

## Cellular Aspects

### Contents of Volume 144, No. 3, 1974

	PAGE		PAGE
<b>Biosynthesis and Degradation</b>		<b>Bioenergetics</b>	
The effect of storage on enzyme activities in tissues. By A. Cryer & W. Bartley	433	The role of mitochondria in modifying the cellular ionic environment. Calcium-induced respiratory activities in mitochondria isolated from various tumour cells. By R. F. W. Thorne & F. L. Bygrave	551
Metabolism of [ <sup>14</sup> C]citrulline in the perfused sheep and goat udder. By E. Roets, R. Verbeke, A.-M. Massart-Leën & G. Peeters	435	Inhibition of mitochondrial phosphate transport by <i>p</i> -diazobenzenesulphonate ( <i>Short Communication</i> ). By A. P. Dawson	597
Effect of cobalt on the synthesis and degradation of hepatic catalase <i>in vivo</i> . By Y. Yasukochi, M. Nakamura & S. Minakami	455	<b>Subcellular Structures</b>	
The carbon assimilation pathways of <i>Methylococcus capsulatus</i> , <i>Pseudomonas methanica</i> and <i>Methylosinus trichosporium</i> (OB3B) during growth on methane. By T. Strøm, T. Ferenci & J. R. Quayle	465	Fractionation of the proteins of plant microbodies. By R. H. Brown, J. M. Lord & M. J. Merrett	559
Purification and properties of 3-hexulose phosphate synthase and phospho-3-hexuloisomerase from <i>Methylococcus capsulatus</i> . By T. Ferenci, T. Strøm & J. R. Quayle	477	<b>Cellular Interactions and Control Processes</b>	
Cyclic metabolic pathway of a butylated hydroxytoluene by rat liver microsomal fractions. By C. Chen & Y.-S. Shaw	497	Ribonucleic acid labelling and nucleotide pools during compensatory renal hypertrophy. By J. M. Hill, G. AB & R. A. Malt	447
The biosynthesis of granulose by <i>Clostridium pasteurianum</i> . By R. L. Robson, R. M. Robson & J. G. Morris	503	Inducibility and some properties of the threonine dehydratase of sheep liver. By S. Doonan, D. H. Koerner, W. Schmutzler & C. A. Vernon	533
Mobilization of granulose in <i>Clostridium pasteurianum</i> . Purification and properties of granulose phosphorylase. By R. L. Robson & J. G. Morris	513	Studies on the role of calcium ions in the stimulation by adrenaline of amylase release from rat parotid. By R. L. Dormer & S. J. H. Ashcroft	543
The development of plastocyanin in greening bean leaves. By B. G. Haslett & R. Cammack	567	Intranuclear localization and receptor proteins for 1,25-dihydroxycholecalciferol in chick intestine. By D. E. M. Lawson & P. W. Wilson	573
Biosynthesis of <i>trans,trans</i> - and <i>cis,trans</i> -farnesols by soluble enzymes from tissue cultures of <i>Andrographis paniculata</i> . By K. H. Overton & F. M. Roberts	585	Virally mediated membrane changes: inverse effects on transport and diffusion ( <i>Short Communication</i> ). By C. A. Pasternak & K. J. Micklem	593
Concentrations of histamine in brain of guinea pig and rat during dietary protein malnutrition ( <i>Short Communication</i> ). By C. O. Enwonwu & B. S. Worthington	601	Early changes in the messenger ribonucleic acid concentration of amino acid-starved cells of <i>Escherichia coli</i> are not dependent on the state of the <i>rel</i> gene ( <i>Short Communication</i> ). By J. E. M. Midgley & R. J. Smith	605

	PAGE		PAGE
<b>Development</b>		<b>General Methods</b>	
Regulation of hepatic L-serine dehydratase and L-serine-pyruvate aminotransferase in the developing neonatal rat. <i>By K. Snell &amp; D. G. Walker</i>	519	Short-term radiorespirometry of cell suspensions. <i>By W. G. Duncombe</i>	487
Induction of cystathionase in human foetal liver ( <i>Short Communication</i> ). <i>By K. Heinonen &amp; N. C. R. R�ih�a</i>	607	<b>Index</b>	611

