<b>Proteins</b>		<b>Nucleic Acids</b>	
Reactions involving superoxide and normal and unstable haemoglobins. By C. C. Winterbourn, B. M. McGrath & R. W. Carrell	493	Spectroscopic evidence for the uneven distribution of adenine and uracil residues in ribosomal ribonucleic acid of <i>Drosophila melanogaster</i> and of <i>Plasmodium knowlesi</i> and its possible evolutionary significance. By R. A. Cox, E. Godwin & J. R. B. Hastings	465
The rate of reaction of superoxide radical ion with oxyhaemoglobin and methaemoglobin. By H. C. Sutton, P. B. Roberts & C. C. Winterbourn	503	The nature of the 5'-linked 5' nucleotide sequence at the 5' end of rabbit globin messenger ribonucleic acid. By J. A. Hunt & G. N. Oakes	637
A low-molecular-weight protein from rat liver that resembles ligandin in its binding properties. By B. Ketterer, E. Tipping, J. F. Hackney & D. Beale	511	<b>Lipids</b>	
Study of poly-L-lysine conformations in aqueous methanol solution by using polarized Raman techniques. By I. W. Shepherd	543	Lipids associated with bovine kidney glomerular basement membranes. By G. Kibel, A. Heilhecker & F. von Bruchhausen	535
Chymotrypsins from the deer (Cervidae) family. Isolation, partial characterization and primary-structure studies of chymotrypsins A and B from both moose ( <i>Alces alces</i> ) and elk ( <i>Cervus elaphus</i> ) pancreas. By R. M. Lindsay & K. J. Stevenson	549	<b>Small Molecules</b>	
[Nitrotyrosyl]cytochrome <i>c</i> . Studies of the effect of iron binding, protein denaturants and oxidation-reduction potentials. By A. J. do Nascimento	589	The isolation and characterization of bilirubin diglucuronide, the major bilirubin conjugate in dog and human bile. By E. R. Gordon, C. A. Goresky, T.-H. Chang & A. S. Perlin	477
Isolation of (copper, zinc)-thioneins from pig liver. By I. Bremner & B. W. Young	631	The determination of methionine in proteins by gas-liquid chromatography. By G. M. Ellinger & A. Duncan	615
Ligand-apomyoglobin interactions. Configurational adaptability of the haem-binding site. By K. E. Lind & J. V. Møller	669	<b>Enzymology</b>	
Human placental diamine oxidase. Improved purification of a copper- and manganese-containing amine oxidase with novel substrate specificity. By M. J. C. Crabbe, R. D. Waight, W. G. Bardsley, R. W. Barker, I. D. Kelly & P. F. Knowles	679	Is a Schiff base involved in the mechanism of the $\Delta^4$ -3-oxo steroid 5 $\alpha$ - or 5 $\beta$ -reductases from mammalian liver? By D. C. Wilton	487
		Iodination of glyceraldehyde 3-phosphate dehydrogenase from <i>Bacillus stearothermophilus</i> . By G. Allen & J. I. Harris	523
		A new method for deriving steady-state rate equations suitable for manual or computer use. By K. J. Indge & R. E. Childs	567
		Thymidine phosphotransferase and nucleotide phosphohydrolase of the fern <i>Asplenium nidus</i> . General properties and inhibition by adenosine 3':5'-cyclic monophosphate. By A. R. Grivell & J. F. Jackson	571

	PAGE		PAGE
A method for the purification of milligram quantities of stable human phosphatidylcholine-cholesterol acyltransferase. By K. G. Varma & L. A. Soloff	583	Kinetic and spectral properties of rabbit brain 4-aminobutyrate aminotransferase. By R. A. John & L. J. Fowler	645
Molecular forms and activities of glycosidases in cultures of amniotic-fluid cells. By B. Hultberg, J. Lindsten & S. Sjöblad	599	Affinity purification and some molecular properties of human liver alkaline phosphatase. By J. M. Trépanier, L. E. Seargeant & R. A. Stinson	653
Purification of phosphodiesterase II from rat and guinea-pig intestinal mucosa. By P. R. Flanagan & S. H. Zbarsky	607	Dissociation and catalysis in yeast hexokinase A. By D. C. Williams & J. G. Jones	661
Mode of interaction between $\beta$ -lactam antibiotics and the exocellular DD-carboxypeptidase-transpeptidase from <i>Streptomyces</i> R39. By N. Fuad, J.-M. Frère, J.-M. Ghuysen, C. Duez & M. Iwatsubo	623	Effects of arginine and some analogues on the partial adenosine triphosphate-adenosine diphosphate exchange reaction catalysed by arginine kinase. Evolutionary divergence in the mechanism of action of a monomer and a dimer arginine kinase. By E. O. Anosike & D. C. Watts	689

