

CONTENTS OF VOLUME 105, No. 2, 1967

	PAGE		PAGE
The structure of the heavy chain of immunoglobulin and its relevance to the nature of the antibody-combining site. The Second Ciba Medal Lecture. By R. R. Porter	417	Studies on glycogen synthesis in pigeon liver homogenates. Glycogen synthesis from glucose monophosphates and uridine diphosphate glucose. By V. N. Nigam	515
Subcellular distribution of cytochrome <i>c</i> in rat liver. Methods for its extraction and purification. By N. F. González-Cadavid and P. N. Campbell	427	Similarities between the biochemical actions of cycasin and dimethylnitrosamine. By R. C. Shank and P. N. Magee	521
The biosynthesis of cytochrome <i>c</i> . Sequence of incorporation <i>in vivo</i> of [¹⁴ C]lysine into cytochrome <i>c</i> and total proteins of rat-liver subcellular fractions. By N. F. González-Cadavid and P. N. Campbell	443	The relative significance of acetate and glucose as precursors for lipid synthesis in liver and adipose tissue from ruminants. By R. W. Hanson and F. J. Ballard	529
Studies on the biosynthesis of gramicidin S in a cell-free system from <i>Bacillus brevis</i> . Further attempts to elucidate its mechanism of synthesis. By K. J. Figenschou , L. O. Frøholm and S. G. Laland	451	Effect of hypophysectomy and replacement therapy on fatty acid metabolism in the rat testis. By A. Goswami and W. L. Williams	537
Purification and properties of a soluble reduced nicotinamide-adenine dinucleotide (phosphate) dehydrogenase from the hepatopancreas of <i>Octopus vulgaris</i> . By G. di Prisco , L. Casola and A. Giuditta	455	An improved synthesis of isopentenyl pyrophosphate. By C. Donninger and G. Popják	545
Caffeine derivatives of haematin compounds. By W. A. Gallagher and W. B. Elliott	461	Characterization of cathepsins in cartilage. By S. Y. Ali , L. Evans , E. Stainthorpe and C. H. Lack	549
Studies on the enzymic degradation of L-serine O-sulphate by a rat liver preparation. By J. H. Thomas and N. Tudball	467	Experimental allergic encephalomyelitis. Isolation of basic proteins and polypeptides from central nervous tissue. By P. R. Carnegie , B. Bencina and G. Lamoureux	559
Further properties and possible mechanism of action of adenosine 5'-triphosphate-D-glucose 6-phosphotransferase from rat liver. By M. J. Parry and D. G. Walker	473	The protein-polysaccharide complex of bovine nasal cartilage. Studies on the protein core. By A. Serafina-Fracassini , T. J. Peters and L. Floreani	569
Studies on amino acid decarboxylases in <i>Escherichia coli</i> . By A. Lawson and A. G. Quinn	483	The glucoamylase of <i>Coniophora cerebella</i> . By N. J. King	577
Esters of serine and threonine in hydrolysates of histones and protamines, and attendant errors in amino acid analyses of proteins. By K. Murray and C. Milstein	491	Xanthine oxidase inactivation by reagents that modify thiol groups. By R. C. Green and P. J. O'Brien	585
Phosphorylation of choline and ethanolamine in Ehrlich ascites-carcinoma cells. By C.-P. Sung and R. M. Johnstone	497	The metabolism of 7- and 12-methylbenz[<i>a</i>]anthracene and their derivatives. By P. Sims	591
Studies on glycogen synthesis in pigeon liver homogenates. Incorporation of hexose into glycogen. By V. N. Nigam and A. Fridland	505	The determination of lactate dehydrogenase isoenzymes in normal human muscle and other tissues. By A. E. H. Emery	599
		Studies on the biosynthesis of protein and lipid components of rat liver mitochondria. By C. B. Taylor , E. Bailey and W. Bartley	605
		A method for the selective extraction of histone fractions f2(a)1 and f2(a)2 from calf thymus deoxyribonucleoprotein at pH7. By E. W. Johns	611

