes during haemolysis (Brahmachari), 1908-9, 4, 280

Haemolysers, action of, in preventing haemolysis (Moore, Wilson and Hutchinson), 1908-9, 4, 353

protective action of serum proteins against (Moore, Wilson and Hutchinson), 1908-9, 4, 346

Haemolysis, chemical nature of a bacterial agent (Atkin), 1914, 8, 328

Haemolysins, influence of hypertonic saline solutions on action of (Sutherland and McCay), 1909-11, 5, 1

specific, the mechanism of haemolysis by (Brahmachari), 1911, 8, 227

Haemolysin, action of mowrin in (Moore), 1909-11, 5, 110

balancing action of haemolysers in preventing (Moore, Wilson and Hutchinson), 1908-9, 4, 353

by bile derivatives (MacLean and Hutchinson), 1908-9, 4, 369

by liver lipoids (Wilson), 1911-12 6, 102

case of anaemia having high resisting power to (Brahmachari), 1908-9, 4, 63

distribution of salts in (Woelfel), 1907-8, 3, 146

factors in production of (Brahmachari), 1908-9, 4, 280

freezing point of corpuscles during (Brahmachari), 1911-12 6, 76

in hypertonic saline or distilled water (Brahmachari), 1909-11, 5, 291

influence of evaporation on resistance of erythrocytes to (Brahmachari), 1911-12 6, 77

influence of oxidising and reducing agents on (Moore, Wilson and Hutchinson), 1908-9, 4, 346

of blood by hypsometric and hyposmotic solutions of sodium chloride (Brahmachari), 1908-9, 4, 59

physico-chemical mechanism of (Brahmachari), 1913, 7, 562; 1914, 8, 227

produced by selenium salts (Jones), 1911-12 6, 106

Hypoxemic value of blood serum (McCay), 1907-9, 3, 97

value of serum in blackwater fever (McCay), 1907-9, 3, 106

value of serum, influence of sulphates on (McCay), 1907-9, 3, 110

Heart, action of Apocynum cannabinum on (Graham), 1908-9, 4, 386

action of muscarine on (MacLean), 1908-9, 4, 66

action of opium alkaloids on (Watkins-Thomas), 1911-12, 6, 436

action of pilocarpine on (McQueen), 1907-8, 3, 402; (MacLean), 1908-9, 4, 66

inhibition of, by faradisation (MacLean), 1908-9, 4, 66

isolated, action of camphene phosphonates of sodium on (Gardner and Symes), 1909-11, 5, 397

isolated, action of 6,7-dimethoxy-2-methyl-3,4-dihydroisoquinolinium chloride on (Laidlaw), 1909-11, 5, 257

isolated, action of ether on (Embley), 1909-11, 8, 82

isolated, action of mowrin on (Sowton), 1909-11, 5, 116

isolated, action of sodium phosphate on (Gardner and Symes), 1908-11, 5, 396

muscle, effect of allyl sulphide on (Carlier and Evans), 1906-7, 2, 336

muscle, preparation of lecithin from (MacLean), 1908-9, 4, 46

relation of diastatic efficiency to glycogen content in (MacLean), 1908-9, 4, 467

Heat-coagulation, change in physical condition of inorganic constituents of tissue caused by (Roaf and Alderson), 1906-7, 2, 417

of fibrinogen and other proteins, influence of calcium salts on (Murray), 1906, 4, 167

Heat, destruction of haemolysin of V. nasik, by rate of (Atkin), 1914, 8, 333

resistance of trypsin solutions to (Edie), 1914, 8, 84

Hepatic artery, ligature of, in cats (Bainbridge and Leathes), 1906-7, 2, 28

Herring, chemical composition during reproductive period (Milroy), 1907-8, 3, 366

Herter, C. A., obituary notice of (Williams), 1909-11, 5, xx1

Herzig and Meyer's reaction applied to proteins and amino-acids (Burn), 1914, 8, 184

Hevea brasiliensis, oxidising enzyme in latex of (Speno), 1907-8, 3, 351

Hepatic acid in butter, nature of (Smedley), 1911-12, 6, 451

Hexosephosphoric acid, action of enzymes on (Plimmer), 1913, 7, 57

hydrolysis by acids and alkalies (Plimmer), 1913, 7, 77

Hibernating animals, purine metabolism of (Kennaway), 1909-11, 6, 188

Hippuric acid, separation from urine (Roaf), 1907-8, 3, 185

Histidine, action of caustic alkali upon (Plimmer), 1916, 10, 118

as precursor of purines (Ackroyd and Hopkins), 1910, 10, 551

betaine, trimethylhistidine (Barger and Ewins), 1913, 7, 204

degradation products of (Barger and Dakin), 1916, 10, 378
Histological osmotic pressure of Histidine, effect of sodium-p-toluenesulphochloramide (Dakin), 1916, 10, 322

--- the diazo-reactions of (Totani), 1915, 9, 385

Histological staining, adsorption processes in (Bayliss), 1906-7, 2, 216

--- nature of methylene blue-cosin staining (Barratt), 1906, 1, 406

Histone, osmotic pressure of (Moore, Whitley and Webster), 1913, 7, 146

Homogentisic acid, production (Dakin), 1913, 7, 116; (Walpole), 1916, 10, 318

--- optimum for hydrolysis of glycogen by pancreatic enzymes (Norrie), 1913, 7, 37

--- optimum for pepsin (Okada), 1916, 10, 126

Hydrogen electrode, a simple (Barendrecht), 1915, 9, 96

--- an improved (Walpole), 1914, 8, 131

Hydrogen ion concentration, apparatus for estimating by means of indicators (Walpole), 1909-11, 5, 211

--- chart of data of (Walpole), 1909-11, 5, 207; 1914, 8, 630

--- during the coagulation of milk (Milroy), 1915, 9, 217

--- effect of, on agglutination of bacteria (Tulloch), 1914, 8, 303

--- effect of, on engulfment solutions (Chick), 1913, 7, 318

--- effect of, on precipitation of egg-albumin by ammonium sulphate (Chick and Martin), 1913, 7, 386

--- effect of, on velocity of heat destruction of a bacterial haemolysin (Atkin), 1914, 8, 328

--- of sodium phosphate solutions (Prideaux), 1911-12, 6, 122

--- relation of indicators to (Walpole), 1909-11, 5, 207; 1914, 8, 630

--- see also Acidity, Alkalinity, Electrometric titration, Isoelectric point

Hydrogen peroxide, catalytic decomposition of, by the catalase of blood (Evans), 1906-7, 2, 133

Hydroxy-acids, reaction of, with nitrophenyl-hydrazone (Dakin), 1915, 10, 313

Hydroxybenzoic acids, role of, in cork formation (Drabble and Nierenstein), 1906-7, 2, 96

β-Hydroxybutyric acid, estimation of (Kennaway), 1914, 8, 230

--- excretion of, in acetonuria (Kennaway), 1914, 8, 355

Hydroxybutyric acids (α and β), reaction of, with nitrophenylhydrazone (Dakin), 1916, 10, 318

α-Hydroxy-β-glyoxalinepropionic acid, action of reagents on (Barger and Dakin), 1916, 10, 381

α-Hydroxyisobutyric acid, reaction of, with nitrophenylhydrazone (Dakin), 1916, 10, 318

ω-Hydroxys-methylfururaldehyde, production of, from carbohydrates (Cunningham and Dorée), 1914, 8, 438

Hydroxymethylphosphonic acid, action of enzymes on (Plimmer), 1913, 7, 60

--- hydrolysis by acids and alkalis (Plimmer), 1913, 7, 78

Hyoscine, pharmacological action of (Webster), 1907-8, 3, 129

Hyoscynamine, pharmacological action of (Webster), 1907-8, 3, 129
Hypochlorites, action of, on amino-acids (Milroy), 1916, 10, 460
—— action of, on proteins (Milroy), 1916, 10, 453
—— behaviour of, on injection (Milroy), 1916, 10, 453
—— intravenous injection of (Milroy), 1916, 10, 462
Hyposulphite, sodium, effect of, on metabolism (Jones), 1909-11, 5, 431
Hyposulphite hydrochloride, influence of, on plant growth and cell division (Coppin), 1911-12, 6, 418
Hysteresis in colloidal solutions (Moore and Roaf), 1906-7, 2, 72

Immune bodies, relation to oxidising enzymes (Moore), 1908-9, 4, 136
Inactivation of peroxidase of milk by heat, rate of (Zilva), 1914, 8, 656
India-rubber, oxidases in (Spence), 1907-8, 3, 165
Indicators, chart presentation of (Walpole), 1909-11, 6, 207
—— recent notes on (Walpole), 1914, 8, 628
Indole, colour reactions of, with aldehydes (Homer), 1913, 7, 116
—— condensation with trioxymethylene (Homer), 1913, 7, 113
—— derivatives, colour reactions of, relation to glyoxylic reaction (Homer), 1913, 7, 116
—— derivatives, condensation with aldehydes (Homer), 1913, 7, 101
Indoleacetic acid (Ewins and Laidlaw), 1913, 7, 19
Indoleaceturic acid (Ewins and Laidlaw), 1913, 7, 21, 24
Indolealdehyde, colour reactions of (Homer), 1913, 7, 124
Indolethylamine, fate of, in the organism (Ewins and Laidlaw), 1913, 7, 18
—— formation from tryptophan (Laidlaw), 1911-12, 6, 160
—— physiological action of (Laidlaw), 1911-12, 6, 141
Inositol, formation from phytic acid (Plimmer and Page), 1913, 7, 172
—— identity of, from human brain with inositol from ox brain and with f-inositol (Momose), 1916, 10, 125
—— of brain, preparation of (Momose), 1916, 10, 120
Intestinal lithiasis (Williams), 1906-7, 2, 397
—— lithiasis, association with mucous colitis (Williams), 1906-7, 2, 403
—— movements, action of opium alkaloids on (Watkin-Thomas), 1911-12, 6, 442
—— mucosa, deamination in (Bostock), 1911-12, 6, 60
—— mucosa, extract of, in pancreatic glycosuria (Edie, Moore and Roaf), 1909-11, 5, 388
—— sand, analysis of (Williams), 1906-7, 2, 397

Intestine, abnormal assimilation of fat in some diseases of (Williams), 1906-7, 2, 395
—— action of extract on organic phosphorus compounds (Pлиммер), 1913, 7, 43
—— fat concretions in (Williams), 1906-7, 2, 405
Inulase, presence of, in Beta vulgaris (Robertson, Irvine and Dobson), 1908-9, 4, 266
Invertase, action of (Barendrecht), 1913, 7, 557
—— of washed zymin and dried yeast (Harden and Zilva), 1914, 8, 222
—— presence of, in Beta vulgaris (Robertson, Irvine and Dobson), 1908-9, 4, 264
—— see also Sucrase

Invertebrates, hydrolytic enzymes of (Roaf), 1907-8, 3, 462
Iodine content of fish thyroids (Cameron), 1913, 7, 466
Iodo-eosin as test for free alkali in plant tissues (Hof), 1908-9, 4, 175
Iris, action of indolethylamine on (Laidlaw), 1911-12, 6, 147
Iron, intake and output of, in healthy vegetarian (Little and Harris), 1906-7, 2, 237
—— salts, action on Bacillus typhosus (Moore and Hawkes), 1907-8, 3, 313
Isobutyric acid, reactions of (Moore and Hawkes), 1907-8, 3, 323
Isocarbostyril, action of, with nitrophenyl-hydrazine (Dakin), 1916, 10, 318
Isocarbostyril, relation to other sterols (Dorée), 1913, 7, 616
Isoelectric point, of euglobulin (Chick), 1913, 7, 318
—— of haemolysin of V. nasik (Atkin), 1914, 8, 344
—— of some biochemical substances (Walpole), 1914, 8, 638
Isoquinoline derivatives, physiological action of (Laidlaw), 1909-11, 5, 243
Isothiocyanates see Allyl and Phenyl

Jaundice, catarrah, experimental pathology of (Sutherland), 1906, 1, 364

Kendall’s method, for the estimation of reducing sugars (Wilson and Atkin), 1916, 10, 137, 504
Kephir, lactase from (Barendrecht), 1913, 7, 555
Kerasin, constitution and properties of (Rosenheim), 1916, 10, 142, 151
—— extraction of (Rosenheim), 1913, 7, 604
—— preparation of, from brain (Rosenheim), 1914, 8, 110
Kidney, action of Apocynum cannabinum on (Graham), 1908-9, 4, 401
—— detachment of electrolytes from, by narcotics (Roaf and Alderson), 1906-7, 2, 423
—— phosphatides of, (MacLean), 1911-12, 6, 333
—— phosphatides, purification of (MacLean), 1911-12, 6, 355
—— reducing endoenzyme in (Harris), 1909-11, 5, 143
INDEX OF SUBJECTS

