Contents of Volume 143, No. 3, 1974

	PAGE		PAGE
Proteins		Enzymology	
Topography of <i>Escherichia coli</i> ribosomal proteins. The order of reactivity of thiol groups. By A. Bakardjieva & R. R. Crichton	599	Chemically modified nylons as supports for enzyme immobilization. Polyisocyanide-nylon. By L. Goldstein, A. Freeman & M. Sokolovsky	497
Reductive alkylation of ribosomes as a probe to the topography of ribosomal proteins. By G. Moore & R. R. Crichton	607	The nucleoside triphosphate-ribonucleic acid nucleotidyltransferase (EC 2.7.7.6) of <i>Agrobacterium tumefaciens</i> (Smith and Townsend) Conn. Purification and properties of the enzyme from the tumorigenic strain B6806. By U. C. Knopf	511
The macromolecular properties of blood-group-specific glycoproteins. Characterization of a series of fractions obtained by density-gradient ultracentrifugation. By K. R. Bhaskar & J. M. Creeth	669	Temperature and pressure adaptation of the binding site of acetylcholinesterase. By P. W. Hochachka	535
The amino acid sequence of plastocyanin from <i>Chlorella fusca</i> . By J. Kelly & R. P. Ambler	681	Purification and properties of dolphin muscle aspartate and alanine transaminases and their possible roles in the energy metabolism of diving mammals. By T. G. Owen & P. W. Hochachka	541
The amino acid sequence of plastocyanin from French bean (<i>Phaseolus vulgaris</i>). By P. R. Milne, J. R. E. Wells & R. P. Ambler	691	Purification and properties of the trimethylamine dehydrogenase of Bacterium 4B6. By J. Colby & L. J. Zatman	555
Completion of the analysis of the primary structure of the variable domain of a homogeneous rabbit antibody to type III pneumococcal polysaccharide. By J.-C. Jaton	723	Protection of glutamate dehydrogenase by nicotinamide-adenine dinucleotide against reversible inactivation by pyridoxal 5'-phosphate as a sensitive indicator of conformational change induced by substrates and substrate analogues. By S.-S. Chen & P. C. Engel	569
Mössbauer effect in the 'super-reduced' form of the high-potential iron-sulphur protein from <i>Chromatium</i> (Short Communication). By D. P. E. Dickson & R. Cammack	763	The structure and mechanism of stem bromelain. Evaluation of the homogeneity of purified stem bromelain, determination of the molecular weight and kinetic analysis of the bromelain-catalysed hydrolysis of <i>N</i> -benzyloxycarbonyl-L-phenylalanyl-L-serine methyl ester. By C. W. Wharton	575
The solubility of fibrinogen in solutions containing dextrans of various molecular weights (Short Communication). By M. W. Rampling	767	Kinetic studies on the effect of uridine diphosphate galactose and manganous ions on the reaction between lactose synthetase A protein from human milk and <i>p</i> -hydroxymercuribenzoate. By B. J. Kitchen & P. Andrews	587
Nucleic Acids		Structure and properties of arginase from the polychaete annelid <i>Pista pacifica</i> Berkeley. By K. L. O'Malley & R. C. Terwilliger	591
Formation of rings from segments of HeLa-cell nuclear deoxyribonucleic acid. By N. Hardman	521		
Small Molecules			
Biological, proton-magnetic-resonance- and ultraviolet-spectroscopic evidence for a molecular complex of actinomycin D and 10,11-dihydro-3 <i>H</i> -naphth[1,2- <i>g</i>]indazol-7-ol (Short Communication). By R. W. Chesnut, N. N. Durham, E. A. Mawdsley, G. X. Thyvelikakath, K. D. Berlin & B. M. Fung	789		

