CONTENTS

The effect of cycloheximide on ribonucleic acid polymerase activity in rat liver nuclei. By F. R. MANGAN, G. E. NEAL and D. C. WILLIAMS ........................................ 44P

Stereospecific hydrogen transfer. By T. H. ELLIOTT, E. JACOB and R. C. C. TAO ............................................................. 45P

Effects of pent-4-enoic acid and related fatty acids on ketone-body metabolism. By A. E. SENIOR, P. REAY and H. S. A. SHERRATT ................ 45P

Pent-4-enoic acid and glucose metabolism: mechanism of the hypoglycaemic effect. By A. E. SENIOR and H. S. A. SHERRATT .......... 46P

Chemical and enzymic degradation of synthetic β-xylopyranosides of L-threonine, L-serine and related peptides. By M. HIGHAM, P. W. KENT and D. FISHER ........................................... 47P

The desaturation of stearic acid by mammary-gland tissue of the lactating goat and sow. By R. BICKERSTAFFE and E. F. ANNISON .......... 47P

Formation of biliary phospholipids. By D. R. ILLINGWORTH and J. GLOVER ................................................................. 48P

Distribution of absorbed cholesterol between prealbumin and lipoprotein fractions in rat serum. By S. JEVONS and J. GLOVER .......... 49P

Separation of barley root mitochondria into different fractions by density gradient centrifugation. By B. J. MIPLIN .................................................. 49P

A new method for the preparation and purification of heparin. By J. E. SCOTT, T. E. STACEY and M. G. TIGWELL ..................................... 50P

The determination of the molecular weight of protein sub-units on acrylamide gels. By D. PEEL ................................................................. 51P

An automated procedure for the separation and estimation of sugars in acid hydrolysates of soil. By C. M. MUNDIE, M. V. CHESHIRE and J. S. D. BACON ................................................................. 51P

INDEX TO AUTHORS

Index of Subjects

Abietic acid, bacterial transformation of (Cross, B. E. & Myers, P. L.) 303
Abomasum, bovine, carbohydrate activities in mucosa of (Siddons, R. C.) 839
Acetyl-coenzyme A, inhibitor studies on proposed route of synthesis of, in chloroplasts (Shah, S. P. J., Rogers, L. J. & Goodwin, T. W.) 173
Acetyl-xylinum, bacterial (Hopkins, R. P.) 577
Acetobacter xylinum, role of ubiquinone in respiratory chain of (Benzman, M. & Goldhamer, H.) 311
Acetyl-CoA-carboxylase, effects of catabolic and anabolic steroids on incorporation of, by skeletal-muscle ribosomes (Bullock, G., White, A. M. & Worthington, J.) 417
Amino acids, biosynthesis of, from lactate by Peptostreptococcus eldenii (Somerville, H. J.) 107
Amino acids, 7-chloro-4-nitrobenzo-2-oxa-1,3-diazole, new fluorogenic reagent for (Ghosh, P. B. & Whitehouse, M. W.) 155
Amino acids, effects of catabolic and anabolic steroids on incorporation of, by skeletal-muscle ribosomes (Bullock, G., White, A. M. & Worthington, J.) 417
Amino acids, reaction of 2,4,6-trinitrobenzenesulfonic acid with (Freedman, R. B. & Radda, G. K.) 385
Amines, association of, in several species of bacteria (Whistance, G. R. & Threlfall, D. R.) 505
Androst-16-ene, biosynthesis of, from C21 and C19 steroids in boar testicular and adrenal tissue in vitro (Ahmad, N. & Gower, D. B.) 233
Angiotensin II, [1-asparagine-5-valine-], interaction of, with lipid monolayers (Smart, R. S. & Sanyal, N. N.) 369
Antigen-antibody interaction (Crompton, M. J.) 25
Anti-insulin antibodies, as labelled, preparation and properties of (Miles, L. E. M. & Hales, C. N.) 611
Aromatic acids, metabolism of, in fungi (Cain, R. B., Bilton, R. F. & Darrah, J. A.) 797
Ascites-tumour cells, mouse, effects of varying the cellular and extracellular concentrations of sodium and potassium ions on uptake of glycine by, in the presence and absence of sodium cyanide (Eddy, A. A.) 459
Ascites-tumour cells, mouse, net gain of sodium ions and net loss of potassium ions accompanying uptake of glycine by, in the presence of sodium cyanide (Eddy, A. A.) 195
Asparagine residue, N-terminal, transamination of, of carboxypeptidase (van Heyningen, S., Tipton, K. F. & Dixon, H. B. F.) 508
Aspartate aminotransferase, two forms of, in rat liver and kidney mitochondria (Bhargava, M. M. & Sreenivasan, A.) 619
Aspartate, biosynthesis of, from lactate by Peptostreptococcus eldenii (Somerville, H. J.) 107
Aspartate, utilization of, by foetal and adult liver from ruminants and non-ruminants (Hanson, R. W. & Ballard, F. J.) 705
Aurovertin, comparison of effects of NN'-dicyclohexylcarbodi-imide, oligomycin A and, on energy-linked reactions in mitochondria and submitochondrial particles (Roberton, A. M., Holloway, C. T., Knight, I. G. & Beechey, R. B.) 446
Bacilli, lifetime of messenger ribonucleic acid for penicillinase synthesis in several strains of (Yudkin, M. D.) 675
Bacillus megaterium, comparison of synthetic glucosaminyl-phosphatidylglycerol with a phospholipid isolated from (Gurr, M. L., Bonsen, P. P. M., Op den Kamp, J. A. F. & van Deenen, L. L. M.) 211
Bacillus steatothermophilus, role of polyamines associated with ribosomes from (Stevens, L. & Morrison, M. R.) 633
Bacillus subtilis var. niger and Bacillus subtilis W23, teichoic acids of, grown in a chemostat (Ellwood, D. C. & Tempest, D. W.) 404
INDEX OF SUBJECTS

1968

Cell surface, protein component of, of *Staphylococcus aureus* (James, A. M. & Brewer, J. E.) 257

Cell wall, role of muramic acid phosphate in, of *Lactobacillus fermenti* (Knox, K. W. & Holmwood, K. J.) 353

Cell walls, higher plant, presence of ribonucleic acid in (Phethean, P. D., Jervis, L. & Hallaway, M.) 25

Cell walls, method for rapid lysis of, of *Micrococcus radiodurans* by lysozyme (Driedger, A. A.) 26

Cells, parenchymal, liver, rat, effect of actinomycin D on ribonucleic acid and protein synthesis in (Shanmugam, G. & Bhargava, P. M.) 741

Central nervous system, see Nervous system, central

Chicks, embryonic and growing, activities of citrate-cleavage enzyme, 'malic' enzyme and certain dehydrogenases in liver and adipose tissue of (Goodridge, A. G.) 663

Chicks, embryonic and growing, conversion of [*U-14C*]glucose into carbon dioxide, glyoxegen, cholesterol and fatty acids in liver of (Goodridge, A. G.) 655

Chicks, growing, effects of starvation and of starvation followed by feeding on enzyme activities and metabolism of [*U-14C*]glucose in liver of (Goodridge, A. G.) 667

7-Chloro-4-nitrobenzo-2-oxa-1,3-diazole, new fluorogenic reagent for amino acids and other amines (Ghosh, P. B. & Whitehouse, M. W.) 155

Chloroplasts, enzymic formation of haem in (Porra, R. J. & Lancelles, J.) 343

Chloroplasts, illuminated, reduction of flavines by (Penzer, G. R. & Radda, G. K.) 6

Chloroplasts, tobacco-leaf, formation of adenosine 5'-phosphate from adenosine 5'-triphosphate in (Keys, A. J.) 1

Cholesterol, absorbed, distribution of, between prealbumin and lipoprotein fractions in rat serum (Jevons, S. & Glover, J.) 49

Cholesterol, conversion of [*U-14C*]glucose into, in liver of embryonic and growing chicks (Goodridge, A. G.) 655

Cholesterol, effects of starvation and of starvation followed by feeding on conversion of [*U-14C*]glucose into, in liver of growing chicks (Goodridge, A. G.) 667

