	PAGE		PAGE
Proteins		Polymerization of proteins with glutaraldehyde. Soluble molecular-weight markers.	
A comparison of the physical and chemical properties of four cytochromes <i>c</i> from <i>Azotobacter vinelandii</i> .		By J. W. Payne	867
By W. H. Campbell, W. H. Orme-Johnson & R. H. Burris	617	Isolation and characterization of a glycoprotein from human colostrum.	
The biosynthesis of plasmodial myosin during starvation of <i>Physarum polycephalum</i> .		By J. H. Nichols & A. Bezkorovainy	875
By F. H. White & J. Lascelles	639	The electrophoretic mobility of peptides on paper at pH 1.9 (<i>Short Communication</i>).	
The chemistry of the collagen cross-links. The characterization of Fraction C, a possible artifact produced during the reduction of collagen fibres with borohydride.		By C. J. Bailey & J. A. M. Ramshaw	889
By S. P. Robins & A. J. Bailey	657	The amino acid sequence around the reactive cysteine residue in human plasma Factor XIII (<i>Short Communication</i>).	
Purification and some properties of rabbit anti-ovalbumin.		By J. J. Holbrook, R. D. Cooke & I. B. Kingston	901
By A. A. Ansari & A. Salahuddin	705	Nucleic Acids	
The amino acid sequence of cytochrome <i>c'</i> from <i>Alcaligenes</i> sp. N.C.I.B. 11015.		Nucleotide sequence analyses of the cytoplasmic 5S ribosomal ribonucleic acid from five species of flowering plants.	
By R. P. Ambler	751	By P. I. Payne, M. J. Corry & T. A. Dyer	845
Characterization of the proteins of guinea-pig hair and hair-follicle tissue.		Carbohydrates	
By P. M. Steinert & G. E. Rogers	759	The molecular-weight distribution of glycosaminoglycans.	
The formation of ferritin from apoferritin. Inhibition and metal ion-binding studies.		By J. J. Hopwood & H. C. Robinson	631
By I. G. Macara, T. G. Hoy & P. M. Harrison	785	The direction of glycan synthesis in a bacterial peptidoglycan.	
Some characteristics of the coagulation Factor Xa purified from human serum.		By J. B. Ward & H. R. Perkins	721
By Å. G. Berre, B. Østerud, T. B. Christensen, T. Holm & H. Prydz	791	Conformation of the mucopolysaccharides. X-ray fibre diffraction of heparin.	
The thermal denaturation of human oxyhaemoglobins A, A ₂ , C and S.		By I. A. Nieduszynski & E. D. T. Atkins	729
By J. Kinderlerer, H. Lehmann & K. F. Tipton	805	Small Molecules	
Purification and properties of a mouse liver plasma-membrane glycoprotein hydrolysing nucleotide pyrophosphate and phosphodiester bonds.		The interaction of 3-deoxy-3-fluoro-D-glucose with the hexose-transport system of the human erythrocyte.	
By W. H. Evans, D. O. Hood & J. W. Gurd	819	By G. J. Riley & N. F. Taylor	773
Immunochemical characterization of proteins from mouse liver plasma membranes.		Enzymology	
By J. W. Gurd, W. H. Evans & H. R. Perkins	827	The subcellular distribution and properties of aldehyde dehydrogenases in rat liver.	
Collagen cross-links. A mass-spectrometric and ¹ H- and ¹³ C-nuclear-magnetic-resonance study.		By S. O. C. Tottmar, H. Pettersson & K.-H. Kiessling	577
By E. Hunt & H. R. Morris	833	The nature and mode of action of the cellulosytic component C ₁ of <i>Trichoderma koningii</i> on native cellulose.	
		By G. Halliwell & M. Griffin	587