Kidney, reductase in (Harris and Creighton), 1911-12, 6, 429
— relation of diastatic efficiency to glycogen content in (MacLean), 1908-9, 4, 467
Kieselguhr, adsorption of proteolytic enzymes of spleen by (Hedin), 1906-7, 2, 112
— juices prepared with, may not contain enzymes in cell ratios (Hedin), 1906-7, 2, 116
Kinase, relation of, to antithrombin (Dale and Walpole), 1916, 10, 356
Kinetics of adsorption (Bayliss), 1916, 1, 185
Kreatin see Creatine
Kreatinin see Creatinine
Kynurenic acid, feeding experiments with (Asayama), 1916, 10, 466
— not formed from indolethylamine (Ewins and Laidlaw), 1913, 7, 23
Lactalbumin, composition of (Crowther and Raistrick), 1916, 10, 439
Lactase, absence of, from Beta vulgaris (Robertson, Irvine and Dobson), 1908-9, 4, 296
— action of (Barendrecht), 1913, 7, 555
— nature of animal (Stephenson), 1911-12, 6, 230
Lactate, sodium, effect of ingestion of, on output of allantoin in urine of dog (Umeda), 1915, 9, 436
— sodium, effect of ingestion of, on the reaction of the blood and the composition of the alveolar air in man (Momose), 1915, 9, 485
Lactic acid, and nitrophenylhydrazine, conditions affecting the formation of methylglyoxal and other derivatives from (Dakin), 1916, 10, 316
— decomposition of, by killed yeast in presence of pyruvic acid (Palladin and Sabuin), 1916, 10, 183, 191
— effect on, of reducing enzymes of dried yeast (Harden and Norris), 1915, 9, 332
— formation of, during muscular contraction and rigor mortis (Latham), 1907-8, 3, 193
Lactoglobulin, composition of (Crowther and Raistrick), 1916, 10, 438
Lactose, formation of (Marshall and Kirkness), 1908-7, 2, 1
— growth of rats upon artificial diets containing (Drummond), 1916, 10, 89
— purification of, for use in artificial diets (Drummond), 1916, 10, 97
— Rubner's test for (Rowgerson), 1915, 9, 245
— tables for the estimation of, by the copper iodide method (Cole), 1914, 8, 139
d-Lactyl-p-nitrophenylhydrazide (Dakin), 1916, 10, 315
i-Lactyl-p-nitrophenylhydrazide (Dakin), 1916, 10, 315
Laevulose see Fructose
Laidlaw, C. G. P., obituary notice of (Blackman), 1916, 10, 8
Langerhans, islets of, in relation to diabetes (Rennie and Fraser), 1906-7, 2, 7
Lanoline membranes (Moore and Roaf), 1906-7, 2, 69
Lanthanum carbonate, effect on growth and cell-division in hyacynth (Evans), 1913, 7, 349
Lactic acid, molybdate method for the estimation of minute quantities of phosphorus (Raper), 1914, 8, 650
Lactic acid, salts, action of, on Bacillus typhosus (Moore and Hawkes), 1907-8, 3, 313
— salts, administration of, after atoxyl in trypanosomiasis (Moore, Nierenstein and Todd), 1906-7, 2, 306
Leaves, foliage, action of, on gelatinised starch (Daish), 1916, 10, 54
— action of, on soluble starch (Daish), 1916, 10, 51
— of snowdrop, carbohydrates of (Parkin), 1911-12, 6, 1
— presence of maltase in (Daish), 1916, 10, 49
Lecithides in reproductive organs of Echinoderms (Moore, Whitley and Adams), 1913, 7, 127
Lecithin, cause of loss of choline in hydrolysis of (MacLean), 1908-9, 4, 43
— constitution of (MacLean), 1915, 9, 376
— distribution of nitrogen in (MacLean), 1915, 9, 364
— from heart muscle, choline content of (MacLean), 1908-9, 4, 52
— hydrolysis and saponification of (MacLean), 1908-9, 4, 38, 42
— hydrolysis of, by blood and chyle (Thiele), 1913, 7, 275; by tissues (Thiele), 1913, 7, 287
— membranes (Moore and Roaf), 1906-7, 2, 69
— method of preparation of choline from (MacLean), 1915, 9, 360
— nitrogen-containing radical of (MacLean), 1908-9, 4, 38, 240
— nitrogenous impurity associated with (MacLean), 1915, 9, 353
— of kidney (MacLean), 1911-12, 6, 336
— (ordinary) composition of (MacLean), 1915, 9, 359
— pure, preparation of (MacLean), 1915, 9, 374
Lecithol (MacLean), 1908-9, 4, 39
Leek, the common, analysis of (Carlier and Evans), 1906-7, 2, 325
Lecythine, deamination of (Bostock), 1911-12, 6, 53
— in ergot (Barger and Dale), 1906-7, 2, 294
— oxidation of, to isovaleric aldehyde by sodio-p-toluene-sulphonchloroamide (Dakin), 1916, 10, 321
— reaction of, with semicarbazide (Dakin), 1916, 10, 318
Leucocytosis, effect of certain drugs and diseases upon (Coleman), 1906-7, 2, 194
INDEX OF SUBJECTS

Leucocytozoon syphilidus, chemistry of (Mo-Donagh and Wallis), 1913, 7, 517
Leukaemia, myelogenous, influence of X-rays on blood in (Williams), 1906, 1, 249
Light, reaction of marine organisms to (Moore), 1908-9, 4, 1
Lignoceric acid, ethyl ester of (Rosenheim and MacLean), 1915, 9, 105
 — from carnauba (Rosenheim and MacLean), 1915, 9, 106
 — from kerasin (Rosenheim), 1916, 10, 154
Lime-juice, nitrogenous constituents of (Funk), 1913, 7, 81
Linoic acid, action of sodium salt on plant growth and cell division (Coppen), 1911-12, 6, 418
Lipaeinia, in diabetes (Wilson and Williams), 1906-7, 2, 20
Lipase, inactive, preparation of (Umeda), 1915, 9, 40
 — in blood and chyle (Thiele), 1913, 7, 275; in tissues (Thiele), 1913, 7, 287
 — in Ricinus communis (Somerville), 1911-12, 6, 203
 — pancreatic, stability of (de Souza), 1916, 10, 108
Lipoid content of euglobulin of serum (Chick), 1914, 8, 412
 — material in diabetic blood (Wilson and Williams), 1906-7, 2, 29
 — membrane of cells, does not explain osmotic properties of living cells (Moore and Roaf), 2, 69
Lipoids, action of unsaturated substances on solubility of (Moore, Wilson and Hutchinson), 1908-9, 4, 346
 — changes in solubility of, in presence of one another (Moore, Wilson and Hutchinson), 1908-9, 4, 346
 — nomenclature of (Rosenheim), 1908-9, 4, 351
 — of liver, haemolytic and anti-complementary properties of (Wilson), 1911-12, 6, 102, 103
 — of liver, saponification and iodine values of (Wilson), 1911-12, 6, 104
 — relation of, to vitaminme (Cooper), 1914, 8, 347
Liquid crystals of phenoisin and kerasin (Rosenheim), 1914, 8, 121
Litmus paper, use as a quantitative indicator of reaction (Walpole), 1913, 7, 260
Liver, action of extract of, on organic phosphorus compounds (Filmer), 1913, 7, 43
 — action of selenium compounds on (Jones), 1908-9, 4, 412
 — autolysis, distribution of nitrogen in (Bostock), 1911-12, 6, 385
 — autolysis of, effect of acids and alkalies on (Schryver), 1906, 1, 128, 149
 — autolysis of, effect of peptic and trypptic digestion products on (Schryver), 1906, 4, 127, 138, 139, 145, 148
 — decomposition, effect of arterial or venous obstruction upon nutrition of (Bainbridge and Leathes), 1906-7, 2, 25
Bioch.

Liver, deaminisation in (Bostock), 1911-12, 6, 51
 — detachment of electrolytes from, by narcotics, etc. (Roaf and Alderson), 1906-7, 2, 422
 — extract of, in pancreatic glycosuria (Edie, Moore and Roaf), 1909-11, 5, 368
 — lipid substances in, biochemical relations of (Wilson), 1911-12, 6, 100
 — nitrogen of, in anaphylaxis (Barger and Dale), 1914, 8, 670
 — of depancreatized cats, diastatic ferment in (Bainbridge and Beddard), 1906-7, 2, 93
 — of diabetic patients, diastatic ferment in (Bainbridge and Beddard), 1906-7, 2, 92
 — of dog, formation of allantoin by perfusion with saline (Ackroyd), 1909-11, 5, 220
 — of rabbit, allantoin formation in, by perfusion with Ringer's solution (Ackroyd), 1909-11, 5, 443
 — perfusion of indoethylamine through (Ewins and Laidlaw), 1913, 7, 19
 — reductase in (Harris), 1909-11, 5, 143; (Harris and Creighton), 1911-12, 6, 429
 — relation of diastatic efficiency to glycojen content in (MacLean), 1908-9, 4, 467
Lophius piscatorius, islets of Langerhans from, given to diabetics (Rennie and Fraser), 1906-7, 2, 8
Lung, effect of increase in atmospheric oxygen on mammalian (Adams), 1911-12, 6, 307
Lungs, relation of diastatic efficiency to glycojen content in (MacLean), 1908-9, 4, 467
Lymphocytes, action of coal-tar bases upon (Norris), 1914, 8, 253
Magnesium oxide, compound of, with globulin of Bertholletia excelsa (Moore and Bigland), 1909-11, 5, 48
Malic acid, influence of sodium salt on plant growth and cell division (Coppen), 1911-12, 6, 418
Malignant disease, creatine content of muscle in (Chisolm), 1911-12, 6, 245
 — reactivity of inorganic salts of serum in (Moore and Wilson), 1906, 1, 297
 — see also Cancer and Rous sarcoma
Maltase, distribution of, in plants (Daish), 1916, 10, 49, 56; (Davis), 1916, 10, 31
 — function of, in starch degradation (Davis), 1916, 10, 31
 — influence of, on amyloclastic activity of plant materials (Davis), 1916, 10, 31
 — localisation of, in plant seeds (Davis), 1916, 10, 44
 — of washed zymin and dried yeast (Harden and Zilva), 1914, 8, 224
 — presence of, in Beta vulgaris (Robertson, Lincoln and Dobson), 1908-9, 4, 265
 — presence of, in cereals (Davis), 1916, 10, 33
 — presence of, in foliage leaves (Daish), 1916, 10, 49

