	PAGE		PAGE
Biosynthesis and Degradation			
Lipogenesis in rabbit isolated fat-cells. By E. D. Saggerson	477	Inhibition of protein synthesis by ricin: experiments with rat liver mitochondria and nuclei and with ribosomes from <i>Escherichia coli</i> (<i>Short Communication</i>). By M. Greco, L. Montanaro, F. Novello, C. Saccone, S. Sperti & F. Stirpe	695
Turnover of myelin and other structural proteins in the developing rat brain. By M. I. Sabri, A. H. Bone & A. N. Davison	499	Cellular Interactions and Control Processes	
Synthesis of fatty acids in the perfused mouse liver. By D. M. W. Salmon, N. L. Bowen & D. A. Hems	611	Lomofungin as an inhibitor of nucleic acid synthesis in <i>Saccharomyces cerevisiae</i> . By M. Cannon & A. Jimenez	457
Carnitine and trimethylaminobutyrate synthesis in rat tissues (<i>Short Communication</i>). By R. A. Cox & C. L. Hoppel	699	The effect of oxytetracycline on insulin resistance in obese mice. By N. Bégin-Heick, M. Bourassa & H. M. C. Heick	465
Bioenergetics			
A re-evaluation of energy-independent calcium-ion binding by rat liver mitochondria. By K. C. Reed & F. L. Bygrave	555	The effects of 5 α -dihydrotestosterone on the kinetics of cell proliferation in rat prostate. By B. Lesser & N. Bruchovsky	483
The influx of calcium ions into human erythrocytes during cold storage. The influences of extracellular pH, intracellular adenosine triphosphate and efflux of univalent cations. By B. Mouat & C. Long	629	The control of tricarboxylate-cycle oxidations in blowfly flight muscle. The steady-state concentrations of coenzyme A, acetyl-coenzyme A and succinyl-coenzyme A in flight muscle and isolated mitochondria. By R. G. Hansford	509
The reconstitution of functional respiratory chains in membranes from electron-transport-deficient mutants of <i>Escherichia coli</i> as demonstrated by quenching of atebirin fluorescence (<i>Short Communication</i>). By B. A. Haddock & J. A. Downie	703	Calcium ion transport by pig erythrocyte membrane vesicles. By J. T. Buckley	521
Subcellular Structures			
Golgi β -glucuronidase of androgen-stimulated mouse kidney. By C. A. Marsh, C.-W. Lin & W. H. Fishman	491	The estimation of rates of utilization of glucose and ketone bodies in the brain of the suckling rat using compartmental analysis of isotopic data. By J. E. Cremer & D. F. Heath	527
Phosphodiesterase II in epithelial cells from guinea-pig and rat small intestine. By P. R. Flanagan & S. H. Zbarsky	545	Role of human skin in the photodecomposition of bilirubin. By C. L. Kapoor, C. R. Krishna Murti & P. C. Bajpai	567
A rapid method for the preparation of microvilli from rabbit kidney. By A. G. Booth & A. J. Kenny	575	Breakdown of phosphatidylinositol provoked by muscarinic cholinergic stimulation of rat parotid-gland fragments. By L. M. Jones & R. H. Michell	583
Heterogeneous distribution of enzymes among plasma-membrane fragments sedimenting with the microsomal fraction of rat liver. By K. A. Norris, M. Dobrota, F. S. Issa, R. H. Hinton & E. Reid	667	Phosphatidylinositol cleavage catalysed by the soluble fraction from lymphocytes. Activity at pH 5.5 and pH 7.0. By D. Allan & R. H. Michell	591

