

The Biochemical Journal

THE BIOCHEMICAL SOCIETY

OFFICERS AND COMMITTEE, 1971-72

Chairman of the Committee

T. W. GOODWIN, F.R.S.

Treasurer

D. F. ELLIOTT

Meetings Secretary

H. M. KEIR

Committee Secretary

A. N. DAVISON

International Secretary

A. P. MATHIAS

Committee

J. S. D. BACON

R. B. BEECHEY

E. A. DAWES

R. M. C. DAWSON

D. T. ELMORE

R. HOFFENBERG*‡

G. D. HUNTER

V. H. T. JAMES

A. KORNER

C. F. MILLS

H. R. PERKINS†

S. V. PERRY

D. C. PHILLIPS, F.R.S.

P. J. RANDLE

D. S. ROBINSON

T. A. SCOTT

D. G. WALKER*†

A. M. WHITE

Symposium Organizer: R. M. S. SMELLIE

* *Ex officio* Member of Committee.

† Representative of Editorial Board of the *Biochemical Journal*.

‡ Representative of Editorial Board of *Clinical Science*.

The **Biochemical Society** exists to advance the science of biochemistry through meetings and publications. Eleven meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP (01-242 1076/7/8/9).

The *Biochemical Journal* is published and distributed by the Biochemical Society. It is published twice monthly, in four or more volumes per year. It is planned that five volumes will appear in 1971. The index for each volume is published separately.

Subscriptions to the *Biochemical Journal*. For non-members of the Biochemical Society the subscription to the Journal at the present rate of publication is £45 per year (£9 per volume). For non-members in the U.S.A. the 1971 subscription is \$110 per year (\$22 per volume). All subscriptions are payable in advance at the time of ordering. Orders and subscriptions should be sent to the Biochemical Society (Publications), 7 Warwick Court, London WC1R 5DP.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address in the preceding paragraph. No claims will be entertained if they are received later than three months after the date of posting of the Journal.

Back Numbers. Enquiries for volumes 1-19 should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts may be obtained on application to Walter J. Johnson Ltd., Berkeley Square House, Berkeley Square, London W1X 6BA, or to the Biochemical Society.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP (01-242 1076/7/8/9). Copy is required eight weeks before publication date. Rate cards are available on request.

Microfilms. Volumes 1-89 (1906-1963) have been recorded on microfilm by Micro Methods Ltd., East Ardsley, Wakefield, Yorks. Details are available from the firm or the Biochemical Society.

INDEX TO AUTHORS

	PAGE		PAGE
Alleyne, G. A. O.	35	Haslewood, G. A. D.	15
Baldwin, G. S.	69	Jungalwala, F. B.	19
Barbioli, B.	123	Kay, J.	75
Barrett, A. J.	1	Kemp, P.	97
Bezkorovainy, A.	125	Nicholson, B. H.	117
Caldarera, C. M.	123	Nicklas, W. J.	83
Carnegie, P. R.	57, 69	O'Donnell, V. J.	105
Clark, J. B.	83	Russell, L. M.	127
Coleman, G. S.	97	Ryle, A. P.	75
Corti, A.	123	Scott, R.	41
Creaser, E. H.	127	Stewart, J. C.	41

Flores, H.	35		
Ford, H. C.	105		
Freinkel, N.	19		
Giorgi, E. P.	41		
Grant, J. K.	41		
Grohlich, D.	125		

