THE BIOCHEMICAL SOCIETY

OFFICERS AND COMMITTEE, 1971–72

Chairman of the Committee
T. W. GOODWIN, F.R.S.

Treasurer
D. F. ELLIOTT

Meetings Secretary
H. M. KEIR

Committee Secretary
A. N. DAVISON

International Secretary
A. P. MATHIAS

Committee
J. S. D. BACON  G. D. HUNTER  D. C. PHILLIPS, F.R.S.
R. B. BEECHEY  V. H. T. JAMES  P. J. RANDLE
E. A. DAWES  A. KORNER  D. S. ROBINSON†
R. M. C. DAWSON  C. F. MILLS  T. A. SCOTT
D. T. ELMORE  H. R. PERKINS†  D. G. WALKER*†
R. HOFFENBERG*‡  S. V. PERRY  A. M. WHITE

Symposium Organizer: R. M. S. SMELLIE

* Ex officio Member of Committee.
† Representative of Editorial Board of the Biochemical Journal.
‡ Representative of Editorial Board of Clinical Science.

The Biochemical Society exists to advance the science of biochemistry through meetings and publications. Eleven meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP (01-242 1076/7/8/9).

The Biochemical Journal is published and distributed by the Biochemical Society. It is published twice monthly, in four or more volumes per year. It is planned that five volumes will appear in 1971. The index for each volume is published separately.

Subscriptions to the Biochemical Journal. For non-members of the Biochemical Society the subscription to the Journal at the present rate of publication is £45 per year (£9 per volume). For non-members in the U.S.A. the 1971 subscription is $110 per year ($22 per volume). All subscriptions are payable in advance at the time of ordering. Orders and subscriptions should be sent to the Biochemical Society (Publications), 7 Warwick Court, London WC1R 5DP.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address in the preceding paragraph. No claims will be entertained if they are received later than three months after the date of posting of the Journal.

Back Numbers. Enquiries for volumes 1–9 should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts may be obtained on application to Walter J. Johnson Ltd., Berkeley Square House, Berkeley Square, London W1X 6BA, or to the Biochemical Society.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP (01-242 1076/7/8/9). Copy is required eight weeks before publication date. Rate cards are available on request.

Microfilms. Volumes 1–89 (1906–1963) have been recorded on microfilm by Micro Methods Ltd., East Ardsley, Wakefield, Yorks. Details are available from the firm or the Biochemical Society.
Control of glutamine synthesis in rat liver.  
By P. Lund  
653

SHORT COMMUNICATIONS
Decreased activities of enzymes associated with sialic acid synthesis in livers of diabetic rats. 
By F. Maley, R. Ghambeer and R. R. DelGiacco  
661

Oxidation of reduced nicotinamide nucleotides by diamide (NNN'N'-tetramethylazofomamide). 
By J. S. Brown  
665

Biochemical characteristics of slow skeletal muscle in work-induced hypertrophy. 
By A. Margreth and G. Salviati  
669