	PAGE		PAGE
An oxygenase from guinea-pig liver which catalyses sulphoxidation. By K. Prema & K. P. Gopinathan	613	The β -galactosidase-catalysed hydrolyses of β -D-galactopyranosyl pyridinium salts. Rate-limiting generation of an enzyme-bound galactopyranosyl cation in a process dependent only on aglycone acidity. By M. L. Sinnott & S. G. Withers	751
Regulation of heart muscle pyruvate dehydrogenase kinase. By R. H. Cooper, P. J. Randle & R. M. Denton	625	Expressions of the Michaelis-Menten equation when studying enzyme reactions in a variable-volume medium (<i>Short Communication</i>). By M. P. Gingold	771
Studies on the changes in protein fluorescence and enzymic activity of aspartate aminotransferase on binding of pyridoxal 5'-phosphate. By R. W. Evans & J. J. Holbrook	643	The effect of systematic error on the accuracy of Michaelis constants and maximum velocities estimated by using the integrated Michaelis-Menten equation (<i>Short Communication</i>). By P. F. J. Newman, G. L. Atkins & I. A. Nimmo	779
The hybridization of glyceraldehyde 3-phosphate dehydrogenases from rabbit muscle and yeast. Kinetics and thermodynamics of the reaction and isolation of the hybrid. By H. H. Osborne & M. R. Hollaway	651	The steady-state kinetics of isotope exchange at equilibrium: one substrate-one product enzymic mechanisms where two molecules of substrate or product are bound to an enzyme molecule (<i>Short Communication</i>). By I. G. Darvey	783
An examination of the utility of photogenerated reagents by using α -chymotrypsin. By A. J. Bridges & J. R. Knowles	663	Immunological evidence to show that the <i>N</i> -acetylglucosaminidase and <i>N</i> -acetylgalactosaminidase activities of <i>Dictyostelium discoideum</i> reside in the same protein molecule (<i>Short Communication</i>). By D. Every & J. M. Ashworth	785
Electron-paramagnetic-resonance studies on cobalt(II) carbonic anhydrase-sulphonamide complexes. By S. A. Cockle, S. Lindskog & E. Grell	703	Intermolecular Organization	
Properties of pig heart aconitase. By O. Gawron, Sr., M. C. Kennedy & R. A. Rauner	717	pH-controlled hydrogen-bonding (<i>Short Communication</i>). By J. L. Wood	775
The purification of cholinesterase from horse serum. By A. R. Main, W. G. Soucie, I. L. Buxton & E. Arinc	733	Index	793
Inhibition of the soluble adenosine triphosphatase from mitochondria by adenylyl imidodiphosphate. By R. D. Philo & M. J. Selwyn	745		

The following papers appeared in the last issue of the Biochemical Journal

Cellular Aspects Contents of Volume 144, No. 2, 1974

	PAGE		PAGE
Biosynthesis and Degradation			
Degradation of monogalactosyl diglyceride and diagalactosyl diglyceride by sheep pancreatic enzymes. By S. S. Bajwa & P. S. Sastry	177	Inhibition of progesterone of the lactogenic effect of prolactin in the pseudopregnant rabbit. By L. Assairi, C. Delouis, P. Gaye, L.-M. Houdebine, M. Ollivier-Bousquet & R. Denamur	245
Urate synthesis in the perfused chick liver. By E. Barratt, P. J. Buttery & K. N. Boorman	189	Adenosine 3':5'-cyclic monophosphate in young and senescent human fibroblasts during growth and stationary phase <i>in vitro</i> . Effects of prostaglandin E ₁ and of adrenaline. By R. J. Haslam & S. Goldstein	253
Synthesis of phosphoenolpyruvate carboxykinase (guanosine triphosphate) by isolated liver polyribosomes. By F. J. Ballard, M. F. Hopgood, L. Reshef, S. Tilghman & R. W. Hanson	199	Biogenesis of mitochondria. Phospholipid synthesis <i>in vitro</i> by yeast mitochondrial and microsomal fractions. By G. S. Cobon, P. D. Crowfoot & A. W. Linnane	265
Alternative pathways of zeaxanthin biosynthesis in a <i>Flavobacterium</i> species. Experiments with nicotine as inhibitor. By J. C. B. McDermott, D. J. Brown, G. Britton & T. W. Goodwin	231	A study of various changes in transfer ribonucleic acid methylase activity during adenovirus-12 transformation <i>in vitro</i> . By E. S. McFarlane	277
Studies on the metabolism of 5 α -androst-16-en-3-one in boar testis <i>in vivo</i> . By Y. A. Saat, D. B. Gower, F. A. Harrison & R. B. Heap	347	Soluble neutral and acid maltases in the suckling-rat intestine. The effect of cortisol and development. By G. Galand & G. G. Forstner	281
The relative stability of liver cytosol enzymes incubated <i>in vitro</i> . By M. F. Hopgood & F. J. Ballard	371	Isolation of microvillus plasma membranes from suckling-rat intestine. The influence of premature induction of digestive enzymes by injection of cortisol acetate. By G. Galand & G. G. Forstner	293
Inhibitory effect of carbon monoxide on the N- and ring-hydroxylation of 2-acetamidofluorene by hamster hepatic microsomal preparations (<i>Short Communication</i>). By P. D. Lotlikar & K. Zaleski	427	The response of the small intestine to vitamin D. Correlation between calcium-binding-protein production and increased calcium absorption. By J. S. Emtage, D. E. M. Lawson & E. Kodicek	339
Possible site of flavonoid synthesis in the photosynthetic apparatus (<i>Short Communication</i>). By K. Saito	431	Simulation of biogenic amine metabolism in the brain. By A. J. Turner, J. A. Illingworth & K. F. Tipton	353
Subcellular Structures		Hormonal control of liver regeneration. By S. Thrower & M. G. Ord	361
Transport of catecholamines by resealed chromaffin-granule 'ghosts'. By J. H. Phillips	311	A study of 3':5'-cyclic mononucleotide-dependent protein kinase from canine prostate glands. By B. K. Tsang & R. L. Singhal	377
Steady-state kinetics of catecholamine transport by chromaffin-granule 'ghosts'. By J. H. Phillips	319		
Cellular Interactions and Control Processes			
Androgen responsiveness of the liver of the developing rat. By J.-Å. Gustafsson	225		