	PAGE		PAGE
Affinity chromatography of nicotinamide-adenine dinucleotide-linked dehydrogenases on immobilized derivatives of the dinucleotide. By S. Barry & P. O'Carra	595	Purification and properties of rabbit muscle L-glycerol 3-phosphate dehydrogenase. By P. Bentley, F. M. Dickinson & I. G. Jones	853
Glycyl-L-leucine hydrolase, a versatile 'master' dipeptidase from monkey small intestine. By M. Das & A. N. Radhakrishnan	609	The steady-state kinetics of isotope exchange for one substrate-one product enzymic reactions. By I. G. Darvey	861
Oxaloacetate decarboxylases of rat liver. By B. Dean & W. Bartley	667	3-Hydroxy steroid dehydrogenase activities of cortisone reductase. By W. Gibb & J. Jeffery	881
Some components of the cholinergic system in the prawn <i>Palaemonetes varians</i> (Leach). By R. D. Veldsema-Currie	673	Assay for glutamine synthetase activity (<i>Short Communication</i>). By J. E. Vorhaben, L. Wong & J. W. Campbell	893
Purification and some properties of cytoplasmic aspartate aminotransferase from sheep liver. By M. Campos-Cavieres & E. A. Munn	683	Use of affinity chromatography for the quantitative study of acceptor-ligand interactions: the lactose synthetase system (<i>Short Communication</i>). By P. Andrews, B. J. Kitchen & D. J. Winzor	897
Kinetic studies of the acylation of pig muscle-D-glyceraldehyde 3-phosphate dehydrogenase by 1,3-diphosphoglycerate and of proton uptake and release in the overall enzyme mechanism. By P. J. Harrigan & D. R. Trentham	695	Intermolecular Organization	
$\gamma\delta$ -Dioxovalerate as a substrate for the glyoxalase enzyme system. By T. Jerzykowski, R. Winter & W. Matuszewski	713	Binding of oligosaccharides of hyaluronic acid to proteoglycans (<i>Short Communication</i>). By T. E. Hardingham & H. Muir	905
The reaction pathway of membrane-bound rat liver mitochondrial monoamine oxidase. By M. D. Houslay & K. F. Tipton	735	General Methods	
The reliability of Michaelis constants and maximum velocities estimated by using the integrated Michaelis-Menten equation. By G. L. Atkins & I. A. Nimmo	779	A new general method for the assessment of the molecular-weight distribution of polydisperse preparations. Its application to an intestinal epithelial glycoprotein and two dextran samples, and comparison with a monodisperse glycoprotein. By R. A. Gibbons, S. N. Dixon & D. H. Pocock	649
The mechanism of the reaction between glutathione and 1-menaphthyl sulphate catalysed by a glutathione S-transferase from rat liver. By B. Gillham	797	<i>Appendix: Derivation of an approximate function relating c and ξ for Schulz molecular-weight distributions in the meniscus-depletion condition in the equilibrium ultracentrifuge.</i> By R. A. Gibbons	653
Aromatic amino acid transaminase in rat intestine. By J. Nakamura, T. Noguchi & R. Kido	815	Index	909