The following papers appeared in the last issue of the Biochemical Journal

Molecular Aspects  
Contents of Volume 143, No. 3, 1974

	PAGE		PAGE
<b>Proteins</b>		<b>Enzymology</b>	
Topography of <i>Escherichia coli</i> ribosomal proteins. The order of reactivity of thiol groups. By A. Bakardjieva & R. R. Crichton	599	Chemically modified nylons as supports for enzyme immobilization. Polyisocyanate-nylon. By L. Goldstein, A. Freeman & M. Sokolovsky	497
Reductive alkylation of ribosomes as a probe to the topography of ribosomal proteins. By G. Moore & R. R. Crichton	607	The nucleoside triphosphate-ribonucleic acid nucleotidyltransferase (EC 2.7.7.6) of <i>Agrobacterium tumefaciens</i> (Smith and Townsend) Conn. Purification and properties of the enzyme from the tumorigenic strain B6806. By U. C. Knopf	511
The macromolecular properties of blood-group-specific glycoproteins. Characterization of a series of fractions obtained by density-gradient ultracentrifugation. By K. R. Bhaskar & J. M. Creeth	669	Temperature and pressure adaptation of the binding site of acetylcholinesterase. By P. W. Hochachka	535
The amino acid sequence of plastocyanin from <i>Chlorella fusca</i> . By J. Kelly & R. P. Ambler	681	Purification and properties of dolphin muscle aspartate and alanine transaminases and their possible roles in the energy metabolism of diving mammals. By T. G. Owen & P. W. Hochachka	541
The amino acid sequence of plastocyanin from French bean ( <i>Phaseolus vulgaris</i> ). By P. R. Milne, J. R. E. Wells & R. P. Ambler	691	Purification and properties of the trimethylamine dehydrogenase of bacterium 4B6. By J. Colby & L. J. Zatman	555
Completion of the analysis of the primary structure of the variable domain of a homogeneous rabbit antibody to type III pneumococcal polysaccharide. By J.-C. Jaton	723	Protection of glutamate dehydrogenase by nicotinamide-adenine dinucleotide against reversible inactivation by pyridoxal 5'-phosphate as a sensitive indicator of conformational change induced by substrates and substrate analogues. By S.-S. Chen & P. C. Engel	569
Mössbauer effect in the 'super-reduced' form of the high-potential iron-sulphur protein from <i>Chromatium</i> ( <i>Short Communication</i> ). By D. P. E. Dickson & R. Cammack	763	The structure and mechanism of stem bromelain. Evaluation of the homogeneity of purified stem bromelain, determination of the molecular weight and kinetic analysis of the bromelain-catalysed hydrolysis of <i>N</i> -benzyloxycarbonyl-L-phenylalanyl-L-serine methyl ester. By C. W. Wharton	575
The solubility of fibrinogen in solutions containing dextrans of various molecular weights ( <i>Short Communication</i> ). By M. W. Rampling	767	Kinetic studies on the effect of uridine diphosphate galactose and manganous ions on the reaction between lactose synthetase A protein from human milk and <i>p</i> -hydroxymercuribenzoate. By B. J. Kitchen & P. Andrews	587
<b>Nucleic Acids</b>			
Formation of rings from segments of HeLa-cell nuclear deoxyribonucleic acid. By N. Hardman	521		
<b>Small Molecules</b>			
Biological, proton-magnetic-resonance- and ultraviolet-spectroscopic evidence for a molecular complex of actinomycin D and 10,11-dihydro-3 <i>H</i> -naphth[1,2- <i>g</i> ]indazol-7-ol ( <i>Short Communication</i> ). By R. W. Chesnut, N. N. Durham, E. A. Mawdsley, G. X. Thyvelikakath, K. D. Berlin & B. M. Fung	789		

(continued overleaf)

(continued from preceding page)

