FULL PAPERS

	PAGE		PAGE
Biosynthesis and Degradation		Bioenergetics	
The transfer of mannose to dolichol diphosphate oligosaccharides in pig liver endoplasmic reticulum. By G. J. A. Oliver & F. W. Hemming	191	The action of tributyltin on energy coupling in coupling-factor-deficient submitochondrial particles. By A. P. Dawson & M. J. Selwyn	333
Polyphasic changes in incorporation of precursors into ribonucleic acid of oestradiol-stimulated mammary gland. By F. Auricchio, R. Satriano, A. Rotondi, A. Quirino & F. Bresciani	211	The microbial metabolism of C ₁ compounds. The electron-transport chain of <i>Pseudomonas</i> AM1. By D. Widdowson & C. Anthony	349
The kinetics of incorporation <i>in vivo</i> of [¹⁴ C]acetate and [¹⁴ C]carbon dioxide into the fatty acids of glycerolipids in developing leaves. By C. R. Slack & P. G. Roughan	217	Subcellular Structures	
The microbial metabolism of acetophenone. Metabolism of acetophenone and some chloroacetophenones by an <i>Arthrobacter</i> species. By R. E. Cripps	233	The permeability to calcium of pigeon erythrocyte 'ghosts' studied by using the calcium-activated luminescent protein, obelin. By A. K. Campbell & R. L. Dormer	255
Glycoprotein catabolism in rat liver. Lysosomal digestion of iodinated asialo-fetuin. By J. H. Labadie, K. P. Chapman & N. N. Aronson, Jr.	271	Reconstitution of pig lymphocyte plasma membranes from solubilized components, with particular reference to membrane-associated immunoglobulins. By S. I. Chavin & A. Holliman	267
Biosynthesis and hydrolysis of cholesteryl esters by rat skin subcellular fractions. Regulation by prostaglandins. By V. A. Ziboh & M. A. Dreize	281	Enzymic iodination of eukaryotic ribosomal subunits. Characterization and analysis by two-dimensional gel electrophoresis. By D. P. Leader	373
Studies on the glycosylation of hydroxylysine residues during collagen biosynthesis and the subcellular localization of collagen galactosyltransferase and collagen glucosyltransferase in tendon and cartilage cells. By R. Harwood, M. E. Grant & D. S. Jackson	291	Cellular Interactions and Control Processes	
Mode of formation of cholesta-5,7-dien-3 β -ol from cholest-5-en-3 β -ol by larvae of <i>Calliphora erythrocephala</i> . By P. Johnson, I. F. Cook, H. H. Rees & T. W. Goodwin	303	Enzymic hydrolysis of acetylcarnitine in liver from rats, sheep and cows. By N. D. Costa & A. M. Snoswell	161
Inhibition of fatty acid synthesis and stimulation of glycogen breakdown by vasopressin in the perfused mouse liver. By G. Y. Ma & D. A. Hems	389	Acetyl-coenzyme A hydrolase, an artifact? The conversion of acetyl-coenzyme A into acetate by the combined action of carnitine acetyltransferase and acetylcarnitine hydrolase. By N. D. Costa & A. M. Snoswell	167
The measurement of protein turnover by density labelling. By A. Boudet, T. J. Humphrey & D. D. Davies	409	Creatine kinase equilibrium and lactate content compared with muscle pH in tissue samples obtained after isometric exercise. By K. Sahlin, R. C. Harris & E. Hultman	173
		Effects of cholecalciferol on the translocation of calcium by non-everted ileum <i>in vitro</i> . By E. S. Holdsworth, J. E. Jordan & E. Keenan	181
		4-Aminobutyrate in mammalian putrescine catabolism. By N. Seiler & B. Eichentopf	201