Cholesterol 7a-hydroxylase, solubilization of, from microsomal fraction of rat liver (Scholan, N. A. & Boyd, G. S.) 27

Chondroitin sulphate, 'half-sulphated', of cattle retina (Berman, E. R. & Bach, G.) 75

Chromatography, exclusion, tanned gelatin spheres and granules for (Polson, A. & Katz, W.) 641

Chromatography, osmotic behaviour of Sephadex and its effects on (Edmond, E., Farquhar, S., Dunstone, J. R. & Ogston, A. G.) 755

α-Chymotrypsin, consideration of kinetic data on, in terms of oligomer activities (Winzor, D. J., Loke, J. P. & Nichol, L. W.) 159

Chymotrypsin, preparation of, attached to insoluble polymer support (Wagner, T., Hsu, C.-J. & Kelleher, G.) 892

α-Chymotrypsin, stereospecificity of (Ingles, D. W. & Knowles, J. R.) 561

Citrate-cleavage enzyme, see Adenosine triphosphate citrate lyase

Citrate-cleavage pathway in foetal and adult liver from ruminants and non-ruminants (Hanson, R. W. & Ballard, F. J.) 705

Citrate acid cycle, see Tricarboxylic acid cycle

Clearing-factor lipase, functional status of, in rat liver (Mayes, P. A. & Felts, J. M.) 483

Collagen, bovine, carbohydrate content of preparations of (Grant, M. E. & Jackson, D. S.) 587

Colon, bovine, carbohydrate activities in mucosa of (Sidons, R. C.) 890

Computer analysis of countercurrent distribution curves (Jarvis, B.) 8

Bacillus subtilis var. niger, kinetics of change-over from teichoic acid to teichuronic acid biosynthesis in chemostat cultures of (Tempest, D. W. & Ellwood, D. C.) 39

Bacteriophage T4, deoxyribonucleic acid–ribonucleic acid hybridization and ribonucleic acid–ribonucleic acid duplex formation in analysis of transcription of, in vitro (Brodly, E.) 30

Barley coleoptiles, presence of ribonucleic acid in cell walls of (Phethean, P. D., Jervis, L. & Hallaway, M.) 25

Bean (*Vicia faba* L.), free and membrane-bound ribosomes of cotyledons of seeds of (Payne, P. I. & Boulter, D.) 44

α-Benzquinoine, reassessment of role of, as a product of protocatechuic metabolism by fungi (Bilton, R. F. & Cain, R. B.) 829

Bile salts of sturgeons and of the paddlefish (Haslewood, G. A. D. & Tammar, A. R.) 263

Blowfly (*Calliphora erythrocephala*), factors affecting protein synthesis by fat body of larva of (Price, G. M.) 19

Blowfly (*Calliphora erythrocephala*), metabolism of 1-naphthyl N-methylcarbamate by fat body of larva of (Price, G. M. & Kuhr, R. J.) 20

Bone marrow, rat, activities of tricarboxylic acid-cycle enzymes in cells of (Goldwasser, E.) 413

Brain, exogenous amino acids and the nutrition content and sodium ion flux of isolated tissues from (Harvey, J. A. & McIlwain, H.) 269

Brain, pig, distribution of monoamine oxidase and α-glycerophosphate dehydrogenase in (Tipton, K. F. & Dawson, A. P.) 95

Brain, plasmalogenase activity of subcellular fractions of (Ansell, G. B. & Spanner, S.) 207

3-(Butylthioj)lactate, formation of (Harris, G. L. A., James, S. P. & Needham, D.) 7

Caecum, bovine, carbohydrol activities in mucosa of (Sidons, R. C.) 839

*Calliphora erythrocephala*, see Blowfly

*Camelina sinensis* L., see Tea

Carbaryl, see 1-Naphthyl N-methylcarbamate

Carbohydrases, activities of, in bovine digestive tract (Sidons, R. C.) 839

Carbohydrate, content of, in bovine collagen preparations (Grant, M. E. & Jackson, D. S.) 587

Carbohydrate, utilization of, by locust thoracic muscle in vitro (Candy, D. J.) 12

Cachex isotope [*14C*], distribution of, after oral intake of free and bound [*14C*-labelled glucosamine in rats (Robinson, G. B.) 275

1-Carboxymethylhistidine-119-ribonucleic acid, binding of cupric ions to (Saundry, R. H. & Stein, W. D.) 653

β-Carboxymuconolactone, formation of, as an intermediate in metabolism of aromatic acids in fungi (Cain, R. B., Bilton, R. F. & Darrah, J. A.) 797

Carboxypeptidase, transamination of N-terminal residue of (van Heyningen, S., Tipton, K. F. & Dixon, H. B. F.) 508

Cardenolides, role of deoxycorticosterone in biosynthesis of, in *Digitalis lanata* (Caspi, E., Wickramasinghe, J. A. F. & Lewis, D. O.) 496

Caries, fluoride of dental plaque and its significance in (Jenkins, G. N., Ferguson, D. B. & Edgar, W. M.) 40

α-A1- and β-Casein, self-association and complex-formation of (Payens, T. A. J.) 14

Catalase, bacterial, role of sub-units in thermal deactivation of, in the absence of substrate (Jones, P. F. & Suggett, A.) 833

Cations, excitatory acidic amino acids and content of, of isolated tissues from brain (Harvey, J. A. & McIlwain, H.) 269

Cauliflower flares, dual nature of cofactor required for enzymic production of ethylene from methanolic by (Mapson, L. W. & Mead, A.) 875
Disulphide bonds, interchain, effect of chemical modifications induced in insulin on reactivity of, towards sodium sulphite (Massaglia, A., Pennisi, F., Rosa, U., Ronca-Testoni, S. & Rossi, C. A.) 247

Disulphide interchange reactions involving cyclodextrin and their relevance to problems of α-keratin structure (Lindley, H. & Haylett, T.) 701

Disulphides, mechanism of reduction of, by mitochondria (Skrdele, S.) 693

Dog, metabolism of N-triphenylmethylmorpholine in (Griffiths, M. H.) 731

Egg, hen, isoelectric fractionation of ovotransferrin of (Wenn, R. V. & Williams, J.) 69

Electrophoretic mobility of Staphylococcus aureus (James, A. M. & Brewer, J. E.) 257

Endotoxin, Shigella, effect of, on plasma albumin and fibrinogen synthesis rates in rabbits (Koj, A. & McFarlane, A. S.) 137

Erythrocytes, human, calcium content of (Harrison, D. G., Long, Č. & Siddle, A. B.) 40 p

Escherichia coli, co-ordinated synthesis of ribosomal ribonucleic acid from multiple specific cistrons in deoxyribonucleic acid of (Midgley, J. E. M.) 30 p

Escherichia coli, co-ordination of synthesis of ribosomal ribonucleic acids of, in 'rapidly labelled' and 'randomly labelled' cultures (Piggot, G. H. & Midgley, J. E. M.) 33 p

Escherichia coli, genetic origins of 16s and 23s ribosomal ribonucleic acids of (Avery, R. J. & Midgley, J. E. M.) 33 p

Escherichia coli, M.R.E. 600, messenger ribonucleic acid content of (Gray, W. J. H. & Midgley, J. E. M.) 84 p

Escherichia coli, ribosome-depleted, synthesis of messenger and ribosomal ribonucleic acid in (Piggot, G. H. & Midgley, J. E. M.) 34 p

Escherichia coli, sub-unit structure and specificity of methionyl-transfer-ribonucleic acid synthetase from (Bruton, C. J. & Hartley, B. S.) 281

Ethanolamine plasmalogens, preparation of (Ansell, G. B. & Spanner, S.) 207

Ethylene, dual nature of cofactor required for enzymic production of, from methionin (Mapson, L. W. & Mead, A.) 875

17α-Ethynylloestradiol-17β, effect of, on metabolism of polypeptides in the hypothalamus (Firth, D. A. & Hooper, K. C.) 510

Fatty acids, characterization of, in bovine corpus luteum (Scott, T. W., Hansel, W. & Donaldson, L. E.) 317

Fatty acids, conversion of [14C]glucose into, in liver of embryonic and growing chicks (Goodridge, A. G.) 655

