THE BIOCHEMICAL SOCIETY

OFFICERS AND COMMITTEE, 1970-71

Chairman of the Committee

G. A. D. HASLEWOOD

Committee Secretary

A. N. DAVISON

Meetings Secretary

H. M. KEIR

International Secretary

A. P. MATHIAS

Treasurer

W. F. J. CUTHBERTSON

Assistant Treasurer

D. F. ELLIOTT

Committee

J. S. D. BACON

W. BARTLEY

R. B. BEECHEY

R. M. C. DAWSON

D. T. ELMORE

R. HOFFENBERG*†

A. KORNER

H. A. KREBS

D. J. MANNERS*†

S. V. PERRY

D. C. PHILLIPS

P. J. RANDLE

D. S. ROBINSON*†

R. M. S. SMELLIE§

D. G. WALKER*†

* *Ex officio* Member of Committee.

† Representative of Editorial Board of the *Biochemical Journal*.

‡ Representative of Editorial Board of *Clinical Science*.

§ Symposium Organizer.

The **Biochemical Society** exists to advance the science of biochemistry through meetings and publications. Eleven meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP (01-242 1076/7/8/9).

The *Biochemical Journal* is published and distributed by the Biochemical Society. It is published twice monthly, in four or more volumes per year. It is planned that five volumes will appear in 1971. The index for each volume is published separately.

Subscriptions to the *Biochemical Journal*. For non-members of the Biochemical Society the subscription to the Journal at the present rate of publication is £45 per year (£9 per volume). For non-members in the U.S.A. the 1971 subscription is \$110 per year (\$22 per volume). All subscriptions are payable in advance at the time of ordering. Orders and subscriptions should be sent to the Biochemical Society (Publications), 7 Warwick Court, London WC1R 5DP.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address in the preceding paragraph. No claims can be entertained if they are received later than three months after the date of posting of the Journal.

Back Numbers. Enquiries for volumes 1-19 should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts may be obtained on application to Walter J. Johnson Ltd., Berkeley Square House, Berkeley Square, London W1X 6BA, or to the Biochemical Society.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP (01-242 1076/7/8/9). Copy is required eight weeks before publication date. Rate cards are available on request.

Microfilms. Volumes 1-89 (1906-1963) have been recorded on microfilm by Micro Methods Ltd., East Ardsley, Wakefield, Yorks. Details are available from the firm or the Biochemical Society.

	PAGE	PAGE
A simple and sensitive saturation assay method for the measurement of adenosine 3':5'-cyclic monophosphate. By B. L. Brown, J. D. M. Albano, R. P. Ekins, A. M. Sgherzi and W. Tampion	561	The nature of the 'cytoplasmic 3-hydroxy-butyrate dehydrogenase' from sheep kidney. By D. H. Williamson and P. Kuenzel 569
Rapid-sweep polarography of cystine. By W. Lee	563	Antibiotic production and sporulation in <i>Bacillus subtilis</i> . By J. E. Walker 571
Competitive interaction of <i>Escherichia coli</i> leucyl-transfer-ribonucleic acids with the enzyme-leucyladenylate complex. By M. Kondo	567	A new type of reagent for the detection of molecular varieties of some hydrolytic enzymes: detection of β -amylase isoenzymes. By M. Ceska 575