(continued overleaf)

(continued from preceding page)

	PAGE		PAGE
Effects of antimycin and 2-deoxyglucose on adenine nucleotides in human platelets. Role of metabolic adenosine triphosphate in primary aggregation, secondary aggregation and shape change of platelets.		Protein synthesis and breakdown in the mother-cell and forespore compartments during spore morphogenesis in <i>Bacillus megaterium</i> .	
By H. Holmsen, C. A. Setkowsky & H. J. Day	385	By M. W. Eaton & D. J. Ellar	327
The effect of adrenocorticotrophin on protein degradation in rat adrenal gland and liver.		Metabolism in Whole Organisms	
By J. A. Canick & D. B. Villee	397	Intracellular protein breakdown in thermophilic and mesophilic fungi.	
Specific changes in the messenger ribonucleic acid content of the rat ventral prostate gland after androgenic stimulation. Evidence from the synthesis of aldolase messenger ribonucleic acid.		By H. M. Miller, P. A. Sullivan & M. G. Shepherd	209
By W. I. P. Mainwaring, F. R. Mangan, R. A. Irving & D. A. Jones	413	Water-soluble metabolites of <i>p</i> -nitrophenol and 1-naphthyl <i>N</i> -methylcarbamate in flies and grass grubs. Formation of glucose phosphate and phosphate conjugates.	
Development		By M. P. Heenan & J. N. Smith	303
Albumin and transferrin synthesis during development in the rat.		Pullulanase synthesis in <i>Klebsiella (Aerobacter) aerogenes</i> strains growing in continuous culture.	
By G. C. T. Yeoh & E. H. Morgan	215	By G. C. Hope & A. C. R. Dean	403