Fatty acids, effects of starvation and of starvation followed by feeding on conversion of [14C]glucose into, in liver of growing chicks (Goodridge, A. G.) 667

Fatty acids, metabolism of, in Pitvrosperm ovale (Wilde, P. F. & Stewart, P. S.) 225

Fatty acids, stimulation of synthesis of, in vitro by gonadotrophin-induced testicular ribonucleic acid (Goswami, A., Skipper, J. K. & Williams, W. L.) 147

Ferrochelatase, formation of haem by the action of, in proplastids, chloroplasts and plant mitochondria (Porra, R. J. & Lascelles, J.) 343

Fibrinogen, effect of Shigella endotoxin on rate of synthesis of, in rabbits (Koj, A. & McFarlane, A. S.) 137

Flavines, reduction of, by illuminated chloroplasts (Penzer, G. R. & Radda, G. K.) 6 p

Flavobacterium hepaticum, isolation and characterization of disaccharides and oligosaccharides produced from heparin by degradation by enzymes of (Dietrich, C. P.) 647

Florets, cauliflower, dual nature of cofactor required for enzymic production of ethylene from methionin by (Mapson, L. W. & Mead, A.) 875

Formaldehyde, spectrophotometric study of denaturation of deoxyribonucleic acid in the presence of (Cox, R. A. & Kanagalak, K.) 599

Fructose 1,6-diphosphate, effect of, on activity of rat liver pyruvate kinase (Bailey, E., Stirpe, F. & Taylor, C. B.) 427

Fungi, metabolism of aromatic acids in (Cain, R. B., Bilston, R. F. & Darrah, J. A.) 797

Fungi, reassessment of role of ω-benzoquinone as a product of protocatechuate metabolism by (Bilton, R. F. & Cain, R. B.) 829

Galactokinase, properties of, in developing rat liver (Walker, D. G. & Khan, H. H.) 169

Garlic, purification of allin lyase of (Mazelis, M. & Crews, L.) 725

Gelatin, tanned, spheres and granules of, for exclusion chromatography (Polson, A. & Katz, W.) 641

Germination, correlated changes in some enzyme activities and cofactor and substrate concentrations of pea cotyledon tissue during (Brown, A. P. & Wray, J. L.) 437

Germination, pattern and control of isoprenoid quinone and tocopherol metabolism in wheat grain during (Hall, G. S. & Laidman, D. L.) 475

Glucosamine, 14C-labelled, free and bound, distribution of isotopic label after oral administration of, in rats (Robinson, G. B.) 275

Glucosaminylphosphatidylglycerol, chemical synthesis of (Gurr, M. I., Bonsen, P. P. M., Op den Kamp, J. A. F. & van Deenen, L. L. M.) 211

Glucose, catalolysis of, in pea cotyledon tissue during germination (Brown, A. P. & Wray, J. L.) 437

[U-14C]Glucose, conversion of, into carbon dioxide, glycogen, cholesterol and fatty acids in liver of embryonic and growing chicks (Goodridge, A. G.) 655

Glucose, effects of pent-4-enoic acid and related compounds on metabolism of (Senior, A. E. & Sherratt, H. S. A.) 46 p

[U-14C]Glucose, effects of starvation and of starvation followed by feeding on metabolism of, in liver of growing chicks (Goodridge, A. G.) 667

Glucose 6-phosphate dehydrogenase, increase in vitro in activity of, in mouse mammary tissue (Leader, D. P. & Barry, J. M.) 27 p

α-Glucosidase, acid, purification and characterization of, from rat liver (Uricchio, F., Bruni, C. B. & Sica, V.) 161

β-Glucuronidase, activity of, within intact lysosomes in vitro (Rosenberg, M. & Janoff, A.) 889

Glucuronides of tetralins, excretion of, by rabbits given tetralin (Elliott, T. H. & Hanam, J.) 511

Glutamate, biosynthesis of, from lactate by Peptostreptococcus eldenui (Somerville, H. J.) 107

Glutamate dehydrogenase, rates of structural transitions in (Dodd, G. H. & Radda, G. K.) 5 p

Glutamate dehydrogenase, reaction of, with 2,4,6-trinitrobenzenesulphonic acid (Freedman, R. B. & Radda, G. K.) 5 p

Glutamate, utilization of, by foetal and adult liver from ruminants and non-ruminants (Hanson, R. W. & Ballard, F. J.) 705

α-Glycerophosphate dehydrogenase, distribution of, in pig and rat (Tipton, K. F. & Dawson, A. P.) 95

Glycine, effects of varying the cellular and extracellular concentrations of sodium and potassium ions on uptake of, by mouse ascites-tumour cells in the presence and absence of sodium cyanide (Eddy, A. A.) 489
Glycine, net gain of sodium ions and net loss of potassium ions accompanying uptake of, by mouse ascites-tumour cells in the presence of sodium cyanide (Eddy, A. A.) 195

Glycogen, action of *Streptococcus mitis* pullulanase on (Walker, G. J.) 33

Glycogen, conversion of [U-14C]glucose into, in liver of embryonic and growing chicks (Goodridge, A. G.) 655

Glycopeptides, comparison of, from ovotransferrin and serum transferrin of the hen (Williams, J.) 57

Glycoproteins, [1-14C]glucosamine-labelled, metabolic fate of, in rats (Robinson, G. B.) 275

Glycosaminoglycans, tissue content and turnover rates of intermediates in biosynthesis of, in young rat skin (Hardingham, T. E. & Phelps, C. F.) 9

Glycosulphatase of *Trichodermia viride* (Lloyd, A. G., Large, P. J., Davies, M., Olavesen, A. H. & Dodgson, K. S.) 393

Gonadotrophins, stimulation of fatty acid synthesis in *vitro* by testicular tunic acid induced by (Goswami, A., Skipper, J. K. & Williams, W. L.) 147

Haem, enzymic formation of, in proplastids, chloroplasts and plant mitochondria (Porra, R. J. & Lascelles, J.) 343

Haematin, alkaline, reaction of nitrogenous ligands with (Gallagher, W. A. & Elliott, W. B.) 131

Haemocyanin, binding of copper in (Wood, E. J., Salisbury, C. M. & Stirpe, J. E.) 282

Haemolysis, effect of, on red blood cells of young rat skin (Hardingk, T. E. & Phelps, C. F.) 9

Hemeolysis, partial, evidence for isoelectric point of (Williams, J.) 57

Hemicellulose, degradation of, by *Heterodera* and *Pityrosporum* inclusions (Wright, M. R., Arbuthnott, J. P. & Lominski, I. R. W.) 41

Hen, comparison of glycopeptides from ovotransferrin and serum transferrin of (Williams, J.) 57

Hen, isoelectric fractionation of ovotransferrin of (Wern, R. V. & Williams, J.) 69

Heparin, effect of, on release of angiotensin by the renin-renin substrate system (Ryan, J. W. & McKenzie, J. K.) 687

Heparin, isolation and characterization of disaccharides and oligosaccharides produced from, by bacterial degradation (Dietrich, C. P.) 647

Heparin, new method for separation and purification of (Scott, J. E., Stacey, T. E. & Tigwell, M. J.) 50 r

Heparinase, evidence for inhibition of clearing-factor lipase by, in rat liver (Mayes, P. A. & Felts, J. M.) 485

Hepatocytome, partial, effect of, on activity of nicotinamide-adene dinucleotide pyrophosphorylase in liver nuclei (Stirpe, F. & Delia Corte, E.) 89

Hepatotoxins, effects of, on activity of nicotinamide adenine dinucleotide pyrophosphorylase in liver nuclei (Stirpe, F. & Delia Corte, E.) 89

Heterodera rostochiensis, see *Potato cyst-nematode*

Higher plants, see *Plants*, higher

Histidine, evidence for, in the active site of papain (Husain, S. S. & Lowe, G.) 855

Histidine residue, active-site, location of, in primary sequence of papain (Husain, S. S. & Lowe, G.) 861

Histones, lyphocyte, phytohaemagglutinin and acetylation of (MacGillivray, A. J. & Monjadino, J. P. V. P.) 22 r