Proceedings of The Biochemical Society

	PAGE
Effects of monoamine oxidase inhibitors on qualitative alterations ('transformation') of the catalytic properties of amine oxidases. By V. Z. GORKIN, Zh. I. AKOPYAN, I. V. VERYOVKINA, L. N. STESINA and M. M. ABDEL SAMED	31 P
The reaction of monoamine oxidase with phenethylhydrazine. By K. F. TIPTON	33 P
Monoamine oxidase: multiple forms and selective inhibitors. By M. B. H. YOUNDIM, G. G. S. COLLINS and M. SANDLER	34 P
Monoamine oxidase inhibitors and brain monoamines in clinical conditions. By C. M. B. PARE	36 P
Inhibition of rat and mouse brain monoamine oxidases by (+)-amphetamine. By A. L. GREEN	37 P
The inactivation of monoamine oxidase by clorgyline (M&B 9302). By C. J. COULSON	38 P
A monoamine oxidase-tetrazolium reaction for locating aromatic amino acid decarboxylases in electrophoretic media. By K. N. ANTONAS, W. F. COULSON and J. B. JEPSON	38 P
Calf <i>N</i> -acetylhexosaminidases. By T. W. JORDAN and D. ROBINSON	39 P
The effects of salicylate of the activity of tryptophan pyrrolase in rat liver. By A. A.-B. BADAWY and M. J. H. SMITH	40 P
Effects of propyl gallate and other antioxidants on rat liver microsomal nicotinamide-adenine dinucleotide phosphate-linked cytochrome <i>c</i> reductase. By T. F. SLATER and M. V. TORRIELLI	40 P
The biochemical mode of action of the fasciolicides nitroxylin, hexachlorophane and oxyclozanide. By J. R. CORBETT and J. GOOSE	41 P
The effect of organic anions on the biliary excretion of tri[¹⁴ C]methyl-(3-hydroxyphenyl)ammonium <i>O</i> -glucuronide. By T. N. CALVEY and D. J. BACK	41 P
Biochemical effects of the hypoglycaemic compound diphenyleneiodonium in rat liver mitochondria: inhibition of adenosine triphosphate synthesis. By P. C. HOLLAND and H. S. A. SHERRATT	42 P
Biochemical effects of the hypoglycaemic compound diphenyleneiodonium in rat liver mitochondria: anion-hydroxyl ion exchange. By P. C. HOLLAND and H. S. A. SHERRATT	42 P
The isolation of acidic nuclear proteins from <i>Physarum polycephalum</i> . By M. Y. ALI KHAN and S. SHALL	43 P

PAPERS ACCEPTED FOR PUBLICATION

- Identification in skeletal muscle of a distinct extracellular pool of amino acids, and its role in protein synthesis. By R. C. HIDER, E. B. FERN and D. R. LONDON
- The purification and properties of the L-serine O-sulphate-degrading system of pig liver. By N. TUDBALL, P. THOMAS and R. BAILEY-WOOD
- Release of intestinal surface-membrane glycoproteins associated with enzyme activity by brief digestion with papain. By G. G. FORSTNER
- Aspects of glycine and serine biosynthesis during growth of *Pseudomonas* AM1 on C₁ compounds. By W. HARDER and J. R. QUAYLE
- The biosynthesis of serine and glycine in *Pseudomonas* AM1 with special reference to growth on carbon sources other than C₁ compounds. By W. HARDER and J. R. QUAYLE
- The interaction of concanavalin A with blood-group-substance glycoproteins from human secretions. By A. E. CLARKE and M. A. DENBOROUGH
- The acetylation of insulin. By G. D. LINDSAY and S. SHALL
- Some properties of mitochondria isolated from the flight muscle of the periodical cicada, *Magicicada septendecim*. By R. G. HANSFORD
- The enzymic degradation of alkyl-substituted gentisates, maleates and malates. By D. J. HOPPER, P. J. CHAPMAN and S. DAGLEY
- Gentisic acid and its 3- and 4-methyl-substituted homologues as intermediates in the bacterial degradation of *m*-cresol, 3,5-xyleneol and 2,5-xyleneol. By D. J. HOPPER and P. J. CHAPMAN
- Metabolic studies on retinoic acid in the rat. By P. R. SUNDARESAN and H. N. BHAGAVAN
- Egg proteins in cod serum. Natural occurrence and induction by injections of oestradiol 3-benzoate. By P. A. PLACK, D. J. PRITCHARD and N. W. FRASER
- Incorporation of L-[¹⁴C]leucine into egg proteins by liver slices from cod. By P. A. PLACK and N. W. FRASER
- The amino acid sequences of erabutoxins, neurotoxic proteins of sea-snake (*Laticauda semifasciata*) venom. By S. SATO and N. TAMIYA
- The disulphide bonds of erabutoxin a, a neurotoxic protein of a sea-snake (*Laticauda semifasciata*) venom. By Y. ENDO, S. SATO, S. ISHII and N. TAMIYA
- Protein phosphokinase reactions in mammalian testis. Stimulatory effects of adenosine 3':5'-cyclic monophosphate on the phosphorylation of basic proteins. By A. H. REDDI, L. L. EWING and H. G. WILLIAMS-ASHMAN
- Ketone-body utilization by adult and suckling rat brain *in vivo*. By R. A. HAWKINS, D. H. WILLIAMSON and H. A. KREBS
- Relationship between alkaline phosphatase and neomycin formation in *Streptomyces fradiae*. By M. K. MAJUMDAR and S. K. MAJUMDAR
- The vectorial release of nascent immunoglobulin peptides. By M. J. BEVAN
- The purification and properties of microsomal palmitoyl-coenzyme A synthetase. By J. BAR-TANA, G. ROSE and B. SHAPIRO
- Enzymic formation of *p*-hydroxybenzoate from *p*-hydroxycinnamate. By S. RANGANATHAN and T. RAMASARMA
- Reactions of D-glyceraldehyde 3-phosphate dehydrogenase facilitated by oxidized nicotinamide-adenine dinucleotide. By D. R. TRENTHAM
- Rate-determining processes and the number of simultaneously active sites of D-glyceraldehyde 3-phosphate dehydrogenase. By D. R. TRENTHAM