Contents of Volume 143, No. 1

Proteins			
The localization of a vitamin K-induced modification in an <i>N</i> -terminal fragment of human prothrombin. By T. Skotland, T. Holm, B. Østerud, R. Flengsrud & H. Prydz	29	Transcription of fractionated mammalian chromatin by mammalian ribonucleic acid polymerase. Demonstration of temperature-dependent rifampicin-resistant initiation sites in euchromatin deoxyribonucleic acid. By C. J. Chesterton, B. E. H. Coupar & P. H. W. Butterworth	73
Preliminary characterization of Thy-1.1 and Ag-B antigens from rat tissues solubilized in detergents. By M. Letarte-Muirhead, R. T. Acton & A. F. Williams	51	Ribonucleic acid polymerase activities in Jerusalem-artichoke tissue. By J. R. Gore & J. Ingle	107
Effects of iodination on the distribution of peptide hormones in aqueous two-phase polymer systems. By B. Desbuquois & G. D. Aurbach	83	Lipids	
Separation, purification and properties of β -lactamase I and β -lactamase II from <i>Bacillus cereus</i> 569/H/9. By R. B. Davies, E. P. Abraham & J. Melling	115	A solid-phase radioimmunoassay for plasma progesterone. By K. K. Dighe & W. M. Hunter	219
Metal cofactor requirement of β -lactamase II. By R. B. Davies & E. P. Abraham	129	Carbohydrates	
Conformational changes in the extracellular β -lactamase I from <i>Bacillus cereus</i> 569/H/9. By R. B. Davies, E. P. Abraham & D. G. Dalgleish	137	Crystallization of macromolecular heparin (<i>Short Communication</i>). By E. D. T. Atkins, I. A. Nieduszynski & A. A. Horner	251
A new systematic strategy for the isolation of proteins, illustrated by the purification of a mammalian exo- β - <i>N</i> -acetyl-D-glucosaminidase. By H. K. Robinson & D. H. Leaback	143	Small Molecules	
The macromolecular properties of blood-group-specific glycoproteins. Characterization of a series of fractions obtained by solvent fractionation. By J. M. Creeth, K. R. Bhaskar, A. S. R. Donald & W. T. J. Morgan	159	The identification of 3,3',5,5'-tetraiodothyroformic acid within the rat liver. By D. B. Ramsden, A. M. Lawson, P. J. Raw & R. Hoffenberg	47
The isolation and identification of the P-component of normal human plasma proteins (<i>Short Communication</i>). By P. Binette, M. Binette & E. Calkins	253	The isolation of an azobilirubin β -D-mono-glucoside from dog gall-bladder bile. By E. R. Gordon, M. Dadoun, C. A. Goresky, T.-H. Chan & A. S. Perlin	97
Nucleic Acids		The molecular and crystal structures of 4- <i>N</i> -(2-acetamido-2-deoxy- β -D-glucopyranosyl)-L-asparagine trihydrate and 4- <i>N</i> -(β -D-glucopyranosyl)-L-asparagine monohydrate. The X-ray analysis of a carbohydrate-peptide linkage. By L. T. J. Delbaere	197
Mammalian chromatin substructure studies with the calcium-magnesium endonuclease and two-dimensional polyacrylamide-gel electrophoresis. By L. A. Burgoyne, D. R. Hewish & J. Mobbs	67	Isolation of oligomers of 5,6-dihydroxyindole-2-carboxylic acid from the eye of the catfish. By S. Ito & J. A. C. Nicol	207
		Enzymology	
		A study of the coenzyme-binding characteristics of rabbit muscle L-glycerol 3-phosphate dehydrogenase. By P. Bentley & F. M. Dickinson	11

	PAGE		PAGE
A study of the kinetics and mechanism of rabbit muscle L-glycerol 3-phosphate dehydrogenase. By P. Bentley & F. M. Dickinson	19	Polyribosomal and particulate distribution of lysyl- and phenylalanyl-transfer ribonucleic acid synthetases. By G. Moline, A. Hampel & M. D. Enger	191
Activation of carbamoyl phosphate synthase by N-acetyl-L-aspartate. By H. J. Forman, R. Waddell, P. B. Hamilton & S. Grisolia	63	Molecular weight, amino acid composition and physicochemical properties of the exocellular DD-carboxypeptidase-transpeptidase of <i>Streptomyces</i> R39. By J.-M. Frère, R. Moreno, J.-M. Ghuysen, H. R. Perkins, L. Dierickx & L. Delcambe	233
A new method for determining the Michaelis constant. By F. de Miguel Merino	93	Binding of β -lactam antibiotics to the exocellular DD-carboxypeptidase-transpeptidase of <i>Streptomyces</i> R39. By J.-M. Frère, J.-M. Ghuysen, P. E. Reynolds, R. Moreno & H. R. Perkins	241
Association of xanthine oxidase with the bovine milk-fat-globule membrane. Catalytic properties of the free and membrane-bound enzyme. By M. S. Briley & R. Eisenthal	149	Anion effects on pyruvate kinase (<i>Short Communication</i>). By P. J. Taylor & J. L. Robinson	255
The amino acid sequence of the peptide containing the thiol group of creatine kinase from normal and dystrophic chicken breast muscle. Comparison of some of the immunological properties of the antibodies developed in rabbits against these enzymes. By B. P. Roy	171	Intermolecular Organization	
Adenosine triphosphatase activity in the neural lobe of the bovine pituitary gland. By H. Vilhardt & D. B. Hope	181	Model connective-tissue systems. A study of polyion-mobile ion and of excluded-volume interactions of proteoglycans. By W. D. Comper & B. N. Preston	1
		Lipid and basic protein interaction in myelin. By N. L. Banik & A. N. Davison	39