Hydrogen atoms, involvement of, in mechanism of glucose 6-phosphate-6-dehydrogenase 1-phosphate cyclase (Barnett, J. E. G. & Corina, D. L.) 125

Hydrogen-bond acceptor site in *α*-chymotrypsin (Ingles, D. W. & Knowles, J. E.) 561

Hydrogen peroxide, role of sub-units in thermal deactivation of bacterial catalase in the absence of (Jones, P. & Suggett, A.) 833

Hydrogen, stereospecific transfer of (Elliott, T. H., Jacob, E. & Tao, R. C. C.) 46 r

17-Hydroxy corticosteroids, 1-oxygenated, partial characterization of, from urine of a hypertensive newborn child (Edwards, R. W. H. & Trafford, D. J. H.) 185

Hydroxy fatty acids, formation of, in *Pityrosporum ovale* (Wilde, P. F. & Stewart, P. S.) 225

5α-Hydroxybeticic acid, bacterial transformation of abiotic acid into (Cross, B. E. & Myers, P. L.) 303

5β-Hydroxybeticolic, metabolism of, in fungi (Cain, R. B., Bilton, R. F. & Darrah, J. A.) 797

Hypertension, partial characterization of 1-oxygenated steroids from urine of a newborn child exhibiting (Edwards, R. W. H. & Trafford, D. J. H.) 185

Hypothalamus, effect of 17α-ethynylestradiol-17β on metabolism of polyepitides in (Firth, D. A. & Hooper, K. C.) 510

Imidazole, reaction of, with alkaline haematin (Gallagher W. A. & Elliott, W. B.) 131

Immunoglobulin, human, specific dimerization of light chains of (Stevenson, C. T. & Straus, D.) 375

Insulin, effect of chemical modifications induced in, on reactivity of the interchain disulphide bonds towards sodium sulphite (Massaglia, A., Pennisi, F., Rosa, U., Ronca-Testoni, S. & Rossi, C. A.) 247

Insulin, potassium ions and secretion of, by islets of Langerhans incubated in *vitro* (Howell, S. L. & Taylor, K. W.) 17

Insulin, preparation and properties of 125I-labelled antibodies of (Miles, L. M. & Hales, C. N.) 57

Interferon, temperature-sensitive event in production of (Skehel, J. J. & Burke, D. C.) 6 r

Intestine, large, see Colon

Intestine, small, bovine, carboxydrase activities in mucosa of (Siddons, R. C.) 839

Iodine isotope (125I), preparation and properties of anti-insulin antibodies labelled with (Miles, L. E. M. & Hales, C. N.) 611

Islets of Langerhans, potassium ions and secretion of insulin by, incubated in *vitro* (Howell, S. L. & Taylor, K. W.) 17

Isoprenoid quinones, determination of, in grain and seedlings of wheat (Hall, G. S. & Laidman, D. L.) 465

Isoprenoid quinones, pattern and control of metabolism of, in germinating grain of wheat (Hall, G. S. & Laidman, D. L.) 475

Jack bean, physical and chemical studies of a low-molecular-weight form of urease from (Tanis, R. J. & Naylor, A. W.) 771

α-Keratin, relevance of disulphide reactions involving cyclcyclist to problems of the structure of (Lindley, H. & Haylett, T.) 701

Ketone bodies, activity and intracellular distribution of enzymes of metabolism of, in rat liver (Williamson, D. H., Bates, M. W. & Krebs, H. A.) 353

Ketone bodies, effects of pent-4-enio acid and related compounds on metabolism of (Senior, A. E., Reay, P. & Sherratt, H. S. A.) 45 r

Kidney, pig, reversible inactivation of alkaline phosphatase of, at low pH (Butterworth, P. J.) 243

Kidney, rat, aspartate aminotransferase in mitochondria of (Bhargava, M. M. & Sreenivasan, A.) 619

Lactate, biosynthesis of amino acids from, by *Pepto streptococcus eladenii* (Somerville, H. J.) 107

Lactate dehydrogease, preparation and kinetics of, attached to water-insoluble particles and sheets (Wilson, R. J. H., Kay, G. & Lilly, M. D.) 845

Lactate dehydrogenase, resolution of some steps of the reactions of, with its substrates (Heck, H. d'A., McMurray, C. H. & Gutfreund, H.) 793
**Lactobacillus fermenti**, role of muramic acid phosphate in the cell wall of (Knox, K. W. & Holmwood, K. J.) 363

Lens, structural proteins of polyribosomes of (Benedetti, E. L., Zweers, A. & Bloemendal, H.) 765

Lens, structural protein contamination in polyribosome preparations from (Bloemendal, H. & Zweers, A.) 770

Lipase, clearing-factor, functional status of, in rat liver (Mayes, P. A. & Felts, J. M.) 483

Lipid monolayers, interaction of polypeptide hormones with (Snaith, R. S. & Sanyal, N. N.) 369

Lipogenesis, activities of enzymes concerned in, in liver and adipose tissue of embryonic and growing chicks (Goodridge, A. G.) 663

Lipogenesis, effects of starvation and of starvation followed by feeding on, in liver of growing chicks (Goodridge, A. G.) 667

Lipogenesis from [U-14C]glucose in liver of embryonic and growing chicks (Goodridge, A. G.) 655

Lipogenesis, pathways of carbon flow in, in foetal and adult liver from ruminants and non-ruminants (Hanson, R. W. & Ballard, F. J.) 705

Lipoic acid, reduced, interaction of, with cystamine in mitochondria (Skrede, S.) 693

Lipoprotein lipase, see Clearing-factor lipase

Liver, chick, activities of citrate-cleavage enzyme, 'malic' enzyme and certain dehydrogenases in (Goodridge, A. G.) 665

Liver, chick, conversion of [U-14C]glucose into carbon dioxide, glyoxylate, cholesterol and fatty acids in (Goodridge, A. G.) 655

Liver, chick, effects of starvation and of starvation followed by feeding on enzyme activities and metabolism of [U-14C]glucose in (Goodridge, A. G.) 667

Liver, foetal and adult, adenosine triphosphate citrate lyase and nicotinamide–adenine dinucleotide phosphate-linked malate dehydrogenase in, from ruminants (Hanson, R. W. & Ballard, F. J.) 705

Liver, rat, developing, properties of galactokinase in (Walker, D. G. & Khan, H. H.) 169

Liver, rat, development of ornithine–keto acid amino-transferase activity in (Räihä, N. C. R. & Kekomäki, M. P.) 521

Liver, rat, effect of actinomycin D on ribonuclease and protein synthesis in liver parenchymal cells in suspension and subcellular fractions of, by lysozyme (Driedger, A. G. & Bhargava, P. M.) 741

Liver, rat, effect of dimethylthiourea on enzyme induction in (Shank, R. C.) 625

Liver, rat, effects of partial hepatectomy, hepatotoxins and dietary changes on activity of nicotinamide–adenine dinucleotide pyrophosphatase in nuclei of (Stirpe, F. & Della Corte, E.) 89

Liver, rat, effects of preincubation, pH, copper ions, fructose 1,6-diphosphate and dietary changes on pyruvate kinase activity of (Bailey, E., Stirpe, F. & Taylor, C. B.) 427

Liver, rat, foetal, factors affecting premature induction of tyrosine aminotransferase in (Holt, P. G. & Oliver, I. T.) 333

Liver, rat, effects of partial hepatectomy, hepatotoxins and dietary changes on activity of nicotinamide–adenine dinucleotide pyrophosphatase in nuclei of (Stirpe, F. & Della Corte, E.) 89

Liver, rat, functional status of clearing-factor lipase in (Mayes, P. A. & Felts, J. M.) 483

Liver, rat, mechanism of diulshide reduction by mitochondria of (Skrede, S.) 693

Liver, rat, microsomal ring-fission of cis- and trans-acenaphthen-1,2-diol in (Hopskins, R. P.) 577

Liver, rat, modifications of xanthine oxidase activity in subcellular fractions of, on storage at 20°C (Della Corte, E. & Stirpe, F.) 349

Liver, rat, neonatal, factors affecting premature induction of phosphopyruvate carboxylase in (Yeung, D. & Oliver, I. T.) 325

