

Molecular Aspects

Contents of Volume 143, No. 2, 1974

	PAGE		PAGE
Proteins		Nucleic Acids	
The amino acid sequence of plastocyanin from <i>Cucurbita pepo</i> L. (vegetable marrow). By M. D. Scawen & D. Boulter	257	Studies on chemical modification of thionucleosides in the transfer ribonucleic acid of <i>Escherichia coli</i> . By Y. S. P. Rao & J. D. Cherayil	285
Studies on the structure and activity of rabbit Clq (a subcomponent of the first component of complement). By D. M. Lowe & K. B. M. Reid	265	Some evidence for the occurrence of ribonucleic acid in the lutoid fraction (lysosomal compartment) from <i>Hevea brasiliensis</i> latex (<i>Short Communication</i>). By B. Marin, P. Trouslot & S. Pujarniscle	479
Different molecular forms of plasminogen and plasmin produced by urokinase in human plasma and their relation to protease inhibitors and lysis of fibrinogen and fibrin. By S. Müllertz	273	Stabilization of two-stranded ribohomopolymer helices and destabilization of a three-stranded helix by ethidium bromide (<i>Short Communication</i>). By M. J. Waring	483
The release of iron from horse spleen ferritin by reduced flavins. By S. Sirivech, E. Frieden & S. Osaki	311	Lipids	
Slow conformational changes of a <i>Neurospora</i> glutamate dehydrogenase studied by protein fluorescence. By B. Ashby, J. C. Wootton & J. R. S. Fincham	317	The reaction of phosphoglycolipids and other lipids with hydrofluoric acid. By N. Shaw & A. Stead	461
Extraction, partial purification and properties of obelin, the calcium-activated luminescent protein from the hydroid <i>Obelia geniculata</i> . By A. K. Campbell	411	Carbohydrates	
Evaluation of equilibrium constants by affinity chromatography. By L. W. Nichol, A. G. Ogston, D. J. Winzor & W. H. Sawyer	435	The copolymeric structure of pig skin dermatan sulphate. Characterization of D-glucuronic acid-containing oligosaccharides isolated after controlled degradation of oxydermatan sulphate. By L.-Å. Fransson, L. Cöster, A. Malmström & I. Sjöberg	369
Ferritin iron uptake and release. Structure-function relationships. By P. M. Harrison, T. G. Hoy, I. G. Macara & R. J. Hoare	445	The copolymeric structure of pig skin dermatan sulphate. Isolation and characterization of L-idurono-sulphate-containing oligosaccharides from copolymeric chains. By L.-Å. Fransson, L. Cöster, B. Havsmark, A. Malmström & I. Sjöberg	379
The reaction of <i>N</i> -acetylneuraminidase with chloropyruvate (<i>Short Communication</i>). By J. E. G. Barnett & F. Kolisis	487	Small Molecules	
Proteolysis of rabbit immunoglobulin M by papain (<i>Short Communication</i>). By B. M. McIlroy & G. T. Stevenson	491	Metabolism of biphenyl. Structure and physico-chemical properties of 2-hydroxy-6-oxo-6-phenylhexa-2,4-dienoic acid, the <i>meta</i> -cleavage product from 2,3-dihydroxybiphenyl by <i>Pseudomonas putida</i> . By D. Catelani & A. Colombi	431
Small-angle X-ray scattering of pig thyroglobulin in solution (<i>Short Communication</i>). By H. Brumberger, J. L. Lipton, G. Dorfman & E. Nakano	495	Enzymology	
		Separation and properties of human brain hexosaminidase C. By I. Braidman, M. Carroll, N. Dance & D. Robinson	295

	PAGE		PAGE
Subcellular distribution and properties of kynurenine transaminase in rat liver. By M. Nakatani, M. Morimoto, T. Noguchi & R. Kido	303	An inhibitor of phospholipase D in saliva. By R. M. C. Dawson & N. Hemington	427
Turkey liver xanthine dehydrogenase. Reactivation of the cyanide-inactivated enzyme by sulphide and by selenide. By W. F. Cleere & M. P. Coughlan	331	The preparation of crystalline human L-lactate-nicotinamide-adenine dinucleotide oxidoreductase isoenzyme 1 involving preparative polyacrylamide-gel electrophoresis. By A. V. Emes, M. J. Gallimore, A. W. Hodson & A. L. Latner	453
A comparison of wild-type and mutant ribitol dehydrogenases from <i>Klebsiella aerogenes</i> . By B. D. Burleigh, Jr., P. W. J. Rigby & B. S. Hartley	341	Turkey liver xanthine dehydrogenase: properties of the enzyme dependent on the content of functional active sites (<i>Short Communication</i>). By W. F. Cleere, C. O'Regan & M. P. Coughlan	465
Kinetic studies of oxidized nicotinamide-adenine dinucleotide-facilitated reactions of D-glyceraldehyde 3-phosphate dehydrogenase. By P. J. Harrigan & D. R. Trentham	353	Nuclear protein kinase activity in glucagon-stimulated perfused rat livers (<i>Short Communication</i>). By W. K. Palmer, M. Castagna & D. A. Walsh	469
The enthalpy change for the reduction of nicotinamide-adenine dinucleotide. By K. Burton	365	Formation of catalase compound I by reaction with peroxyacetic acid: pH changes in unbuffered systems (<i>Short Communication</i>). By P. Jones & D. N. Middlemiss	473
Membrane-bound DD-carboxypeptidases from <i>Bacillus megaterium</i> KM. General properties, substrate specificity and sensitivity to penicillins, cephalosporins and peptide inhibitors of the activity at pH5. By T. Diaz-Mauriño, M. Nieto & H. R. Perkins	391	Intermolecular Organization The role of ribosomal ribonucleic acid in the structure and function of mammalian brain ribosomes. By B. K. Grove & T. C. Johnson	419
Deoxycytidylate deaminase. Evidence for a new enzyme in cells infected by the virus of herpes simplex. By H. A. Rolton & H. M. Keir	403	Enhanced extractability of articular cartilage proteoglycans in osteoarthritis (<i>Short Communication</i>). By K. D. Brandt	475