C
Maltase, presence of, in germinated barley
(Daish), 1916, 10, 56
— presence of, in malt and malt extracts
(Davis), 1916, 10, 33
Maltose, action of bromine on solution of
(Wilson and Atkins), 1916, 10, 516
— action of germinated barley on
(Daish), 1916, 10, 70, 73
— presence of, in germinated barley
(Daish), 1916, 10, 66
Mammary gland, complete formation of lactose
in cells of (Marshall and Kirkness), 1906–7,
2, 2
— distribution of nitrogen in the proteins
of normal and pathological conditions of
(Drummond), 1916, 10, 487
Manganese salts, action on Bacillus typhosus
(Moore and Hawkes), 1907–8, 3, 313
Mannitol in ergotinic acid (Barger and Dale),
1906–7, 2, 242
Martin, C., obituary notice of (Russell), 1916,
10, 9
Melanin, in skin of Australian black (Young),
1914, 8, 325
— of black wing markings of Pieris
Brassicae (Onslow), 1916, 10, 27
Membranes, collodion, for ultrafiltration and
pressure dialysis (Walpole), 1915, 9, 284
— the preparation and uses of, of
differential permeability (Brown), 1915,
9, 320, 691
— see also Lanolin and Lecithin
Meningococcic vaccine, experimental inoculations
with (Williams, Murray and Orr),
1907–8, 3, 369
Mercurochloride, administration of, after
atroxy in trypanosomiasis (Moore, Nierenstein
and Todd), 1906–7, 2, 307
Metabolism, action of sulphur compounds on
(Jones), 1909–11, 5, 427
— animal, influence of sodium nitrite
on (Surveyor), 1906, 1, 347
— in a healthy vegetarian (Little and
Harries), 1906–7, 2, 230
— in hibernating animals, of purine
derivatives (Kennaway), 1909–11, 5, 188
— nitrogenous (Schryver), 1906, 1, 157
— nitrogenous, influence of X-rays on
(Williams), 1906, 1, 249
— of calcium salts (Patterson), 1907–8,
3, 39
— of dog, fate of inorganic nitrogen in
(Caldwell and Clotworthy), 1916, 10, 14
— of dog, in experimental diabetes
(Moorhouse, Patterson and Stephenson),
1915, 9, 171
— of haemoglobin, relation of urobin
(Helm), 1909–11, 5, 375
— of marine animals (Moore, Edie,
Whitley and Dakin), 1911–12, 6, 255
— of nitrogenous sugar derivatives
(Hewitt), 1913, 7, 207
— of organic phosphorus compounds
(Plimmer), 1913, 7, 43
— of uric acid, in dogs (Ackroyd),
1909–11, 5, 217
— of uric acid, in rabbits (Ackroyd),
1909–11, 5, 442
Metabolism, protein (Cathcart and Green),
1913, 7, 1
— protein, in foetus (Lindsay), 1911–12,
6, 79
— protein, influence of carbohydrate
and fat on (Tsuji), 1916, 8, 439
— protein, influence of chloroform on
(Lindsey), 1909–11, 5, 407
— protein, influence of excessive water
ingestion on (Orr), 1914, 8, 530
— purine, effect of fat and carbobo-
drate on (Umeda), 1915, 8, 421
— purine, of rats (Ackroyd), 1914, 8,
434
— purine of rats, relation of arginine
and histidine to (Ackroyd and Hopkins),
1916, 10, 551
Metabolites, action of, in animal nutrition
(Schryver), 1906, 1, 127
— Methylosobutyric acid, reaction of, with
nitrophenylhydrzone (Dakin), 1916, 10,
314
— Methylobutyric acid, oxidation of (Raper),
1914, 8, 325
Methylene blue, absorption spectrum of, and
colour of (Barratt), 1906, 1, 407
— — action of, upon cotton fibre
(Barratt and Edie), 1906–7, 2, 443
— — action of, upon mercerised
cotton (Barratt and Edie), 1906–7, 2, 454
— — effect of, on decomposition of
lactic acid by killed yeast (Palladin and
Sabinin), 1916, 10, 184
— — eosin, absorption spectrum of,
and colour of (Barratt), 1906, 1, 407
— — eosin staining (Barratt), 1906,
1, 406
— — surface tension of aqueous
solution of (Barratt and Edie), 1906–7,
2, 456
Methylguanidine, formation of, from creatinine
during isolation by silver method (Ewings),
1916, 10, 106
Methylo-caseinogen (Geake and Nierenstein),
1914, 8, 289
Methylenepentosans, influence of ω-hydroxy-s-
methylfurfuraldehyde upon the estimation of
(Cunningham and Dorset), 1914, 8, 438
Methylyphsgosine, from keratin (Rosenheim),
1916, 10, 187
Micro-organisms, effect of increase in atmos-
pheric oxygen upon (Moore and Williams),
1903–9, 6, 177; 1909–11, 5, 181; (Adams),
1911–12, 6, 297
— see also Bacteria
Milk, cow's, study of proteins of (Crowther and
Raistrick), 1916, 10, 434
— effect of, on coagulation time of blood
(Coleman), 1906–7, 2, 192
— effect of ingestion of, on creatine
excretion of children (Powis and Raper),
1916, 10, 371
— effect of variation of calcium content
on coagulability of (Milroy), 1916, 9, 219
— heated, action of rennin on (Milroy),
1915, 9, 221
— human, milk sugar and conductivity
of (Jackson and Rothera), 1914, 8, 7, 11
Milk, hydrogen ion concentration during coagulation of (Milroy), 1915, 9, 217
— milk sugar, conductivity and depression of freezing point of (Jackson and Rothera), 1914, 8, 1
—— peroxidase in, rate of inactivation of, by heat (Silva), 1914, 3, 606
—— preparation of, use of, in experimental diets (Drummond), 1916, 10, 93; (Osborne and Mendel), 1916, 12, 534
—— sugar, of milk (Jackson and Rothera), 1914, 8, 1
—— vitamin-fraction of (Funk), 1913, 7, 211
Mitosis, electrical forces of (Jessup and others), 1908-9, 4, 191
Mollusc, digestive gland of (Roaf), 1906, 1, 390
Mon-amino-diphosphate in egg yolk (MacLean), 1908-9, 4, 168
Morphine hydrochloride, physiological action of (Wetkyn-Thomas), 1911-12, 6, 434
Mowrah meal, effects of, on man (Moore and Baker-Young), 1909-11, 5, 105
Mowrice acid, and bromo and acetyl derivatives (Moore and Webster), 1909-11, 5, 100
Mowrin, chemical and physiological properties of (Moore, Sowton, Baker-Young and Webster), 1909-11, 5, 94
Mucous colitis, associated with intestinal lithiasis (Williams), 1906-7, 2, 403
Muscarin, action of, on heart (MacLean), 1908-9, 4, 66
—— action of, on vertebrate heart (MacLean), 1907-8, 3, 1
—— antagonism of, to pilocarpine (MacLean), 1907-8, 3, 12
—— constitution of „synthetic“ (Ewines), 1914, 8, 209
—— tolerance to, acquired by frog’s heart (MacLean), 1907-8, 3, 13
Muscle, chemical changes in, of herring (Milroy), 1908-9, 3, 383
—— chick, precursor of creatine in (Burns), 1916, 10, 263
—— creatine content of, in normal state and in disease (Chisolm), 1911-12, 6, 245
—— detachment of electrolytes from, by narcotics (Roaf and Alderson), 1909-7, 2, 421
—— effect of allyl sulphide on (Carlier and Evans), 1906-7, 2, 338
—— effect of work on the creatine content of (Brown and Cathcart), 1908-9, 4, 420
—— formation of lactic acid and carbon dioxide in (Latham), 1907-8, 3, 183
—— glycolytic power of, influence of pancreas on (Simpson), 1909-11, 5, 126
—— guanidine content of, (Burns), 1916, 10, 270
—— (horse flesh), isolation from, of a substance curing polyneuritis of birds (Cooper), 1913, 7, 268
—— of depancreatised cat, diastatic ferment in (Bainbridge and Beddard), 1906-7, 2, 94
—— of diabetic patients, diastatic ferment in (Bainbridge and Beddard), 1906-7, 2, 94
Muscle, phosphatides, purification of (MacLean), 1911-12, 6, 307
—— plain, action of drugs on (Fardon), 1907-8, 3, 419
—— plain, action of indoethylamine on (Laidlaw), 1911-12, 6, 146
—— plain, action of pituitary extract on (Dale), 1908-9, 4, 438
—— rabbit, the reducing enzymes of (Harden and Norrise), 1915, 9, 330
—— relation of diastatic efficiency to glyco- gen content in (MacLean), 1908-9, 4, 407
—— vertebrate, heat rigor in (Vrooman), 1906-7, 2, 363
Muscular system, action of Apocynum cannabi- num on (Graham), 1908-9, 4, 402
Mustard oils, distribution of, in plants (Whed- dale), 1909-11, 5, 455
Myers Ward, C. F., obituary notice of (Haliburton), 1916, 10, 7
Nagana, experimental, treatment of, in white rats by atoxyl (Moore, Nierenstein and Todd), 1906-7, 2, 307
β-Naphthylamine, effect of, on body temperature and coagulation time of blood (Cole- man), 1906-7, 2, 202
Narcotic agents, effect of, in the detachment of electrolytes from cell proteins (Roaf and Alderson), 1906-7, 2, 412
Narcotine hydrochloride, physiological action of (Wetkyn-Thomas), 1911-12, 6, 434
Neosalvarsan, fixation of, by the blood (Young), 1915, 9, 479
Nephelometry of suspensions (Dreyer and Gardner), 1916, 10, 399
Neutral salts, action on volume of tadpole of Rana temporaria (Roaf and Whitley), 1906, 1, 101
Nickel salts, action on Bacillus typhosus (Moore and Hawkes), 1907-8, 3, 313
Nicotine, action on uterus (Fardon), 1907-8, 3, 415
—— the alkaloid of Duboia Hopwoodii (Rothera), 1909-11, 5, 193
—— see also Piturin
Nicotinic acid, occurrence in rice polishes (Drummond and Funk), 1914, 3, 604
Nilhydrin, effect of acids upon the reaction of peptones with (Funk and McLeod), 1914, 8, 109
Nitrates, reduction by enzymes in green plant (Irving and Hankinson), 1907-8, 3, 87
Nitric acid test, in recognition of protein (Norman), 1908-9, 4, 127
Nitrite, sodium, influence on animal meta- bolism (Surveyor), 1906, 1, 347
Nitrites, formation from nitrates by enzymes in green plant (Irving and Hankinson), 1907-8, 3, 93
Nitrogen-containing radicle of lecithin (MacLean), 1908-9, 4, 38
—— radicle of phosphatides (MacLean), 1908-9, 4, 240
Nitrogen distribution in autolysis of liver (Bostock), 1911-12, 6, 388
—— distribution in foetal fluids throughout pregnancy (Lindsay), 1911-12, 6, 79
INDEX OF SUBJECTS

Nitrogen, distribution in lecithin (MacLean), 1915, 9, 364
--- nitrogen distribution in tissues (Cathcart), 1916, 10, 197
--- distribution in tissues in different stages of nutrition (Schryver), 1906, 1, 128, 134, 157
--- distribution in urine of adult herbivora (Lindsay), 1911–12, 6, 81
--- equilibrium, maintenance of, on low protein intake in a vegetarian (Little and Harris), 1906–7, 2, 236
--- excretion of, effect of chloroform on total (Lindsay), 1909–11, 5, 407
--- excretion of, effect of various diets on (Cathcart and Green), 1913, 7, 1; (Lang), 1915, 9, 475
--- excretion of total, following anesthesia (Tsuji), 1915, 9, 453
--- free amino, of the different proteins of ox and horse serum (Hartley), 1915, 9, 269
--- in saliva (Barron), 1906, 1, 1
--- inorganic, fate of, in metabolism of dog (Caldwell and Clotworthy), 1916, 10, 14
--- intake, a method of estimating (Little and Harris), 1906–7, 2, 231
--- of liver, in anaphylaxis (Barger and Dale), 1914, 8, 670
--- organic, partition of, in digestion of the dog (Zanus), 1916, 9, 20
--- residual, estimation in serum and tissues (Schryver), 1906, 1, 129, 136, 139
--- retention of (Caldwell and Clotworthy), 1916, 10, 14
--- solubility of, in blood and serum (Findlay and Creighton), 1909–11, 5, 300
--- superimposed, the retention of, on carbohydrate and fat diets compared (Tsuji), 1915, 9, 439
--- Nitrogenous metabolism (Schryver), 1906, 1, 157
--- metabolism, influence of X-rays on (Williams), 1906, 1, 249
--- Nitrophenylhydrazine, reaction of, with hydroxy- and amino-acids (Dakin), 1916, 10, 315
--- Nitroprusside, sodium, detection of acetoacetic acid by (Harding and Ruttan), 1911–12, 6, 445
--- sodium, test for creatinine (MacLean), 1906–7, 2, 164
--- Nitrosocholine (Ewins), 1914, 8, 212
--- Nitrous oxide, solubility of, in blood and serum (Findlay and Creighton), 1909–11, 5, 299
--- Nucleic acid, action of enzymes on (Plimmer), 1913, 7, 62
--- hydrolysis by acids and alkalies (Plimmer), 1913, 7, 77
--- influence of sodium salt of, on plant growth and cell division (Coppin), 1911–12, 6, 418
--- Nuclein, effect of, on coagulation time of blood (Coleman), 1906–7, 2, 198
--- Nutrition, albuminous foodstuffs, function of, in general economy of (Schryver), 1906, 1, 125, 157
--- Nutrition, animal, action of metabolites in (Schryver), 1906, 1, 127
--- animal, autolysis in (Schryver), 1906, 1, 126, 144
--- animal, chemical dynamics of (Schryver), 1906, 1, 123
--- animal, distribution of nitrogen in tissues in different stages of (Schryver), 1906, 1, 128, 130
--- effect of salts (Moore, Roaf and Knowles), 1907–8, 3, 279
--- of marine animals (Moore, Edie, Whitley and Dakin), 1911–12, 6, 255
--- Obituary notice of A. Herter (Williams), 1909–11, 5, xxi
--- of C. G. P. Laidlaw (Blackman), 1916, 10, 8
--- of C. Martin (Russell), 1916, 10, 9
--- of C. F. Myers Ward (Halliburton), 1916, 10, 7
--- of F. W. Pavy (Bywaters), 1916, 10, 1
--- of S. Ringer (Moore), 1909–11, 5, 1
--- of A. C. H. Rothera (Hopkins), 1916, 10, 11
--- of J. Wade (Hopkins), 1916, 10, 5
--- Oleic acid, influence of sodium salt on plant growth and cell-division (Coppin), 1911–12, 6, 418
--- Oligodynamic action, adsorption processes in (Baylies), 1906, 1, 226
--- Oligodynamic action, absorption processes in (Baylies), 1906, 1, 226
--- Opacity of suspensions, estimation of (Dreyer and Gardner), 1916, 10, 399
--- Opium alkaloids, physiological action of (Watkin-Thomas), 1911–12, 6, 433
--- Ospianic power of blood, effect of injection of antitoxic and antibacterial sera on (Yorke and Smith), 1906, 1, 341
--- power of normal serum, lowering and ultimate suppression of, in normal serum (Yorke and Smith), 1906–7, 2, 74
--- technique, degree of error of (Glynn and Cox), 1908–9, 4, 300
--- Osonins, behaviour of, during pressure filtration (Yorke), 1906–7, 2, 357
--- local production of (Murray, Williams and Orr), 1907–8, 3, 353
--- protein nature of (Yorke), 1906–7, 2, 362
--- Organic acids, estimation and daily output of, in urine (Edie and Whitley), 1906, 1, 11
--- Organism, proteolytic, study of (Drummond), 1914, 8, 38
--- Orthophosphate, sodium, physiological action of (Gardner and Symes), 1909–11, 5, 393
--- Oryzalin, preparation of, from rice and properties of (Kajiru), 1911–12, 6, 179
--- Osmometer (Moore and Roaf), 1906–7, 2, 46
--- Osmotic effect of various strengths of salts upon cell volume (Roaf), 1906, 1, 383
--- equilibrium of red blood corpuscles (Moore and Roaf), 1907–8, 3, 65, 75
--- phenomena of egg yolk (Osborns and Kincaid), 1914, 8, 28
INDEX OF SUBJECTS

