

CONTENTS OF VOLUME 107, No. 3, 1968

	PAGE		PAGE
<i>N</i> -Acetyl- β -glucosaminidases in human spleen. By D. Robinson and J. L. Stirling	321	A study of the heterogeneous 37s ribonucleic acid induced by foot-and-mouth-disease virus. By T. F. Wild , S. J. Martin and F. Brown	395
The lipid composition of <i>Mycoplasma laidlawii</i> strain B. By N. Shaw , P. F. Smith and W. L. Koostra	329	Variations in the phosphate content and thiol/disulphide ratio of histones during the cell cycle. Studies with regenerating rat liver and sea urchins. By M. G. Ord and L. A. Stocken	403
A method for the separation of peptides and α -amino acids. By D. K. J. Tommel , J. F. G. Vliegenthart , T. J. Penders and J. F. Arens	335	The effect of starvation and alloxan-diabetes on the contents of citrate and other metabolic intermediates in rat liver. By C. Start and E. A. Newsholme	411
Investigations on the oligosaccharide units of an A myeloma globulin. By G. Dawson and J. R. Clamp	341	Studies in phytosterol biosynthesis. Mechanism of biosynthesis of cycloartenol. By H. H. Rees , L. J. Goad and T. W. Goodwin	417
Sedimentation studies on the interaction of proflavine with deoxyribonucleic acid. By P. H. Lloyd , R. N. Prutton and A. R. Peacocke	353	Chromatography of oxidized and reduced cytochrome <i>c</i> on carboxymethylcellulose. By H. B. F. Dixon and C. M. Thompson	427
Effect of second-leaf removal or kinetin treatment on the nucleic acid metabolism of senescing first seedling leaf of barley. By B. I. S. Srivastava and R. K. Atkin	361	Biosynthesis of ethylene. Enzymes involved in its formation from methional. By L. W. Mapson and D. A. Wardale	433
The action of digitonin on rat liver mitochondria. The effects on enzyme content. By C. Hoppel and C. Cooper	367	SHORT COMMUNICATIONS	
The action of digitonin on rat liver mitochondria. Electron microscopy. By D. J. Morton , C. Hoppel and C. Cooper	377	The specificity of yeast α -(1 \rightarrow 6)-glucosidases. By G. N. Bathgate and D. J. Manners	443
The action of digitonin on rat liver mitochondria. Phospholipid content. By H. A. I. Newman , S. E. Gordesky , C. Hoppel and C. Cooper	381	Anaerobic formation of protoporphyrin IX from coproporphyrinogen III by bacterial preparations. By A. F. M. Ehteshamuddin	446
Fractionation of native and denatured transforming deoxyribonucleic acid from <i>Bacillus subtilis</i> . By S. R. Ayad , G. R. Barker and J. Weigold	387