Liver, rat, purification and characterization of acid α-glucosidase from (Auricchio, F., Bruni, C. B. & Sica, V.) 161

Liver, rat, redox state of nicotinamide–adenine dinucleotides in homogenates of (Krebs, H. A. & Gascoyne, T.) 513

Liver, rat, thymidine kinase activity in, during development (Klemperer, H. G. & Haynes, G. R.) 541

Liver, rat, two forms of aspartate aminotransferase in mitochondria of (Bhargava, M. M. & Sreenivasan, A.) 619

Locust, carbohydrate utilization by thoracic muscle of, in vitro (Candy, D. J.) 129

Lymphocytes, incorporation of [5-3H]uridine and attachment of cells to glass during activation of, induced by phytohaemagglutinin (Forsdyke, D. R.) 297

Lysosomes, intact, hydrolytic activity within, in vitro (Rosenberg, M. & Janoff, A.) 889

Lysosomes, phospholipases A₁ and A₂ of, of bovine adrenal medulla (Smith, A. D. & Winkler, H.) 867

Maize shoots, utilization of D-tyrosine and 3-hydroxyphenylpyruvate for biosynthesis of plastic substrate and related compounds by (Threlfall, D. R. & Whistage, G. R.) 24r

Malate dehydrogenase, nicotinamide–adenine dinucleotide phosphate-linked, activity of, in foetal and adult liver from ruminants and non-ruminants (Hanson, R. W. & Ballard, F. J.) 705

Malate–nicotinamide–adenine dinucleotide phosphate oxidoreductase (decarboxylating), activity of, in liver and adipose tissue of embryonic and growing chicks (Goodridge, A. G.) 663

Maleic anhydride, dissociation of methionyl-transfer-ribonucleic acid synthetase as a result of reaction with acetaminophen (Hanson, R. W. & Krebs, H. A.) 162

Maleic anhydride, see 'Malic enzyme', see L-Malate–nicotinamide–adenine dinucleotide phosphate oxidoreductase (decarboxylating)

Malaise, purification and characterization of, from rat liver (Auricchio, F., Bruni, C. B. & Sica, V.) 161

Maltodextrins, branched, action of Streptococcus mutis pullulanase on (Walker, G. J.) 1

Marrow, bone, rat, activities of tricarboxylic acid-cycle enzymes in cells of (Goldwasser, E.) 413

Membrane, chloroplast, tobacco-leaf, permeability of, to adenosine phosphates (Keys, A. J.) 1

Membrane, protoplasm, composition of, from Saccharomyces cerevisiae (Longley, R. P., Rose, A. H. & Knights, B. A.) 401

Menaquinone, effect of anaerobiosis on concentration of, in three species of bacteria (Whistage, G. R. & Threlfall, D. R.) 505

Mesophilic, bacterial, relationship of, to enzymic production of ethylene from (Driedger, L. W. & Mead, A. T.) 675

Methionyl-transfer-ribonucleic acid synthetase, sub-unit structure and specificity of, from Escherichia coli (Bruton, C. J. & Hartley, B. S.) 281

Micrococcus radiodurans, method for rapid lysis of cell wall of, by lysozyme (Driedger, A. A.) 269

Microsomes, liver, rat, ring-fission of cis- and trans-acenaphthen-1,2-diol by (Hopkins, R. P.) 577

Mitochondria, barley-root, separation of, into different fractions by density-gradient centrifugation (Miflin, B. J.) 499

Mitochondria, changes in redox state of nicotinamide–adenine dinucleotides of, during preparation of rat liver homogenate (Krebs, H. A. & Gascoyne, T.) 513

Mitochondria, comparison of effects of NN'-dicyclohexyl-carbodi-imide, oligomycin A and aurovertin on energy-
linked reactions in (Roberton, A. M., Holloway, C. T., Knight, I. G. & Beechey, R. B.) 445
Mitochondria, copper ion-induced swelling of, in vitro (Verity, M. A. & Gambell, J. K.) 289
Mitochondria, liver, rat, two forms of aspartate amino-transferase in (Bhargava, M. M. & Sreenivasan, A.) 619
Mitochondria, mechanism of disulphide reduction by (Skrede, S.) 693
Mitochondria, plant, enzymic formation of haem in (Porra, R. J. & Lascelles, J.) 343
Mitochondria, specific binding of ptericin A in the reduced nicotinamide–adenine dinucleotide dehydrogenase segment of the respiratory chain of (Horgan, D. J. & Casida, J. E.) 153
Monoamine oxidase, distribution of, in pig brain (K. F. & Dawson, A. P.) 95
Morpholine, formation of, from N-triphenylmethylmorpholine in the stomach (Griffiths, M. H.) 731
Mucopolysaccharides, see Glycosaminoglycans
Muscle, diaphragm, (Bhargava, M. M. & Sreenivasan, A.) 577
Muscle, histidine residue of, from N-triphenylmethylmorpholine (Bhargava, M. M. & Sreenivasan, A.) 289
Muscle, liver, effects of partial heptectomy, hepatotoxins and dietary changes on activity of nicotinamide–adenine dinucleotide pyrophosphorylase in (Stirpe, F. & Della Corte, E.) 89
Nucleic acids, hybridization techniques in research on (Colloquium) 29P
Nucleic acids, synthesis of, in stimulated pig lymphocytes (Hardy, D. A. & Ling, N. R.) 23P
Nucleoside triphosphates, α-32P-labelled, rapid general method for preparation of, of very high specific radioactivity (Murray, K. & Wu, R.) 42P
Nucleotide sugars, tissue content and turnover rates of, involved in biosynthesis of glycosaminoglycans in young rat skin (Hardingham, T. E. & Phelps, C. F.) 9
Nucleotides, free, requirement for chelating agents for extraction of, from tobacco leaf (Keys, A. J.) 1
Nucleotides, α-32P-labelled, rapid general method for preparation of, of very high specific radioactivity (Murray, K. & Wu, R.) 42P
5'-Oligoadenyllic acids, phosphorylation of, by adenylate kinase and adenosine triphosphate (Klemperer, H. G. & Harvey, A. E. D.) 101
Oligomycin A, comparison of effects of N'N'-dicyclohexylcarbodi-imide, aurovertin and, on energy-linked reactions in mitochondria and submitochondrial particles (Roberton, A. M., Holloway, C. T., Knight, I. G. & Beechey, R. B.) 445
Oligosaccharides, isolation and characterization of, produced from heparin by bacterial degradation (Dietrich, C. P.) 647
L-Ornithine decarboxylase, presence of, in rat prostate gland (Pegg, A. E. & Williams-Ashman, H. G.) 533
Ornithine–keto acid aminotransferase, development of activity of, in rat liver (Räihä, N. C. R. & Kemokáti, M. P.) 521
Ovotransferrin, comparison of glycopeptides from serum transferrin and, of the hen (Williams, J.) 57
Ovotransferrin, hen's-egg, isoelectric fractionation of (Wen, R. V. & Williams, J.) 69
Ox., adenosine triphosphate citrate lyase and nicotinamide-adenine dinucleotide phosphate-linked malate dehydrogenase in foetal and adult liver from (Hanson, R. W. & Ballard, F. J.) 705
Ox., carboxydrase activities in digestive tract of (Siddons, R. C.) 839
Ox., lysosomal phospholipases A₁ and A₂ of adrenal medulla of (Smith, A. D. & Winkler, H.) 867
Oxidative phosphorylation, see Phosphorylation, oxidative
Oxytocin, interaction of, with lipid monolayers (Snart, R. S. & Sanyal, N. N.) 369
Paddlefish, bile salts of (Haslewod, G. A. D. & Tammar, A. R.) 263
Pancreas, bovine, carboxydrase activities in (Siddons, R. C.) 839
Pancreas, rabbit, potassium ions and secretion of insulin by islets of Langerhans of (Howell, S. L. & Taylor, K. W.) 17
Papain, evidence for histidine in the active site of (Husain, S. S. & Lowe, G.) 885
Papain, location of the active-site histidine residue in primary sequence of (Husain, S. S. & Lowe, G.) 861
Parahæmatins, aggregation of (Gallagher, W. A. & Elliott, W. B.) 131
Passer (P Eum sativum), correlated changes of some enzyme activities and cofactor and substrate concentrations of cotyledon tissue of, during germination (Brown, A. F. & Wray, J. L.) 437
Penicillinase, lifetime of messenger ribonucleic acid for synthesis of, in several strains of bacilli (Yudkin, M. D.) 675
INDEX OF SUBJECTS