Osmotic pressure of blood and body fluids of some Australian animals (Jona), 1911-12, 6, 130
— of blood and coelomic fluid of aquatic animals (Dakin), 1907-8, 3, 473
— of blood of fishes (Dakin), 1907-8, 3, 258
— of cell sap in various plants (Drabble, E. and H.), 1906-7, 2, 120
— of cell sap and environment in plants, relation between (Drabble, E. and H.), 1906-7, 2, 117
— of solutions of certain colloids, the direct measurement of (Moore and Roaf), 1906-7, 2, 34
Ovarian cyst fluid, preponderance of chlorides in (Gruner), 1906-7, 2, 391
Ovaries, chemical changes in, in herring (Milroy), 1907-8, 3, 385
Oxalic acid, influence of sodium cyst on growth and cell-division (Coppin), 1911-12, 6, 418
Oxidases, in india-rubber and latex (Spence), 1907-8, 3, 165, 175
Oxidation, mode of, of fatty acids with branch- ed chains (Raper), 1914, 8, 320
— of blood. effect of alkalis on rate of (Kato), 1915, 9, 393
— of blood pigment (MacWilliam), 1907-8, 3, 155
Oxidising agents, effects of, on haemolysis (Moore, Wilson and Hutchinson), 1908-9, 4, 346
— enzyme in latex of Hevea brasiliensis (Spence), 1907-8, 3, 351
— enzymes, presence of, in plants (Moore and Whitley), 1908-9, 4, 136
Oxycholesterol, colour reaction for, with dimethyl sulphate (techn.) (Rosenheim), 1916, 10, 178
— presence of, and its esters in the brain (Rosenheim), 1914, 8, 74
Oxygen, combinations of, with haemoglobin (Hill), 1913, 7, 471; (Barcroft), 1913, 7, 481
— consumption of submaxillary glands and other tissues (Barcroft), 1906, 1, 6
— effect of on growth of micro-organisms (Moore and Williams), 1908-9, 4, 177; 1909-11, 5, 181; (Adams), 1911-12, 6, 297
— effect of, on mammals inoculated with tuberculosis and on the lungs of mammals (Adams), 1911-12, 6, 303, 307
Oxygen in plasmas (Barcroft), 1906, 1, 2
— in saliva (Barcroft), 1906, 1, 1
— lack of, and glycosuria (Edie), 1906, 1, 472
— solubility of, in blood and serum (Findlay and Creighton), 1909-11, 5, 297
Oxygenease (Moore), 1908-9, 4, 136
— in latex of Funetia elastica (Spence), 1907-8, 3, 173
Oxyhaemoglobin (Hill), 1913, 7, 471; (Barcroft), 1913, 7, 481
Palmitic acid, esters of (Stephenson), 1913, 7, 439
Pancreas, action of extract of, on glyoxygen (Norris), 1913, 7, 26, 622
— extract of, in pancreatic glycosuria (Edie, Moore and Roaf), 1909-11, 5, 358
— extracts of, in diabetes (Simpson), 1909-11, 5, 142
— influence of, on glycolytic power of muscle (Simpson), 1909-11, 5, 126
— lipolytic activity of fresh, old and diluted glycerol extracts of (de Souza), 1916, 10, 111, 112
— tryptic activity of fresh, old and diluted glycerol extracts of (de Souza), 1916, 10, 111, 112
— see also Depepancreatised animals
Pancreatic extract and juice, action on organic phosphorus compounds (Plimmer), 1915, 7, 43
— extracts, activation of (Vernon), 1914, 8, 498
Pancreatin, clotting action on caseinogen (Schryver), 1915, 7, 570
Pavy, F. W., obituary notice of (Bywaters), 1916, 10, 1
Pectic substances of plants (Schryver and Haynes), 1916, 10, 539
Pectin, absorption of alkaline earths by gelatinised (Haynes), 1914, 8, 567
— gelatinisation of (Haynes), 1914, 8, 553
— production of, from pectinogen (Schryver and Haynes), 1916, 10, 544
— properties of (Schryver and Haynes), 1916, 10, 545
Pectinogen, preparation of, from plants (Schryver and Haynes), 1916, 10, 540
— properties of (Schryver and Haynes), 1916, 10, 543
Penicilliurn, formation of ellagic acid from galloyl-glycine by (Nierenstein), 1915, 9, 240
Pentadecoic acid in yeast fat (Neville), 1913, 7, 343
Pentosans, influence of ω-hydroxy-σ-methyl- furfuraldehyde upon the estimation of (Cunningham and Dorée), 1914, 8, 458
Pentose group, presence of, in pectinogen (Schryver and Haynes), 1916, 10, 546
Pepsin, action of, on trypsin (Edie), 1914, 8, 193
— inhibitory action of heated, on activity of unheated (Bearn and Cramer), 1906-7, 2, 175
— optimal reaction for (Okada), 1916, 10, 126
INDEX OF SUBJECTS

Peptic digestion products, influence on autolytic enzyme of liver (Schrøyer), 1906, 1, 148
__ enzymes, colorimetric demonstration of (Roaf), 1907-8, 3, 188
Peptone, absence from serum (Schrøyer), 1906, 1, 137
__ formaldehyde titration of (Walpole), 1913, 7, 421
__ formation of, from caseinogen by the action of dilute acid in the cold (Funk and McLeod), 1914, 8, 107
Peroxidase (Moore), 1908-9, 4, 136
__ in india-rubber (Spence), 1907-8, 3, 169
__ in milk, rate of inactivation of, by heat (Zilva), 1914, 8, 656
__ of milk, temperature coefficient of rate of inactivation of, by heat (Zilva), 1914, 8, 656
__ of washed zymin and dried yeast (Harden and Zilva), 1914, 8, 217
Pharmacological action see also Adrenaline
__ Allyl compounds, Apocynum, Atropine, Boerhaavia, Boxwood (West African), Camphor, Cephalophorine, Chloroform, Conine, Cotton seed meal, Daturine, Digitaline, Duboisine, Ergot, Ether, Ethyl bromide, chloride and iodide, Hyoscine, Hydrocaine, Indolethylamine, Isoquinoline, Isothiocyanate, Mowrin, Muscarine, Neosalvin, Opium, Phisoarpine, Pitutary, Pyrophosphate, Salvarsan, Scopolamine, Secretin, Selenium, Somniform, Squill, Strophanthus, Sulphide, Sulphite, Trypanosomiasis, Tyramine and Uterus
__ Phase rule, question of its validity in system methylimino blue, cotton-fibre, water (Barratt and Edie), 1906-7, 2, 460
Phellemic acids (Drabble and Nierenstein), 1906-7, 2, 101
Phellonic acids (Drabble and Nierenstein), 1906-7, 2, 101
Phenol, disinfectant and germicidal action of, nature of (Cooper), 1911-12, 6, 362
Phenols, distribution of, in plants (Wheldale), 1908-9, 5, 450
__ effects of various substances on germicidal and protein-precipitating powers of (Cooper), 1913, 7, 177
__ germicidal and protein-precipitating power of (Cooper), 1913, 7, 175
__ relation of constitution of, to germicidal and protein-precipitating power (Cooper), 1913, 7, 176
__ relations of, to proteins (Cooper), 1911-12, 6, 365, 368, 381
__ role of, in cork formation (Drabble and Nierenstein), 1906-7, 2, 96
Phenylisothiocyanate, physiological action of (Carlier), 1911-12, 6, 182
Phosphates, action of, on inactive lipase (Umeda), 1915, 9, 47
__ effect on animal body (Moore, Roaf and Knowles), 1907-8, 3, 290, 296
Phosphatide, from protogen, molecular weight of (Pearson), 1914, 8, 616
Phosphatides, anomalous results in preparation of (MacLean), 1915, 9, 357
Phosphatides, nitrogen-containing radicle of (MacLean), 1909-9, 4, 38
__ of kidney (MacLean), 1911-12, 6, 333
__ the so-called “acetone-soluble” (MacLean), 1914, 8, 453
Phosphomolybdic acid, colour reaction with food stuffs (Funk and Macalium), 1913, 7, 356
Phosphoprotein, action of enzymes on (Pimmer), 1913, 7, 64
__ hydrolysis by acids and alkalis (Pimmer), 1913, 7, 78
Phosphorescence of marine organisms, diurnal periodicity of (Moore), 1908-9, 4, 1
Phosphorus compounds, organic, hydrolysis by dilute acid and alkali (Pimmer), 1913, 7, 72
__ organic, metabolism of, and hydrolysis by enzymes (Pimmer), 1913, 7, 43
__ content of globulins of serum (Haslam), 1913, 7, 492, 513, 636; (Chick), 1914, 8, 412
__ estimation of, in urine (Mathison), 1908-9, 4, 233
__ estimation of minute quantities of, by a gravimetric method (Raper), 1914, 8, 649
__ in urine, output of organic (Mathison), 1908-9, 4, 274
__ percentage of, in various samples of protagen (Lochhead and Cramer), 1906-7, 2, 350
Phosphotungstate precipitate from rice-polishings, chemical investigation of (Drummond and Funk), 1914, 8, 598
Phosphotungstic acid, colour reaction with foodstuffs (Funk and Macalium), 1913, 7, 356
Photosynthesis, nature of first sugar of (Parkin), 1911-12, 6, 40
Phrenalisin, constitution and properties of (Rosenheim), 1916, 10, 142, 145
__ extraction of (Rosenheim), 1913, 7, 604
__ identity of, with cerebrin, pseudocerebrin and cerebrin (Rosenheim), 1916, 10, 150
__ melting point of (Rosenheim), 1914, 8, 121
__ preparation of, from brain (Rosenheim), 1914, 8, 110
Phrenosin acid, from "carnaubon" (Rosenheim and MacLean), 1915, 9, 107
__ from phrenosin (Rosenheim), 1916, 10, 146
Physical environment and osmotic pressure of cell sap in plants, reaction between (Drabble, E. and H.), 1906-7, 2, 117
Phystostigmine, action on uterus (Fardon), 1907-8, 3, 409
Phytic acid, action of enzymes on (Pimmer), 1913, 7, 53
__ hydrolysis by acids and alkalis (Pimmer), 1913, 7, 75
__ preparation and constitution of (Pimmer and Page), 1913, 7, 160, 169
Phtyin (Pimmer and Page), 1913, 7, 157
Phytin, action of enzymes on (Plimmer), 1913, 7, 53
Phytosterol, presence of, in phanerogams (Doré), 1908-9, 4, 105
Picric acid test for creatinine (MacLean), 1906-7, 2, 104
Pigments, in skin of Australian black (Young), 1914, 8, 460
—— of blood, oxidation of (MacWilliam), 1907-8, 3, 155
—— of red turulae (Chapman), 1916, 10, 548
—— of the seed-coats of Abrus precatorius (Sarkar), 1914, 8, 281
—— of wing markings of Pieris Brassicae (Onslow), 1916, 10, 26
Pilocarpine, action of, on heart (McQueen), 1907-8, 3, 402; (MacLean), 1907-8, 3, 1; 1908-9, 4, 66
—— action of, on uterus (Fardon), 1907-8, 3, 409
—— and muscarine, antagonism of (MacLean), 1907-8, 3, 12
—— tolerance to, acquired by frog’s heart (MacLean), 1907-8, 3, 13
Pituitary, body, action of extracts of (Dale), 1908-9, 4, 427
—— extract, action of enzymes on (Dale), 1908-9, 4, 439
Pituitrin, identity of, with nicotine (Rothera), 1909-11, 5, 193
Plant species, chemical differentiation of (Wheddale), 1909-11, 5, 445
Plants and plant substances see Abrus, Antirrhinum, Azotobacter, Beta, Boletus, Boxwood, Cell-division, Ergot, Globulins, Humic acid, Leaves, Maltase, Osmotic pressure, Oxidase, Reducing enzymes, Ricinus, Tannin, Tannin reaction, Tannic acid, Tannin, Pectin, Pectinogen, Penicillium, Pentosans, Phytin, Pleurococcus, Seeds, Soy-bean, Plant species, Tannin acid, Withania and Yeast
Plasmody, effect of chloroform on (Dale and Walpole), 1916, 10, 342
—— fowl, effect of trypan on (Dale and Walpole), 1916, 10, 353
—— oxygen in (Barcroft), 1906, 1, 2
—— “reactivity” of (Moore, Alexander, Kelly and Roaf), 1906, 1, 290; (Moore and Wilson), 1906, 1, 298
Plasmody, action of osmotic pressure of cell sap (Drabble, E. and H. and Scott), 1906-7, 2, 228
Plasmon in protein catabolism (Catheart and Green), 1913, 7, 12
Platinum, colloidal, reactivity of, with acid and alkali (Moore and Bigland), 1909-11, 5, 47
Pleurococcus, size of cells of, in neutral salt solutions (Drabble, E. and H. and Scott), 1906-7, 2, 221
Pneumonia, acute, leucocytosis and coagulation time of blood in (Coleman), 1906-7, 2, 200
Poisons, action of, on reductase (Harris and Creighton), 1914, 8, 585
Polyneuritis, avian, curative action of autolysed yeast in cases of (Cooper), 1914, 8, 250
—— curative substance from animal tissues (Cooper), 1913, 7, 268
—— see also Antineuritic and Vitamines
Polyosaccharides, as nutrient media for Azotobacter (Mockeridge), 1915, 9, 274
—— enzymatic formation of, by yeast preparations (Harden and Young), 1913, 7, 630
Portal vein, ligature of, in cats (Bainbridge and Leathes), 1906-7, 2, 30
Potassium, estimation of, in urine (Green), 1911-12, 6, 69
Pre-opsonin in normal serum (Yorke and Smith), 1906-7, 2, 74
Prosecretin in diabetes mellitus (Bainbridge and Beddard), 1906, 1, 437; (Bainbridge), 1907-8, 3, 82
—— in jaundice (Sutherland), 1906, 1, 366
Protagon, an individual substance (Lochhead and Cramer), 1906-7, 2, 330
—— molecular weight of (Pearson), 1914, 8, 616
—— percentage of phosphorus in various samples of (Lochhead and Cramer), 1906-7, 2, 350
Protain, osmotic pressure of (Moore, Whitley and Webster), 1913, 7, 146
Proteids see Proteins
Protein, Adamkiewicz (Hopkins-Cole) reaction for (Rosenheim), 1906, 1, 233; (Homer), 1913, 7, 116; (Mottram), 1913, 7, 249; (Brechtel), 1915, 9, 36
—— Bence-Jones, nature of (Williams), 1909-11, 5, 225
—— catalysis, rate of (Catheat and Green), 1913, 7, 1
—— deaminised, guanidine content of (Burne), 1916, 10, 271
—— digestion and absorption of, in depancreatised dog (Cruckshank), 1915, 9, 146
—— digestion and absorption of, in dog (Cruckshank), 1915, 9, 141
—— digestion of (of cooked beef), in the dog (Zouz), 1915, 9, 17
—— effect of diet on retention of (Umeda), 1916, 10, 245
—— effect of feeding, on acidosis (Lang), 1915, 9, 467
—— hydrolysia (Fittom), 1914, 8, 157
—— by alcoholic hydrogen chloride (Weizmann and Agashe), 1913, 7, 437
—— estimation of aspartic acid and glutaminic acids in the products of (Foreman), 1914, 8, 463
—— metabolism in post (Lindsay), 1911-12, 6, 79
—— influence of carbohydrate and fat on (Tsujii), 1915, 9, 439
—— influence of chloroform on (Lindsay), 1909-11, 5, 407
—— influence of excessive water ingestion on (Orr), 1914, 8, 630
—— nitric acid and biuret tests for (Norman), 1908-9, 4, 127
INDEX OF SUBJECTS

