

CONTENTS OF VOLUME 124, No. 5, 1971

	PAGE		PAGE
Nucleotide sequences in bacteriophage ribonucleic acid. The eighth Hopkins Memorial Lecture. By F. Sanger	833	Enzymic iodination. A probe for accessible surface proteins of normal and neoplastic lymphocytes. By J. J. Marchalonis, R. E. Cone and V. Santer	921
The specificity of combination between ristocetins and peptides related to bacterial cell-wall mucopeptide precursors. By M. Nieto and H. R. Perkins	845	Comparison of the <i>N</i> -acetylhexosaminidase components in the ram testis and epididymis by isoelectric focusing. By B. G. Winchester	929
The purification and properties of the respiratory-chain reduced nicotinamide-adenine dinucleotide dehydrogenase of <i>Torulopsis utilis</i> . By S. O. C. Totmar and C. I. Raġan	853	Oximes, nitriles and 2-hydroxynitriles as precursors in the biosynthesis of cyanogenic glucosides. By B. A. Tapper and G. W. Butler	935
Synthesis of phosphoenolpyruvate from propionate in sheep liver. By R. M. Smith and W. S. Osborne-White	867	Multiple forms of uridine kinase in normal and neoplastic rat liver. By G. Krystal and T. E. Webb	943
Interactions of acetate, propionate and butyrate in sheep liver mitochondria. By R. M. Smith	877	SHORT COMMUNICATIONS	
Protein synthesis by membrane-bound and free ribosomes of the developing rat cerebral cortex. By T. M. Andrews and J. R. Tata	883	The incorporation of [¹⁴ C ₄]aspartic acid into nicotinic acid <i>N</i> -glucoside in <i>Nicotiana tabacum</i> . By T. A. Scott and A. L. Devonshire	949
Nucleoside pyrophosphatase activity associated with pig kidney alkaline phosphatase. By M. Wass and P. J. Butterworth	891	Apparent metabolic regulation of the coupling between the potassium ion gradient and methionine transport in mouse ascites-tumour cells. By M. Reid and A. A. Eddy	951
Dissociation of ribosomes from oocytes of <i>Xenopus laevis</i> into active subparticles. By H. Pratt and R. A. Cox	897	Turnover of the plasma-membrane and microsomal proteins of rat liver containing primary hepatoma nodules. By K. A. Narayan and H. Chandrasekhara	953
Enzymic synthesis of <i>N</i> -acetyl-L-phenylalanine in <i>Escherichia coli</i> K12. By R. V. Krishna, P. R. Krishnaswamy and D. R. Rao	905	Dolichol phosphates as acceptors of mannose from guanosine diphosphate mannose in liver systems. By J. B. Richards, P. J. Evans and F. W. Hemming	957
The preparation of an alkali-soluble collagen from demineralized bone. By G. D. Kemp and G. R. Tristram	915		

Proceedings of the Biochemical Society

	PAGE
Genetic analysis with human-mouse hybrid cells. By W. F. Bodmer	35P
Insertion of small pieces of foreign genetic material into somatic cells. By P. R. Cook	35P
Chromosome behaviour in human-mouse somatic-cell hybrids. By S. D. Handmaker	37P
The identification of human chromosomes by fluorescence techniques. By L. Zech	38P
Somatic hybridization as a tool for the study of differentiation: a review. By M. Nabholz	39P
Chromatin structure. By B. M. Richards, J. F. Pardon and A. S. Pooley	39P
Control of transcription of chromatin deoxyribonucleic acid. By A. J. MacGillivray and J. Paul	40P
Interaction of androgenic steroids with prostatic chromatin. By W. I. P. Mainwaring	42P