Pepsin, affinity labelling of active site of (Badley, R. A. & Teale, F. W. J.) 15 r
Peptides, reaction of 2,4,6-trinitrobenzenesulphonic acid with (Raman, R. R. & Radda, G. K.) 383
*Peptostreptococcus elsentii, biosynthesis of amino acids from lactate by (Somerville, H. J.) 107
Periodate, spectrophotometric method for microdetermination of (Fields, R. & Dixon, H. B.) 883
pH, effect of, on activity of rat liver pyruvate kinase (Bailey, E., Sturpe, F. & Taylor, C. B.) 427
Phage, see Bacteriophage
Phenylalanine, inhibition of human placental alkaline phosphatase by (Ghosh, N. K. & Fishman, W. H.) 779
Phosphatase, alkaline, kidney, reversible inactivation of, at low pH (Butterworth, P. J.) 243
Phosphatase, alkaline, purification and properties of molecular-weight variants of, from human placenta (Ghosh, N. K. & Fishman, W. H.) 779
Phospholipases A1 and A2, lysosomal, of bovine adrenal medulla (Smith, A. D. & Winkler, H.) 867
Phospholipid, comparison of, isolated from Bacillus megaterium with synthetic glucosaminylphosphatidylglycerol (Gur, M. L., Bonsen, P. P. M., Op den Kamps, J. A. F. & van Deenen, L. L. M.) 211
Phospholipids, binary formation of (Illingworth, D. R. & Glover, J.) 48 r
Phospholipids, effects of electrical stimulation on [32P]-orthophosphate incorporation into, of brain slices (Pumphrey, A. M.) 36 r
Phospholipids, metabolism of, by spermatozoa and seminal plasma (Scott, T. W. & Dawson, R. C.) 457
Phospholipids, microsome, of bovine corpus luteum (Scott, T. W., Hansel, W. & Donaldson, L. E.) 317
Phosphopyruvate carboxylase, factors affecting premature induction of, in neonatal rat liver (Yeung, D. & Oliver, I. T.) 325
Phosphorylation of 5'-oligoadenylic acids by adenylyl kinase and adenosine triphosphate (Klemperer, H. G. & Harvey, A. E. D.) 101
Phosphorylation, oxidative, comparison of effects of N'N'-dicyclohexylcarbodi-imide, oligomycin A and aurovertin on, in mitochondria and submicrosomal particles (Robertson, A. M., Holloway, C. T., Knight, I. G. & Beechey, R. B.) 445
Phytohaemagglutinin and acetylation of lymphocyte histones (MacGillivray, A. J. & Monjadino, J. P. V.) 22 r
Phytohaemagglutinin, incorporation of [5-3H]uridine and attachment of cells to glass during activation of lymphocytes induced by (Forsdyke, D. K.) 297
Piericidin A, specific binding of, in the reduced nicotinamide--adenine dinucleotide dehydrogenase segment of the mitochondrial respiratory chain (Horgan, D. J. & Casida, J. E.) 153
Pig, distribution of monoamine oxidase and α-glycerophosphate dehydrogenase in brain of (Tipton, K. F. & Dawson, A. P.) 95
Pium salticum, see Pea
Pityrosporum ovale, fatty acid metabolism of (Wilde, P. F. & Stewart, P. S.) 225
Placenta, human, purification and properties of molecular-weight variants of alkaline phosphatase from (Ghosh, N. K. & Fishman, W. H.) 779
Plants, higher, presence of ribonucleic acid in cell walls of (Phethean, P. D., Jervis, L. & Hallaway, M.) 25
Plasma albumin, see Albumin, plasma
Plasma, corticosterone concentrations in, in the perinatal rat (Holt, P. G. & Oliver, I. T.) 339
Plasma, rabbit, properties of renin substrate in (Ryan, J. W., McKenzie, J. K. & Lee, M. R.) 679
Plasmalogenase, activity of, in normal and demyelinating tissue of the central nervous system (Ansell, G. B. & Spammer, S.) 207
Plasmid, utilization of n-tyrosine and p-hydroxyphenylpyruvate for biosynthesis of, by maize shoots (Threlfall, D. R. & Whistance, G. R.) 24 r
Polymyosin, role of, associated with ribosomes from Bacillus stearothermophilus (Stevens, L. & Morrison, M. R.) 633
Polyamines, single-stranded, relevance of a spectrophotometric study of denaturation of deoxyribonucleic acid in the presence of urea or formaldehyde to the secondary structure of (Cox, R. A. & Kanagalingam, K.) 599
Polypeptide chain, growing, conformation of (Crompton, M. J.) 18 r
Polypeptide hormones, interaction of, with lipid monolayers (Smart, R. S. & Sanyal, N. N.) 369
Polypeptides, effect of 17α-ethynylloestradiol-17β on metabolism of, in the hypotalamus (Firth, D. A. & Hooper, K. C.) 510
Polyribosomes, bacterial, free and membrane-bound (Coleman, G.) 41 r
Polyribosomes, lens, structural aspects of (Benedetti, E. L., Zweers, A. & Bloemendal, H.) 765
Polyribosomes, lens, structural protein contamination in preparations of (Bloom, L. & Zweers, A.) 770
Polyosomes, see Polyribosomes
Polysulphonic acids, aromatic, effect of, on lethal effect of staphylococal α-toxin in mice (Arbuthnott, J. P., Lominski, I. R. W. & Wright, M. B.) 49
Polyuridylic acid, aromatic, kinetic evaluation of, as inhibitors of haemolytic action of staphylococcal α-toxin (Wright, M. R., Arbuthnott, J. P. & Lominski, I. R. W.) 41
Potassium ions and secretion of insulin by islets of Langerhans incubated in vitro (Howell, S. L. & Taylor, K. W.) 17
Potassium ions, effects of varying the cellular and extra-cellular concentrations of sodium ions and, on uptake of glycine by mouse ascites-tumour cells in the presence and absence of sodium cyanide (Eddy, A. A.) 489
Potassium ions, net gain of sodium ions and net loss of, accompanying uptake of glycine by mouse ascites-tumour cells in the presence of sodium cyanide (Eddy, A. A.) 196
Potato cyst-nematode (Heterodera rostochiensis), chemical composition of cyst wall of (Clarke, A. J.) 221
Pregnenolone, metabolism of, in boar testicular and adrenal tissue in vitro (Ahmad, N. & Gower, D. B.) 233
Progestrone, metabolism of, in boar testicular and adrenal tissue in vitro (Ahmad, N. & Gower, D. B.) 233
Proplastidic enzymes, enzymic formation of haem in (Porra, R. J. & Lascelles, J.) 343
Prostate gland, rat, putrescine biosynthesis in (Pegg, A. E. & Williams-Asman, H. G.) 533
Protein component of cell surface of Staphylococcus aureus (James, A. M. & Brewer, J. E.) 257
Protein, effect of actinomycin D on synthesis of, in rat liver parenchymal cells in suspension and liver slices (Shannmugam, G. & Bhargava, P. M.) 741
Protein, factors affecting synthesis of, by fat body of larvae of the blowfly Calliphora erythrocephala (Price, G. M.) 19 r
Protein--protein interaction (Colloquium) 1 r
Protein--protein interaction, optical methods for the study of (Teale, F. W. J.) 1 r
Protein--protein interaction, topography of sites of (Richards, F. M.) 62 r
Protein, synthesis of, associated with induction of nitrate reductase activity in radish cotyledons (Ingle, J.) 715
Proteins, determination of molecular weights of sub-units of, on polyacrylamide gels (Peel, D.) 51r
Proteins, lens, chick, sub-unit structure of (Truman, D. E. S., Clayton, R. M. & Campbell, J. C.) 9r
Proteins, muscle, interactions of (Perry, S. V.) 3r
Ribonuclease, detection for electrophoresis of (Leaback, D. H. & Rutter, A. C.) 19r
Proteins, reaction of 2,4,6-trinitrobenzenesulfonic acid with (Freedman, R. B. & Radda, G. K.) 335
Protoplast metabolism of, in fungi (Cain, R. B., Bilton, R. F. & Darrah, J. A.) 797
Protoplast protoplast, composition of role of o-benzoquinone as a product of metabolism of, by fungi (Bilton, R. F. & Cain, R. B.) 829
Protocatechuic, metabolism of, in fungi (Cain, R. B., Bilton, R. F. & Darrah, J. A.) 797
Protoplast protoplast, reassessment of role of o-benzoquinone as a product of metabolism of, by fungi (Bilton, R. F. & Cain, R. B.) 829
Ribonuclease, messenger, of Escherichia coli M.R.E. 600 (Gray, W. J. H. & Midgley, J. E. M.) 34r
Ribonuclease, messenger, content of, in Escherichia coli M.R.E. 600 (Gray, W. J. H. & Midgley, J. E. M.) 34r
Ribonuclease, messenger, lifetime of, for penicillinase synthesis in several strains of bacilli (Yudkin, M. D.) 675
Ribonuclease polymerase, ribosomes, synthesis of, in rat liver nuclei (Mangan, F. R., Neal, G. E. & Williams, D. C.) 44r
Ribonuclease polymerase, stimulation by reticuloocyte ribosomes of transcription of calf thymus deoxyribonuclease acid by, of Escherichia coli (Hunt, D. & Klemperer, H. G.) 10r
Ribonuclease, RNA, presence of, in cell walls of higher plants (Pethaneh, P. D., Jervis, L. & Hallaway, M.) 25
Ribonuclease, rapidly labelled, in short-term lymphocyte cultures in vitro (Monjardino, J. P. P. V. & MacGillivray, A. J.) 22r
Ribonuclease, ribosomal, co-ordinated synthesis of, from multiple cistrons in Escherichia coli deoxyribonuclease acid (Midgley, J. E. M.) 30r
Ribonuclease acid polymerase, synthesis of, associated with induction of nitrate reductase activity in radish cotyledons (Ingle, J.) 715