## RAPID PAPERS

<b>Proteins</b>		<b>Enzymology</b>	
Abnormal carbohydrate composition of the major penetrating membrane protein of En(a-) human erythrocytes. By M. J. A. Tanner, R. E. Jenkins, D. J. Anstee & J. R. Clamp	701	Dihydrofolate reductase and thymidylate synthetase activities in the liver of rabbit foetuses during the haemopoietic period. By J. R. Bourbon	713
Removal of adsorbed elastase from partially digested elastin. By H. P. M. Fromageot & G. M. J. Slusarczuk	705	Inhibition of acetylcholinesterase by derivatives of 1,3,2-dioxaphosphorinane 2-oxide. By D. B. Coult	717
<b>Nucleic Acids</b>		Differences in the degradation of yeast phosphofructokinase by proteinases A and B from yeast. By K. Huse, G. Kopperschläger & E. Hofmann	721
Modification of brain deoxyribonucleic acid base content with maturation in normal and malnourished rats. By N. W. Penn	709	Autophagy-related changes of arylsulphatases A and B in rat liver lysosomes. By P. Sanghavi & H. Koenig	725
<b>Small Molecules</b>			
Ascorbic acid, metal ions and the superoxide radical. By B. Halliwell & C. H. Foyer	697

The following papers appeared in the last issue of the *Biochemical Journal*

Cellular Aspects

Contents of Volume 156, No. 2, 1976

FULL PAPERS

	PAGE		PAGE
<b>Biosynthesis and Degradation</b>			
The purification and biological properties of pancreatic big glucagon. By K. J. O'Connor & N. R. Lazarus	265	Glutamate metabolism and transport in rat brain mitochondria. By S. C. Dennis, J. M. Land & J. B. Clark	323
Studies on the biosynthesis of pancreatic glucagon in the pigeon ( <i>Columba livia</i> ). By K. J. O'Connor & N. R. Lazarus	279	The effects of proteolytic digestion by trypsin on the structure and catalytic properties of reduced nicotinamide-adenine dinucleotide dehydrogenase from bovine heart mitochondria. By C. I. Ragan	367
Synthesis of bile acid monosulphates by the isolated perfused rat kidney. By J. A. Summerfield, J. L. Gollan & B. H. Billing	339	Role of ubiquinone in the mitochondrial generation of hydrogen peroxide. By A. Boveris, E. Cadenas & A. O. M. Stoppani	435
Studies on the purification and properties of UDP-galactose-glycoprotein galactosyltransferase from rat liver and serum. By I. H. Fraser & S. Mookerjea	347	<b>Subcellular Structures</b>	
Lipid metabolism and mobilization in the guinea pig during pregnancy. By C. T. Jones	357	Further characterization of rat liver mitochondrial fractions. Lipid composition and synthesis, and protein profiles. By J. G. Satav, S. S. Katyare, P. Fatterpaker & A. Sreenivasan	215
16 $\beta$ -Hydroxylation of dehydroepiandrosterone sulphate by homogenates of human foetal liver. By K. N. Wynne & A. G. C. Renwick	419	Isolation of a Golgi-apparatus-enriched fraction from leukaemic cells. By A. Warley & G. M. W. Cook	245
Effects of clofibrate on some microsomal hydroxylations involved in the formation and metabolism of bile acids in rat liver. By B. Angelin, I. Björkhem & K. Einarsson	445	Phospholipid composition of the plasma membrane of the green alga, <i>Hydrodictyon africanum</i> . By D. S. Bailey & D. H. Northcote	295
Bacterial catabolism of threonine. Threonine degradation initiated by L-threonine-NAD <sup>+</sup> oxidoreductase. By S. C. Bell & J. M. Turner	449	The subcellular localization and properties of the ferrochelataase of etiolated barley. By H. N. Little & O. T. G. Jones	309
<b>Bioenergetics</b>			
Synthesis of adenosine triphosphate during release of intravesicular and membrane-bound calcium ions from passively loaded sarcoplasmic reticulum. By M. G. P. Vale, V. R. Osório e Castro & A. P. Carvalho	239	<b>Cellular Interactions and Control Processes</b>	
Effects of triphenylsulphonium ions on mitochondria. Inhibition of adenosine triphosphatase activity. By R. H. Barrett & M. J. Selwyn	315	Transport of pyruvate and lactate into human erythrocytes. Evidence for the involvement of the chloride carrier and a chloride-independent carrier. By A. P. Halestrap	193
		The dissociation of exocytosis and respiratory stimulation in leucocytes by ionophores. By G. Zabucchi & D. Romeo	209
		Production of 1,2-diacylglycerol and phosphatidate in human erythrocytes treated with calcium and ionophore A23187. By D. Allan, R. Watts & R. H. Michell	225

(continued overleaf)