	PAGE		PAGE
Structure and properties of arginase from the polychaete annelid <i>Pista pacifica</i> Berkeley. By K. L. O'Malley & R. C. Terwilliger	591	The $\beta$ -galactosidase-catalysed hydrolyses of $\beta$ -D-galactopyranosylpyridinium salts. Rate-limiting generation of an enzyme-bound galactopyranosyl cation in a process dependent only on aglycone acidity. By M. L. Sinnott & S. G. Withers	751
An oxygenase from guinea-pig liver which catalyses sulphoxidation. By K. Prema & K. P. Gopinathan	613	Expressions of the Michaelis-Menten equation when studying enzyme reactions in a variable-volume medium ( <i>Short Communication</i> ). By M. P. Gingold	771
Regulation of heart muscle pyruvate dehydrogenase kinase. By R. H. Cooper, P. J. Randle & R. M. Denton	625	The effect of systematic error on the accuracy of Michaelis constants and maximum velocities estimated by using the integrated Michaelis-Menten equation ( <i>Short Communication</i> ). By P. F. J. Newman, G. L. Atkins & I. A. Nimmo	779
Studies on the changes in protein fluorescence and enzymic activity of aspartate aminotransferase on binding of pyridoxal 5'-phosphate. By R. W. Evans & J. J. Holbrook	643	The steady-state kinetics of isotope exchange at equilibrium: one substrate-one product enzymic mechanisms where two molecules of substrate or product are bound to an enzyme molecule ( <i>Short Communication</i> ). By I. G. Darvey	783
The hybridization of glyceraldehyde 3-phosphate dehydrogenases from rabbit muscle and yeast. Kinetics and thermodynamics of the reaction and isolation of the hybrid. By H. H. Osborne & M. R. Hollaway	651	Immunological evidence to show that the <i>N</i> -acetylglucosaminidase and <i>N</i> -acetylgalactosaminidase activities of <i>Dictyostelium discoideum</i> reside in the same protein molecule ( <i>Short Communication</i> ). By D. Every & J. M. Ashworth	785
An examination of the utility of photogenerated reagents by using $\alpha$ -chymotrypsin. By A. J. Bridges & J. R. Knowles	663	<b>Intermolecular Organization</b> pH-controlled hydrogen-bonding ( <i>Short Communication</i> ). By J. L. Wood	775
Electron-paramagnetic-resonance studies on cobalt(II) carbonic anhydrase-sulphonamide complexes. By S. A. Cockle, S. Lindskog & E. Grell	703	<b>Index</b>	793
Properties of pig heart aconitase. By O. Gawron, Sr., M. C. Kennedy & R. A. Rauner	717		
The purification of cholinesterase from horse serum. By A. R. Main, W. G. Soucie, I. L. Buxton & E. Arinc	733		
Inhibition of the soluble adenosine triphosphatase from mitochondria by adenylyl imidodiphosphate. By R. D. Philo & M. J. Selwyn	745		

