

# The Biochemical Journal

# THE BIOCHEMICAL SOCIETY

OFFICERS AND COMMITTEE, 1970-71

*Chairman of the Committee*

G. A. D. HASLEWOOD

*Committee Secretary*  
A. N. DAVISON

*Meetings Secretary*  
H. M. KEIR

*Treasurer*

W. F. J. CUTHBERTSON

*Assistant Treasurer*  
D. F. ELLIOTT

*International Secretary*

A. P. MATHIAS

*Committee*

J. S. D. BACON

W. BARTLEY

R. B. BEECHEY

R. M. C. DAWSON

D. T. ELMORE

R. HOFFENBERG\*†

A. KORNER

H. A. KREBS

D. J. MANNERS\*†

S. V. PERRY

D. C. PHILLIPS

P. J. RANDLE

D. S. ROBINSON\*†

R. M. S. SMELLIE§

D. G. WALKER\*†

\* *Ex officio* Member of Committee.

† Representative of Editorial Board of the *Biochemical Journal*.

‡ Representative of Editorial Board of *Clinical Science*.

§ Symposium Organizer.

**The Biochemical Society** exists to advance the science of biochemistry through meetings and publications. Eleven meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP (01-242 1076/7/8/9).

**The *Biochemical Journal*** is published and distributed by the Biochemical Society. It is published twice monthly, in four or more volumes per year. It is planned that five volumes will appear in 1970. The index for each volume is published separately.

**Subscriptions to the *Biochemical Journal*.** For non-members of the Biochemical Society the subscription to the *Journal* at the present rate of publication is £45 per year (£9 per volume). For non-members in the U.S.A. the subscription is \$108 per year (\$22 per volume). All subscriptions are payable in advance at the time of ordering. Orders and subscriptions should be sent to the Biochemical Society (Publications), 7 Warwick Court, London WC1R 5DP.

**Claims** regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address in the preceding paragraph. No claims can be entertained if they are received later than three months after the date of posting of the *Journal*.

**Back Numbers.** Enquiries for volumes 1-19 should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts may be obtained on application to Walter J. Johnson Ltd., Berkeley Square House, Berkeley Square, London W1X 6BA, or to the Biochemical Society.

**Advertisements.** Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP (01-242 1076/7/8/9). Copy is required eight weeks before publication date. Rate cards are available on request.

**Microfilms.** Volumes 1-61 (1906-1955) have been recorded on microfilm by Micro Methods Ltd., East Ardsley, Wakefield, Yorks. Details are available from the firm or the Biochemical Society.

	PAGE
Use of electrofocusing for the detection of carrier proteins and their differentiation from antibodies. By S. LEWIN . . . . .	37 P
Countercurrent studies of porcine liver porphyrins. By S. G. SMITH, R. V. BELCHER and R. MAHLER . . . . .	38 P
Two techniques for the study of hepatic membrane-containing fractions. By A. A. EL-AASER, K. A. NORRIS and E. REID . . . . .	38 P
The circular dichroism of deoxyribonucleic acid and deoxyribonucleohistone and the effect of thermal denaturation. By P. HENSON and I. O. WALKER . . . . .	39 P
Molecular models for macromolecules: a new concept for teaching and research. By I. SMITH and M. J. SMITH . . . . .	40 P
Transport pathway for glycine betaine in rat kidney cortex <i>in vitro</i> . By D. F. EVERED and P. B. NUNN . . . . .	40 P
Transport pathway for glycine betaine in rabbit kidney <i>in vivo</i> . By C. S. FRANKLIN, D. F. EVERED and P. B. NUNN . . . . .	41 P
The effect of circulating lactose on brain metabolism in the neonatal rat. By A. McLEAN and B. E. CLAYTON . . . . .	41 P
A flow system for the superfusion and stimulation of isolated mammalian tissues. By H. McILWAIN and D. JONES . . . . .	42 P