IUPAC-IUB Commission on Biochemical Nomenclature (CBN). Nomenclature of iron-sulphur proteins. Recommendations (1973).	5	
IUPAC-IUB Commission on Biochemical Nomenclature (CBN). Amendments and corrections (1973).	9	
Proteins		
Effect of high tyrosine content on the determination of tryptophan in protein by the acidic ninhydrin method. Application to chicken ovinhibitor. <i>By J. C. Zahnley & J. G. Davis</i>	59	
Structural studies on individual components of bovine transferrin. <i>By N. E. Richardson, N. Buttress, A. Feinstein, A. Stratil & R. L. Spooner</i>	87	
High total histone/deoxyribonucleic acid ratios for rat liver nuclei. <i>By S. K. Chanda, R. Ickowicz & A. L. Dounce</i>	115	
A phosphorylated light-chain component of myosin from skeletal muscle. <i>By W. T. Perrie, L. B. Smillie & S. V. Perry</i>	151	
Refolding of triose phosphate isomerase. <i>By S. G. Waley</i>	165	
[2-(3-Nitrotyrosine)]oxytocin, a weakly active analogue of the hormone bound by neurophysin (<i>Short Communication</i>). <i>By D. B. Hope & M. Walti</i>	241	
Preparation of insoluble collagen from human cartilage (<i>Short Communication</i>). <i>By F. S. Steven & H. Thomas</i>	245	
The binding of cationic detergent to insulin, zinc-insulin and iso-insulin (<i>Short Communication</i>). <i>By K. S. Birdi</i>	253	
Nucleic Acids		
Thermolability of 28 S ribosomal ribonucleic acid from the liver of <i>Crotalus durissus terrificus</i> (Ophidia, Reptilia). <i>By J. F. Giorgini & F. L. de Lucca</i>	73	
Reaction products from <i>N</i> -methyl- <i>N</i> -nitroso-urea and deoxyribonucleic acid containing thymidine residues. Synthesis and identification of a new methylation product, <i>O</i> ⁴ -methylthymidine. <i>By P. D. Lawley, D. J. Orr, S. A. Shah, P. B. Farmer & M. Jarman</i>		193
The alkylation of 2'-deoxyguanosine and of thymidine with diazoalkanes. Some observations on <i>O</i> -alkylation. <i>By P. B. Farmer, A. B. Foster, M. Jarman & M. J. Tisdale</i>		203
Molecular integrity of chloroplast ribosomal ribonucleic acid (<i>Short Communication</i>). <i>By C. J. Leaver</i>		237
Lipids		
The structure of novel C ₃₅ pentacyclic terpenes from <i>Acetobacter xylinum</i> . <i>By H. J. Förster, K. Biemann, W. G. Haigh, N. H. Tattrie & J. R. Colvin</i>		133
Induction of orientation of bacterial cellulose microfibrils by a novel terpenoid from <i>Acetobacter xylinum</i> . <i>By W. G. Haigh, H. J. Förster, K. Biemann, N. H. Tattrie & J. R. Colvin</i>		145
Carbohydrates		
Studies on β -glucanases. Some properties of a bacterial endo- β -(1 \rightarrow 3)-glucanase system. <i>By D. J. Manners & G. Wilson</i>		11
The structure of a β -(1 \rightarrow 3)-D-glucan from yeast cell walls. <i>By D. J. Manners, A. J. Masson & J. C. Patterson</i>		19
The structure of a β -(1 \rightarrow 6)-D-glucan from yeast cell walls. <i>By D. J. Manners, A. J. Masson, J. C. Patterson, H. Björndal & B. Lindberg</i>		31
Enzymology		
Regulation of locust fat-body phosphorylase. <i>By S. W. Applebaum & H. M. Schlesinger</i>		37
Regulatory properties of adenosine triphosphate-L-methionine <i>S</i> -adenosyltransferase of rat liver. <i>By J. B. Lombardini, T.-C. Chou & P. Talalay</i>		43

	PAGE		PAGE
The kinetics of interconversion of intermediates of the reaction of pig muscle lactate dehydrogenase with oxidized nicotinamide-adenine dinucleotide and lactate. By N. G. Bennett & H. Gutfreund	81	Heparan sulphate sulphotransferase. Properties of an enzyme from ox lung. By T. Foley & J. R. Baker	187
Effects of lipid removal on the molecular size and kinetic properties of bovine plasma aryl-esterase. By B. J. Kitchen, C. J. Masters & D. J. Winzor	93	The purification and regulatory properties of α -oxoglutarate dehydrogenase from <i>Acinetobacter lwoffii</i> . By M. G. Parker & P. D. J. Weitzman	215
Steady-state enzyme kinetics with high-affinity substrates or inhibitors. A statistical treatment of dose-response curves. By P. J. F. Henderson	101	Effect of high- and low-protein diets on the regulation of rat liver tyrosine aminotransferase and tryptophan oxygenase activities by L-tyrosine and L-tryptophan. By H. Mukhtar, M. K. Sahib & C. R. Krishna Murti	225
Studies on the sulphation of 3,4-dihydroxyphenylethylamine (dopamine) and related compounds by rat tissues. By W. N. Jenner & F. A. Rose	109	Evidence that chick tendon procollagen must be denatured to serve as substrate for proline hydroxylase (<i>Short Communication</i>). By L. Murphy & J. Rosenbloom	249
Enzyme forms produced from aspartate trans-carbamoylase by digestion with trypsin. By E. Heyde, A. Nagabhushanam & S. Venkataraman	125	Intermolecular Organization Optical-rotatory-dispersion studies of compounds related to cholesterol in liposomes and the membranes of erythrocyte 'ghosts'. By J. R. Green, P. A. Edwards & C. Green	63
The nature of the electrophoretically separable multiple forms of rat liver monoamine oxidase. By M. D. Houslay & K. F. Tipton	173	The interaction between ribonuclease A and surfactants. By M. N. Jones, H. A. Skinner, E. Tipping & A. Wilkinson	231