## Contents of Volume 144, No. 1

	PAGE		PAGE
<b>Biosynthesis and Degradation</b>		<b>Energy-linked reduction of nicotinamide-adenine dinucleotide in membranes derived from normal and various respiratory-deficient mutant strains of <i>Escherichia coli</i> K12.</b>	
Effects on protein synthesis of injecting synthetic polyribonucleotides into living cells. By H. R. Woodland & S. E. Ayers	11	By R. K. Poole & B. A. Haddock	77
Putrescine catabolism in mammalian brain. By N. Seiler & M. J. Al-Therib	29	<b>Proton/sodium ion antiport in <i>Escherichia coli</i>.</b> By I. C. West & P. Mitchell	87
Rat cerebral-cortex adenosine deaminase activity and its subcellular distribution. By I. Pull & H. McIlwain	37	<b>Subcellular Structures</b>	
The metabolic sequence by which some 4,4-dimethyl sterols are converted into cholesterol. By G. F. Gibbons	59	The reconstitution of microsomal redox chains. A comparative analysis of the effectiveness of membrane self-assembly and template binding of electron carriers. By A. I. Archakov, G. I. Bachmanova, V. M. Devichensky, I. I. Karuzina, N. S. Zhrebkova, G. A. Alimov, G. P. Kuznetsova & A. V. Karyakin	1
The influence of substrate concentrations on the rate of insect juvenile hormone biosynthesis by corpora allata of the desert locust <i>in vitro</i> . By S. S. Tobe & G. E. Pratt	107	<b>Caution in the interpretation of plant ribosome studies (<i>Short Communication</i>).</b> By C. J. Leaver & J. A. Dyer	165
Activities of prolyl hydroxylase, lysyl hydroxylase, collagen galactosyltransferase and collagen glucosyltransferase in the liver of rats with hepatic injury. By J. Risteli & K. I. Kivirikko	115	<b>Cellular Interactions and Control Processes</b>	
Collagen biosynthesis. Characterization of subcellular fractions from embryonic chick fibroblasts and the intracellular localization of procollagen prolyl and procollagen lysyl hydroxylases. By R. Harwood, M. E. Grant & D. S. Jackson	123	Regulatory effects of polyamines on membrane-bound acetylcholinesterase. By A. Kossorotow, H. U. Wolf & N. Seiler	21
Yeast protein synthesis. Preparation and analysis of a highly active cell-free system. By C. H. Sissons	131	Phenethylbiguanide and the inhibition of hepatic gluconeogenesis in the guinea pig. By K. Ogata, M. Jomain-Baum & R. W. Hanson	49
Lipolysis and hydrogenation of galactolipids and the accumulation of phytanic acid in the rumen ( <i>Short Communication</i> ). By R. M. C. Dawson, N. Hemington, D. Grime, D. Lander & P. Kemp	169	Inhibition by the branched-chain 2-oxo acids of the 2-oxoglutarate dehydrogenase complex in developing rat and human brain. By M. S. Patel	91
<b>Bioenergetics</b>		Oestradiol uptake and retention, and high-affinity binding sites in cultured rabbit uterus. By S. L. Russell & G. H. Thomas	99
The nature and properties of the inducible sodium-plus-potassium ion-dependent adenosine triphosphatase in the gills of eels ( <i>Anguilla anguilla</i> ) adapted to fresh water and sea water. By J. R. Sargent & A. J. Thomson	69	Enzyme synthesis in the regulation of hepatic 'malic' enzyme activity. By G. Murphy & D. G. Walker	149

	PAGE		PAGE
Differences in the products of mitochondrial protein synthesis <i>in vivo</i> in human and mouse cells and their potential use as markers for the mitochondrial genome in human-mouse cell hybrids.	161	<b>Metabolism in Whole Organisms</b>	
By A. Jeffreys & I. Craig		Glucose transport in <i>Entamoeba histolytica</i> .	43
<b>Development</b>		By R. Serrano & R. E. Reeves	
Changes in respiratory activities during the cell-cycle of the fission yeast <i>Schizosaccharomyces pombe</i> 972h <sup>-</sup> growing in the presence of glycerol.	141	Distribution and metabolism of phenylalanine and tyrosine during tularaemia in the rat ( <i>Short Communication</i> ).	
By R. K. Poole & D. Lloyd		By M. C. Powanda, R. E. Dinterman, R. W. Wannemacher, Jr. & G. D. Herbrandson	173

