

# **The Biochemical Journal**

# THE BIOCHEMICAL SOCIETY

OFFICERS AND COMMITTEE, 1970-71

*Chairman of the Committee*

G. A. D. HASLEWOOD

*Committee Secretary*

A. N. DAVISON

*Meetings Secretary*

H. M. KEIR

*Treasurer*

W. F. J. CUTHBERTSON

*Assistant Treasurer*

D. F. ELLIOTT

*International Secretary*

A. P. MATHIAS

*Committee*

J. S. D. BACON

W. BARTLEY

R. B. BEECHEY

R. M. C. DAWSON

D. T. ELMORE

R. HOFFENBERG\*†

A. KORNER

H. A. KREBS

D. J. MANNERS\*†

S. V. PERRY

D. C. PHILLIPS

P. J. RANDLE

D. S. ROBINSON\*†

R. M. S. SMELLIE§

D. G. WALKER\*†

\* *Ex officio* Member of Committee.

† Representative of Editorial Board of the *Biochemical Journal*.

‡ Representative of Editorial Board of *Clinical Science*.

§ Symposium Organizer.

**The Biochemical Society** exists to advance the science of biochemistry through meetings and publications. Eleven meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP (01-242 1076/7/8/9).

The *Biochemical Journal* is published and distributed by the Biochemical Society. It is published twice monthly, in four or more volumes per year. It is planned that five volumes will appear in 1970. The index for each volume is published separately.

**Subscriptions to the *Biochemical Journal*.** For non-members of the Biochemical Society the subscription to the Journal at the present rate of publication is £45 per year (£9 per volume). For non-members in the U.S.A. the subscription is \$108 per year (\$22 per volume). All subscriptions are payable in advance at the time of ordering. Orders and subscriptions should be sent to the Biochemical Society (Publications), 7 Warwick Court, London WC1R 5DP.

**Claims** regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address in the preceding paragraph. No claims can be entertained if they are received later than three months after the date of posting of the Journal.

**Back Numbers.** Enquiries for volumes 1-19 should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts may be obtained on application to Walter J. Johnson Ltd., Berkeley Square House, Berkeley Square, London W1X 6BA, or to the Biochemical Society.

**Advertisements.** Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP (01-242 1076/7/8/9). Copy is required eight weeks before publication date. Rate cards are available on request.

**Microfilms.** Volumes 1-61 (1906-1955) have been recorded on microfilm by Micro Methods Ltd., East Ardsley, Wakefield, Yorks. Details are available from the firm or the Biochemical Society.

	PAGE		PAGE
The subcellular localization of di- and tri-peptide hydrolase activity in guinea-pig small intestine. By <b>T. J. Peters</b> . . . . .	195	The preparation and properties of yeast $\beta$ -fructofuranosidase chemically attached to polystyrene. By <b>H. Filippusson</b> and <b>W. E. Hornby</b> .	215
SHORT COMMUNICATION			
The effect of feeding with a tryptophan-free amino acid mixture on rat liver magnesium ion-activated deoxyribonucleic acid-dependent ribonucleic acid polymerase. By <b>A. R. Henderson</b> . . . . .	205	Metabolism of angiotensin I in the pulmonary circulation. By <b>J. W. Ryan</b> , <b>J. M. Stewart</b> , <b>W. P. Leary</b> and <b>J. G. Ledingham</b> . . . . .	221