Contents of Volume 135, No. 2

Proteins		A spectrophotometric study of the secondary structure of precursor ribosomal ribonucleic acid from Krebs ascites-tumour cells. By A. A. Hadjiolov & R. A. Cox	349
The purification and properties of the lectin from potato tubers, a hydroxyproline-containing glycoprotein. By A. K. Allen & A. Neuberger	307	Evidence for the binding of the carcinogen 3-methylcholanthrene to both the purine and the pyrimidine bases of hamster fibroblast deoxyribonucleic acid (<i>Short Communication</i>). By P. A. Jones, W. Gevers & A. O. Hawtrey	375
A hydroxyproline-containing glycopeptide released from the walls of sycamore tissue-culture cells by hydrazinolysis. By M. F. Heath & D. H. Northcote	327	Carbohydrates O-Methyl sugars in lipopolysaccharides of Rhodospirillaceae. Identification of 3-O-methyl-D-mannose in <i>Rhodopseudomonas viridis</i> and of 4-O-methyl-D-xylose and 3-O-methyl-6-deoxy-D-talose in <i>Rhodopseudomonas palustris</i> respectively. By J. Weckesser, H. Mayer & I. Fromme	293
The formation of ferritin from apoferritin. Catalytic action of apoferritin. By I. G. Macara, T. G. Hoy & P. M. Harrison	343	The structure of a polymer containing galactosamine from walls of <i>Bacillus subtilis</i> 168 (<i>Short Communication</i>). By V. N. Shibaev, M. Duckworth, A. R. Archibald & J. Baddiley	383
Superoxide dismutase: a contaminant of bovine catalase (<i>Short Communication</i>). By B. Halliwell	379		
Nucleic Acids			
The occurrence of two types of synthesis of deoxyribonucleic acid during normal growth in <i>Bacillus subtilis</i> . By W. J. Harris	315		

	PAGE		PAGE
Small Molecules		Reduction of α -oxo carboxylic acids by pigeon liver 'malic' enzyme.	
The catalase activity of ferrihaems.		By C. L. Tang & R. Y. Hsu	287
By P. Jones, T. Robson & S. B. Brown	353		
Oxidation of deuteroferrihaem by hydrogen peroxide.		Studies by electron paramagnetic resonance on the catalytic mechanism of nitrogenase of <i>Klebsiella pneumoniae</i> .	
By P. Jones, K. Prudhoe & T. Robson	361	By B. E. Smith, D. J. Lowe & R. C. Bray	331
Enzymology		Amino acid activation in mammalian brain. Purification and characterization of tryptophan-activating enzyme from buffalo brain.	
Mechanism and stereochemistry of the 5-aminolaevulinate synthetase reaction.		By C.-C. Liu, C.-H. Chung & M.-L. Lee	367
By Z. Zaman, P. M. Jordan & M. Akhtar	257		
Properties and mechanism of action of creatine kinase from ox smooth muscle. Anion effects compared with pyruvate kinase.		Intermolecular Organization	
By B. Focant & D. C. Watts	265	A comparative study of ribonuclease hydrolysis of rat brain-cortex and liver membrane-bound ribosomes.	
The contractile and regulatory proteins of insect flight muscle.		By H. Simpkins, E. Panko & S. Tay	299
By B. Bullard, R. Dabrowska & L. Winkelman	277		

Contents of Volume 135, No. 3

Proteins		Phosphorylation of myelin basic protein by an adenosine 3':5'-cyclic monophosphate-dependent protein kinase (<i>Short Communication</i>).	
Collagen cross-linking. Isolation of cross-linked peptides from collagen of chicken bone.		By P. R. Carnegie, B. E. Kemp, P. R. Dunkley & A. W. Murray	569
By D. R. Eyre & M. J. Glimcher	393		
The transporting proteins of cholecalciferol and 25-hydroxycholecalciferol in serum of chicks and other species. Partial purification and characterization of the chick proteins.		Nucleic Acids	
By S. Edelstein, D. E. M. Lawson & E. Kodicek	417	The use of sodium perchlorate in deproteinization during the preparation of nucleic acids (<i>Short Communication</i>).	
The isolation and partial characterization of ribonuclease A from <i>Bison bison</i> .		By J. Wilcockson	559
By G. R. Stewart & K. J. Stevenson	427	Ribonucleic acid-deoxyribonucleic acid hybridization as a second-order reaction (<i>Short Communication</i>).	
Qualitative determination of <i>N</i> -terminal amino acids of peptides and proteins with cobalt(III) chelates.		By B. D. Young & J. Paul	573
By K. W. Bentley & E. H. Creaser	507		
Nitrogenase of <i>Klebsiella pneumoniae</i> . Interaction of the component proteins studied by ultracentrifugation.		Lipids	
By R. R. Eady	531	The sterols of the echinoderm <i>Asterias rubens</i> .	
The reactive serine residue in phosphoglucosyltransferase of <i>Micrococcus lysodeikticus</i> (<i>Short Communication</i>).		By A. G. Smith, I. Rubinstein & L. J. Goad	443
By C. P. Milstein, J. B. Clarke & H. G. Britton	551	Incorporation of radioactive mevalonate into C ₅₀ and C ₅₅ prenols by <i>Streptococcus mutans</i> (<i>Short Communication</i>).	
		By K. J. I. Thorne	567
		Small Molecules	
		An explanation of the asymmetric binding of sugars to the human erythrocyte sugar-transport systems (<i>Short Communication</i>).	
		By J. E. G. Barnett, G. D. Holman & K. A. Munday	539