Ribonuclease acid, testicular, gonadotrophin-induced, stimulation of fatty acid synthesis in vitro by (Goswami, A., Skipper, J. K. & Williams, W. L.) 147
Ribonuclease acid, messenger and ribosomal, synthesis of, in ribosome-depleted Escherichia coli (Pigott, G. H. & Midgley, J. E. M.) 34r
Ribonuclease acid, synthesis of, of fresh and processed tea leaves (Bhattacharyya, A. K. & Ghosh, J. J.) 121
Ribonuclease acid, synthesis of, of ribosomes, 28s and 18s, alternating arrangement of cistrons for, in genome in Xenopus laevis (Birnstiel, M.) 31r
Ribonuclease acid, messenger, ribosomal, synthesis of, of Escherichia coli in ‘rapidly labelled’ and ‘randomly labelled’ cultures (Pigott, G. H. & Midgley, J. E. M.) 33r
Ribonuclease acid, ribosomal, 16s and 23s, genetic origins of, of Escherichia coli (Avery, R. J. & Midgley, J. E. M.) 33r
Ribosomes, free and membrane-bound, of cotyledons of developing and germinating bean seeds (Payne, P. I. & Boult, D.) 44r
Ribosomes, reticuloocyte, location of messenger on sub-units of (Nolan, R. D. & Steinert, H. R. V.) 29r
Ribosomes, role of polyanymes associated with, from Bacillus stearothermophilus (Stevens, L. & Morrison, M. R.) 633
Ribosomes, skeletal-muscle, effects of catechol and anabolic steroids on amino acid incorporation by (Bullock, G., White, A. M. & Worthington, J.) 417
Ribosomes, synthesis of, in the reduced nicotinamide–adenine dinucleotide dehydrogenase segment of the mitochondrial respiratory chain (Horgan, D. J. & Casida, J. E.) 153
Saccharomyces cerevisiae, composition of proplast membrane of (Longley, R. P., Rose, A. H. & Knights, B. A.) 401
Saccharomyces cerevisiae, mechanism of elaboration of ring B in ergosterol biosynthesis in (Akhtar, M. & Parvez, M. A.) 527
Saccharomyces cerevisiae, mechanism of elaboration of ring B in ergosterol biosynthesis in (Akhtar, M. & Parvez, M. A.) 527
Scrapie, incorporation of nucleic acid and polysaccharide precursors into a post-ribosomal fraction of brain of mice affected with (Adams, D. H. & Caspary, E. A.) 38r
Saccharomyces cerevisiae, composition of proplast membrane of (Longley, R. P., Rose, A. H. & Knights, B. A.) 401
Saccharomyces cerevisiae, mechanism of elaboration of ring B in ergosterol biosynthesis in (Akhtar, M. & Parvez, M. A.) 527
Scrapie, incorporation of nucleic acid and polysaccharide precursors into a post-ribosomal fraction of brain of mice affected with (Adams, D. H. & Caspary, E. A.) 38r
Scrapie, synthesis of nuclear basic proteins in mice and rats affected with (Caspary, E. A. & Sewell, F. M.) 37r
Seminal vesicle, metabolism of phospholipids by (Scott, T. W. & Dawson, R. M. C.) 457
Sephadex, osmotic behaviour of, and its effects on chromatography (Edmond, E., Farquhar, S., Dunstone, J. R. & Ogston, A. G.) 755
Serine, biosynthesis of, from lactate by Pseudomonas aeruginosa (Somervell, H. J.) 107
Serine methyl ester, oxidation of, by periodate (Fields, R. & Dixon, H. B. F.) 883
Serum transferrin, see Transferrin, serum
Shigella dysenteriae, effect of endotoxin of, on plasma albumin and fibrinogen synthesis rates in rabbits (Koj, A. & McFarlane, A. S.) 137
Sialoglycan of cattle retina (Berman, E. R. & Bach, G.) 75
Skeletal muscle, see Muscle, skeletal
Skin, rat, young, tissue content and turnover rates of intermediates in biosynthesis of glycosaminoglycans in (Hartmann, T. E. & Phelps, C. F.) 9
Sodium ions, effects of varying the cellular and extracellular concentrations of potassium ions and, on uptake of glycine by mouse ascites-tumour cells in the presence and absence of sodium cyanide (Eddy, A. A.) 489
Sodium ions, excitatory action of phospholipids and flux of, of isolated tissues from brain (Harvey, J. A. & McIlwain, H.) 269
Sodium ions, net loss of potassium ions and net gain of, accompanying uptake of glycine by mouse ascites-tumour cells in the presence of sodium cyanide (Eddy, A. A.) 195
Spermatozoa, metabolism of phospholipids by (Scott, T. W. & Dawson, R. M. C.) 457
Spermmer and spermidine, role of, associated with ribosomes from Bacillus steatorrhophilus (Stevens, L. & Morrison, M. R.) 633
Staphylococcus aureus, kinetic evaluation of aromatic polysulfonic acids as inhibitors of haemolytic action of α-toxin of (Wright, M. R., Arbuthnott, J. P. & Lominski, I. R. W.) 41
Staphylococcus aureus, protein component of cell surface of (James, A. M. & Brewer, J. E.) 257
Starvation, effects of, on enzyme activities and metabolism of (Uh-14C)glucose in liver of growing chicks (Goodridge, A. G.) 667
Stearic acid, desaturation of, by mammy-gland tissue of the lactating goat and sow (Bickerstaffe, R. & Annison, E. F.) 47r
Steroids, C21 and C19, biosynthesis of androst-16-enes from, in boar testis and adrenal tissue in vitro (Ahmad, N. & Gower, D. B.) 233
Steroids, catabolie and anabolic effects of, on amino acid incorporation by skeletal-muscle ribosomes (Bullock, G., White, A. M. & Worthington, J.) 417
Steroids, 1-oxygenated, partial characterization of, from urine of a hypertensive newborn child (Edwards, R. W. H. & Trafford, D. J. H.) 185
Stilboestrol, inhibition of deoxyribonuclease acidic nucleotidyltransferase by derivatives of (Fahmy, A. R. & Griffiths, K.) 749
Streptococcus mitis, properties of pullulanase of (Walker, G. J.) 223
Sturgeon, bile salts of (Haslewood, G. A. D. & Tammar, A. R.) 263
Sugars, automated procedure for separation and determination of, in hydrolysates of soil (Mundie, C. M., Cheshire, M. V. & Bacon, J. S. D.) 51r
Sulphite, effect of chemical modifications induced in insulin on reactivity of the interchain disulphide bonds towards (Massagli, A., Pennisi, F., Rosa, U., Roncalio-Tesioni, S. & Rossi, C. A.) 247
Suramin, inhibition of haemolytic action of staphylococcal α-toxin by (Wright, M. R., Arbuthnott, J. P. & Lominski, I. R. W.) 41
Tea leaves, fresh and processed, ribonucleic acids of (Bhattacharyya, A. K. & Ghosh, J. J.) 121
Teichoic acids, kinetics of change-over from biosynthesis of, to biosynthesis of teichuronic acids in chemostat cultures of Bacillus subtilis var. niger (Tempest, D. W. & Ellwood, D. C.) 39r
Teichoic acids of Bacillus subtilis var. niger and Bacillus subtilis W23 grown in a chemostat (Ellwood, D. C. & Tempest, D. W.) 40r
Testis, boar, biosynthesis of androst-16-enes from C21 and C19 steroids in mice of (Ahmad, N. & Gower, D. B.) 233
Testis, rat, involvement of hydrogen atoms in mechanism of glucose 6-phosphate→α-myo-inositol 1-phosphate cyclase of (Barnett, J. E. G. & Corina, D. L.) 125
Testis, rat, stimulation of fatty acid synthesis in vitro by gonadotrophin-induced ribonucleic acid in (Goswami, A., Skipper, J. K. & Williams, W. L.) 147
Tetraclin, metabolism of, in rabbits (Elliot, T. H. & Hanam, J.) 551
Thermolysin, use of, in amino acid sequence determination (Ambler, R. P. & Medway, R. J.) 893
Thymidine kinase, activity of, in rat liver during development (Klemperer, H. G. & Haynes, G. R.) 541
Thromboxane, renal effects of, in the dog (Clark, J. D., Zatman, M. L. & Kenny, A. D.) 25r
Tobacco leaf, formation of adenosine 5′-phosphate from adenosine 5′-triphosphate in chloroplasts of (Keys, A. J.) 1
Tocopherols, determination of, in grain and seedlings of wheat (Hall, G. S. & Laidman, D. L.) 465
Tocopherols, pattern and control of metabolism of, in germinating grain of wheat (Hall, G. S. & Laidman, D. L.) 475
α-Toxin, staphylococcal, effect of aromatic polysulfonic acids on lethal effect of, in mice (Arbuthnott, J. P., Lominski, I. R. W. & Wright, M. R.) 49
α-Toxin, staphylococcal, kinetic evaluation of aromatic polysulfonic acids as inhibitors of haemolytic action of (Wright, M. R., Arbuthnott, J. P. & Lominski, I. R. W.) 41
Transamination of N-terminal residue of carboxypeptidase (van Heyningen, S., Tipton, K. F. & Dixon, H. F. B.) 508
Transferrin, serum, comparison of glycopeptides from ovotransferrin and, of the hen (Williams, J.) 57
Triacsinone, effect of, on amino acid incorporation by skeletal-muscle ribosomes (Bullock, G., White, A. M. & Worthington, J.) 417
Triacsinone, effect of, on development of ornithine–keto acid aminotransferase activity in rat liver (Raiha, N. C. R. & Kekomaki, M. P.) 521
Tricarboxylic acid cycle, activities of enzymes of, in rat bone-marrow cells (Goldwasser, C.) 413
Tricarboxylic acid cycle, enzymes of, in Pseudomonas aeruginosa (Somerville, H. J.) 107
Trychoderma viride, glycosphatide of (Lloyd, A. G., Large, F. J., Davies, M., Olavesen, A. H. & Dodgson, K. S.) 393
INDEX OF SUBJECTS