	PAGE		PAGE
Phosphatidylinositol cleavage in lymphocytes. Requirement for calcium ions at a low concentration and effects of other cations. By D. Allan & R. H. Michell	599	Metabolic adaptations during lactogenesis. Lactose synthesis in rabbit mammary tissue during pregnancy and lactation. By R. W. Mellenberger & D. E. Bauman	659
Protein kinase activity stimulated by adenosine 3':5'-cyclic monophosphate in synaptic-membrane fragments from ox brain. Inhibition of intrinsic activity by free and membrane-bound calcium ions. By M. Weller & R. Rodnight	605	Stimulation by 6- <i>N</i> ,2'- <i>O</i> -dibutyryladenosine 3':5'-cyclic monophosphate and glucocorticoids of phosphoenolpyruvate carboxykinase in the isolated perfused rat liver (<i>Short Communication</i>). By W. B. Huttner, W. Krone, H. J. Seitz & W. Tarnowski	691
Comparative studies on 3-oxo acid coenzyme A transferase from various rat tissues. By A. Fenselau & K. Wallis	619	Development	
Calcium-ion binding to the chromaffin-granule surface. By P. M. Dean & E. K. Matthews	637	Phytochrome-induced synthesis of ribonuclease <i>de novo</i> in lupin hypocotyl sections. By G. J. Acton & P. Schopfer	449
Influence of ascorbic acid on ribosomal patterns and collagen biosynthesis in healing wounds of scorbutic guinea pigs. By R. Harwood, M. E. Grant & D. S. Jackson	641	Thymidine kinase activity in cardiac muscle during embryonic and postnatal development. By P. C. Gillette & W. C. Claycomb	685
The effect of starvation on phosphodiesterase activity and the content of adenosine 3':5'-cyclic monophosphate in isolated mouse pancreatic islets. By K. Capito & C. J. Hedeskov	653	Metabolism in Whole Organisms	
		The synthesis of [¹⁴ C]streptozotocin and its distribution and excretion in the rat. By E. H. Karunanayake, D. J. Hearse & G. Mellows	673
		Index	707

The following papers appeared in the last issue of the Biochemical Journal
Molecular Aspects
Contents of Volume 141, No. 3, 1974

	PAGE		PAGE
Proteins			
Heterogeneity in tissue ferritins displayed by gel electrofocusing. By J. W. Drysdale	627	Analysis of the code relating sequence to conformation in globular proteins. An informational analysis of the role of the residue in determining the conformation of its neighbours in the primary sequence. By B. Robson & R. H. Pain	883
A plasma protein fractionation procedure for use in studies of protein metabolism. Its application to the measurement of synthesis rates of two α_1 -glycoproteins and other serum proteins in the rat. By J. Ho, K. N. Jeejeebhoy & R. H. Painter	655	Analysis of the code relating sequence to conformation in globular proteins. The distribution of residue pairs in turns and kinks in the backbone chain. By B. Robson & R. H. Pain	899
Calcium and thiol reactivity of human plasma clotting factor XIII. By R. D. Cooke, T. C. Pestell & J. J. Holbrook	675	A set of surface proteins common to the circulating human platelet and lymphocyte (<i>Short Communication</i>). By M. J. A. Tanner, D. H. Boxer, J. Cumming & J. Verrier-Jones	909
Calcium-induced dissociation of human plasma factor XIII and the appearance of catalytic activity. By R. D. Cooke	683	Nucleic Acids	
A mass-spectrometric sequence study of the enzyme ribitol dehydrogenase from <i>Klebsiella aerogenes</i> . By H. R. Morris, D. H. Williams, G. G. Midwinter & B. S. Hartley	701	Identical 3'-terminal octanucleotide sequence in 18S ribosomal ribonucleic acid from different eukaryotes. A proposed role for this sequence in the recognition of terminator codons. By J. Shine & L. Dalgarno	609
Phosphorylation of troponin and the effects of interactions between the components of the complex. By S. V. Perry & H. A. Cole	733	Studies on the 3'-terminal sequences of the large ribosomal ribonucleic acid of different eukaryotes and those associated with 'hidden' breaks in heat-dissociable insect 26S ribonucleic acid. By J. Shine, J. A. Hunt & L. Dalgarno	617
The formation of iron-binding fragments of hen ovotransferrin by limited proteolysis. By J. Williams	745	Studies on the fractionation of total transfer ribonucleic acid and purification of an alanine transfer ribonucleic acid from chick embryo. By M. P. J. S. Anandaraj & J. D. Cherayil	647
The amino acid sequence of plastocyanin from <i>Vicia faba</i> L. (broad bean). By J. A. M. Ramshaw, M. D. Scawen & D. Boulter	835	Carbohydrates	
Analysis of the code relating sequence to conformation in globular proteins. Theory and application of expected information. By B. Robson	853	X-ray fibre diffraction of cartilage proteoglycan aggregates containing hyaluronic acid (<i>Short Communication</i>). By E. D. T. Atkins, T. E. Hardingham, D. H. Isaac & H. Muir	919
Analysis of the code relating sequence to conformation in globular proteins. Development of a stereochemical alphabet on the basis of intra-residue information. By B. Robson & R. H. Pain	869	Enzymology	
		The binding of oxidized and reduced nicotinamide-adenine dinucleotides to bovine liver uridine diphosphate glucose dehydrogenase. By P. A. Gainey & C. F. Phelps	667