	PAGE		PAGE
Folate metabolism in the rat liver during regeneration after partial hepatectomy. <i>By</i> B. Barbiroli, C. Bovina, B. Tolomelli & M. Marchetti	229	Regulation of mitochondrial protein turnover by thyroid hormone(s). <i>By</i> M. S. Rajwade, S. S. Katyare, P. Fatterpaker & A. Sreenivasan	379
Analysis of enzyme induction in bacteria. <i>By</i> R. Young & H. Bremer	243	Gluconeogenesis by isolated guinea-pig liver parenchymal cells. <i>By</i> I. J. Arinze & D. L. Rowley	393
Phosphatidate phosphohydrolase and palmitoyl-coenzyme A hydrolase in cardiac sub-cellular fractions of hyperthyroid rabbits and cardiomyopathic hamsters. <i>By</i> K. J. Kako & S. D. Patterson	313	The activity of phosphoenolpyruvate carboxykinase in rat tissues. Assay techniques and effects of dietary and hormonal changes. <i>By</i> C. I. Pogson & S. A. Smith	401
Precocious development of glucuronidating and hydroxylating enzymes in chick embryos treated with pituitary grafts. <i>By</i> G. J. Wishart & G. J. Dutton	325	Metabolism in Whole Organisms	
Evidence for the coupling of biosynthesis and secretion of serum albumin in the rat. The effect of colchicine on albumin production. <i>By</i> P. R. Dorling, P. S. Quinn & J. D. Judah	341	A difference in the incorporation of ¹⁴ C into hippurate glycine from DL-[2- ¹⁴ C]glutamate and DL-[5- ¹⁴ C]glutamate in guinea pigs. <i>By</i> K. V. Rowsell, T. A. J. Ali & E. V. Rowsell	357
Treatment of immature mice with gonadotrophins. The influence of mouse age on the response of ovarian alkaline phosphatase activities to gonadotrophins. <i>By</i> T. A. Bramley	365	The calculation of errors and the choice of sampling times in the determination of irreversible disposal rates <i>in vivo</i> by isotope experiments. <i>By</i> D. F. Heath & V. J. Cunningham	417

SHORT COMMUNICATIONS

	PAGE		PAGE
Cellular Interactions and Control Processes		Development	
Acute effects of carbon monoxide on the metabolism of perfused rat liver. <i>By</i> D. L. Topping	425	Changes in lectin-induced deoxyribonucleic acid synthesis in cultures of chick-embryo fibroblasts at various stages of development. <i>By</i> R. Roguet & R. Bourrillon	421
The release of 3':5'-cyclic monophosphate from the isolated perfused rat heart. <i>By</i> J. A. O'Brien & R. C. Strange	429		

The following papers appeared in the last issue of the Biochemical Journal

Molecular Aspects
Contents of Volume 151, No. 2, 1975

FULL PAPERS

	PAGE		PAGE
Proteins		Enzymology	
The amino acid sequence of <i>Staphylococcus aureus</i> penicillinase. By R. P. Ambler	197	Deoxyribonucleic acid polymerases of <i>Euglena gracilis</i> . Purification and properties of two distinct deoxyribonucleic acid polymerases of high molecular weight. By A. G. McLennan & H. M. Keir	227
The preparation of a semisynthetic tritiated insulin with a specific radioactivity of up to 20 curies per millimole. By P. A. Halban & R. E. Offord	219	Deoxyribonucleic acid polymerases of <i>Euglena gracilis</i> . Primer-template utilization of and enzyme activities associated with the two deoxyribonucleic acid polymerases of high molecular weight. By A. G. McLennan & H. M. Keir	239
Protein chromatography on adsorbents with hydrophobic and ionic groups. Some properties of <i>N</i> -(3-carboxypropionyl)aminodecyl-Sepharose and its interaction with wheat-germ aspartate transcarbamoylase. By R. J. Yon & R. J. Simmonds	281	The separation of bovine brain β - <i>N</i> -acetyl-D-hexosaminidases. Abnormal gel-filtration behaviour of β - <i>N</i> -acetyl-D-glucosaminidase C. By B. Overdijk, W. M. J. van der Kroef, W. A. Veltkamp & G. J. M. Hooghwinkel	257
Sequence studies on the constant region of the fd section of rabbit immunoglobulin G of different allotype. By D. M. Pratt & L. E. Mole	337	Purification and properties of 6-phosphogluconate dehydrogenase from rabbit mammary gland. By S. A. Betts & R. J. Mayer	263
A genetic marker in the variable region of rabbit immunoglobulin heavy chain. By L. E. Mole	351	Factorization of the Michaelis functions. By H. B. F. Dixon	271
Nucleic Acids		Purification and properties of oestrogen-induced uterine peroxidase. By T. McNabb & P. H. Jellinck	275
Role of apurinic sites in the resistance of methylated oligodeoxyribonucleotides to degradation by spleen exonuclease. By G. P. Margison, P. J. O'Connor & A. Cornish-Bowden	249	Affinity-chromatography purification of alkaline phosphatase from calf intestine. By O. Brenna, M. Perrella, M. Pace & P. G. Pietta	291
Isoaccepting lysine transfer ribonucleic acid species of <i>Pseudomonas aeruginosa</i> . By B. Thimmappaya & J. D. Cherayil	377	Reversible modification of pig heart mitochondrial malate dehydrogenase by pyridoxal 5'-phosphate. By S.-S. Chen & P. C. Engel	297
Lipids		A product-inhibition study of bovine liver glutamate dehydrogenase. By P. C. Engel & S.-S. Chen	305
The radioimmunoassay of steroid glucuronides. The oestrogen C-3 glucuronides as haptens. By P. Samarajeewa & A. E. Kellie	369	The effect of acid proteinase inhibitors on chicken pepsin. By J. M. Llewellyn & M. L. Green	319
Carbohydrates		The purification and properties of pig spleen phosphofructokinase. By P. E. Hickman & M. J. Weidemann	327
A membrane-associated lipomannan in micrococci. By D. A. Powell, M. Duckworth & J. Baddiley	387		
Small Molecules			
Radioimmunoassay of colchicine. By C. Boudene, F. Duprey & C. Bohuon	413		