	PAGE		PAGE
Effect of thyroidectomy on pathways of glucose metabolism in lactating rat mammary gland. By E. Walters and P. McLean	615	Fatty acid synthesis in intestinal mucosa of guinea pig. By M. J. Tame and R. Dils	709
A possible mechanism of inhibition of protein synthesis by dimethylnitrosamine. By S. Villa-Treviño	625	Changes in hepatic lipogenesis during development of the rat. By C. B. Taylor , E. Bailey and W. Bartley	717
A simple method for the preparation of 5-methyltetrahydropteroylglutamic acid. By I. Chanarin and J. Perry	633	Identification of guanosine diphosphate derivatives of D-xylose, D-glucose and D-galactose in mature strawberry leaves. By R. R. Selvendran and F. A. Isherwood	723
Binding of nicotinamide-adenine dinucleotides to diphtheria toxin. By L. Montanaro and S. Sperti	635	Nicotinamide-adenine dinucleotide-specific isocitrate dehydrogenase from pea mitochondria. By G. F. Cox and D. D. Davies	729
Studies on ox brain aminopeptides. By A. S. Brecher and R. E. Sobel	641	A computer programme for the calculation of radioactivity data from liquid-scintillation counters fitted with external standards. By J. M. Felts and P. A. Mayes	735
Further studies on the stimulation of glycolysis by previous aerobiosis. By G. Gaja , G. Ragnotti , F. Cajone and A. Bernelli-Zazzera	647	Structure and properties of rat thymus deoxyribonucleoprotein. Solubility properties and effects of precipitation. By R. F. Itzhaki	741
Enzymic glucosylation of phenols. By S. M. Hopkinson and J. B. Pridham	655	The cell walls of <i>Pseudomonas aeruginosa</i> . General composition. By K. Clarke , G. W. Gray and D. A. Reveley	749
The dimerization of Δ^1 -piperidine-2-carboxylic acid. By D. B. Hope , K. C. Horncastle and R. T. Aplin	663	The extraction of cell walls of <i>Pseudomonas aeruginosa</i> with aqueous phenol. Material from the phenol layer. By K. Clarke , G. W. Gray and D. A. Reveley	755
The hydrolysis of glycosyl fluorides by glycosidases. By J. E. G. Barnett , W. T. S. Jarvis and K. A. Munday	669	The extraction of cell walls of <i>Pseudomonas aeruginosa</i> with aqueous phenol. The insoluble residue and material from the aqueous layers. By K. Clarke , G. W. Gray and D. A. Reveley	759
Determination of the base composition of deoxyribonucleic acid by measurement of the adenine/guanine ratio. By J. T. O. Kirk	673	The separation of vanillate <i>o</i> -demethylase from protococatechuate 3,4-oxygenase by ultracentrifugation. By N. J. Cartwright and J. A. Buswell	767
Quantitative nucleic acid changes during phytohaemagglutinin-induced lymphocyte transformation <i>in vitro</i> . Dependence of the response on phytohaemagglutinin/serum ratio. By D. R. Forsdyke	679	Regulation of development of hepatic glucokinase in the neonatal rat by the diet. By D. G. Walker and S. W. Eaton	771
Effect of mercurial compounds on structure-linked latency of lysosomal hydrolases. By M. A. Verity and A. Reith	685	Studies on the pathogenesis of liver necrosis by α -amanitin. Effect of α -amanitin on ribonucleic acid synthesis and on ribonucleic acid polymerase in mouse liver nuclei. By F. Stirpe and L. Fiume	779
The equilibrium constants of the glutamate dehydrogenase systems. By P. C. Engel and K. Dalziel	691	The formation, distribution and function of ribosomes and microsomal membranes during induced amphibian metamorphosis. By J. R. Tata	783
Intracellular concentration of cysteine in <i>Escherichia coli</i> and its relation to repression of the sulphate-activating enzymes. By J. F. Wheldrake	697		
Metabolism of [1- 14 C]glyoxylate, [1- 14 C]-glycollate, [1- 14 C]glycine and [2- 14 C]-glycine by homogenates of kidney and liver tissue from hyperoxaluric and control subjects. By B. M. Dean , R. W. E. Watts and W. J. Westwick	701		

CONTENTS

iii

PAGE	PAGE
Citrate and the conversion of carbohydrate into fat. The regulation of fatty acid synthesis by rat liver extracts. By M. Fang and J. M. Lowenstein	803
Oxygen toxicity in <i>Astasia</i> . By N. Bégin-Heick and J. J. Blum	813
Metabolic changes during phosphate deprivation in <i>Englena</i> in air and in oxygen. By J. J. Blum and N. Bégin-Heick	821
Resting and stimulated respiration <i>in vitro</i> in the central nervous system. Regional distribution and relation to cell density. By J. W. Ridge	831
The aminoethylphosphonate - containing lipids of rumen protozoa. By R. M. C. Dawson and P. Kemp	837
Synthesis of ribonucleic acid in normal bone <i>in vitro</i> . By J. Steinberg and G. Nichols, jun.	843
Effect of thrombin on the radioactive nucleotides of human washed platelets. By D. M. Ireland	857
Carbohydrate metabolism of the perfused rat liver. By B. D. Ross , R. Hems , R. A. Freedland and H. A. Krebs	869
The cellular distribution of some rat-kidney glycosidases. By R. G. Price and N. Dance	877
The structure and possible function of the glycolipid from <i>Staphylococcus lactis</i> I3. By D. E. Brundish , N. Shaw and J. Baddiley	885
The intracellular ratio of cysteine and cystine in various tissues. By J. C. Crawhall and S. Segal	891
SHORT COMMUNICATIONS	
Small sub-units of myosin. By A. G. Weeds	25c
The thiol groups of thyroglobulin. By R. Pitt-Rivers and H. L. Schwartz	28c
The characterization of pneumococcal C-polysaccharide as a ribitol teichoic acid. By D. E. Brundish and J. Baddiley	30c
The influence of magnesium ions and other bivalent metal ions on the aconitase equilibrium and its bearing on the binding of magnesium ions by citrate in rat heart. By P. J. England , R. M. Denton and P. J. Randle	32c
The neurophysins of the pig. By L. O. Utenthal , Y. Ishida and D. B. Hope	34c
A sensitive non-destructive method for the demonstration of bile acids on thin-layer chromatography. By M. A. Eastwood and D. Hamilton	37c
The positional specificity of lysosomal phospholipase A activities. By H. Winkler , A. D. Smith , F. Dubois and H. van den Bosch	38c