2,4,6-Trinitrobenzenesulphonic acid, reaction of, with amino acids, peptides and proteins (Freedman, R. B. & Radda, G. K.) 383

Triphenylcarbinol, formation of, from N-triphenylmethylmorpholine in the stomach (Griffiths, M. H.) 731

N-Triphenylmethylmorpholine, metabolism of, in the dog and rat (Griffiths, M. H.) 731

Triticum vulgare, see Wheat

Tropocollagen, bovine, and rat (Jackson, D. S.) 587

Tryptophan pyrrolase, induction of, in rat liver (Holt, P. G. & Oliver, I. T.) 333

Tyrosine aminotransferase, effect of anaerobiosis on concentration of, in rat liver supernatant on storage at -20° (Della Corte, E. & Stirpe, F.) 349

Xenopus laevis, alternating arrangement of 28s and 18s ribosomal ribonucleic acid cistrons in genome in (Birnstiel, M.) 31r

Xylanase system of Coniophora cerebella (King, N. J. & Fuller, D. B.) 571

Xylosidase of Coniophora cerebella (King, N. J. & Fuller, D. B.) 571

Yeast (Saccharomyces cerevisiae), composition of protoplast membrane of (Longley, R. P., Rose, A. H. & Knights, B. A.) 401

Yeast (Saccharomyces cerevisiae), mechanism of elaboration of zing 3 in ergosterol biosynthesis in (Akhtar, M. & Parves, M. A.) 327

Ubiquinone, effect of anaerobiosis on concentration of, in three species of bacteria (Whistance, G. R. & Threlfall, D. R.) 505

Ubiquinone, role of, in respiratory chain of Acetobacter xylinum (Benziman, M. & Goldhamer, H.) 311

Urea, spectrophotometric study of denaturation of deoxyribonucleic acid in the presence of (Cox, R. A. & Kanagalingam, K.) 599

Urease, physical and chemical studies of a low-molecular-weight form of (Tanis, R. J. & Naylor, A. W.) 771

[5-3H]Uridine, incorporation of, during activation of lymphocytes induced by phytohaemagglutinin (Forsdyke, D. R.) 297

Urine, partial characterization of 1-oxygenated steroids from, of a hypertensive newborn child (Edwards, R. W. H. & Trafford, D. J. H.) 185

Urine, rabbit, metabolites of tetralin in (Elliott, T. H. & Hanam, J.) 551

Vasotocin, [8-arginine]-, interaction of, with lipid monolayers (Snart, R. S. & Sanyal, N. N.) 368

Vicia faba L., see Bean

Vitamin B₃, increased plasmalogenase activity in demyelinating spinal cords of monkeys deficient in (Ansell, G. B. & Spanner, S.) 207

Wheat (Triticum vulgare), determination of tocopherols and isoprenoid quinones in grain and seedlings of (Hall, G. S. & Laidman, D. L.) 465

Wheat (Triticum vulgare), pattern and control of isoprenoid quinone and tocopherol metabolism in germinating grain of (Hall, G. S. & Laidman, D. L.) 475

Xanthine oxidase, modifications of activity of, in rat liver supernatant on storage at -20° (Della Corte, E. & Stirpe, F.) 349

Xenopus laevis, alternating arrangement of 28s and 18s ribosomal ribonucleic acid cistrons in genome in (Birnstiel, M.) 31r

Xylanase system of Coniophora cerebella (King, N. J. & Fuller, D. B.) 571

β-Xylopyranosides, synthetic, chemical and enzymic degradation of, of L-threonine, L-serine and related peptides (Higham, M., Kent, P. W. & Fisher, D.) 47r

Xylosidase of Coniophora cerebella (King, N. J. & Fuller, D. B.) 571

Yeast (Saccharomyces cerevisiae), composition of protoplast membrane of (Longley, R. P., Rose, A. H. & Knights, B. A.) 401

Yeast (Saccharomyces cerevisiae), mechanism of elaboration of zing 3 in ergosterol biosynthesis in (Akhtar, M. & Parves, M. A.) 327