(continued overleaf)

(continued from preceding page)

	PAGE		PAGE
Ribitol dehydrogenase from <i>Klebsiella aerogenes</i> . Purification and subunit structure. By S. S. Taylor, P. W. J. Rigby & B. S. Hartley	693	Product inhibition studies on bovine liver carbamoyl phosphate synthetase. By K. R. F. Elliott & K. F. Tipton	817
Phosphonomethyl analogues of phosphate ester glycolytic intermediates. By H. B. F. Dixon & M. J. Sparkes	715	A steady-state kinetic model of butyrylcholinesterase from horse plasma. By K.-B. Augustinsson, T. Bartfai & B. Mannervik	825
The interaction of the phosphonate analogue of 3-phospho-D-glycerate with phosphoglycerate kinase. By G. A. Orr & J. R. Knowles	721	Mutationally altered rate constants in the mechanism of alkaline phosphatase. By S. E. Halford & M. J. Schlesinger	845
Properties of the phosphonomethyl isosteres of two phosphate ester glycolytic intermediates. By D. Stribling	725	Thiol-blocking reagents and phosphate acetyltransferase catalysis, and the assessment of protection by adsorbed molecules (<i>Short Communication</i>). By S. A. Kyrtopoulos & D. P. N. Satchell	905
Dehydrogenation of a phosphonate substrate analogue by glycerol 3-phosphate dehydrogenase. By P. R. Adams, R. Harrison & T. D. Inch	729	A comparison of two methods for fitting the integrated Michaelis-Menten equation (<i>Short Communication</i>). By I. A. Nimmo & G. L. Atkins	913
Studies of triose phosphate isomerase by hydrogen exchange. By C. A. Browne & S. G. Waley	753	Hydrolysis of bradykinin and its higher homologues by angiotensin-converting enzyme (<i>Short Communication</i>). By F. E. Dorer, J. W. Ryan & J. M. Stewart	915
Mechanism of activation of pyruvate dehydrogenase by dichloroacetate and other halogenated carboxylic acids. By S. Whitehouse, R. H. Cooper & P. J. Randle	761	Intermolecular Organization	
Affinity chromatography of nicotinamide nucleotide-dependent dehydrogenases on immobilized nucleotide derivatives. By I. P. Trayer & H. R. Trayer	775	Characterization of gastric mucoproteins isolated by equilibrium density-gradient centrifugation in caesium chloride. By B. J. Starkey, D. Snary & A. Allen	633
A kinetic analysis of enzyme systems involving four substrates. By K. R. F. Elliott & K. F. Tipton	789	Conformational changes in gastric mucoproteins induced by caesium chloride and guanidinium chloride. By D. Snary, A. Allen & R. H. Pain	641
Kinetic studies of bovine liver carbamoyl phosphate synthetase. By K. R. F. Elliott & K. F. Tipton	807	Index	923