Protein, precipitant, sodium sulphate as (Schryver), 1906, 1, 130, 133
— tannic acid as (Schryver), 1906, 1, 133
— trichloracetic acid as (Schryver), 1906, 1, 133
— trichloracetic acid as precipitant, 1906, 1, 133
— heat-coagulation of, influence of (Adamson), 1914, 8, 59; (Chick), 1914, 8, 261

Proteins, analysis of (Plimmer), 1916, 10, 115
— ash-constituents, action of, in adsorption phenomena (Bayliss), 1906, 1, 175
— ash-constituents of (Bayliss), 1906, 1, 176

— cell, effect of narcotic agents in the detachment of electrolytes from (Roaf and Alderson), 1906-7, 2, 412
— density and solution volume of (Chick and Martin), 1913, 7, 92
— distribution of, in plants (Wheddale), 1909-11, 5, 454
— effect of acid and alkali on osmotic pressure of (Adamson and Roaf), 1907-8, 3, 422
— estimation of tyrosine content by bromination (Plimmer and Eaves), 1913, 7, 297
— heat-coagulation of, influence of calcium salts on (Murray), 1906, 1, 167
— Herzig and Meyer’s reaction applied to (Burn), 1914, 8, 154
— of horse-serum, anaphylaxis to (Dale and Hartley), 1910, 10, 406
— of ox and horse serum, composition of (Hartley), 1914, 8, 541
— of ox and horse serum, the free amino-nitrogen of the different (Hartley), 1915, 9, 269
— of rice (Kajiura), 1911-12, 6, 171
— of serum, equilibrium with acids and alkalis (Moore and Bigland), 1909-11, 5, 32
— of sperm of Echinus esculentus (Moore, Whiteley and Webster), 1913, 7, 142
— of tumours and normal tissues, distribution of nitrogen in (Drummond), 1916, 10, 473
— precipitation of, by phenols (Cooper), 1913, 7, 175
— production of humic bodies from (Bottomley), 1915, 9, 266
— reaction of, with quinones (Cooper), 1913, 7, 186
— relations of phenol and m-cresol to (Cooper), 1911-12, 6, 362
— “salting-out” of (Chick and Martin), 1913, 7, 300, 548
— separation of (Hassam), 1913, 7, 492, 636
— serum, influence of acid and alkali on osmotic pressure of (Adamson and Roaf), 1907-8, 3, 422
— serum, protective action of, against haemolysers (Moore, Wilson and Hutchinson), 1908-9, 4, 346
— see also Albumin, Bence-Jones, Casein, Caseinogen, Edestin, Euglobulin, Excelsin, Fibrinogen, Gelatin, Globulin, Lactalbumin, Lactoglobulin, Phosphoprotein, Pseudoglobulin, Serum and Silk fibrin

Proteolytic action of taka-diastase, optimal conditions for (Okada), 1916, 10, 130
— enzymes of taka-diastase, effect of sodium chloride on action of (Okada), 1916, 10, 135
— enzymes of taka-diastase, resistance to acids (Okada), 1916, 10, 133

Protozoic organism, study of (Drummond), 1914, 8, 385

Prothrombin, preparation of a solution of (Dale and Walpole), 1916, 10, 336

Protozoan diseases, failure to cure connected with relationship of dose of drug to size of animal (Moore), 1908-9, 4, 325

Promusozoa, a parasite, a biochemical study of (Moore, Nierenstein and Todd), 1906-7, 2, 300

Prussian blue, soluble, as test for reducing power of animal bioplasm (Harris and Irvine), 1906, 1, 355

Pseudo-anti-rennin, of horse serum, its mode of action (Thaysen), 1915, 9, 118

Pseudo-cerebrin, identity of, with phrenosin “Rosenheim), 1916, 10, 150
— of Gamgee, identity of, with cerebrin (Chick), 1914, 8, 154

Pseudo-convolhydrine, detection of, in tissues (Dilling), 1908-9, 4, 297

Pseudo-globulin (horse), viscosity of solutions of, influence of various factors on (Chick), 1914, 8, 269

Pseudo-anthrin, of horse serum, anaphylaxis to (Dale and Hartley), 1910, 10, 415, 421
— of ox and horse serum, composition of (Hartley), 1914, 8, 541
— phosphorus content of (Chick), 1914, 8, 412
— relationship of, to euglobulin in serum (Chick), 1914, 8, 404
— separation and purification of (Haslam), 1913, 7, 504

Pseudo-muscarine, constitution of (Ewins), 1914, 8, 209

Ptyalin, part played by, in aiding gastric digestion (Maxwell), 1915, 9, 323

Purine, arginine and histidine as precursors of (Ackroyd and Hopkins), 1916, 10, 664
— derivatives, distribution of, in plants (Wheddale), 1909-11, 5, 455
— influence on growth and cell-division in plants (Coppin), 1911-12, 6, 416
— phosphotungstic acid colour reaction of (Funk and Macalumi), 1913, 7, 387
— metabolism, effect of various dietary deficiencies on, in the rat (Ackroyd and Hopkins), 1916, 10, 551
— in hibernating animals (Kennaway), 1909-11, 5, 188
— in rats (Ackroyd), 1914, 8, 434

Purines, endogenous, excretion of, under the influence of fat and carbohydrate (Umeda), 1915, 9, 421

Putrefactive organisms, in urine, action of antiseptics on (Jordan), 1909-11, 5, 274
INDEX OF SUBJECTS