PAPERS ACCEPTED FOR PUBLICATION

- The regulatory proteins of the myofibril. Characterization and properties of the inhibitor factor (troponin B). By M. C. SCHAUB and S. V. PERRY
- Effects of metabolic acidosis and starvation on the content of intermediary metabolites in rat kidney. By D. A. HEMS and J. T. BROSNAN
- Isolation and nature of intracellular peptides from a cephalosporin C-producing *Cephalosporium* sp. By P. B. LODER and E. P. ABRAHAM
- Biosynthesis of peptides containing α -amino adipic acid and cysteine in extracts of a *Cephalosporium* sp. By P. B. LODER and E. P. ABRAHAM
- Different effects of thymidine and 5-fluorouracil 2'-deoxyriboside on biosynthetic events in cultured P815 Y mast cells. By J. J. M. BERGERON
- The transport of citrate and other tricarboxylic acids in two species of *Pseudomonas*. By H. G. LAWFOED and G. R. WILLIAMS
- The isolation of ovomucoid variants differing in carbohydrate composition. By J. G. BEELEY
- The lysosomal membrane complex. Focal point of primary steroid hormone action. By C. M. SZEGO, B. J. SEELEER, R. A. STEADMAN, D. F. HILL, A. K. KIMURA and J. A. ROBERTS
- The inhibition of glutamate dehydrogenase by L-serine O-sulphate and related compounds and by photo-oxidation in the presence of Rose Bengal. By N. TUDBALL and P. THOMAS
- Thiol-dependent changes in the properties of rat liver sulphotransferases. By D. J. BARFORD and J. G. JONES
- A comparison of mitochondria from *Torulopsis utilis* grown in continuous culture with glycerol, iron, ammonium, magnesium or phosphate as the growth-limiting nutrient. By P. A. LIGHT and P. B. GARLAND
- Non-haem iron and the dissociation of piericidin A sensitivity from site 1 energy conservation in mitochondria from *Torulopsis utilis*. By R. A. CLEGG and P. B. GARLAND
- Effect of sulphate-limited growth on mitochondrial electron transfer and energy conservation between reduced nicotinamide-adenine dinucleotide and the cytochromes in *Torulopsis utilis*. By B. A. HADDOCK and P. B. GARLAND
- Spectroscopic studies of flavoproteins and non-haem iron proteins of submitochondrial particles of *Torulopsis utilis* modified by iron- or sulphate-limited growth in continuous culture. By C. I. RAGAN and P. B. GARLAND
- Effects of glucose and other modifiers of insulin release on the oxidative metabolism of amino acids in microdissected pancreatic islets. By B. HELLMAN, J. SEHLIN and I.-B. TALJEDAL
- Changes in the transcription pattern of flax cotyledons after inoculation with flax rust. By A. K. CHAKRAVORTY and M. SHAW
- The purification and properties of the penicillinase specified by the resistance factor 1818 in *Escherichia coli* and *Proteus mirabilis*. By J. W. DALE and J. T. SMITH
- Characterization of the penicillinase specified by the resistance factor R-1818 in *Escherichia coli* K12 and other Gram-negative bacteria. By J. W. DALE
- Some relationships between episomal and chromosomal penicillinases in Gram-negative bacteria. By J. W. DALE and J. T. SMITH

NOTES FOR CONTRIBUTORS

It is the policy of the *Biochemical Journal* to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Theoretical contributions will be considered equally with papers dealing with experimental work. Preliminary or inconclusive experiments should not generally be described.

For detailed instructions on the preparation of papers contributors should refer to *Policy of the Journal and Instructions to Authors* [*Biochem. J.* (1971), 121, 1] (obtainable from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP, price 15p. post free). In general the *Biochemical Journal* uses the recommended SI (Système Internationale) symbols [see *Symbols, Signs and Abbreviations Recommended for British Scientific Publications* (1969) (London: The Royal Society)]. For biochemical nomenclature authors should as far as possible follow the Tentative Rules and Proposals of the IUPAC-IUB Commission on Biochemical Nomenclature [see *Biochem. J.* (1971), 121, 11]. For chemical nomenclature the IUPAC Rules should be followed [see *Biochem. J.* (1971), 121, 11]. The *Biochemical Journal* uses as a standard of spelling the *Concise Oxford Dictionary of Current English* (Oxford: Clarendon Press).

Two types of paper are accepted by the editors: **Full-length papers.** Papers submitted for publication should be sent together with an extra copy of the synopsis to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent.

Papers submitted should be written concisely. Typescripts that are not concise or do not conform to the conventions of the *Biochemical Journal* will be returned to the authors for revision. If a paper that has been returned to an author for revision is not resubmitted within one month, it will, on resubmission, be deemed to be a new paper and the date

of receipt altered accordingly. A revised paper containing a significant amount of new material will also be redated.

Submission of a paper to the Editorial Board implies that it reports unpublished work, that it is not under consideration for publication elsewhere, and that if accepted for the *Biochemical Journal* it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Papers should be headed by a concise but informative title, by the names of the authors and by the name and address of the establishment where the work was performed. Details of financial support may appear in the acknowledgements at the end of the paper.

Before preparing papers authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. Papers should be in double-spaced typing throughout (including references and legends of tables and figures) on sheets of uniform size with wide margins. The top copy should be submitted. It cannot be overemphasized that the need for revision of badly prepared typescripts inevitably leads to delays in publication.

Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the Journal. Sufficient information must be included to permit repetition of the experimental work.

Short Communications. Typescripts should be submitted *in duplicate*, written in English, and conform strictly to the form of the Journal as far as spelling and abbreviations are concerned. Such communications must not exceed 1200 words of text, but in addition may include either one table, typed on a separate sheet, or one figure, drawn according to the rules of the Journal. If no figure or table is included the text may be expanded to 1400 words. Communications should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Papers should be complete in themselves; (1) the methods used in experimental work must be adequately described or sufficient references given to allow repetition of the work; (2) sufficient indication of the results of experimental work must be included to justify the claims made.

MERCK

the DEPENDABLE

BIOCHEMICA PROGRAMME

includes

AMINO ACIDS & DERIVATIVES

ENZYMES & COENZYMES

ENZYME SUBSTRATES

CARBOHYDRATES

NUCLEOBASES, NUCLEOSIDES

NUCLEOTIDES & SUGARPHOSPHATES

STEROIDS & STEROIDGLYCOSIDES

VITAMINS

*These are all in production and
separate folders are available*