Contents of Volume 142, No. 1

Biosynthesis and Degradation			
Protein synthesis by synaptosomes from rat brain. Contribution by the intraterminal mitochondria. By A. G. Hernández	7	The transport of sulphate and sulphite in rat liver mitochondria. By M. Crompton, F. Palmieri, M. Capano & E. Quagliariello	127
Phospholipid synthesis in rat liver endoplasmic reticulum after the administration of phenobarbitone and 20-methylcholanthrene. By S. C. Davison & E. D. Wills	19	The amounts and rates of export of polysaccharides found within the membrane system of maize root cells. By D. J. Bowles & D. H. Northcote	139
		Cellular Interactions and Control Processes	
The distribution of L-asparagine synthetase in the principal organs of several mammalian and avian species. By H. A. Milman & D. A. Cooney	27	Properties of pyruvate dehydrogenase of rat mammary tissue and its changes during pregnancy, lactation and weaning. By H. G. Coore & B. Field	87
Metabolism of dihydrotachysterol and 5,6-trans-cholecalciferol in the chick and the rat. By D. E. M. Lawson & P. A. Bell	37	The relationship between the concentration of adenosine 3':5'-cyclic monophosphate and the anti-lipolytic action of insulin in isolated rat fat-cells. By K. Siddle & C. N. Hales	97
Studies on the biosynthesis of tetrahymanol in <i>Tetrahymena pyriformis</i> . The mechanism of inhibition by cholesterol. By A. S. Beedle, K. A. Munday & D. C. Wilton	57	Folic acid metabolism in vitamin B ₁₂ -deficient sheep. Effects of injected methionine on liver constituents associated with folate metabolism. By R. M. Smith, W. S. Osborne-White & J. M. Gawthorne	105
A comparison of glucoside formation by liver preparations from the rabbit and the mouse. By R. S. Labow & D. S. Layne	75	Folic acid metabolism in vitamin B ₁₂ -deficient sheep. Effects of injected methionine on methotrexate transport and the activity of enzymes associated with folate metabolism in liver. By J. M. Gawthorne & R. M. Smith	119
Cyclitol glucosides and their role in the synthesis of a glucan from uridine diphosphate glucose in <i>Phaseolus aureus</i> . Characterization of some cyclitol glucosides and their synthesis. By J. Kemp & B. C. Loughman	153	Role of adenosine 3':5'-cyclic monophosphate in the action of 1,1,1-trichloro-2,2-bis-(p-chlorophenyl)ethane (DDT) on hepatic and renal metabolism. By S. Kacew & R. L. Singhal	145
Bioenergetics			
Inhibition and uncoupling of photophosphorylation in isolated chloroplasts by organotin, organomercury and diphenyleneiodonium compounds. By A. S. Watling-Payne & M. J. Selwyn	65	Evaluation of glucose turnover, body mass and recycling with reversible and irreversible tracers. By J. Katz, H. Rostami & A. Dunn	161
Studies with a reconstituted muscle glycolytic system. The rate and extent of glycolysis in simulated post-mortem conditions. By R. K. Scopes	79	Determination of synthesis, recycling and body mass of glucose in rats and rabbits <i>in vivo</i> with ³ H- and ¹⁴ C-labelled glucose. By J. Katz, A. Dunn, M. Chenoweth & S. Golden	171
Subcellular Structures			
Progesterone-induced lysis of rat kidney lysosomes as studied by changes in light-absorbance. By P. Badenoch-Jones & H. Baum	1	Concentration of elongation factor 2 in rat skeletal muscle during protein depletion and re-feeding (<i>Short Communication</i>). By S. D. Alexis, V. R. Young & D. M. Gill	185

	PAGE		PAGE
Metabolism in Whole Organisms			
A new method for the preparation of uniformly ¹⁴ C-labelled compounds by using <i>Anacystis nidulans</i> .		The effect of oral inorganic sulphate on the metabolism of 4-hydroxyphenethylamine (tyramine) in man: tyramine <i>O</i> -sulphate measurement in human urine (<i>Short Communication</i>).	
By K. C. Tovey, G. H. Spiller, K. G. Oldham, N. Lucas & N. G. Carr	47	By I. Smith & P. D. Mitchell	189