(continued from preceding page)

	PAGE		PAGE
The androgenic regulation of prostate proteins with a high affinity for deoxyribonucleic acid. Evidence for a prostate deoxyribonucleic acid-unwinding protein. By W. I. P. Mainwaring, P. S. Rennie & J. Keen	253	Nuclear binding of progesterone in hen oviduct. Binding to multiple sites <i>in vitro</i> . By G. M. Pikler, R. A. Webster & T. C. Spelsberg	399
Prevention, by ribosome-bound nascent polypeptidyl chains, of the functional interaction of T-2 toxin with its receptor site. By M. Cannon, K. E. Smith & C. J. Carter	289	Nuclear binding of progesterone in hen oviduct. Role of acidic chromatin proteins in high-affinity binding. By R. A. Webster, G. M. Pikler & T. C. Spelsberg	409
Effect of pent-4-enoic acid, propionic acid and other short-chain fatty acids on citrulline synthesis in rat liver mitochondria. By A. M. Glasgow & H. P. Chase	301	Equilibrium-dialysis studies of the interaction between cholic acid and 100000g-supernatant preparations from the rat liver. By R. C. Strange, I. A. Nimmo & I. W. Percy-Robb	427
Control of rat mammary-gland pyruvate dehydrogenase by insulin and prolactin. By B. Field & H. G. Coore	333	<b>Metabolism in Whole Organisms</b>	
The regulation of rat liver tryptophan pyrrolase activity by reduced nicotinamide-adenine dinucleotide (phosphate). Experiments with glucose and nicotinamide. By A. A.-B. Badawy & M. Evans	381	Effect of ischaemic limb injury on the rates of metabolism of ketone bodies in starved rats. By R. N. Barton	233
Nuclear binding of progesterone in chick oviduct. Multiple binding sites <i>in vivo</i> and transcriptional response. By T. C. Spelsberg	391	Studies on the metabolic role of <i>myo</i> -inositol. Distribution of radioactive <i>myo</i> -inositol in the male rat. By L. M. Lewin, Y. Y. S. Sulimovici & P. F. Kraicer	357

## RAPID PAPERS

	PAGE		PAGE
<b>Biosynthesis and Degradation</b>		<b>Cellular Interactions and Control Processes</b>	
The existence of a glyconeogenic pathway in rat skin. By R. F. Peters & A. M. White	465	Long-term effects of a high glucose concentration on cyclic nucleotide phosphodiesterase activity in mouse pancreatic islets maintained in tissue culture. By C. Berne & A. Andersson	461
Deoxyribonucleoside triphosphate pools in vitamin B-12-deficient <i>Euglena gracilis</i> . By E. F. Carell & G. H. Goetz	473	<b>Metabolism in Whole Organisms</b>	
<b>Subcellular Structures</b>		Glucose transport as rate-limiting step in the growth of <i>Escherichia coli</i> on glucose. By D. Herbert & H. L. Kornberg	477
The development of the intense circular-dichroic signal during granum formation in greening etiolated maize. By S. Demeter, L. Mustardy, E. Machowicz & R. P. F. Gregory	469		