The following papers appeared in the last issue of the Biochemical Journal

Cellular Aspects

Contents of Volume 144, No. 1, 1974

	PAGE		PAGE
Biosynthesis and Degradation		Energy-linked reduction of nicotinamide-adenine dinucleotide in membranes derived from normal and various respiratory-deficient mutant strains of <i>Escherichia coli</i> K12.	77
Effects on protein synthesis of injecting synthetic polyribonucleotides into living cells. By H. Woodland & S. E. Ayers	11	By R. K. Poole & B. A. Haddock	
Putrescine catabolism in mammalian brain. By N. Seiler & M. J. Al-Therib	29	Proton/sodium ion antiport in <i>Escherichia coli</i> . By I. C. West & P. Mitchell	87
Rat cerebral-cortex adenosine deaminase activity and its subcellular distribution. By I. Pull & H. McIlwain	37		
The metabolic sequence by which some 4,4-dimethyl sterols are converted into cholesterol. By G. F. Gibbons	59	Subcellular Structures	
The influence of substrate concentrations on the rate of insect juvenile hormone biosynthesis by corpora allata of the desert locust <i>in vitro</i> . By S. S. Tobe & G. E. Pratt.	107	The reconstitution of microsomal redox chains. A comparative analysis of the effectiveness of membrane self-assembly and template binding of electron carriers. By A. I. Archakov, G. I. Bachmanova, V. M. Devichensky, I. I. Karuzina, N. S. Zhrebkova, G. A. Alimov, G. P. Kuznetsova & A. V. Karyakin	1
Activities of prolyl hydroxylase, lysyl hydroxylase, collagen galactosyltransferase and collagen glucosyltransferase in the liver of rats with hepatic injury. By J. Risteli & K. I. Kivirikko	115	Caution in the interpretation of plant ribosome studies (<i>Short Communication</i>). By C. J. Leaver & J. A. Dyer	165
Collagen biosynthesis. Characterization of subcellular fractions from embryonic chick fibroblasts and the intracellular localization of procollagen prolyl and procollagen lysyl hydroxylases. By R. Harwood, M. E. Grant & D. S. Jackson	123	Cellular Interactions and Control Processes	
Yeast protein synthesis. Preparation and analysis of a highly active cell-free system. By C. H. Sissons	131	Regulatory effects of polyamines on membrane-bound acetylcholinesterase. By A. Kossorotow, H. U. Wolf & N. Seiler	21
Lipolysis and hydrogenation of galactolipids and the accumulation of phytanic acid in the rumen (<i>Short Communication</i>). By R. M. C. Dawson, N. Hemington, D. Grime, D. Lander & P. Kemp	169	Phenethylbiguanide and the inhibition of hepatic gluconeogenesis in the guinea pig. By K. Ogata, M. Jomain-Baum & R. W. Hanson	49
Bioenergetics		Inhibition by the branched-chain 2-oxo acids of the 2-oxoglutarate dehydrogenase complex in developing rat and human brain. By M. S. Patel	91
The nature and properties of the inducible sodium-plus-potassium ion-dependent adenosine triphosphatase in the gills of eels (<i>Anguilla anguilla</i>) adapted to fresh water and sea water. By J. R. Sargent & A. J. Thomson	69	Oestradiol uptake and retention, and high-affinity binding sites in cultured rabbit uterus. By S. L. Russell & G. H. Thomas	99
		Enzyme synthesis in the regulation of hepatic 'malic' enzyme activity. By G. Murphy & D. G. Walker	149

(continued overleaf)

(continued from preceding page)

	PAGE		PAGE
Differences in the products of mitochondrial protein synthesis <i>in vivo</i> in human and mouse cells and their potential use as markers for the mitochondrial genome in human-mouse cell hybrids.		<i>saccharomyces pombe</i> 972h ⁻ growing in the presence of glycerol.	
By A. Jeffreys & I. Craig	161	By R. K. Poole & D. Lloyd	141
		Metabolism in Whole Organisms	
Development		Glucose transport in <i>Entamoeba histolytica</i> .	
Changes in respiratory activities during the cell-cycle of the fission yeast <i>Schizo-</i>		By R. Serrano & R. E. Reeves	43
		Distribution and metabolism of phenylalanine and tyrosine during tularaemia in the rat (<i>Short Communication</i>).	
		By M. C. Powanda, R. E. Dinterman, R. W. Wannemacher, Jr., & G. D. Herbrandson	173