	PAGE
Glucocorticosteroid effects on liver chromatin. By C. E. SEKERIS	43 P
Transfer ribonucleic acid methylases in normal tissues and in tumours. By V. M. CRADDOCK	44 P
Abortive infection of hamster cells by polyoma virus. By G. A. NICHOLAS and J. D. PITTS	45 P
Cause of the heterogeneity of 'silent' plasma cholinesterase variants. By P. K. DAS	45 P
Cell fusion without viruses. By J. A. LUCY, Q. F. AHKONG, F. C. CRAMP, D. FISHER and J. I. HOWELL	46 P
A study of the fusion of highly vacuolated plant protoplasts. By L. A. WITHERS, J. B. POWER and E. C. COCKING	47 P
Interaction properties of cell hybrids formed by fusion of interacting and non-interacting mammalian cells. By J. McCARGOW and J. D. PITTS	48 P
Histone F2c and erythrocyte maturation. By W. S. STEVELY	48 P
Changes in rat liver non-histone nuclear proteins during nitrosamine carcinogenesis. By M. GRONOW	49 P
Lipase activity against 1,2-diglyceride in rat erythrocyte membranes. By R. H. MICHELL and R. COLEMAN	49 P
Cytoplasmic redox control of protein synthesis. By R. D. NOLAN and M. B. HOAGLAND	50 P
The site and nature of transferase II-guanosine triphosphate complex attachment to mammalian ribosomes. By B. S. BALIGA, R. D. NOLAN and H. N. MUNRO	51 P
Biosynthesis of tryptophanase by polyribosomes and by ribonucleic acid and ribosomes isolated from <i>Escherichia coli</i> . By J. H. PARISH, S. A. M. KHAIRUL BASHAR, N. L. BROWN and M. BROWN	51 P
Lincomycin as a chloroplast probe. By R. J. ELLIS	52 P
A new enzymic fragment (Fab) of rabbit immunoglobulin G. By G. E. CONNELL and R. R. PORTER	53 P
Antigenicity of sheep cortical-bone matrix proteins. By I. R. DICKSON	53 P
Some properties of Embden-geese egg-white albumin. By B. M. AUSTEN, E. J. ROMANOWSKA and R. D. MARSHALL	54 P
Cross-links in protein from cataractous lenses. By R. H. BUCKINGHAM	54 P
Characterization of components of inhibitory-factor (troponin B) preparations of the myofibril. By J. M. WILKINSON, S. V. PERRY, H. COLE and I. P. TRAYER	55 P
Lipid metabolism in experimental cholestasis. By C. O. RECORD, K. G. M. M. ALBERTI and D. H. WILLIAMSON	56 P
An explanation for the lowering of blood ketone-body concentrations in starved rats during short-term exercise. By C. R. S. HOUGHTON, R. A. HAWKINS, D. H. WILLIAMSON and H. A. KREBS	56 P
The effects of physical training on the metabolic response to short-term severe exercise in the rat. By C. R. S. HOUGHTON, R. A. HAWKINS, D. H. WILLIAMSON and H. A. KREBS	57 P
Penetration of perfused rat liver by exogenous amyloglucosidase. By D. A. HEMS, R. IVINGS and B. E. RYMAN	57 P
Liposomes as carriers of enzymes or drugs: a new approach to the treatment of storage diseases. By G. GREGORIADIS and B. E. RYMAN	58 P
The effect of respiratory inhibitors and oligomycin on sodium ion transport and adenine nucleotides in rat liver slices. By G. D. V. VAN ROSSUM	59 P
Metabolism of respiratory tissue: secretion of mucosubstances by organ cultures of mammalian trachea. By P. W. KENT, P. F. DANIEL and J. T. GALLAGHER	59 P
Effects of lysolecithin (lysophosphatidylcholine) and fatty acids on rat liver microsomal glucose 6-phosphatase. By B. R. CATER and T. HALLINAN	60 P
Fatty acids from acylhydrolase action on diglycerides inhibit phospholipase C-treated microsomal glucose 6-phosphatase. By B. R. CATER and T. HALLINAN	60 P
Water regime as a factor in determining flavour strength in vegetables. By G. G. FREEMAN and N. MOSSADEGHI	61 P
Deoxyribonucleic acid synthesis in cells infected with type 1 or type 2 herpes simplex virus. By I. W. HALLIBURTON, E. A. HILL and G. RUSSELL	62 P
Studies on nuclear proteins in cells infected with type 1 or type 2 herpes simplex virus. By I. W. HALLIBURTON and E. A. HILL	62 P
Methylation of pseudorabies-virus deoxyribonucleic acid. By M. LOW, M. I. MECHIE and J. HAY	63 P
The effect of pseudorabies-virus infection on cellular deoxyribonucleic acid. By M. LOW and J. HAY	63 P