Proceedings of The Biochemical Society

	PAGE
The coupling between the flows of chemical particles in the cristae membranes of mitochondria. By P. D. MITCHELL	1P
Biochemical properties of inner and outer mitochondrial membranes of liver. By G. L. SOTTOCASA	1P
The actions of insulin and catabolic hormones on the plasma membrane of fat cells. By M. RODBELL	2P
Some properties of carrier substances isolated from bacterial and erythrocyte membranes. By W. D. STEIN	3P
A surface membrane preparation from rat liver prepared under isotonic conditions. By R. COLEMAN , R. H. MITCHELL , J. B. FINEAN and J. N. HAWTHORNE	5P
Acetylcholinesterase activity in the surface membrane of rat liver. By G. E. WHEELER , R. COLEMAN and J. B. FINEAN	5P
Some biochemical and X-ray diffraction studies of isolated mitochondrial membranes. By J. E. THOMPSON , R. COLEMAN and J. B. FINEAN	6P
Electrons and protons in membranes. By R. J. P. WILLIAMS	6P
Some new information concerning the stability of the scrapie agent. By G. D. HUNTER , G. C. MILLSON and R. A. GIBBONS	7P
A consideration of the nature of the scrapie agent—a membrane hypothesis. By R. A. GIBBONS and G. D. HUNTER	7P
The contribution of hydrogen bonding at C-6 to the active transport of sugars in hamster intestine. By W. T. S. JARVIS , J. E. G. BARNETT and K. A. MUNDAY	8P

	PAGE
Determination of the initial product of glycosidase action. By J. E. G. BARNETT and W. T. S. JARVIS	9P
Influence of growth condition on the cell wall content and wall composition of <i>Aerobacter aerogenes</i> . By D. C. ELLWOOD and D. W. TEMPEST	9P
The accumulation of ¹⁴ C-labelled lactose by a cytoplasmic membrane preparation of <i>Escherichia coli</i> . By L. R. SMITH and W. D. STEIN	10P
Metabolic effectors of rat-heart muscle hexokinase. By P. J. ENGLAND and P. J. RANDLE	10P
DDT as an inhibitor of photophosphorylation in certain varieties of barley. By P. D. LAWLER and L. J. ROGERS	11P
Glucose 6-phosphate dehydrogenase and alkaline phosphatase activities in relation to ribonucleic acid and protein synthesis in leucocytes trisomic for a G-group chromosome. By P. F. BENSON and M. DE JONG	11P
Disk electrophoresis of alkaline phosphatases from human serum and tissue extracts. By I. SMITH, J. D. PERRY and P. J. LIGHTSTONE	12P
Effect of bile and pancreatic juice on the intestinal lipids of the sheep. By W. M. F. LEAT and F. A. HARRISON	13P
Isotope dilution studies on a proposed route of acetyl-coenzyme A synthesis in chloroplasts. By S. P. J. SHAH, L. J. ROGERS and T. W. GOODWIN	13P
Zonal centrifugation of hepatic microsomal material. By R. H. HINTON, E. KLUCIS, A. A. EL-AASER, J. T. R. FITZSIMONS, P. ALEXANDER and E. REID	14P
Gluconeogenesis from various precursors in neonatal rat liver. By R. G. VERNON, S. W. EATON and D. G. WALKER	15P
The effect of cardiolipin on the anion permeability of artificial phospholipid micelles. By J. D. MCGIVAN and J. B. CHAPPELL	15P
The effect of nigericin and dianemycin on membrane systems. By P. J. F. HENDERSON and J. B. CHAPPELL	16P
Reversal of mitochondrial swelling associated with fatty acid oxidation. By W. C. McMURRAY, J. KUTTIS and M. NAKATANI	16P
Glucose uptake by isolated fat cells and the influence of insulin. By C. P. J. CAYGILL and W. D. STEIN	17P
An apparent energy requirement for oxaloacetate penetration into mitochondria provided by permeant cations. By B. H. ROBINSON and J. B. CHAPPELL	18P
Biochemical changes in plasma membranes isolated from livers of rats treated with dimethylnitro- samine. By R. N. LE PAGE and W. H. BUTLER	18P
A comparative analysis of the lipids and fatty acids of the cell membranes and lysosome membranes from rat liver and skin. By C. H. WYNN, M. IQBAL and I. AB I. DAVIES	19P
Accumulation of various substances within lysosomes. By J. T. DINGLE and A. J. BARRETT	19P
A lysosomal component capable of binding cations and a carcinogen. By A. J. BARRETT and J. T. DINGLE	20P
Chemical similarities between the lysosome and plasma membranes. By D. THINES-SEMPOUX	20P
Platelet fragments: a micro-particulate fraction of platelet-free plasma with adenosine triphos- phatase activity. By N. CRAWFORD	21P
The subcellular distribution of serotonin in blood platelets before and after incubation with sero- tonin. By B. MINTER and N. CRAWFORD	22P
The testosterone-induced biosynthesis of glycosaminoglycans in chick combs. By L. KREITZMAN and C. F. PHELPS	23P
The turnover rates of intermediates in the biosynthesis of glycosaminoglycans of rat skin. By T. E. HARDINGHAM and C. F. PHELPS	23P
Structural studies on the principal glycoprotein of the sheep colonic epithelium. By P. W. KENT, J. P. ACKERS and J. C. MARSDEN	24P
Hormonal effects on the sodium-ion transport across toad bladder. By T. DALTON and R. S. SMART	24P
Active transport of chloride by a toad bladder. By H. E. F. DAVIES, D. G. MARTIN, G. W. G. SHARP and A. LEAF	25P
The binding of dicarboxylic acids to aspartate aminotransferase. By K. N. HAARHOFF	26P