Contents of Volume 143, No. 2

	PAGE		PAGE
Proteins		Slow conformational changes of a <i>Neurospora</i> glutamate dehydrogenase studied by protein fluorescence. By B. Ashby, J. C. Wootton & J. R. S. Fincham	317
The amino acid sequence of plastocyanin from <i>Cucurbita pepo</i> L. (vegetable marrow). By M. D. Scawen & D. Boulter	257	Extraction, partial purification and properties of obelin, the calcium-activated luminescent protein from the hydroid <i>Obelia geniculata</i> . By A. K. Campbell	411
Studies on the structure and activity of rabbit Clq (a subcomponent of the first component of complement). By D. M. Lowe & K. B. M. Reid	265	Evaluation of equilibrium constants by affinity chromatography. By L. W. Nichol, A. G. Ogston, D. J. Winzor & W. H. Sawyer	435
Different molecular forms of plasminogen and plasmin produced by urokinase in human plasma and their relation to protease inhibitors and lysis of fibrinogen and fibrin. By S. Müllertz	273	Ferritin iron uptake and release. Structure-function relationships. By P. M. Harrison, T. G. Hoy, I. G. Macara & R. J. Hoare	445
The release of iron from horse spleen ferritin by reduced flavins. By S. Sirivech, E. Frieden & S. Osaki	311		

	PAGE		PAGE
The reaction of <i>N</i> -acetylneuraminase lyase with chloropyruvate (<i>Short Communication</i>). By J. E. G. Barnett & F. Kolisis	487	Enzymology	
Proteolysis of rabbit immunoglobulin M by papain (<i>Short Communication</i>). By B. M. McIlroy & G. T. Stevenson	491	Separation and properties of human brain hexosaminidase C. By I. Braidman, M. Carroll, N. Dance & D. Robinson	295
Small-angle X-ray scattering of pig thyroglobulin in solution (<i>Short Communication</i>). By H. Brumberger, J. L. Lipton, G. Dorfman & E. Nakano	495	Subcellular distribution and properties of kynurenine transaminase in rat liver. By M. Nakatani, M. Morimoto, T. Noguchi & R. Kido	303
Nucleic Acids		Turkey liver xanthine dehydrogenase. Reactivation of the cyanide-inactivated enzyme by sulphide and by selenide. By W. F. Cleere & M. P. Coughlan	331
Studies on chemical modification of thionucleosides in the transfer ribonucleic acid of <i>Escherichia coli</i> . By Y. S. P. Rao & J. D. Cherayil	285	A comparison of wild-type and mutant ribitol dehydrogenases from <i>Klebsiella aerogenes</i> . By B. D. Burleigh, Jr., P. W. J. Rigby & B. S. Hartley	341
Some evidence for the occurrence of ribonucleic acid in the luteal fraction (lysosomal compartment) from <i>Hevea brasiliensis</i> latex (<i>Short Communication</i>). By B. Marin, P. Trouslot & S. Pujarniscle	479	Kinetic studies of oxidized nicotinamide-adenine dinucleotide-facilitated reactions of D-glyceraldehyde 3-phosphate dehydrogenase. By P. J. Harrigan & D. R. Trentham	353
Stabilization of two-stranded ribohomopolymer helices and destabilization of a three-stranded helix by ethidium bromide (<i>Short Communication</i>). By M. J. Waring	483	The enthalpy change for the reduction of nicotinamide-adenine dinucleotide. By K. Burton	365
Lipids		Membrane-bound DD-carboxypeptidases from <i>Bacillus megaterium</i> KM. General properties, substrate specificity and sensitivity to penicillins, cephalosporins and peptide inhibitors of the activity at pH 5. By T. Diaz-Mauriño, M. Nieto & H. R. Perkins	391
The reaction of phosphoglycolipids and other lipids with hydrofluoric acid. By N. Shaw & A. Stead	461	Deoxycytidylate deaminase. Evidence for a new enzyme in cells infected by the virus of herpes simplex. By H. A. Rolton & H. M. Keir	403
Carbohydrates		An inhibitor of phospholipase D in saliva. By R. M. C. Dawson & N. Hemington	427
The copolymeric structure of pig skin dermatan sulphate. Characterization of D-glucuronic acid-containing oligosaccharides isolated after controlled degradation of oxydermatan sulphate. By L.-Å. Fransson, L. Cöster, A. Malmström & I. Sjöberg	369	The preparation of crystalline human L-lactate-nicotinamide-adenine dinucleotide oxidoreductase isoenzyme 1 involving preparative polyacrylamide-gel electrophoresis. By A. V. Emes, M. J. Gallimore, A. W. Hodson & A. L. Latner	453
The copolymeric structure of pig skin dermatan sulphate. Isolation and characterization of L-iduronic sulphate-containing oligosaccharides from copolymeric chains. By L.-Å. Fransson, L. Cöster, B. Havsmark, A. Malmström & I. Sjöberg	379	Turkey liver xanthine dehydrogenase: properties of the enzyme dependent on the content of functional active sites (<i>Short Communication</i>). By W. F. Cleere, C. O'Regan & M. P. Coughlan	465
Small Molecules			
Metabolism of biphenyl. Structure and physicochemical properties of 2-hydroxy-6-oxo-6-phenylhexa-2,4-dienoic acid, the <i>meta</i> -cleavage product from 2,3-dihydroxybiphenyl by <i>Pseudomonas putida</i> . By D. Catelani & A. Colombi	431		