Contents of Volume 142, No. 2

	PAGE		PAGE
Biosynthesis and Degradation		Subcellular Structures	
The development of ribonuclease and acid phosphatase during germination of <i>Pisum arvense</i> .		The differential scattering of circularly polarized light by chloroplasts and evaluation of their true circular dichroism.	
By G. R. Barker, C. M. Bray & T. J. Walter	211	By R. P. F. Gregory & S. Raps	193
Synthesis and maturation of ribosomal ribonucleic acids in isolated HeLa cell nuclei. A tracer study on the topology of the 45S precursor of ribosomal ribonucleic acids.		<i>Appendix</i> : Theoretical rationale for the scattering correction of circular-dichroism spectra in dilute suspensions.	
By A. A. Hadjiolov & G. I. Milchev	263	By R. P. F. Gregory & S. Raps	201
The specific radioactivity of the tissue free amino acid pool as a basis for measuring the rate of protein synthesis in the rat <i>in vivo</i> .		Glycosyltransferases in the Golgi membranes of onion stem.	
By E. B. Fern & P. J. Garlick	413	By J. T. Powell & K. Brew	203
Sterol biosynthesis by the sea urchin <i>Echinus esculentus</i> .		Cellular Interactions and Control Processes	
By A. G. Smith & L. J. Goad	421	Studies on the Golgi apparatus. Cumulative inhibition of protein and glycoprotein secretion by D-galactosamine.	
Synthesis of polyprenyltoluquinols from homogentisate and polyprenyl pyrophosphates in particulate fractions of <i>Euglena</i> and sugar beet (<i>Short Communication</i>).		By C. H. Bauer, R. Lukaschek & W. G. Reutter	221
By G. Thomas & D. R. Threlfall	437	Effect of glucagon on phenylalanine metabolism and phenylalanine-degrading enzymes in the rat.	
Peroxidatic oxidation of tyrosine to melanin in supernatant of crude mouse melanoma homogenates (<i>Short Communication</i>).		By L. M. Brand & A. E. Harper	231
By R. P. Patel, M. R. Okun, L. M. Edelstein & N. Cariglia	441	Different mechanisms of regulation of nuclear reduced nicotinamide-adenine dinucleotide phosphate-dependent 3-oxo steroid 5 α -reductase activity in rat liver, kidney and prostate.	
Alterations in cholesterol and fatty acid biosynthesis in rat liver homogenates by aryloxy acids (<i>Short Communication</i>).		By J.-Å. Gustafsson & Å. Pousette	273
By R. J. Olson, T. E. Trumble & W. Gamble	445	The metabolic effects of sodium dichloroacetate in the starved rat.	
Bioenergetics		By P. J. Blackshear, P. A. H. Holloway & K. G. M. M. Alberti	279
The effect of energization on the apparent Michaelis-Menten constant for oxygen in mitochondrial respiration.		Measurement of the dynamics of stimulation and inhibition of steroidogenesis in isolated rat adrenal cells by using column perfusion.	
By L. C. Petersen, P. Nicholls & H. Degn	247	By P. J. Lowry & C. McMartin	287
Mode of inhibition of mitochondrial energy transduction by chlorophenoxyisobutyrate.			
By S. R. Panini & C. K. Ramakrishna Kurup	253		