MEMORIAL UNIVERSITY OF NEWFOUNDLAND

St. John's, Newfoundland, Canada

DEPARTMENT OF BIOCHEMISTRY

Applications are invited for appointment at the *ASSISTANT* or *ASSOCIATE PROFESSOR* level in the field of Comparative Biochemistry with special emphasis on marine life. The effective date of the appointment will be September 1, 1971.

The position requires teaching undergraduate and graduate students and the development of an active research programme.

Send curriculum vitae and names of three referees to Dr. L. A. W. Feltham, Professor and Head, Department of Biochemistry, Memorial University of Newfoundland, St. John's, Newfoundland, Canada.

Closing date for receipt of applications will be *March 15, 1971*.

NOTES FOR CONTRIBUTORS

It is the policy of the *Biochemical Journal* to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Theoretical contributions will be considered equally with papers dealing with experimental work. Preliminary or inconclusive experiments should not generally be described.

For detailed instructions on the preparation of papers contributors should refer to *Policy of the Journal and Instructions to Authors* [*Biochem. J.* (1971), **121**, 1] (obtainable from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP, price 15p post free). In general the *Biochemical Journal* uses the recommended SI (Système Internationale) symbols [see *Symbols, Signs and Abbreviations Recommended for British Scientific Publications* (1969) (London: The Royal Society)]. For biochemical nomenclature authors should as far as possible follow the Tentative Rules and Proposals of the IUPAC-IUB Commission on Biochemical Nomenclature [see *Biochem. J.* (1971), **121**, 11]. For chemical nomenclature the IUPAC Rules should be followed [see *Biochem. J.* (1971), **121**, 11]. The *Biochemical Journal* uses as a standard of spelling the *Concise Oxford Dictionary of Current English* (Oxford: Clarendon Press).

Two types of paper are accepted by the editors: **Full-length papers.** Papers submitted for publication should be sent together with an extra copy of the synopsis to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent.

Papers submitted should be written concisely. Typescripts that are not concise or do not conform to the conventions of the *Biochemical Journal* will be returned to the authors for revision. If a paper that has been returned to an author for revision is not resubmitted within one month, it will, on resubmission, be deemed to be a new paper and the date

of receipt altered accordingly. A revised paper containing a significant amount of new material will also be redated.

Submission of a paper to the Editorial Board implies that it reports unpublished work, that it is not under consideration for publication elsewhere, and that if accepted for the *Biochemical Journal* it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Papers should be headed by a concise but informative title, by the names of the authors and by the name and address of the establishment where the work was performed. Details of financial support may appear in the acknowledgements at the end of the paper.

Before preparing papers authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. Papers should be in double-spaced typing throughout (including references and legends of tables and figures) on sheets of uniform size with wide margins. The top copy should be submitted. It cannot be overemphasized that the need for revision of badly prepared typescripts inevitably leads to delays in publication.

Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the Journal. Sufficient information must be included to permit repetition of the experimental work.

Short Communications. Typescripts should be submitted *in duplicate*, written in English, and conform strictly to the form of the Journal as far as spelling and abbreviations are concerned. Such communications must not exceed 1200 words of text, but in addition may include either one table, typed on a separate sheet, or one figure, drawn according to the rules of the Journal. If no figure or table is included the text may be expanded to 1400 words. Communications should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Papers should be complete in themselves; (1) the methods used in experimental work must be adequately described or sufficient references given to allow repetition of the work; (2) sufficient indication of the results of experimental work must be included to justify the claims made.