	PAGE		PAGE
Nuclear protein kinase activity in glucagon-stimulated perfused rat livers (<i>Short Communication</i>).		Intermolecular Organization	
By W. K. Palmer, M. Castagna & D. A. Walsh	469	The role of ribosomal ribonucleic acid in the structure and function of mammalian brain ribosomes.	
Formation of catalase compound I by reaction with peroxoacetic acid: pH changes in unbuffered systems (<i>Short Communication</i>).		By B. K. Grove & T. C. Johnson	419
By P. Jones & D. N. Middlemiss	473	Enhanced extractability of articular cartilage proteoglycans in osteoarthritis (<i>Short Communication</i>).	
		By K. D. Brandt	475

Contents of Volume 143, No. 3

Proteins		Small Molecules	
Topography of <i>Escherichia coli</i> ribosomal proteins. The order of reactivity of thiol groups.		Biological, proton-magnetic-resonance- and ultraviolet-spectroscopic evidence for a molecular complex of actinomycin D and 10,11-dihydro-3H-naphth[1,2-g]indazol-7-ol (<i>Short Communication</i>).	
By A. Bakardjieva & R. R. Crichton	599	By R. W. Chesnut, N. N. Durham, E. A. Mawdsley, G. X. Thyvelikakath, K. D. Berlin & B. M. Fung	789
Reductive alkylation of ribosomes as a probe to the topography of ribosomal proteins.		Enzymology	
By G. Moore & R. R. Crichton	607	Chemically modified nylons as supports for enzyme immobilization. Polyisocyanate-nylon.	
The macromolecular properties of blood-group-specific glycoproteins. Characterization of a series of fractions obtained by density-gradient ultracentrifugation.		By L. Goldstein, A. Freeman & M. Sokolovsky	497
By K. R. Bhaskar & J. M. Creeth	669	The nucleoside triphosphate-ribonucleic acid nucleotidyltransferase (EC 2.7.7.6) of <i>Agrobacterium tumefaciens</i> (Smith and Townsend) Conn. Purification and properties of the enzyme from the tumorigenic strain B6806.	
The amino acid sequence of plastocyanin from <i>Chlorella fusca</i> .		By U. C. Knopf	511
By J. Kelly & R. P. Ambler	681	Temperature and pressure adaptation of the binding site of acetylcholinesterase.	
The amino acid sequence of plastocyanin from French bean (<i>Phaseolus vulgaris</i>).		By P. W. Hochachka	535
By P. R. Milne, J. R. E. Wells & R. P. Ambler	691	Purification and properties of dolphin muscle aspartate and alanine transaminases and their possible roles in the energy metabolism of diving mammals.	
Completion of the analysis of the primary structure of the variable domain of a homogeneous rabbit antibody to type III pneumococcal polysaccharide.		By T. G. Owen & P. W. Hochachka	541
By J.-C. Jaton	723	Purification and properties of the trimethylamine dehydrogenase of <i>Bacterium</i> 4B6.	
Mössbauer effect in the 'super-reduced' form of the high-potential iron-sulphur protein from <i>Chromatium</i> (<i>Short Communication</i>).		By J. Colby & L. J. Zatman	555
By D. P. E. Dickson & R. Cammack	763	Protection of glutamate dehydrogenase by nicotinamide-adenine dinucleotide against reversible inactivation by pyridoxal 5'-phosphate as a sensitive indicator of conformational change induced by substrates and substrate analogues.	
The solubility of fibrinogen in solutions containing dextrans of various molecular weights (<i>Short Communication</i>).		By S.-S. Chen & P. C. Engel	569
By M. W. Rampling	767		
Nucleic Acids			
Formation of rings from segments of HeLa-cell nuclear deoxyribonucleic acid.			
By N. Hardman	521		

