

THE BIOCHEMICAL SOCIETY

OFFICERS AND COMMITTEE, 1972-73

Chairman of the Committee

T. W. Goodwin, F.R.S.

Treasurer

D. F. Elliott

Committee Secretary

A. N. Davison

Meetings Secretary

H. M. Keir

International Secretary

A. P. Mathias

Committee

R. B. Beechey

E. A. Dawes

R. M. C. Dawson

D. T. Elmore

K. Griffiths

R. Hoffenberg*‡

G. D. Hunter

V. H. T. James

C. F. Mills

C. A. Pasternak†

P. J. Randle

D. S. Robinsont

T. A. Scott

T. F. Slater

Ruth E. van Heyningen

D. G. Walker*†

A. M. White

T. S. Work

**Ex officio* Member of Committee.

†Representative of Editorial Board of the *Biochemical Journal*.

‡Representative of Editorial Board of *Clinical Science*.

Symposium Organizer

R. M. S. Smellie

The **Biochemical Society** exists to advance the science of biochemistry through meetings and publications. Eleven meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)].

The **Biochemical Journal** is published and distributed by the Biochemical Society. It is published twice monthly, in four or more volumes per year. It is planned that five volumes will appear in 1972. The index for each volume is published separately.

Subscriptions to the *Biochemical Journal*. For non-members of the Biochemical Society the subscription to the Journal at the present rate of publication is £45 per year (£9 per volume). For non-members in the U.S.A. the subscription is \$112 per year (subject to exchange variation) (\$22.50 per volume). All subscriptions are payable in advance at the time of ordering. Orders and subscriptions should be sent to the Biochemical Society (Publications), 7 Warwick Court, London WC1R 5DP.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address in the preceding paragraph. No claims can be entertained if they are received later than three months after the date of posting of the Journal.

Back Numbers. Enquiries for volumes 1-9 should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts may be obtained on application to Walter J. Johnson Ltd., 24/28 Oval Road, London NW1 7DX, or to The Biochemical Society.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)]. Copy is required eight weeks before publication date. Rate cards are available on request.

Microfilms. Volumes 1-89 (1906-1963) have been recorded on microfilm by the EP Group, Microfilm Division, Bradford Road, East Ardsley, Wakefield, Yorks. Details are available from the firm or the Biochemical Society.

The BIOCHEMICAL JOURNAL

Papers Accepted for Publication

Carbohydrate metabolism in the isolated perfused rat kidney.

By D. A. Hems & G. Gaja

Automatic monitoring of biochemical parameters in tissue culture. Studies on synchronously growing mouse myeloma cells.

By N. J. Cowan & C. Milstein

Microbial metabolism of pyridinium compounds. Metabolism of 4-carboxy-1-methylpyridinium chloride, a photolytic product of paraquat.

By K. A. Wright & R. B. Cain

Microbial metabolism of pyridinium compounds. Isotopic studies of the metabolic fate of 4-carboxy-1-methylpyridinium chloride.

By K. A. Wright & R. B. Cain

The three-dimensional structure of supercoiled deoxyribonucleic acid in solution. Evidence obtained from the angular distribution of scattered light.

By D. J. Jolly & A. M. Campbell

The effects of hormones on milk-fat synthesis in mammary explants from pseudo-pregnant rabbits.

By C. R. Strong, I. Forsyth & R. Dils

The formation of glucosides of isoflavones and of some other phenols by rabbit liver microsomes.

By R. S. Labow & D. S. Layne

The specific assay of arylsulphatase C, a rat liver microsomal marker enzyme.

By D. W. Milsom, F. A. Rose & K. S. Dodgson

Studies on the oestrogen sulphatase and arylsulphatase C activities of rat liver.

By J. O. Dolly, K. S. Dodgson & F. A. Rose

Metabolism of sodium oestrone [³⁵S]sulphate in the guinea pig.

By J. O. Dolly, C. G. Curtis, K. S. Dodgson & F. A. Rose

The antibody binding site. Labelling of a specific antibody against the photo-precursor of an aryl nitrene.

By G. W. J. Fleet, J. R. Knowles & R. R. Porter

Effect of adrenaline on ³²P incorporation into rat fat-cell phospholipids.

By J. M. Stein & C. N. Hales

Locations of amino acids in brain slices from the rat. Tetrodotoxin-sensitive release of amino acids.

By A. M. Benjamin & J. H. Quastel

Preparation and properties of nexuses and lipid-enriched vesicles from mouse liver plasma membranes.

By W. H. Evans & J. W. Gurd

The cellular production of hydrogen peroxide.

By A. Boveris, N. Oshino & B. Chance

The subcellular distribution of triphosphoinositide phosphomonoesterase in guinea-pig brain.

By A. Sheltawy, M. Brammer & D. Borrill

The distribution of molecular species of phosphatidylinositol in ox brain and its subcellular fractions.

By M. G. Luthra & A. Sheltawy

Purification and properties of the ribonucleic acid-dependent ribonucleic acid polymerase from *Halobacterium cutirubrum*.