	PAGE		PAGE
Increase in pituitary adenosine 3':5'-cyclic monophosphate content and potentiation of growth-hormone release from heifer anterior pituitary slices incubated in the presence of 3-isobutyl-1-methylxanthine. By J. G. Schofield & M. McPherson	295	Hormonal regulation of adipose-tissue acetyl-coenzyme A carboxylase by changes in the polymeric state of the enzyme. The role of long-chain fatty acyl-coenzyme A thioesters and citrate. By A. P. Halestrap & R. M. Denton	365
The metabolism of macromolecules during the differentiation of myxamoebae of the cellular slime mould <i>Dictyostelium discoideum</i> containing different amounts of glycogen. By B. D. Hames & J. M. Ashworth	301	Regulation of guanylate cyclase in guinea-pig islets of Langerhans. By S. L. Howell & W. Montague	379
The control of saccharide synthesis during development of myxamoebae of <i>Dictyostelium discoideum</i> containing differing amounts of glycogen. By B. D. Hames & J. M. Ashworth	317	Insulin release from the perfused rat pancreas. Mode of action of tolbutamide. By V. Bowen & N. R. Lazarus	385
The effect of lysine on gluconeogenesis from lactate in rat hepatocytes. By N. W. Cornell, P. Lund & H. A. Krebs	327	The effects of potassium, 5-hydroxytryptamine, adrenocorticotrophin and angiotensin II on the concentration of adenosine 3':5'-cyclic monophosphate in suspensions of dispersed rat adrenal zona glomerulosa and zona fasciculata cells. By J. D. M. Albano, B. L. Brown, R. P. Ekins, S. A. S. Tait & J. F. Tait	391
The role of adenosine 3':5'-cyclic monophosphate in the division of WI 38 cells. The cellular response to prostaglandin E ₁ and the effects of a cyclic adenosine 3':5'-cyclic monophosphate analogue and prostaglandin E ₁ on cell division. By M. J. Kurtz, P. Polgar, L. Taylor & A. M. Rutenburg	339	Production and utilization of acetate in mammals. By S. E. Knowles, I. G. Jarrett, O. H. Filsell & F. J. Ballard	401
The action of local anaesthetics on lipolysis and on adenosine 3':5'-cyclic monophosphate content in isolated rat fat-cells. By K. Siddle & C. N. Hales	345	Effect of duration of the period after castration on the response of the rat ventral prostate to androgens (<i>Short Communication</i>). By B. Lesser & N. Bruchovsky	429
Changes in intramitochondrial adenine nucleotides in blowfly flight-muscle mitochondria. By S. M. Danks & J. B. Chappell	353		
Adaptive changes in the capacity of systems used for the synthesis of citrulline in rat liver mitochondria in response to high- and low-protein diets. By J. D. McGivan, N. M. Bradford & J. B. Chappell	359	Development	
		Pathways of gluconeogenesis from L-serine in the neonatal rat (<i>Short Communication</i>). By K. Snell	433

Contents of Volume 142, No. 3

Biosynthesis and Degradation		Synthesis of fatty acids in the perfused mouse liver. By D. M. W. Salmon, N. L. Bowen & D. A. Hems	611
Lipogenesis in rabbit isolated fat-cells. By E. D. Saggerson	477	Carnitine and trimethylaminobutyrate synthesis in rat tissues (<i>Short Communication</i>). By R. A. Cox & C. L. Hoppel	699
Turnover of myelin and other structural proteins in the developing rat brain. By M. I. Sabri, A. H. Bone & A. N. Davison	499		