INDEX TO AUTHORS
Antonini, E.  605

Stark, J. R.  461
Thambyrajah, V.  461
Trentham, D. R.  573
Williams, D. L.  501
Williamson, D. H.  501
Wool, I. G.  537
Metabolism of pyruvate and malate by isolated fat-cell mitochondria. By B. R. Martin and R. M. Denton
Regulation of adipose-tissue pyruvate dehydrogenase by insulin and other hormones. By H. G. Coore, R. M. Denton, B. R. Martin and P. J. Randle
Lactate production in the perfused rat liver. By H. F. Woods and H. A. Krebs
Comparison of the N-acetylhexosaminidase components in the ram testis and epididymis by isoelectric focusing. By B. G. Winchester
The heterogeneity of uridine diphosphate glucuronyltransferase from rat liver. By G. J. Mulder
The C4-dicarboxylic acid pathway of photosynthesis. Evidence for an intermediate pool of carbon dioxide and the identity of the donor C4-dicarboxylic acid. By M. D. Hatch
Digestion of endocytosed protein by rat yolk-sac cultured in vitro. By K. E. Williams, J. B. Lloyd, M. Davies and F. Beck
The kinetics of phenethylhydrazine oxidation by monoamine oxidase. By K. F. Tipton and I. P. C. Spiers
Further studies on the glycerol teichoic acid of walls of Staphylococcus lactis I3. Location of the phosphodiester groups and their susceptibility to hydrolysis with alkali. By A. R. Archibald, J. Baddeley, J. E. Heckels and S. Heptinstall
Poly-β-hydroxybutyrate biosynthesis and the regulation of glucose metabolism in Azotobacter beijerinckii. By P. J. Senior and E. A. Dawes
Metabolism of m-tert.-butylphenyl N-methylcarbamate in insects and mice. By P. G. C. Douch and J. N. Smith
The metabolism of 3,5-di-tert.-butylphenyl N-methylcarbamate in insects and by mouse liver enzymes. By P. G. C. Douch and J. N. Smith
The localization of 1,25-dihydroxycholecalciferol in bone cell nuclei of rachitic chicks. By J. C. Weber, V. Pons and E. Kodicek
The interaction of insulin with phospholipids. By M. C. Perry, W. Tampion and J. A. Lucy
The location of the thiol groups of myosin that are protected by pyrophosphate against reaction with 2,4-dinitrophenyl β-hydroxyethyl disulphide. By I. Kakol
The influence of insulin and of contraction on glucose metabolism in the perfused diaphragm muscle from normal and streptozotocin-treated rats. By A. Beloff-Chain, E. B. Chain and K. A. Rooledge
Comparison of some metabolic parameters in the perfused and the incubated rat diaphragm muscle with diaphragm muscle in vivo. By K. A. Rooledge
Biosynthesis of the carbohydrate portions of immunoglobulin M. By R. M. E. Parkhouse and F. Melchers
Biosynthesis of the carbohydrate portion of immunoglobulins. Incorporation of radioactive fucose into immunoglobulin G1 synthesized and secreted by mouse plasma-cell tumour MOPC 21. By F. Melchers
Circular-dichroism studies on two β-lactamases from Bacillus cereus. By D. G. Dalgleish and A. R. Peacocke
NOTES FOR CONTRIBUTORS

It is the policy of the Biochemical Journal to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Theoretical contributions will be considered equally with papers dealing with experimental work. Preliminary or inconclusive experiments should not generally be described.

For detailed instructions on the preparation of papers contributors should refer to Policy of the Journal and Instructions to Authors [Biochem. J. (1971), 121, 1] (obtainable from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP, price 15p. post free).

Two types of paper are accepted by the editors: Full-length papers. Papers submitted for publication should be sent together with an extra copy of the synopsis to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent.

Papers submitted should be written concisely. Typescripts that are not concise or do not conform to the conventions of the Biochemical Journal will be returned to the authors for revision. If a paper that has been returned to an author for revision is not resubmitted within one month, it will, on resubmission, be deemed to be a new paper and the date of receipt altered accordingly. A revised paper containing a significant amount of new material will also be redated.

Submission of a paper to the Editorial Board implies that it reports unpublished work, that it is not under consideration for publication elsewhere, and that if accepted for the Biochemical Journal it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Papers should be headed by a concise but informative title, by the names of the authors and by the name and address of the establishment where the work was performed. Details of financial support may appear in the acknowledgements at the end of the paper.

Before preparing papers authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. Papers should be in double-spaced typing throughout (including references and legends of tables and figures) on sheets of uniform size with wide margins. The top copy should be submitted. It cannot be overemphasized that the need for revision of badly prepared typescripts inevitably leads to delays in publication.

Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the Journal. Sufficient information must be included to permit repetition of the experimental work.

Short Communications. Typescripts should be submitted in duplicate, written in English, and conform strictly to the form of the Journal as far as spelling and abbreviations are concerned. Such communications must not exceed 1200 words of text, but in addition may include either one table, typed on a separate sheet, or one figure, drawn according to the rules of the Journal. If no figure or table is included the text may be expanded to 1400 words. Communications should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Papers should be complete in themselves: (1) the methods used in experimental work must be adequately described or sufficient references given to allow repetition of the work (2) sufficient indication of the results of experimental work must be included to justify the claims made.