## INDEX TO AUTHORS

	PAGE		PAGE
Allan, D. . . . .	133	Manchester, K. L. . . . .	79, 95
Bacon, J. S. D. . . . .	67	Mowbray, J. . . . .	171
Bailey, E. . . . .	49	Okamoto, K. . . . .	25, 37
Boldingh, J. . . . .	55	Ottaway, J. H. . . . .	171
Brosnan, J. T. . . . .	105	Peters, T. J. . . . .	195
Burton, K. . . . .	117, 125	Quastel, J. H. . . . .	25, 37
Charlwood, P. A. . . . .	113	Rodnight, R. . . . .	1, 15
Crumpton, M. J. . . . .	133	Rose, M. S. . . . .	151
Edwards, P. A. . . . .	61	Roy, B. P. . . . .	177
Filippusson, H. . . . .	215	Ryan, J. W. . . . .	221
Flint, A. P. F. . . . .	145	Shooter, K. V. . . . .	61
Goldfarb, P. S. G. . . . .	15	Sneyd, J. G. T. . . . .	187
Gordon, A. H. . . . .	67	Stewart, J. M. . . . .	221
Hems, D. A. . . . .	105	Stokes, E. . . . .	159
Henderson, A. R. . . . .	205	Tanner, P. J. . . . .	159
Hornby, W. E. . . . .	215	Taylor, I. F. . . . .	67
Hughes, R. C. . . . .	159	Thomas, G. A. . . . .	117, 125
Jones, D. . . . .	67	Thomson, A. R. . . . .	177
Laws, J. F. . . . .	177	Varney, N. F. . . . .	117, 125
Leary, W. P. . . . .	221	Veldink, G. A. . . . .	55
Ledingham, J. G. . . . .	221	Vliegthart, J. F. G. . . . .	55
Lock, E. A. . . . .	151	Webley, D. M. . . . .	67
Lockwood, E. A. . . . .	49	Wimhurst, J. M. . . . .	79, 95
Loten, E. G. . . . .	187		

## PAPERS ACCEPTED FOR PUBLICATION

- Mass-spectrometric study of the azopigments obtained from bile pigments with diazotized ethyl anthranilate. By F. COMPERNOLLE, F. H. JANSEN and K. P. M. HEIRWEGH
- Heterogeneity of bile pigment conjugates as revealed by chromatography of their ethyl anthranilate azopigments. By K. P. M. HEIRWEGH, G. P. VAN HEES, P. LEROY, F. P. VAN ROY and F. H. JANSEN
- Inner- and outer-membrane enzymes of mitochondria during liver regeneration. By A. R. L. GEAR
- Zymogen secretion and phospholipid metabolism in the pancreas. Phospholipids of the zymogen granule. By D. A. WHITE and J. N. HAWTHORNE
- Flavin-photosensitized reactions of retinol and stilbene. By A. GORDON-WALKER and G. K. RADDA
- Occurrence and formation of the *N*-methyl-lysines in myosin and the myofibrillar proteins. By M. F. HARDY, C. I. HARRIS, S. V. PERRY and D. STONE
- Measurement of uridine diphosphate glucuronic acid concentrations and synthesis in animal tissues. By V. ZHIVKOV
- The purification and chemical composition of the lipopolysaccharide of *Pseudomonas alcaligenes*. By B. A. KEY, G. W. GRAY and S. G. WILKINSON
- Studies on phytochrome. Two photoreversible chromoproteins from etiolated oat seedlings. By T. S. WALKER and J. L. BAILEY
- Studies on phytochrome. Some properties of electrophoretically pure phytochrome. By T. S. WALKER and J. L. BAILEY
- The synthesis of exopolysaccharide by *Klebsiella aerogenes* membrane preparations, and the involvement of lipid intermediates. By I. W. SUTHERLAND and M. NORVAL
- Polyamines and amino acid incorporation *in vitro* into microsomes of rat cerebral cortex. By P. P. GIORGI
- Effects of beryllium on deoxyribonucleic acid-synthesizing enzymes in regenerating rat liver. By H. P. WITSCHI
- The identity of a myelin-like fraction isolated from developing brain. By H. C. AGRAWAL, N. L. BANIK, A. H. BONE, A. N. DAVISON, E. F. MITCHELL and M. SPOHN
- Reactive phosphate ester of the carcinogen 2-(*N*-hydroxy)acetamidofluorene. By P. LOTLIKAR and M. B. WASSERMAN
- The use of zonal centrifugation to study membrane formation during the life cycle of mammalian cells. Synthesis of 'marker' enzymes and other components of cellular organelles. By A. M. H. WARMSLEY, B. PHILLIPS and C. A. PASTERNAK
- Protein-polysaccharide of chicken cartilage and chondrocyte cell cultures. By H. J. SHULMAN and K. MEYER
- Preparation, proteolysis and reversible oxidation of highly purified *Azotobacter vinelandii* polynucleotide phosphorylase. By A. T. GAJDA, G. ZAROR DE BEHRENS and P. S. FITT
- Effect of prostaglandin E1 alone and in combination with theophylline or aspirin on collagen-induced platelet aggregation and on platelet nucleotides including adenosine 3':5'-cyclic monophosphate. By G. BALL, G. G. BRERETON, M. FULWOOD, D. M. IRELAND and P. YATES
- The 503nm pigment of *Escherichia coli*. By J. R. KAMITAKAHARA and W. J. POLGLASE
- N*-(5'-Phosphoribosyl)anthranilate isomerase-indol-3-ylglycerol phosphate synthetase of tryptophan biosynthesis. Relationship between the two activities of the enzyme from *Escherichia coli*. By T. E. CREIGHTON
- Chemical properties of guinea-pig immunoglobins  $\gamma_1G$ ,  $\gamma_2G$  and  $\gamma M$ . By R. G. Q. LESLIE and S. COHEN