Pyrimidine derivatives, phosphotungstic acid colour reaction of (Funk and Macallum), 1913, 7, 357
Pyrophosphate, sodium, physiological action of (Gardner and Symes), 1909–11, 5, 393
— toxicity of, administered in food (Symes and Gardner), 1915, 9, 9
l-Pyrrolidonecarboxylic acid, formation of, from glutamic acid (Foreman), 1914, 8, 481
— in the estimation of glutamic acid (Foreman), 1914, 8, 468
Pyruvaldehyde, condensation with aromatic aldehydes (Lubrzynska and Symes), 1913, 7, 376
— condensation with fatty aldehydes (Symes and Lubrzynska), 1913, 7, 370
— decomposition of, by carboxy-lase (Harden), 1913, 7, 214
— effect of, on decomposition of lactic acid by killed yeast (Palladin and Sabinin), 1916, 10, 191
— estimation of (MacLean), 1913, 7, 611
Quinine, action on plain muscle (Fardon), 1907–8, 3, 419
— salts of, in blackwater fever (Sutherland and McCay), 1909–11, 5, 20
Quinones, action on proteins (Cooper), 1913, 7, 186
Racemisation of sheep’s caseinogen (Dudley and Woodman), 1915, 9, 100
Rana temporaria, tadpole, action of acids, alkaloids and neutral salts on (Roaf and Whitley), 1906, 1, 88
— tadpole, cell volume and salts (Roaf), 1906, 1, 384
β-Ratio, a numerical expression of the relative excretions of β-hydroxybutyric acid and acetacetic acid in acetonuria (Kennaway), 1914, 8, 356
Rats, growth of, influence of cholesterol content of food on (Lander), 1915, 9, 93
— growth of, influenced by diet (Hopkins and Neville), 1913, 7, 97; (Ackroyd and Hopkins), 1916, 10, 551
— growth of, upon artificial diets containing lactose (Drummond), 1916, 10, 89
— growth of, upon diets of isolated food substances (Osborne and Mendel), 1916, 10, 534
— purine metabolism of (Ackroyd), 1914, 8, 434
— purine metabolism of, on diets deficient in various constituents (Ackroyd and Hopkins), 1916, 10, 551
— technique of dietary experiments with (Hopkins and Ackroyd), 1916, 10, 554
Reaction of urine to indicators (Edie and Whitley), 1906, 1, 11
Reactivity of inorganic salts of serum in malignant disease (Moore and Wilson), 1908, 1, 297, 311, 317
— of plasma (Moore, Alexander, Kelly and Roaf), 1906, 1, 290
Red blood corpuscles see Blood corpuscles, red
Reducing agents, effect of, on haemolysis (Moore, Wilson and Hutchinson), 1908–9, 9, 346
— power of animal bioplasm, use of soluble Prussian blue as a test for (Harris and Irvine), 1906, 1, 355
— and G. power of submaxillary glands and other tissues (Barcroft), 1906, 1, 6
Reductase, attempts to isolate, and action of poisons on (Harris and Creighton), 1914, 8, 585, 587
— existence of, in liver and kidney (Harris), 1909–11, 5, 143
— in liver and kidney (Harris and Creighton), 1911–12, 6, 429
— influence of protoplasmic poisons on (Harris), 1911–12, 6, 201
— of B. coli communis (Harden and Zilva), 1915, 9, 379
— of washed zymin and dried yeast (Harden and Norris), 1914, 8, 100
— theory of action of (Harris), 1909–11, 5, 157
Reduction of blood, effect of alkalies on rate of (Kato), 1915, 9, 383
— of nitrates by enzymes in green plants (Irving and Hankinson), 1907–8, 3, 87
Regulator mixtures, notes on (Walpole), 1914, 8, 626
Renal tubules, secretion by, in frog (Bainbridge and Beddard), 1906, 1, 255
Rennin, action of, on caseinogen (Schryver), 1913, 7, 568; (Harden and Macallum), 1914, 8, 93
— antiserum, inhibiting power of a (Thaysen), 1915, 9, 127
— inhibition of, by horse and rabbit sera (Thaysen), 1915, 9, 114, 126
— inhibitory action of, on heated, on activity of unheated (Bearn and Cramer), 1906–7, 2, 178
Reproductive organs of Echinoderms, content of glycogen, lecithides and fats (Moore, Whitley and Adams), 1913, 7, 127
Respiration, action of allyl compounds, phenylisocyanate, ethyl sulphide and ethyl merocyanin on (Carlies), 1911–12, 6, 182
— action of opium alkaloids on (Watkinson-Thomas), 1911–12, 6, 441
— effect of allyl sulphide on, in rabbit (Carlier and Evans), 1907–8, 2, 331
— effect of 6:7-dimethoxy-2-methyl-3:4-dihydrosoquinolinium chloride on (Laidlaw), 1909–11, 5, 263
— effect of ether on (Emley), 1909–11, 5, 90
— of gold-fish, action of carbon dioxide on (Osborne and Munza), 1906, 1, 377
— relation to production of glycosuria (Edie, Moore and Roaf), 1909–11, 5, 337
Respiratory centre in medulla, effect of allyl sulphide on (Carlier and Evans), 1906–7, 2, 332
— exchange, in brown trout (Gardner and Leetham), 1914, 8, 374, 591
— in fresh water fish, apparatus for investigation of (Gardner and Leetham), 1914, 8, 375
Salts, acid, salting-out of salivary digestion, salicylic acid, saliva, nitrogen some safranine, saccharo-humates, acid (Robertson, saccharo-humic amount saccharose, quotient size sarcoma, heat, proteins (Kajiura), 1911-12, 6, 203

Ringer, S., obituary notice of (Moore), 1909-11, 5, i

Rothera, A. C. H., obituary notice of (Hopkins), 1916, 10, 11

Rous sarcoma, distribution of nitrogen in the proteins of (Drummond), 1916, 10, 490

Saccharo-humates, nutritive value of, as nitrogen compounds (Robertson, Irvine and Dobson), 1906-7, 2, 478

Saccharo-humic acid (Robertson, Irvine and Dobson), 1906-7, 2, 470

Saccharomyces, size of cells of, in neutral salt solutions (Drabble, E. and H. and Scott), 1909-7, 2, 221

Sarcarose, amount in foliage leaf of snowdrop (Parkin), 1911-12, 6, 25

— influence of acids on its inversion by sucrase (Stoward), 1911-12, 6, 131

— presence of, in germinated barley (Daish), 1916, 340

Safranine, some applications of, as a test for carbohydrates (MacLean), 1906-7, 2, 431

Salicylic acid, as urinary antiseptic (Jordan), 1909-11, 5, 287

Saline solution, normal, effect of, on coagulation time of blood (Coleman), 1906-7, 2, 292

— solutions, hypertonic, influence of, on action of haemolysins (Sutherland and McCay), 1909-11, 5, 1

Saliva, nitrogen in (Barcroft), 1906, 1, 1

— oxygen in (Barcroft), 1906, 1, 1

Salivary digestion, relation of, to gastric (Maxwell), 1915, 9, 323

Salting-out of proteins (Chick and Martin), 1913, 7, 380, 548

Salts, acid, alkaline and neutral, action on tadpole of Rana temporaria (Roaf and Whitley), 1906, 1, 88, 94, 95

— influence on the rate of hydrolysis of glycocon by diastatic enzymes (Norris), 1913, 7, 622

— influence of, on the rate of inactivation of peroxidase in milk by heat (Zilva), 1914, 8, 662

— inorganic, influence of, upon growth, nutrition and cell division (Moore, Roaf and Knowles), 1907-8, 3, 279

— neutral, effect of, on activity and multiplication of yeast cells (Drabble and Scott), 1906-7, 2, 340

— osmotic effects of, upon cell volume (Roaf), 1906, 1, 383

Salvarsan, fixation of, by the blood (Young), 1915, 9, 479

Sandal-wood oil, as urinary antiseptic (Jordan), 1909-11, 5, 285

Sapo-glucoside see Saponin

Saponin, from Mowrah seeds (Moore, Sowton, Baker-Young and Webster), 1909-11, 5, 94

Saponins see also Movrin

Sarcoma see Rous sarcoma

Schütz's law, applied to catalase of blood (Evans), 1906-7, 2, 144

Scopolamine, pharmacological action of (Webster), 1907-8, 3, 129

Sea-water, organic matter of (Moore, Edie, Whitley and Dakin), 1911-12, 6, 265

Secale cornutum see Ergot

Secretin, in jaundice (Sutherland), 1906, 1, 366

— in relation to diabetes mellitus (Bainbridge and Beddard), 1906, 1, 429; (Moore, Edie and Abram), 1906, 1, 28, 446; (Bainbridge), 1907-8, 3, 82

Secretion by renal tubules in frog (Bainbridge and Beddard), 1906, 1, 255

Seeds, effects of caffeine upon germination and growth of (Ransom), 1911-12, 6, 151, 156

— Indian, urease content of (Annett), 1914, 8, 449

Selenium compounds, physiological action of (Jones), 1908-9, 4, 405

— salts, action on red blood corpuscles (Jones), 1911-12, 6, 106

Semicarbazide, reaction of with leucine (Dakin), 1916, 10, 318

Sera, antitoxino and antibacterial, effect of injection of, on opsonic power of blood (Yorke and Smith), 1906, 1, 341

— antitoxic, concentration of (Homer), 1916, 10, 280

— from fed and fasting animals, influence of, on autolytic enzyme of liver (Schryver), 1906, 1, 127, 145

— specific agglutination of bacteria by (Tulloch), 1914, 8, 293

Serum, absence of albumose and peptone from (Schrayer), 1906, 1, 137

— albumin, density and solution volume of (Chick and Martin), 1913, 7, 92

— antitrypsin and trypsin of (Hedin), 1906, 1, 474

— blood, haemosic value of (McCay), 1907-8, 3, 97

— comparison of action of antitrypsin of, with that of charcoal (Hedin), 1906, 1, 484, 491

— crysaloids in, method of estimating (Moore and Bigland), 1908-11, 6, 33

— electrical conductivity of (Moore and Roaf), 1907-8, 3, 73

— electrolytes not detached from, by narcotics (Roaf and Alderson), 1906-7, 2, 419

— fixation of salvarsan and neosalvarsan by (Young), 1915, 8, 480

— induration point of (Moore and Roaf), 1907-8, 3, 69

— globulin, density and solution volume of (Chick and Martin), 1913, 7, 92
INDEX OF SUBJECTS

43

Serum, globulins, relationship between
(Chick), 1914, 8, 404
--- horse, anaphylaxis to separated
proteins of (Dale and Hartley), 1916, 10, 408
--- horse, composition of the proteins of
(Hartley), 1914, 8, 543
--- horse, inhibiting substances of (Thaysen),
1915, 9, 114
--- horse, inhibition of rennin by
(Thaysen), 1915, 9, 114
--- horse, viscosity of (Chick and Lubrzyńska),
1914, 8, 66
--- immune relation of action of active
bodies in, to oxidising enzymes (Moore),
1908–9, 4, 165
--- normal and immune, inhibitory action
of, on trypsin (Porter), 1914, 8, 50
--- normal, pre-opsonin in (Yorke and
Smith), 1906–7, 2, 74
--- ox and horse, free amino nitrogen of
proteins of (Hartley), 1915, 9, 269
--- ox, composition of the proteins of
(Hartley), 1914, 8, 541
--- presence of auxo-lipase in (Tsuiji),
1915, 9, 54
--- proteins, behaviour of, during
pressure filtration (Yorke), 1906–7, 2, 357
--- proteins, equilibrium with acids and
alkalies of (Moore and Bigland), 1909–11
5, 32
--- proteins, protective action of, against
haemolysers (Moore, Wilson and Hutchin-
on), 1908–9, 4, 346
--- rabbit, the inhibiting effect of, on
rennin (Thaysen), 1915, 9, 126
--- reactivity of inorganic salts of, in
malignant disease (Moore and Wilson),
1906, 1, 297, 311, 317
--- residual nitrogen estimation in
(Schryver), 1906, 1, 129, 137, 157
--- solubility of gases in (Findlay and
Creighton), 1909–11, 5, 294
--- tryptic digestion products not cir-
culating in (Schryver), 1906, 1, 138

Sewage purification, adsorption processes in
(Bayliss), 1906, 1, 214

Shell fish, purification of, from Bacillus
esculentus (Moore and Hawkes), 1907–8,
8, 313

Silk-fibroin, hydrolysis by alcoholic hydrogen
chloride (Weizmann and Agashe), 1913,
7, 439

Silver salts, action on Bacillus typhosus
(Moore and Hawkes), 1907–8, 3, 313
--- administration of, after atoxyl
in trypanosomiasis (Moore, Nierenstein and
Todd), 1906–7, 2, 306

Skatole, condensation reactions of (Homer),
1913, 7, 116
--- condensation with trioxymethylene
(Homer), 1913, 7, 113

Skin, of Australian black, black pigment in
(Young), 1914, 8, 460

Slyke, van, determination of the composition of
the proteins of ox and horse serum
by the method of (Hartley), 1914, 8, 541

Sodio-p-toluensulphochlorosamide, action of,
on albumins (Milroy), 1916, 10, 458
--- action of, on amino-acids (Dakin),
1916, 10, 321

Sodium chloride, haemolysis of blood by
hyposmotic and hyperosmotic solutions of
(Brahmachari), 1908–9, 4, 69
--- toxicity of, for plant cells
(Drabble, E. and H.), 1906–7, 2, 119
--- effect of, in causation of gout and
production of gouty deposits (Little),
1908–9, 4, 30
--- phosphates, as standards of acidity
(Potier), 1911–12, 6, 122
--- salts, see also under name of the anion
--- sulphate as protein precipitant
(Schryver), 1906, 1, 130, 133

Soil, adsorption processes in (Bayliss),
1906, 1, 214
--- organic matter of, as culture medium
for Azotobacter (Mockeridge), 1916, 9, 272
--- Solvataion factors, of salts and colloids
(Hatchek), 1916, 10, 325

Somnoform, physiological action of (Webster),
1906, 1, 328

Soy-bean, effects of various substances on
the urease of (Onodera), 1915, 9, 544
--- estimation of urea by urease of
(Pimmer and Skelton), 1914, 8, 70
--- of urease of, and its co-enzyme
(Onodera), 1915, 9, 575

Specific adsorption (Bayliss), 1906, 1, 212
--- precipitate, behaviour of amylase in
presence of (Porter), 1913, 7, 599
--- precipitate, behaviour of trypsin in
presence of (Porter), 1914, 8, 50
--- sera, agglutination of bacteria by
(Tulloch), 1914, 8, 293