	PAGE		PAGE
Enzymology			
Cross-specificity in some vertebrate and insect glutathione-transferases with methyl parathion (dimethyl <i>p</i> -nitrophenyl phosphorothionate), 1-chloro-2,4-dinitrobenzene and <i>S</i> -crotonyl- <i>N</i> -acetylcysteamine as substrates. <i>By</i> A. G. Clark, J. N. Smith & T. W. Speir	385	Use of progress curves to investigate product inhibition in enzyme-catalysed reactions. Application to the soluble mitochondrial adenosine triphosphatase. <i>By</i> R. D. Philo & M. J. Selwyn	525
Palmitoyl-coenzyme A synthetase. Isolation of an enzyme-bound intermediate. <i>By</i> J. Bar-Tana, G. Rose & B. Shapiro	411	Separation and partial characterization of two types of alkaline phosphatase from <i>Serratia marcescens</i> (<i>Short Communication</i>). <i>By</i> A. R. Bhatti	537
<i>N</i> -Acetyl- β -D-hexosaminidase component A. Different forms in human tissues and fluids. <i>By</i> J. U. Ikonne & R. B. Ellis	457	Purification and properties of an enzyme duet, phosphoribosylaminoimidazole carboxylase and phosphoribosylaminoimidazolesuccinocarboxamide synthetase, involved in the biosynthesis of purine nucleotides <i>de novo</i> (<i>Short Communication</i>). <i>By</i> C. A. H. Patey & G. Shaw	543
Molecular weight and amino acid composition of the exocellular DD-carboxypeptidase-transpeptidase of <i>Streptomyces</i> R61. <i>By</i> J.-M. Frère, J.-M. Ghuysen, H. R. Perkins & M. Nieto	463	The effects of chronic phenobarbitone administration and subsequent withdrawal on the activity of rat liver tryptophan pyrrolase and their resemblance to those of ethanol (<i>Short Communication</i>). <i>By</i> A. A.-B. Badawy & M. Evans	555
Enzymic mechanisms involving concomitant transfer and hydrolysis reactions. <i>By</i> J.-M. Frère	469	Inhibition of 3-phosphoglycerate dehydrogenase from <i>Pisum sativum</i> by purine nucleotides (<i>Short Communication</i>). <i>By</i> J. C. Slaughter	563
Kinetics of concomitant transfer and hydrolysis reactions catalysed by the exocellular DD-carboxypeptidase-transpeptidase of <i>Streptomyces</i> R61. <i>By</i> J.-M. Frère, J.-M. Ghuysen, H. R. Perkins & M. Nieto	483	Intermolecular Organization	
Fluorescence and circular-dichroism studies on the <i>Streptomyces</i> R61 DD-carboxypeptidase-transpeptidase. Penicillin binding by the enzyme. <i>By</i> M. Nieto, H. R. Perkins, J.-M. Frère & J.-M. Ghuysen	493	Protein synthesis and loss of viability in rye embryos. The lability of transferase enzymes during senescence. <i>By</i> B. E. Roberts & D. J. Osborne	405
Functional groups in the activity and regulation of <i>Escherichia coli</i> citrate synthase. <i>By</i> M. J. Danson & P. D. J. Weitzman	513	The effect of surfactant structure on ribonuclease A-surfactant interactions (<i>Short Communication</i>). <i>By</i> C. Blinkhorn & M. N. Jones	547