	PAGE		PAGE
<b>Biosynthesis and Degradation</b>		<b>Subcellular Structures</b>	
Degradation of monogalactosyl diglyceride and diagalactosyl diglyceride by sheep pancreatic enzymes.	177	Transport of catecholamines by resealed chromaffin-granule 'ghosts'.	311
By S. S. Bajwa & P. S. Sastry		By J. H. Phillips	
Urate synthesis in the perfused chick liver.	189	Steady-state kinetics of catecholamine transport by chromaffin-granule 'ghosts'.	319
By E. Barratt, P. J. Buttery & K. N. Boorman		By J. H. Phillips	
Synthesis of phosphoenolpyruvate carboxykinase (guanosine triphosphate) by isolated liver polyribosomes.	199	<b>Cellular Interactions and Control Processes</b>	
By F. J. Ballard, M. F. Hopgood, L. Reshef, S. Tilghman & R. W. Hanson		Androgen responsiveness of the liver of the developing rat.	225
Alternative pathways of zeaxanthin biosynthesis in a <i>Flavobacterium</i> species. Experiments with nicotine as inhibitor.	231	By J.-Å. Gustafsson	
By J. C. B. McDermott, D. J. Brown, G. Britton & T. W. Goodwin		Inhibition of progesterone of the lactogenic effect of prolactin in the pseudopregnant rabbit.	245
Studies on the metabolism of 5 $\alpha$ -androst-16-en-3-one in boar testis <i>in vivo</i> .	347	By L. Assairi, C. Delouis, P. Gaye, L.-M. Houdebine, M. Ollivier-Bousquet & R. Denamur	
By Y. A. Saat, D. B. Gower, F. A. Harrison & R. B. Heap		Adenosine 3':5'-cyclic monophosphate in young and senescent human fibroblasts during growth and stationary phase <i>in vitro</i> . Effects of prostaglandin E <sub>1</sub> and of adrenaline.	253
The relative stability of liver cytosol enzymes incubated <i>in vitro</i> .	371	By R. J. Haslam & S. Goldstein	
By M. F. Hopgood & F. J. Ballard		Biogenesis of mitochondria. Phospholipid synthesis <i>in vitro</i> by yeast mitochondrial and microsomal fractions.	265
Inhibitory effect of carbon monoxide on the <i>N</i> - and ring-hydroxylation of 2-acetamidofluorene by hamster hepatic microsomal preparations ( <i>Short Communication</i> ).	427	By G. S. Cobon, P. D. Crowfoot & A. W. Linnane	
By P. D. Lotlikar & K. Zaleski		A study of various changes in transfer ribonucleic acid methylase activity during adenovirus-12 transformation <i>in vitro</i> .	277
Possible site of flavonoid synthesis in the photosynthetic apparatus ( <i>Short Communication</i> ).	431	By E. S. McFarlane	
By K. Saito			

	PAGE		PAGE
Soluble neutral and acid maltases in the suckling-rat intestine. The effect of cortisol and development. By G. Galand & G. G. Forstner	281	The effect of adrenocorticotrophin on protein degradation in rat adrenal gland and liver. By J. A. Canick & D. B. Villee	397
Isolation of microvillus plasma membranes from suckling-rat intestine. The influence of premature induction of digestive enzymes by injection of cortisol acetate. By G. Galand & G. G. Forstner	293	Specific changes in the messenger ribonucleic acid content of the rat ventral prostate gland after androgenic stimulation. Evidence from the synthesis of aldolase messenger ribonucleic acid. By W. I. P. Mainwaring, F. R. Mangan, R. A. Irving & D. A. Jones	413
The response of the small intestine to vitamin D. Correlation between calcium-binding-protein production and increased calcium absorption. By J. S. Emtage, D. E. M. Lawson & E. Kodicek	339	<b>Development</b> Albumin and transferrin synthesis during development in the rat. By G. C. T. Yeoh & E. H. Morgan	215
Simulation of biogenic amine metabolism in the brain. By A. J. Turner, J. A. Illingworth & K. F. Tipton	353	Protein synthesis and breakdown in the mother-cell and forespore compartments during spore morphogenesis in <i>Bacillus megaterium</i> . By M. W. Eaton & D. J. Ellar	327
Hormonal control of liver regeneration. By S. Thrower & M. G. Ord	361	<b>Metabolism in Whole Organisms</b> Intracellular protein breakdown in thermophilic and mesophilic fungi. By H. M. Miller, P. A. Sullivan & M. G. Shepherd	209
A study of 3':5'-cyclic mononucleotide-dependent protein kinase from canine prostate glands. By B. K. Tsang & R. L. Singhal	377	Water-soluble metabolites of <i>p</i> -nitrophenol and 1-naphthyl <i>N</i> -methylcarbamate in flies and grass grubs. Formation of glucose phosphate and phosphate conjugates. By M. P. Heenan & J. N. Smith	303
Effects of antimycin and 2-deoxyglucose on adenine nucleotides in human platelets. Role of metabolic adenosine triphosphate in primary aggregation, secondary aggregation and shape change of platelets. By H. Holmsen, C. A. Setkowsky & H. J. Day	385	Pullulanase synthesis in <i>Klebsiella (Aerobacter) aerogenes</i> strains growing in continuous culture. By G. C. Hope & A. C. R. Dean	403