Sperm of Echinus esculentus, proteins in
(Moore, Whitley and Webster), 1913, 7, 142

Sphacelinae acid (Barger and Dale), 1906–7, 2,
243, 283, 297

Sphacelotoxin (Barger and Dale), 1906–7, 2,
244, 282, 297

Sphingosine, from “carnaubon” (Rosenheim
and MacLean), 1915, 9, 108
--- from phrenosin and keratin (Rosen-
heim), 1916, 10, 148, 156

Spleen, action of putitary extract on (Dale),
1908–9, 4, 434
--- adsorption of its proteolytic enzymes
by charcoal and kieselguhr (Hedin),
1906–7, 2, 112

Squill, pharmacological action on heart
(Haynes), 1906, 1, 62

Staphylococcus pyogenes aureus, in urine, action
of antiseptics on (Jordan), 1909–11, 5, 274

Starch degradation, influence of maltase on
proteins of (Davis), 1916, 10, 374
--- formation of glucose from, by malt
and barley (Davis), 1916, 10, 38
INDEX OF SUBJECTS

Starch gelatinised, action of germinated barley on (Daish), 1916, 10, 66
— action of leaves on (Daish), 1916, 10, 54
— osmotic pressure of hydrolytic products from (Moore and Roaf), 1906-7, 2, 62
— soluble, action of germinated barley on (Daish), 1916, 10, 63
— action of leaves on (Daish), 1916, 10, 51
— solutions, osmotic pressure of (Moore and Roaf), 1906-7, 2, 58
— reactivity of, with acid and alkali (Moore and Bigland), 1909-11, 5, 47
Stearic acid in butter (Smedley), 1911-12, 6, 459
Sterols, classification of (Dorée), 1913, 7, 616
Stomach, relation of diastatic efficiency to glycogen content (MacLean), 1908-9, 4, 467
Stratification, adsorptive, in gels (Bradford), 1916, 10, 169
Strophanthus, action of, on heart (Haynes), 1906, 1, 62
— action of, on plain muscle (Fardon), 1907-8, 3, 419
Submaxillary glands, effect of injection of thionin (Barcroft), 1906, 1, 4
— oxygen consumption of (Barcroft), 1906, 1, 6
— oxygen tension in (Barcroft), 1906, 1, 1
— reducing power of (Barcroft), 1906, 1, 5
Succrase, influence of acids on inversion of saccharose by (Stoward), 1911-12, 6, 131
— preparation of (Stoward), 1911-12, 6, 133
— see also Invertase
Sucrose see Saccharose
Sugar content of the blood, the relationship of creatinuria to changes in the (MacAdam), 1915, 9, 229
— effect of, on metabolism in experimental diabetes (Moorehouse, Patterson and Stephenson), 1915, 9, 174
— in blood and other tissues, improved method for determination of (Edie and Spence), 1906-7, 2, 103
— in blood, condition of (Edie and Spence), 1906-7, 2, 103, 109
— in blood, estimation of (Gardner and MacLean), 1914, 8, 301
— in urine, certain reactions of, modified by creatinine (MacLean), 1906-7, 2, 156
Sugars, action of normal and basic lead acetate on the (Rogerson), 1915, 9, 245
— cause of coloured precipitates formed by alkaline copper solutions from (Benedict), 1906-7, 2, 409
— no osmotic pressure through parchment paper (Moore and Roaf), 1906-7, 2, 63
— production of humic bodies from (Bottomley), 1915, 9, 262
— soluble, action of alkalis upon (Wilson and Atkins), 1916, 10, 51
— reducing, action of, by Kendall's solution (Wilson and Atkins), 1916, 10, 137
Sugars, reducing, new test for, in urine (Cramer), 1915, 9, 156
— reduction of alkaline copper solutions by (Benedict), 1906-7, 2, 408
— value of various, as nutrients for Azokobacter (Mockeridge), 1915, 9, 275
Sulphate, sodium, effect of, on autolysis (Jones), 1909-11, 5, 430
— metabolic changes produced by injection of (Jones), 1909-11, 5, 427
Sulphates, estimation of ethereal and inorganic, in urine, by a volumetric method (Rosenheim and Drummond), 1914, 8, 143
— estimation of, volumetric, in small quantities of urine (Drummond), 1915, 9, 492
— (inorganic), output of, under influence of carbohydrate and fat (Tsuji), 1915, 9, 439
Sulphide, sodium, effect of, on metabolism (Jones), 1909-11, 5, 436
Sulphite, sodium, effect of, on metabolism (Jones), 1909-11, 5, 432
Sulphur, in urine, comparison of methods for estimation (Ritson), 1908-9, 4, 337
— in urine, estimation of, by means of barium peroxide (Ritson), 1908-9, 4, 343
— in urine, volumetric estimation of total, in small quantities (Drummond), 1915, 9, 492
— output of, on various diets (Catheart and Green), 1913, 7, 1
— output of, under the influence of carbohydrate and fat (Tsuji), 1915, 9, 439
— partition of, on carbohydrate and fat diets (Tsuji), 1915, 9, 439
Surface tension of aqueous solution of methylene blue (Barratt and Edie), 1906-7, 2, 456
Suspensions, estimation of turbidity of (Dreyer and Gardner), 1916, 10, 399
Sword bean, urease content of (Annett), 1914, 8, 450
Synthesis of albumins, not in intestinal mucous membrane (Schryver), 1906, 1, 143
Syphilis: host and parasite, chemistry of (McDonagh and Wallis), 1913, 7, 617
Tables for the estimation of lactose by the copper iodide method (Cole), 1914, 8, 139
Tadpole of Rana temporaria, action of acids, alkalies, and acid, alkaline and neutral salts on (Roaf and Whitley), 1906, 1, 88
— cell volume and salts (Roaf), 1906, 1, 384
Taka-diastase, inhibitory action of heated, on activity of unheated (Bearn and Cramer), 1906-7, 2, 180
— optimal conditions for the proteolastic action of (Okada), 1916, 10, 130
— resistance to acids of proteolastic enzymes of (Okada), 1916, 10, 133
Tannic acid as protein precipitant (Schryver), 1906, 1, 133
Tannic acid, rôle of, in cork formation (Drabble and Nierenstein), 1906-7, 2, 96
Tartaric acid, reaction of, with nitrophenyl-hydrazine (Dakin), 1916, 10, 318
INDEX OF SUBJECTS

Teichmann’s test for blood (Symons), 1913, 7, 596; (Sutherland and Mitra), 1914, 8, 128
Teleostei, islets of Langerhans in (Rennie and Fraser), 1906–7, 2, 8
Temperature coefficient of rate of inactivation of peroxidase of milk by heat (Zliva), 1914, 8, 655
- effect of, on adsorption (Bayliss), 1906, 1, 189
- effect of, on living mammalian muscle (Vrooman), 1906–7, 2, 306
- effect of, on osmotic strength of cells in plants (Drabble, E. and H.), 1906–7, 2, 129
- effect of, on transference of trypsin adsorbed by charcoal to caseinogen (Hedin), 1906–7, 2, 83
- optimum for pancreatic hydrolysis of glycosogen (Norris), 1913, 7, 31
Tests of mice, influence of ingestion of alkaline salts on (Wilson), 1911–12, 6, 162
Tetanus toxin, purification of (Glenny and Walpole), 1915, 9, 305
Thionin injections, effect of, on submaxillary glands, muscle, pancreas, mucous membrane of stomach, and other tissues (Barcroft), 1906, 1, 4
Thrombin, factors concerned in formation of (Dale and Walpole), 1916, 10, 331
- in relation to coagulation (Barratt), 1915, 9, 511
- preparation of a solution of (Dale and Walpole), 1916, 10, 341
Thrombokinase, in relation to coagulation (Barratt), 1915, 9, 512
- preparation of a solution of (Dale and Walpole), 1916, 10, 342
Thyroid of fish, iodine content of (Cameron), 1913, 7, 466
Tissue extracts, physical constants (Schryver), 1906, 1, 140
Tissues, effect of injection of thionin on certain (Barcroft), 1906, 1, 4
- effect of injection of various substances on composition of (Cathcart), 1915, 10, 232
- introduction of dissolved substances by means of electro-osmosis into living (Barratt and Harris), 1911–12, 6, 329
- nitrogen distribution in (Cathcart), 1915, 10, 197
- nitrogen distribution in, in different stages of nutrition (Schryver), 1906, 1, 128, 134
- nitrogen distribution in the proteins of normal (Drummond), 1916, 10, 473
- normal composition of (Cathcart), 1906, 10, 216
- oxygen consumption of certain (Barcroft), 1906, 1, 6
- oxygen tension in certain (Barcroft), 1906, 1, 1
- reducing power of certain (Barcroft), 1906, 1, 6
- residual nitrogen of (Schryver), 1906, 1, 128, 129, 136, 139
Torulæ, red, colouring matter of (Chapman), 1916, 10, 548