# NOTES FOR CONTRIBUTORS

It is the policy of the *Biochemical Journal* to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary or inconclusive experiments should not generally be described.

For detailed instructions on the preparation of papers contributors should refer to *Policy of the Journal and Instructions to Authors* [*Biochem. J.* (1970), 116, 1] (obtainable from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP, price 3s. 0d. post free). In general the *Biochemical Journal* uses the recommended SI (Système Internationale) symbols [see *Symbols, Signs and Abbreviations Recommended for British Scientific Publications* (1969) (London: The Royal Society)]. For biochemical nomenclature authors should as far as possible follow the Tentative Rules and Proposals of the IUPAC-IUB Commission on Biochemical Nomenclature [see *Biochem. J.* (1970), 116, 10]. For chemical nomenclature the system of the Chemical Society should be used [see *Handbook for Chemical Society Authors* (1961), pp. 46-163]. The *Biochemical Journal* uses as a standard of spelling the *Concise Oxford Dictionary of Current English* (Oxford: Clarendon Press).

Two types of paper are accepted by the editors: **Full-length papers.** Papers submitted for publication should be sent together with an extra copy of the synopsis to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent.

Papers submitted should be written concisely. Typescripts that are not concise or do not conform to the conventions of the *Biochemical Journal* will be returned to the authors for revision. If a paper that has been returned to an author for revision is not resubmitted within one month, it will, on resubmission, be deemed to be a new paper and the date of receipt altered accordingly. A revised paper containing a significant amount of new material will also be redated.

Submission of a paper to the Editorial Board implies that it reports unpublished work, that it is not under consideration for publication elsewhere, and that if accepted for the *Biochemical Journal* it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Papers should be headed by a full and informative title (it should be borne in mind that scientific information services may index only the key words that appear in the title), by the names of the authors and by the name and address of the establishment where the work was performed. Details of financial support may appear in the acknowledgements at the end of the paper.

Before preparing papers authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. The need for revision of badly prepared typescripts or diagrams will delay publication. Papers should be in double-spaced typing throughout (including references and legends of tables and figures) on sheets of uniform size with wide margins. The top copy should be submitted.

Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the Journal. Sufficient information must be included to permit repetition of the experimental work. Theoretical contributions will be considered equally with papers dealing with experimental work.

**Short Communications.** Typescripts should be submitted *in duplicate*, written in English, and conform strictly to the form of the Journal as far as spelling and abbreviations are concerned. Such communications must not exceed 1200 words of text, but in addition may include either one table, typed on a separate sheet, or one figure, drawn according to the rules of the Journal. If no figure or table is included the text may be expanded to 1400 words. Communications should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Papers should be complete in themselves; (1) the methods used in experimental work must be adequately described or sufficient references given to allow repetition of the work; (2) sufficient indication of the results of experimental work must be included to justify the claims made.
