

## CONTENTS OF VOLUME 121, No. 4, 1971

	PAGE		PAGE
IUPAC-IUB Commission on Biochemical Nomenclature. Abbreviations and symbols for the description of the conformation of polypeptide chains. Tentative Rules (1969).	577	Study of soluble lipoprotein in rat liver mitochondria. By <b>S. V. Koppikar, P. Fatterpaker and A. Sreenivasan</b> . . . . .	643
Micro method for determination of reactive carbonyl groups in proteins and peptides, using 2,4-dinitrophenylhydrazine. By <b>R. Fields and H. B. F. Dixon</b> . . . . .	587	Nicotinamide nucleotide synthesis in regenerating rat liver. By <b>G. M. Ferris and J. B. Clark</b> . . . . .	655
Purification of ribonuclease T <sub>1</sub> by diethylaminoethylcellulose chromatography. By <b>R. Fields, H. B. F. Dixon, G. R. Law and C. Yui</b> . . . . .	591	Studies on type II glycogenosis. Effects of cortisone derivatives on acid $\alpha$ -glucosidase. By <b>E. J. Bourne, K. Clarke, J. B. Pridham and J. J. M. Rowe</b> . . . . .	663
Protein-bound phosphorylserine in acid hydrolysates of brain tissue. The determination of [ <sup>32</sup> P]phosphorylserine by ion-exchange chromatography and electrophoresis. By <b>D. A. Jones and R. Rodnight</b> . . . . .	597	The reaction of aralkyl sulphate esters with glutathione catalysed by rat liver preparations. By <b>B. Gillham</b> . . . . .	667
Isotopic studies of the conversion of oxophlorins and their ferrihaems into bile pigments in the rat. By <b>T. Kondo, D. C. Nicholson, A. H. Jackson and G. W. Kenner</b> . . . . .	601	Synthesis of [1,2- <sup>3</sup> H <sub>2</sub> ]cholecalciferol and metabolism of [4- <sup>14</sup> C,1,2- <sup>3</sup> H <sub>2</sub> ]- and [4- <sup>14</sup> C,1- <sup>3</sup> H]-cholecalciferol in rachitic rats and chicks. By <b>D. E. M. Lawson, B. Pelc, P. A. Bell, P. W. Wilson and E. Kodicek</b> . . . . .	673
Studies on ribonucleic acid synthesis in the venom glands of <i>Vipera palaestinae</i> (Ophidia, Reptilia). By <b>D. Rotenberg, E. S. Bamberger and E. Kochva</b> . . . . .	609	Protein synthesis by membrane-bound and free ribosomes of secretory and non-secretory tissues. By <b>T. M. Andrews and J. R. Tata</b> . . . . .	683
Nucleic acid enzymology of extremely halophilic bacteria. <i>Halobacterium cutirubrum</i> polynucleotide phosphorylase. By <b>P. I. Peterkin and P. S. Fitt</b> . . . . .	613	A polymer of glucose and <i>N</i> -acetylgalactosamine 1-phosphate in the wall of <i>Micrococcus</i> sp. A1. By <b>M. D. Partridge, A. L. Davison and J. Baddiley</b> . . . . .	695
Nucleic acid enzymology of extremely halophilic bacteria. <i>Halobacterium cutirubrum</i> deoxyribonucleic acid-dependent ribonucleic acid polymerase. By <b>B. G. Louis and P. S. Fitt</b> . . . . .	621	Purification and some kinetic properties of rat liver glucosamine synthetase. By <b>P. J. Winterburn and C. F. Phelps</b> . . . . .	701
Nucleic acid enzymology of extremely halophilic bacteria. <i>Halobacterium cutirubrum</i> ribonucleic acid-dependent ribonucleic acid polymerase. By <b>B. G. Louis and P. S. Fitt</b> . . . . .	629	Studies on the control of hexosamine biosynthesis by glucosamine synthetase. By <b>P. J. Winterburn and C. F. Phelps</b> . . . . .	711
Nucleic acid enzymology of extremely halophilic bacteria. Gel-filtration and density-gradient-centrifugation studies of the molecular weights of <i>Halobacterium cutirubrum</i> polynucleotide phosphorylase and deoxyribonucleic acid- and ribonucleic acid-dependent ribonucleic acid polymerases. By <b>B. G. Louis, P. I. Peterkin and P. S. Fitt</b> . . . . .	635	The binding of substrates and modifiers to glucosamine synthetase. By <b>P. J. Winterburn and C. F. Phelps</b> . . . . .	721
		<b>SHORT COMMUNICATIONS</b>	
		The decarboxylation of retinoic acid by horseradish peroxidase and an acetone-butanol-ether-dried liver powder. By <b>E. C. Nelson, M. Mayberry, R. Reid and K. V. John</b> . . . . .	731
		The molecular size of enzymically active aldolase A. By <b>C. J. Masters and D. J. Winzor</b> . . . . .	735