Torulin, isolation and antineuritic properties of (Edie, Evans, Moore, Simpson and Webster), 1911–12, 6, 240
Toxins, bacterial, concentration of (Glenny and Walpole), 1916, 9, 298
- effect of, on coagulation of blood (Coleman), 1906–7, 2, 184
Transpiration, effect of concentration of cell sap on (Drabble, E. and H.), 1906–7, 2, 127
Transudates, ratio of osmotic concentration of chlorides to chlorides in (Grüner), 1906–7, 2, 391
- retarding influence of non-electrolytes on conductivity of (Grüner), 1906–7, 2, 385
Trehalose in ergot (Barger and Dale), 1907, 2, 241
Tricarbomethoxygalloyl-glycine, preparation of (Nierenstein), 1915, 9, 242
Trichloroacetic acid as protein precipitant (Schryver), 1906, 1, 133
Trimethylamine, a normal constituent of human blood, urine and cerebrospinal fluid (Dorée and Golla), 1909–11, 5, 306
- periodide (Dorée and Golla), 1909–11, 5, 311
- tests for (Dorée and Golla), 1909–11, 5, 309
Trimethyl-ß-amino-ethylammonium hydroxide (Ewins), 1914, 8, 369
Trimethyl-ß-cyano-ethylammonium hydroxide (Ewins), 1914, 8, 369
Trimethylhistidine from various sources (Barger and Ewins), 1913, 7, 304
Trioxymethylene, colour reaction with indole derivatives (Homer), 1913, 7, 118, 119
- condensation with indole derivatives (Homer), 1913, 7, 112
Trout, brown, respiratory exchange in (Gardner and Leetham), 1914, 8, 374, 381
Trypanosomiasis, failures to cure, connected with relationship of dosage of drug to size of animal (Moore), 1908–9, 4, 323
- increase in virulence of, after treatment by atoxyl alone (Moore, Nierenstein and Todd), 1906–7, 2, 308
- treatment of, by atoxyl followed by a mercuric salt (Moore, Nierenstein and Todd), 1906–7, 2, 300
Trypsin (Hedin), 1906, 1, 474
- action of, on caseinogen (Harden and Macalum), 1914, 8, 93
- action of, on pepsin (Edie), 1914, 8, 193
- adsorbed by charcoal, extraction of, by caseinogen (Hedin), 1906–7, 2, 81
- adsorption by charcoal (Hedin), 1906, 1, 456
- amount neutralised by antitryptsin (Hedin), 1906, 1, 478
- behaviour of, in presence of a specific precipitate (Porter), 1914, 8, 50
- effect of, on fowl-plasma (Dale and Walpole), 1916, 10, 353
- evidence of combination of, with protein before occurrence of hydrolysis (Hedin), 1906–7, 2, 87
Trypsin, influence of charcoal on digestive power of (Hedin), 1906, 1, 488
--- inhibition of, by normal and immune sera (Porter), 1914, 8, 50
--- neutralisation by antitrypsin (Hedin), 1906, 1, 476
--- resistance of solutions of, to heat (Edie), 1914, 8, 84
Trypsinogen, activation of (Vernon), 1914 8, 494
Tryptic digestion, influence of, on autolytic enzyme of liver (Schryver), 1906, 1, 127, 158, 1445
--- products, not circulating in serum (Schryver), 1906, 1, 138
--- enzymes, colorimetric demonstration of (Roaf), 1907-8, 3, 188
Tryptophane, absorption of bromine by (Plimmer and Eaves), 1913, 7, 304
--- colour reactions of (Homer), 1913, 7, 116
--- condensation with aldehydes (Homer), 1913, 7, 101
--- conversion into indolethylamine (Laidlaw), 1911-12, 6, 150
--- effect of absence of, from diet on maintenance and allantoin excretion of rats (Ackroyd and Hopkins), 1916, 10, 551
Tuberculosis, effect of increase in atmospheric oxygen on mammals inoculated with (Adams), 1911-12, 6, 303
Tumours, distribution of nitrogen in the proteins of (Drummond), 1916, 10, 473
Turbidity of suspensions, estimation of (Dreyer and Gardner), 1916, 10, 399
Tyrosine, clinical application of (Clark), 1909-11, 5, 286
Tyrosinase, presence of, in haemolymph of pupae of P. Brassicae (Onslow), 1916, 10, 28
--- presence of, in wing of P. Brassicae (Onslow), 1916, 10, 29
--- tyrosine, action of diazomethane on (Geake and Nierenstein), 1915, 9, 311
--- tyrosine, diazo-reactions of (Totani), 1915, 9, 385
--- estimation in proteins by bromination (Plimmer and Eaves), 1913, 7, 297
--- feeding experiments with a diet deficient in (Totani), 1916, 10, 382
--- quantitative isolation of, from caseinogen (Totani), 1916, 10, 383
--- separation from cystine (Plimmer), 1913, 7, 311
--- synthesis of (Latham), 1907-8, 3, 199
Ultrafiltration, apparatus for (Walpole), 1915, 9, 288
--- apparatus, "plate" forms of (Walpole), 1916, 10, 254
--- behaviour of opsonins and serum proteins during (Yorke), 1906-7, 2, 357
--- dilution and concentration of antigens by (Glenny and Walpole), 1915, 9, 288
--- use of collodion membranes in (Walpole), 1915, 9, 284
--- see also Filtration and Collodion membranes
Urea, effect of ingestion of, on the reaction of the blood, and composition of the alveolar air in man (Momose), 1915, 9, 485
--- effect of ingestion of, on tissue composition (Cathcart), 1916, 10, 232
--- estimation of (Milroy), 1913, 7, 399
--- estimation of, in urine (Lindsay), 1908-9, 4, 448
--- estimation of, in urine, by means of urease (Plimmer and Skelton), 1914, 8, 70
--- excretion of, effect of chloroform on (Lindsay), 1900-11, 5, 407
--- in protein catabolism (Cathcart and Green), 1913, 7, 14
Urease, diminution of action during preservation (Onodera), 1915, 9, 569
--- distribution of, in soy-bean (Onodera), 1915, 9, 583
--- effect of acids on (Onodera), 1915, 9, 549
--- effect of alcohols on (Onodera), 1915, 9, 562
--- effect of caustic soda and ammonium on (Onodera), 1916, 9, 507
--- effect of heat on (Onodera), 1915, 9, 586
--- effect of neutral salts and alkaloids on (Onodera), 1915, 9, 559
--- estimation of urea and allantoin in urine by means of (Plimmer and Skelton), 1914, 8, 70
--- in certain Indian seeds (Annett), 1914, 8, 449
--- of soy-bean and its co-enzyme (Onodera), 1915, 9, 575
Urine, acid excretion, increase after X-ray treatment (Williams), 1906, 1, 251
--- --- in renal calculi (Rowlands), 1907-8, 3, 346
--- --- influence of sodium salt on plant growth and cell-division (Coppin), 1911-12, 6, 418
--- --- metabolism of, in dogs (Ackroyd), 1909-11, 5, 217
--- --- metabolism of, in rabbits (Ackroyd), 1909-11, 5, 442
--- --- salts of, in renal calculi (Mackarell, Moore and Thomas), 1909-11, 5, 161
--- --- solutions, osmotic pressure of (Moore and Roaf), 1906-7, 2, 64
--- --- supposed synthesis of, from its decomposition products by tissue extracts (Spiers), 1915, 9, 337
--- urinary, abnormal reaction with Fehling’s solution in testing (Cramer), 1915, 9, 71
--- --- acidity of, of frogs (Bainbridge and Beddard), 1906, 1, 292
--- --- action of antiseptics on (Jordan), 1909-11, 5, 274
--- --- allantoin in, derived from food (Ackroyd), 1909-11, 5, 400
--- --- allantoin in, of diabetic dog, estimation of (Plimmer and Skelton), 1914, 8, 647
--- --- creatine in, conditions favouring excretion of (Taylor), 1909-11, 5, 368
--- --- critical solution point of (Atkins and Wallace), 1913, 7, 219
INDEX OF SUBJECTS

Urine, detection of acetoacetic acid in (Harding and Ruttan), 1911-12, 6, 445
--- dog's, composition of, on purine- and allantoin-free diet (Umeda), 1915, 9, 432
--- effect of boiling with caustic alkali (MacLean), 1906-7, 2, 189
--- estimation and daily output of fixed alkali in (Edie and Whitley), 1906, 1, 11
--- estimation and daily output of organic acids in (Edie and Whitley), 1906, 1, 11
--- estimation of allantoin in, in the presence of glucose (Plimmer and Skelton), 1914, 8, 641
--- estimation of calcium in (Bell), 1911-12, 6, 205
--- estimation of creatine and creatinine in (Thompson, Wallace and Colpworthy), 1913, 7, 454
--- estimation of phosphorus in (Mathison), 1908-9, 4, 233
--- estimation of potassium in (Green), 1911-12, 6, 69
--- estimation of sulphot in, by a volumetric method (Rosenheim and Drummond), 1914, 8, 143
--- estimation of sulphur in, by means of barium peroxide (Ritson), 1908-9, 4, 343
--- estimation of sulphur in, comparison of methods for (Ritson), 1908-9, 4, 337
--- estimation of total sulphur and sulphates in, by micro-methods (Drummond), 1915, 9, 492
--- estimation of urea, allantoin, and amino-acids in (Lindsay), 1908-9, 4, 448
--- estimation of urea and allantoin in, by means of urease (Plimmer and Skelton), 1914, 8, 70
--- estimation of urea in (Milroy), 1913, 7, 403
--- estimation of urobilin in (Simpson), 1909-11, 5, 379
--- excretion of active principle of pituitary extract in (Dale), 1908-9, 4, 443
--- -- -- -- -- -- glucose in, Fehling's test for, in presence of creatine and creatinine (MacLean), 1906, 1, 116, 116, 121
--- -- -- -- -- -- normal, demonstration of glucose in, by means of safranine (MacLean), 1906-7, 2, 436
--- -- -- -- -- -- explanation of reducing action of, on prolonged boiling with Fehling's solution (MacLean), 1906-7, 2, 170
--- -- -- -- -- -- ratio of fermentable to unfermentable substances in (MacLean), 1906-7, 2, 442
--- -- -- reaction of, with safranine (MacLean), 1906-7, 2, 434
--- -- -- total amount of carbohydrate in (MacLean), 1906-7, 2, 438
--- -- -- unfermentable carbohydrate in (MacLean), 1906-7, 2, 436
--- -- -- of adult herbivora, distribution of nitrogen in (Lindsay), 1911-12, 6, 81
--- -- -- on purine free diet, composition of (Umeda), 1915, 9, 423
--- -- output of organic phosphorus in (Mathison), 1908-9, 4, 274

Urine, pathological, glycoceoll and mono-amino-acids in (Hall), 1906, 1, 241
--- -- -- reaction to indicators (Edie and Whitley), 1906, 1, 11
--- -- -- reducing sugars in, new test for (Cramer), 1915, 9, 156
--- -- -- separation of hippuric acid from (Roaf), 1907-8, 3, 185
--- -- -- sugar in, certain reactions of, modified by creatinine (MacLean), 1906-7, 2, 156
--- -- -- trimethylamine in (Dorée and Golla), 1909-11, 5, 306

Urobin, estimation of, in excreta (Simpson), 1909-11, 5, 378
--- -- -- excretion of, in disease (Surveyor), 1907-8, 3, 439
--- -- -- excretion of, in malaria and other diseases (Simpson), 1909-11, 5, 384
--- -- -- relation to haemoglobin metabolism (Simpson), 1909-11, 5, 378

Uroleucic acid, absence of, in case of alkaptonturia (Garrod and Clarke), 1906-7, 2, 219

Uroatrobin, possible relation to indoleacetic acid (Ewms and Laidlaw), 1913, 7, 24

Urotropin, as urinary antiseptic (Jordan), 1909-11, 5, 279

Uterus, action of 6:7-dimethoxy-2-methyl-3:4-dihydrosquinolinium chloride on (Laidlaw), 1909-11, 5, 260
--- -- -- action of drugs on (Fardon), 1907-8, 3, 405
--- -- -- action of indolethylamine on (Laidlaw), 1911-12, 6, 146
--- -- -- action of pituitary extract on (Dale), 1908-9, 4, 436

Vaccine, menigooococic, experimental inoculation (Williams, Murray and Orr), 1907-8, 3, 359

Vagus, mechanism of, effect of ether on (Embley), 1909-11, 5, 86

Vascular system, action of 6:7-dimethoxy-2-methyl-3:4-dihydrosquinolinium chloride upon (Laidlaw), 1909-11, 5, 254
--- -- -- effect of ether on (Embley), 1909-11, 5, 87

Vaso-motor apparatus, peripheral, effect of ether on (Embley), 1909-11, 5, 88

Vaso-motor centre, effect of allyl sulphide on (Carler and Evans), 1906-7, 2, 339
--- -- -- effect of ether on (Embley), 1909-11, 5, 88
--- -- -- reversal, meaning of term, and use of phenomenon as measure of physiological action of ergot preparations (Barger and Dale), 1906-7, 2, 247

Veal in protein catabolism (Cathcart and Green), 1913, 7, 14

Vegetarian, metabolism in a healthy (Little and Harris), 1906-7, 2, 230

Venous obstruction, effect of, upon the nutrition of the liver cells (Bainbridge and Leathes), 1906-7, 2, 25

Vibrio napte, chemical nature of the haemolysis of (Atkin), 1914, 8, 328

Viscosity of colloidal solutions (Hatschek), 1916, 10, 325
Viscosity of protein solutions (Chick and Lubrzenska), 1914, 8, 95; (Chick), 1914, 8, 261

Vitamines, effect of absence of, from diet on allantoin excretion of rats (Ackroyd and Hopkins), 1916, 10, 271
— in animal tissues (Cooper), 1913, 7, 268
— in milk (Funk), 1913, 7, 211
— relation of, to lipoids (Cooper), 1914, 8, 347

see also Antineuritic substances

Wade, J., obituary notice of (Hopkins), 1916, 10, 5

Water, influence of excessive ingestion of, on protein metabolism (Orr), 1914, 8, 530

Xanthine, influence on plant growth and cell-division (Coppin), 1911–12, 6, 418

X-rays, influence on nitrogenous metabolism and on blood in myelogenous leukaemia (Williams), 1906, 4, 249

Yeast, antineuritic base of, isolation of (Edie, Evans, Moore, Simpson and Webster), 1911–12, 6, 240
— autolysed, the curative action of, against avian polyneuritis (Cooper), 1914, 8, 250
— cells, effect of acids, alkalies, and neutral salts on activity and multiplication of (Drabble and Scott), 1906–7, 2, 340

Yeast, dried and washed, enzymes of (Harden and Norris), 1914, 8, 100; (Harden and Zilva), 1914, 8, 217
— dried (Lebedeff), and washed, the reducing enzymes of (Harden and Norris), 1915, 9, 330
— (dried, Lebedeff), and washed, carboxylase in (Harden), 1913, 7, 214
— dried and washed, effect of oxidisable substances on its power of reducing methylene blue (Harden and Norris), 1915, 9, 351
— enzymatic formation of polysaccharides by preparations of (Harden and Young), 1913, 7, 630
— fat of (Neville), 1913, 7, 341
— killed, decomposition of lactic acid by (Palladin and Sabinin), 1916, 10, 183
— rate of fermentation by growing cells (Slator), 1913, 7, 197
— (zymin) extract, action on organic phosphorus compounds (Plimmer), 1913, 7, 43

see also Saccharomyces

Yttrium carbonate, effect on growth and cell-division in hyacinths (Evans), 1913, 7, 349

Zinc salts, action on Bacillus typhosus (Moore and Hawkes), 1907–8, 3, 313

Zymin, washed, carboxylase in (Harden), 1913, 7, 214
— washed, enzymes of (Harden and Norris), 1914, 8, 100; (Harden and Zilva), 1914, 8, 217

Zymooids (Bearn and Cramer), 1906–7, 2, 174

Zymolysis, reversible, attempted by action of beet enzymes (Robertson, Irvine and Dobson), 1908–9, 4, 267