CONTENTS

iii

	PAGE
Induction of deoxyribonucleic acid polymerase and deoxyribonuclease activities in cells infected with herpes simplex virus type II. By J. HAY, H. MOSS and I. W. HALLIBURTON	64 P
An unusual deoxyribonucleic acid species of mammalian cells. By R. H. BURDON	64 P
Initiation of deoxyribonucleic acid replication in mammary-gland organ cultures. By J. SKARDA, C. D. GREEN and J. M. BARRY	65 P
Effect of azaserine on insulin release <i>in vitro</i> . By D. J. DEERY, T. J. COLEMAN and K. W. TAYLOR	65 P
Separation of bovine α - and β -trypsin by affinity chromatography. By G. W. JAMESON and D. T. ELMORE	66 P
The kinetics of hydrolysis of synthetic substrates by bovine factor Xa. By R. W. ADAMS and D. T. ELMORE	66 P
Water surface free energy and its potential in biochemical activities. By S. LEWIN	67 P
Inhibition of δ -aminolaevulate dehydratase by pyridoxal derivatives and by cyanide. By S. VAN HEYNINGEN and D. SHEMIN	68 P
The primary structure of yeast aldolase. By R. S. JACK and J. I. HARRIS	68 P
Light-induced development of enzymes of glycollate metabolism in etiolated bean leaves. By D. R. MURRAY and J. W. BRADBEER	69 P
The chemical composition of dogfish myelin. By H. C. AGRAWAL, N. L. BANIK, A. H. BONE, M. L. CUZNER, A. N. DAVISON and R. F. MITCHELL	70 P
Relationship between ribonucleic acid synthesis and the mechanism of enzyme induction in mammalian liver. By M. K. AGARWAL	70 P
Oestradiol, adenosine 3:5-cyclic monophosphate and nucleolar ribonucleic acid polymerase in calf endometrium. By M. MOUSSERON-CANET, M. ARNAULD, Y. BEZIAT, J. L. BORGNA and J. C. GUILLEUX	71 P
A chromatin-bound receptor-oestradiol complex in chicken oviduct and its effect on chromatin-bound deoxyribonucleic acid-dependent ribonucleic acid polymerase activity. By R. F. COX and N. H. CAREY	71 P
The metabolism of glutamate, aspartate and alanine in the bovine lens. By P. TRAYHURN and R. VAN HEYNINGEN	72 P
Aromatization of androst-4-ene-3,17-dione by human intestinal bacteria. By P. GODDARD and M. J. HILL	73 P
Spectral changes of a cationic dye after interaction with endotoxins. By J. JANDA	73 P
Mutants of <i>Pseudomonas</i> AM1 that require glycollate or glyoxylate for growth on methanol or ethanol. By A. R. SALEM and J. R. QUAYLE	74 P
Activity and regulation of an acidic amino acid permease of <i>Aspergillus nidulans</i> . By J. H. ROBINSON, C. ANTHONY and W. T. DRABBLE	75 P
A cytochrome-deficient mutant of <i>Pseudomonas</i> AM1. By C. ANTHONY and P. DUNSTAN	75 P
The involvement of glycollate in the pathway for ethanol assimilation in <i>Pseudomonas</i> AM1. By C. ANTHONY, P. M. DUNSTAN and W. T. DRABBLE	76 P
In search of lactate dehydrogenase from <i>Bacillus stearothermophilus</i> . By E. KOLB and J. I. HARRIS	76 P
Triose phosphate isomerase from <i>Bacillus stearothermophilus</i> . By R. C. FAHEY, E. KOLB and J. I. HARRIS	77 P
C ₁ compounds as substrates for the production of single-cell protein. By D. E. F. HARRISON and G. HAMER	78 P
Allosteric binding of coenzymes to alcohol dehydrogenases. By A. WISEMAN	78 P
Quaternary structure of oligomers: a new theory and its application. By E. J. MILNER-WHITE	78 P