By B. G. Louis & P. S. Fitt

A possible role for phosphoribosyl pyrophosphate in the stimulation of uterine purine nucleotide synthesis in response to oestradiol-17 β .

By J. M. Oliver

An adenosine triphosphate-dependent stabilization of proteolytic activity in heterolysosomes. Evidence for a proton pump.

By J. L. Mego, R. M. Farb & J. Barnes

Purification and properties of adenosine triphosphate-creatine phosphotransferase from muscle of the dogfish *Scylliorhinus canicula*.

By B. Simonarson & D. C. Watts

Adenosine 5'-pyrophosphate sulphurylase in baker's yeast.

By C. A. Adams & D. J. D. Nicholas

Dietary protein intake and skeletal-muscle protein metabolism in rats. Studies with salt-washed ribosomes and transfer factors.

By S. D. Alexis, S. Basta & V. R. Young

Lipoprotein particles from the Golgi apparatus of guinea-pig liver.

By M. J. Chapman, G. L. Mills & C. E. Taylour

Characterization of a long-chain ¹⁴C-labelled alcohol resulting from a plant enzyme-catalysed reaction with S-adenosyl[methyl-¹⁴C]methionine

By S. A. Ludwig & C. L. Villemez

The preparation and properties of a group of proteins from the high-sulphur fraction of wool.

By H. Lindley & T. C. Elleman

The osmotic properties of sulphoethyl-Sephadex. A model for cartilage.

By A. G. Ogston & J. D. Wells

The effect of phenylpyruvate metabolism in rat brain.

By M. S. Patel

The transformation of the cytoplasmic oestradiol-receptor complex to the nuclear complex in a uterine cell-free system.

By M. Gschwendt & T. H. Hamilton

NOTES FOR CONTRIBUTORS

It is the policy of the *Biochemical Journal* to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Theoretical contributions will be considered equally with papers dealing with experimental work. Preliminary or inconclusive experiments should not generally be described.

For detailed instructions on the preparation of papers contributors should refer to *Policy of the Journal and Instructions to Authors* [*Biochem. J.* (1972), 126, 1–19] (obtainable from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP, price 15p. post free). The *Biochemical Journal* uses the recommended SI (Système Internationale) symbols [see *Pure Appl. Chem.* (1970) 21, 1–44; *Quantities, Units and Symbols* (1971) The Royal Society, London]. For biochemical nomenclature authors should as far as possible follow the Tentative Rules and Proposals of the IUPAC–IUB Commission on Biochemical Nomenclature [see *Biochem. J.* (1972), 126, 9]. For chemical nomenclature the IUPAC Rules should be followed [see *Biochem. J.* (1972), 126, 12]. The *Biochemical Journal* uses as a standard of spelling the *Concise Oxford Dictionary of Current English* (Oxford: Clarendon Press).

Two types of paper are accepted by the editors:

Full-length papers. Papers submitted for publication should be sent together with an extra copy of the synopsis (see below) to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent.

Papers submitted should be written concisely. Special attention is directed to the sections below concerning the preparation of the typescript. Typescripts that are not concise or do not conform to the conventions of the *Biochemical Journal* will be returned to the authors for revision. If a paper that has been returned to an author for revision is not resubmitted within one month, it will, on resubmission, be deemed to be a new paper and the date of receipt altered accordingly. A revised paper containing a significant amount of new material will also be redated.

Submission of a paper to the Editorial Board

implies that it reports unpublished work, that it is not under consideration for publication elsewhere, and that if accepted for the *Biochemical Journal* it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Papers should be headed by a concise but informative full title, by the names of the authors (preferably with one forename in full for each author) and by the name and address of the establishment where the work was performed. Details of financial support may appear in the acknowledgements at the end of the paper.

Before preparing papers authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. Papers should be in double-spaced typing throughout (including the references and legends of tables and figures) on sheets of uniform size and wide margins. The top copy should be submitted. It cannot be overemphasized that the need for revision of badly prepared typescripts inevitably leads to delays in publication.

Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the Journal. Sufficient information must be included to permit repetition of the experimental work.

Short Communications. Typescripts should be submitted *in duplicate*, written in English, and conform strictly to the form of the Journal as far as spelling and abbreviations are concerned. Such communications should not exceed 2400 words in length inclusive of the title, references etc. Authors may include up to two insertions such as tables, figures or schemes; in these cases authors must assess what proportion of a page these insertions will occupy and reduce the number of text words accordingly at the rate of 700 words per full page of the Journal. Authors are advised that the preparation of tables and especially figures is liable to cause a slight increase in publication time. Under no circumstances whatsoever can a complete Short Communication occupy more than four pages of the Journal. Communications should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Papers should be complete in themselves; (1) the methods used in experimental work must be adequately described or sufficient references given to allow repetition of the work; (2) sufficient indication of the results of experimental work must be included to justify the claims made.

Proceedings of the Biochemical Society

JOINT MEETING WITH THE SOCIETY OF BIOLOGICAL
CHEMISTS (INDIA) held at Bangalore

*The Editors of The Biochemical Journal accept no responsibility
for the Reports of the Proceedings of the Biochemical Society*