	PAGE		PAGE
Bioenergetics		The control of tricarboxylate-cycle oxidations in blowfly flight muscle. The steady-state concentrations of coenzyme A, acetyl-coenzyme A and succinyl-coenzyme A in flight muscle and isolated mitochondria.	
A re-evaluation of energy-independent calcium-ion binding by rat liver mitochondria. By K. C. Reed & F. L. Bygrave	555	By R. G. Hansford	509
The influx of calcium ions into human erythrocytes during cold storage. The influences of extracellular pH, intracellular adenosine triphosphate and efflux of univalent cations. By B. Mouat & C. Long	629	Calcium ion transport by pig erythrocyte membrane vesicles. By J. T. Buckley	521
The reconstitution of functional respiratory chains in membranes from electron-transport-deficient mutants of <i>Escherichia coli</i> as demonstrated by quenching of aetbrin fluorescence (<i>Short Communication</i>). By B. A. Haddock & J. A. Downie	703	The estimation of rates of utilization of glucose and ketone bodies in the brain of the suckling rat using compartmental analysis of isotopic data. By J. E. Cremer & D. F. Heath	527
Subcellular Structures		Role of human skin in the photodecomposition of bilirubin. By C. L. Kapoor, C. R. Krishna Murti & P. C. Bajpai	567
Golgi β -glucuronidase of androgen-stimulated mouse kidney. By C. A. Marsh, C.-W. Lin & W. H. Fishman	491	Breakdown of phosphatidylinositol provoked by muscarinic cholinergic stimulation of rat parotid-gland fragments. By L. M. Jones & R. H. Michell	583
Phosphodiesterase II in epithelial cells from guinea-pig and rat small intestine. By P. R. Flanagan & S. H. Zbarsky	545	Phosphatidylinositol cleavage catalysed by the soluble fraction from lymphocytes. Activity at pH 5.5 and pH 7.0. By D. Allan & R. H. Michell	591
A rapid method for the preparation of microvilli from rabbit kidney. By A. G. Booth & A. J. Kenny	575	Phosphatidylinositol cleavage in lymphocytes. Requirement for calcium ions at a low concentration and effects of other cations. By D. Allan & R. H. Michell	599
Heterogeneous distribution of enzymes among plasma-membrane fragments sedimenting with the microsomal fraction of rat liver. By K. A. Norris, M. Dobrota, F. S. Issa, R. H. Hinton & E. Reid	667	Protein kinase activity stimulated by adenosine 3':5'-cyclic monophosphate in synaptic-membrane fragments from ox brain. Inhibition of intrinsic activity by free and membrane-bound calcium ions. By M. Weller & R. Rodnight	605
Inhibition of protein synthesis by ricin: experiments with rat liver mitochondria and nuclei and with ribosomes from <i>Escherichia coli</i> (<i>Short Communication</i>). By M. Greco, L. Montanaro, F. Novello, C. Saccone, S. Sperti & F. Stirpe	695	Comparative studies on 3-oxo acid coenzyme A transferase from various rat tissues. By A. Fenselau & K. Wallis	619
Cellular Interactions and Control Processes		Calcium-ion binding to the chromaffin-granule surface. By P. M. Dean & E. K. Matthews	637
Lomofungin as an inhibitor of nucleic acid synthesis in <i>Saccharomyces cerevisiae</i> . By M. Cannon & A. Jimenez	457	Influence of ascorbic acid on ribosomal patterns and collagen biosynthesis in healing wounds of scorbutic guinea pigs. By R. Harwood, M. E. Grant & D. S. Jackson	641
The effect of oxytetracycline on insulin resistance in obese mice. By N. Bégin-Heick, M. Bourassa & H. M. C. Heick	465		
The effects of 5 α -dihydrotestosterone on the kinetics of cell proliferation in rat prostate. By B. Lesser & N. Bruchofsky	483		

	PAGE		PAGE
The effect of starvation on phosphodiesterase activity and the content of adenosine 3':5'-cyclic monophosphate in isolated mouse pancreatic islets. <i>By K. Capito & C. J. Hedekov</i>	653	Development	
Metabolic adaptations during lactogenesis. Lactose synthesis in rabbit mammary tissue during pregnancy and lactation. <i>By R. W. Mellenberger & D. E. Bauman</i>	659	Phytochrome-induced synthesis of ribonuclease <i>de novo</i> in lupin hypocotyl sections. <i>By G. J. Acton & P. Schopfer</i>	449
Stimulation by 6- <i>N</i> ,2'- <i>O</i> -dibutyryl adenosine 3':5'-cyclic monophosphate and glucocorticoids of phosphoenolpyruvate carboxykinase in the isolated perfused rat liver (<i>Short Communication</i>). <i>By W. B. Huttner, W. Krone, H. J. Seitz & W. Tarnowski</i>	691	Thymidine kinase activity in cardiac muscle during embryonic and postnatal development. <i>By P. C. Gillette & W. C. Claycomb</i>	685
		Metabolism in Whole Organisms	
		The synthesis of [¹⁴ C]streptozotocin and its distribution and excretion in the rat. <i>By E. H. Karunanayake, D. J. Hearse & G. Mellows</i>	673
		Index	707