CONTENTS

v

	PAGE
The effect of magnesium, calcium and adenosine triphosphate on lipolytic enzymes in rat adipose tissue. By D. R. WADE, T. M. CHALMERS and C. N. HALES	26 P
Extracellular anions and the metabolism of adipose tissue <i>in vitro</i> . By C. N. HALES	27 P
The chloride permeability of isolated fat cells. By M. C. PERRY and C. N. HALES	27 P
The stimulation by potassium of insulin secretion from rabbit pancreas <i>in vitro</i> . By R. D. G. MILNER and C. N. HALES	28 P
Effects of heart work on glucose uptake and glycolysis in hearts from normal and diabetic rats. By K. R. L. MANSFORD and L. H. OPIE	28 P
Stimulation of chloroplast hydrogen-ion uptake by the uncoupler <i>NNN'N'</i> -tetramethyl-1,2-diaminoethane. By A. R. CROFTS	29 P
Inhibition of the platelet release reaction by amitriptyline. By D. C. B. MILLS and G. C. K. ROBERTS	30 P
Potassium and nicotinamide coenzyme content of isolated pea chloroplasts. By M. J. HARVEY and A. P. BROWN	30 P
The metabolism of 2-furoic acid by a <i>Pseudomonas fluorescens</i> . By A. H. JONES and P. W. TRUDGILL	31 P
Conversion of 3 β -hydroxycholest-5-en-26-oic acid into bile acids <i>in vivo</i> . By K. A. MITROPOULOS, P. D. G. DEAN, M. W. WHITEHOUSE and N. B. MYANT	31 P
The effect of exogenous corticotrophin on steroid excretion in the newborn. By C. LAURITZEN, C. H. L. SHACKLETON and F. L. MITCHELL	32 P
Preliminary studies on the metabolism and excretion of potassium biphenyl-4-[³⁵ S]-sulphate. By D. J. HEARSE, G. M. POWELL, A. H. OLAVESSEN and K. S. DODGSON	33 P
Separation of glycosulphatase and chondrosulphatase from <i>Patella vulgata</i> . By P. F. LLOYD and R. J. FIELDER	33 P
A conjugated metabolite of vitamin D ₃ in rat bile and faeces. By P. A. BELL and E. KODICEK	34 P
Labile intermolecular cross-links in tendon collagen. By A. J. BAILEY	34 P
Triglyceride synthesis in pig intestinal epithelium. By R. BICKERSTAFFE and E. F. ANNISON	35 P
The presence of an oligosaccharide unit in the region of an interchain disulphide bond on the heavy chain of an IgA myeloma globulin. By A. KO, J. R. CLAMP, G. DAWSON and J. CEBRA	36 P