	PAGE		PAGE
The structure and mechanism of stem bromelain. Evaluation of the homogeneity of purified stem bromelain, determination of the molecular weight and kinetic analysis of the bromelain-catalysed hydrolysis of <i>N</i> -benzyloxycarbonyl-L-phenylalanyl-L-serine methyl ester. By C. W. Wharton	575	The purification of cholinesterase from horse serum. By A. R. Main, W. G. Soucie, I. L. Buxton & E. Arinc	733
Kinetic studies on the effect of uridine diphosphate galactose and manganous ions on the reaction between lactose synthetase A protein from human milk and <i>p</i> -hydroxy-mercuribenzoate. By B. J. Kitchen & P. Andrews	587	Inhibition of the soluble adenosine triphosphatase from mitochondria by adenylyl imidodiphosphate. By R. D. Philo & M. J. Selwyn	745
Structure and properties of arginase from the polychaete annelid <i>Pista pacifica</i> Berkeley. By K. L. O'Malley & R. C. Terwilliger	591	The β -galactosidase-catalysed hydrolyses of β -D-galactopyranosyl pyridinium salts. Rate-limiting generation of an enzyme-bound galactopyranosyl cation in a process dependent only on aglycone acidity. By M. L. Sinnott & S. G. Withers	751
An oxygenase from guinea-pig liver which catalyses sulphoxidation. By K. Prema & K. P. Gopinathan	613	Expressions of the Michaelis-Menten equation when studying enzyme reactions in a variable-volume medium (<i>Short Communication</i>). By M. P. Gingold	771
Regulation of heart muscle pyruvate dehydrogenase kinase. By R. H. Cooper, P. J. Randle & R. M. Denton	625	The effect of systematic error on the accuracy of Michaelis constants and maximum velocities estimated by using the integrated Michaelis-Menten equation (<i>Short Communication</i>). By P. F. J. Newman, G. L. Atkins & I. A. Nimmo	779
Studies on the changes in protein fluorescence and enzymic activity of aspartate aminotransferase on binding of pyridoxal 5'-phosphate. By R. W. Evans & J. J. Holbrook	643	The steady-state kinetics of isotope exchange at equilibrium: one substrate-one product enzymic mechanisms where two molecules of substrate or product are bound to an enzyme molecule (<i>Short Communication</i>). By I. G. Darvey	783
The hybridization of glyceraldehyde 3-phosphate dehydrogenases from rabbit muscle and yeast. Kinetics and thermodynamics of the reaction and isolation of the hybrid. By H. H. Osborne & M. R. Hollaway	651	Immunological evidence to show that the <i>N</i> -acetylglucosaminidase and <i>N</i> -acetylgalactosaminidase activities of <i>Dictyostelium discoideum</i> reside in the same protein molecule (<i>Short Communication</i>). By D. Every & J. M. Ashworth	785
An examination of the utility of photogenerated reagents by using α -chymotrypsin. By A. J. Bridges & J. R. Knowles	663	Intermolecular Organization pH-controlled hydrogen-bonding (<i>Short Communication</i>). By J. L. Wood	775
Electron-paramagnetic-resonance studies on cobalt(II) carbonic anhydrase-sulphonamide complexes. By S. A. Cockle, S. Lindskog & E. Grell	703	Index	793
Properties of pig heart aconitase. By O. Gawron, Sr., M. C. Kennedy & R. A. Rauner	717