## PAPERS ACCEPTED FOR PUBLICATION

- Isolation of bacilysin and a new amino acid from culture filtrates of *Bacillus subtilis*. By J. E. WALKER and E. P. ABRAHAM
- The structure of bacilysin and other products of *Bacillus subtilis*. By J. E. WALKER and E. P. ABRAHAM
- The structure of anticapsin, a new biologically active metabolite of *Streptomyces griseoplanus*. By N. NEUSS, B. B. MOLLOY, R. SHAH and N. DELAHIGUERA
- Rat mammary-gland acetyl-coenzyme A carboxylase. Interaction with milk fatty acids. By A. L. MILLER, M. E. GEROCH and H. R. LEVY
- The physiological role of liver alcohol dehydrogenase. By H. A. KREBS and J. R. PERKINS
- The pepsins from human gastric mucosal extracts. By D. J. ETHERINGTON and W. H. TAYLOR
- The proteolytic action of Arvin on human fibrinogen. By M. R. EWART, M. W. C. HATTON, J. M. BASFORD and K. S. DODGSON
- The susceptibility of *N*-acetyl-*S*-alkyl- and *N*-acetyl-*S*-aryl-cysteine ethyl esters to chymotryptic hydrolysis. By A. P. DAMOGLU, H. LINDLEY and I. W. STAPLETON
- Isolation and properties of chondroitin sulphates from bovine heart valves. By D. A. LOWTHER, B. N. PRESTON and F. A. MEYER.
- The action of streptomycin in a mutant of *Escherichia coli* with increased sensitivity to the antibiotic. By G. TURNOCK
- Sporulation in *Bacillus subtilis*. Correlation of biochemical events with morphological changes in asporogenous mutants. By W. M. WAITES, D. KAY, I. W. DAWES, D. A. WOOD, S. C. WARREN and J. MANDELSTAM
- Nucleotide 'maps' of digests of deoxyribonucleic acid. By K. MURRAY
- Secretion of cell-wall glycoproteins by yeast protoplasts. Effect of 2-deoxy-D-glucose and cycloheximide. By V. FARKAŠ, A. SVOBODA and Š. BAUER
- The use of protamine to study [6,7-<sup>3</sup>H]oestradiol-17 $\beta$  binding in rat uterus. By A. W. STEGGLES and R. J. B. KING
- The recombination of dimers of immunoglobulin peptide chains. By G. T. STEVENSON and K. J. DORRINGTON
- Purification and some properties of a non-haem-iron protein from the bacteroids of soya-bean (*Glycine max* Merr.) nodules. By B. KOCH, P. WONG, S. A. RUSSELL, R. HOWARD and H. J. EVANS
- Autolysis of cell walls of *Bacillus stearothermophilus* B65 and the chemical structure of the peptidoglycan. By W. D. GRANT and A. J. WICKEN
- Purification and amino acid sequence of melanocyte-stimulating hormone from the dogfish *Squalus acanthias*. By P. J. LOWRY and A. CHADWICK
- The characterization of a protein-polysaccharide isolated from Kurloff cells of the guinea pig. By M. F. DEAN and H. MUIR

# NOTES FOR CONTRIBUTORS

It is the policy of the *Biochemical Journal* to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary or inconclusive experiments should not generally be described.

For detailed instructions on the preparation of papers contributors should refer to *Policy of the Journal and Instructions to Authors* [*Biochem. J.* (1970), **116**, 1] (obtainable from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP, price 3s. 0d. post free). In general the *Biochemical Journal* uses the recommended SI (Système Internationale) symbols [see *Symbols, Signs and Abbreviations Recommended for British Scientific Publications* (1969) (London: The Royal Society)]. For biochemical nomenclature authors should as far as possible follow the Tentative Rules and Proposals of the IUPAC-IUB Commission on Biochemical Nomenclature [see *Biochem. J.* (1970), **116**, 10]. For chemical nomenclature the system of the Chemical Society should be used [see *Handbook for Chemical Society Authors* (1961), pp. 46-163]. The *Biochemical Journal* uses as a standard of spelling the *Concise Oxford Dictionary of Current English* (Oxford: Clarendon Press).

Two types of paper are accepted by the editors:  
**Full-length papers.** Papers submitted for publication should be sent together with an extra copy of the synopsis to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent.

Papers submitted should be written concisely. Typescripts that are not concise or do not conform to the conventions of the *Biochemical Journal* will be returned to the authors for revision. If a paper that has been returned to an author for revision is not resubmitted within one month, it will, on resubmission, be deemed to be a new paper and the date of receipt altered accordingly. A revised paper containing a significant amount of new material will also be redated.

Submission of a paper to the Editorial Board implies that it reports unpublished work, that it is not under consideration for publication elsewhere, and that if accepted for the *Biochemical Journal* it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Papers should be headed by a full and informative title (it should be borne in mind that scientific information services may index only the key words that appear in the title), by the names of the authors and by the name and address of the establishment where the work was performed. Details of financial support may appear in the acknowledgements at the end of the paper.

Before preparing papers authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. The need for revision of badly prepared typescripts or diagrams will delay publication. Papers should be in double-spaced typing throughout (including references and legends of tables and figures) on sheets of uniform size with wide margins. The top copy should be submitted.

Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the Journal. Sufficient information must be included to permit repetition of the experimental work. Theoretical contributions will be considered equally with papers dealing with experimental work.

**Short Communications.** Typescripts should be submitted *in duplicate*, written in English, and conform strictly to the form of the Journal as far as spelling and abbreviations are concerned. Such communications must not exceed 1200 words of text, but in addition may include either one table, typed on a separate sheet, or one figure, drawn according to the rules of the Journal. If no figure or table is included the text may be expanded to 1400 words. Communications should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Papers should be complete in themselves; (1) the methods used in experimental work must be adequately described or sufficient references given to allow repetition of the work; (2) sufficient indication of the results of experimental work must be included to justify the claims made.