(continued overleaf)

(continued from preceding page)

	PAGE		PAGE
The nature of experimental error in enzyme kinetic measurements. By A. C. Storer, M. G. Darlison & A. Cornish-Bowden	361	The effect of disulfiram on the aldehyde dehydrogenases of sheep liver. By T. M. Kitson	407
Purification and characterization of kynurenine-2-oxoglutarate aminotransferase from the liver, brain and small intestine of rats. By T. Noguchi, Y. Minatogawa, E. Okuno, M. Nakatani, M. Morimoto & R. Kido	399	A reporter group delivery system with both absolute and selective specificity for thiol groups and an improved fluorescent probe containing the 7-nitrobenzo-2-oxa-1,3-diazole moiety. By T. Stuchbury, M. Shipton, R. Norris, J. P. G. Malthouse, K. Brocklehurst, J. A. L. Herbert & H. Suschitzky	417

SHORT COMMUNICATIONS

	PAGE		PAGE
Proteins			
Evidence for an active dimer of <i>Escherichia coli</i> β -galactosidase. By C. M. Kaneshiro, C. A. Enns, M. G. Hahn, J. S. Peterson & F. J. Reithel	433	The action of chelating agents on human liver aldehyde dehydrogenase. By R. S. Sidhu & A. H. Blair	443
Ontogenetic study of a myelin-derived fraction with 2':3'-cyclic nucleotide 3'-phosphohydrolyase activity higher than that of myelin. By T. V. Waehneltd	435	Dogfish M ₄ lactate dehydrogenase: reversible inactivation by pyridoxal 5'-phosphate and complete protection in complexes that mimic the active ternary complex. By S.-S. Chen & P. C. Engel	447
Nucleic Acids			
A 30S precursor of 30S ribosomes in a mutant of <i>Escherichia coli</i> . By F. Markey & D. G. Wild	463	Evidence that phosphatidylcholine and phosphatidylethanolamine are synthesized by a single enzyme present in the endoplasmic reticulum of castor-bean endosperm. By J. M. Lord	451
Heavy metal-pyrimidine nucleotide interaction: X-ray structure of a cadmium derivative of cytidine 5'-monophosphate. By D. M. L. Goodgame, I. Jeeves, C. D. Reynolds & A. C. Skapski	467	Evidence for isosteric and allosteric-nucleotide inhibition of citrate synthase from multiple-inhibition studies. By S. Harford & P. D. J. Weitzman	455
Enzymology			
Differential effects of temperature on a membrane adenosine triphosphatase and associated phosphatase. By J. A. Walker & K. P. Wheeler	439	An improved assay for bacterial methane monooxygenase: some properties of the enzyme from <i>Pseudomonas methanica</i> . By J. Colby, H. Dalton & R. Whittenbury	459