# Contents of Volume 155, No. 1

## FULL PAPERS

<b>Proteins</b>		<b>Lipids</b>	
Isolation, by partial pepsin digestion, of the three collagen-like regions present in sub-component C1q of the first component of human complement. By K. B. M. Reid	5	High-performance liquid chromatography of phosphatidylcholine and sphingomyelin with detection in the region of 200nm. By F. B. Jungalwala, J. E. Evans & R. H. McCluer	55
Subunit composition and structure of sub-component C1q of the first component of human complement. By K. B. M. Reid & R. R. Porter	19	<b>Carbohydrates</b>	
Physicochemical characterization of proteolytic cleavage fragments of bovine colostrum immunoglobulin G <sub>1</sub> (IgG <sub>1</sub> ). By W. D. Fang & T. K. S. Mukkur	25	2-O-Methyl-D-glucuronic acid, a new hexuronic acid of biological origin. By J. H. Kieras, F. J. Kieras & D. V. Bowen	181
Fb' <sub>2</sub> , a new peptic fragment of human immunoglobulin G. By D. M. Parr, G. E. Connell, D. I. C. Kells & T. Hofmann	31	<b>Enzymology</b>	
Interactions of the lanthanide- and hapten-binding sites in the Fv fragment from the myeloma protein MOPC 315. By R. A. Dwek, D. Givol, R. Jones, A. C. McLaughlin, S. Wain-Hobson, A. I. White & C. Wright	37	Dehydrogenation of the phosphonate analogue of glucose 6-phosphate by glucose 6-phosphate dehydrogenase. By P. R. Adams, R. Harrison, T. D. Inch & P. Rich	1
The purification of the glycoprotein lectin from the broad bean ( <i>Vicia faba</i> ) and a comparison of its properties with lectins of similar specificity. By A. K. Allen, N. N. Desai & A. Neuberger	127	pH-dependence of the steady-state rate of a two-step enzymic reaction. By K. Brocklehurst & H. B. F. Dixon	61
The binding of calcium to a salivary phosphoprotein, protein A, common to human parotid and submandibular secretions. By A. Bennick	163	Some properties of a microsomal oleate desaturase from leaves. By C. R. Slack, P. G. Roughan & J. Terpstra	71
Effect of succinylation (3-carboxypropionylation) on the conformation and immunological activity of ovalbumin. By S. A. Kidwai, A. A. Ansari & A. Salahuddin	171	A new non-functional form of milk xanthine oxidase containing stable quinquivalent molybdenum. By D. J. Lowe, M. J. Barber, R. T. Pawlik & R. C. Bray	81
<b>Nucleic Acids</b>		Purification, characterization and identification of rat liver histidine-pyruvate aminotransferase isoenzymes. By T. Noguchi, E. Okuno, Y. Minatogawa & R. Kido	107
The mechanism of sensitivity to phleomycin in growing <i>Escherichia coli</i> cells. By M. J. Sleight & G. W. Grigg	87	Interaction of human cathepsin D with the inhibitor pepstatin. By C. G. Knight & A. J. Barrett	117
Conformational analysis of deoxyribonucleic acid from PM2 bacteriophage. The effect of size on supercoil shape. By A. M. Campbell	101	Nitrogenase of <i>Azotobacter chroococcum</i> . Kinetics of the reduction of oxidized iron-protein by sodium dithionite. By R. N. F. Thorneley, M. G. Yates & D. J. Lowe	137
		Partial purification and characterization of collagen galactosyltransferase from chick embryos. By L. Risteli, R. Myllylä and K. I. Kivirikko	145
		State and accessibility of zinc in yeast alcohol dehydrogenase. By V. Leskovac, S. Trivić & M. Latkovska	155

## RAPID PAPERS

	PAGE		PAGE
<b>Proteins</b>		<b>Enzymology</b>	
<i>N</i> -Terminal amino acid sequence of wheat proteins that lack phenylalanine and histidine residues. By D. G. Redman	193	Formation of angiotensin III by angiotensin-converting enzyme. By A. T. Chiu, J. W. Ryan, J. M. Stewart & F. E. Dorer	189
<b>Nucleic Acids</b>		Electron-paramagnetic-resonance studies on the molybdenum of nitrate reductase from <i>Escherichia coli</i> K12. By R. C. Bray, S. P. Vincent, D. J. Lowe, R. A. Clegg & P. B. Garland	201
Comparison between the ribosomal ribonucleic acids from free and membrane-bound ribosomal fractions of HeLa cells. By M. S. N. Khan & B. E. H. Maden	197	Studies on human <i>N</i> -acetyl- $\beta$ -D-hexosaminidase C separated from neonatal brain. By G. T. N. Besley & D. M. Broadhead	205

## Contents of Volume 155, No. 2

<b>Proteins</b>		<b>Nucleic Acids</b>	
Mouse haemoglobin beta chains. Sequence data on embryonic $\gamma$ chain and genetic linkage of the $\gamma$ -chain locus to the adult $\beta$ -chain locus <i>Hbb</i> . By J. G. Gilman	231	The circular dichroism of ribosomal ribonucleic acids. By R. A. Cox, W. Hirst, E. Godwin & I. Kaiser	279
The actin of muscle and fibroblasts. By P. J. Anderson	297	<i>Appendix</i> : Calculation of the circular dichroism of bihelical ribonucleic acids as a function of nucleotide composition. By R. A. Cox & W. Hirst	292
A comparison of the properties of renin isolated from pig and rat kidney. By M. Lauritzen, J. J. Damsgaard, I. Rubin & E. Lauritzen	317	<b>Lipids</b>	
The mechanism of folding of globular proteins. Suitability of a penicillinase from <i>Staphylococcus aureus</i> as a model for refolding studies. By B. Robson & R. H. Pain	325	Polar-group behaviour in mixed monolayers of phospholipids and fusogenic lipids. By B. Maggio & J. A. Lucy	353
The mechanism of folding of globular proteins. Equilibria and kinetics of conformational transitions of penicillinase from <i>Staphylococcus aureus</i> involving a state of intermediate conformation. By B. Robson & R. H. Pain	331	Preparation of the 3-monosulphates of cholic acid, chenodeoxycholic acid and deoxycholic acid. By E. S. Haslewood & G. A. D. Haslewood	401
Active fragments obtained by cyanogen bromide cleavage of ovomucoid. By J. G. Beeley	345	<b>Carbohydrates</b>	
The molybdenum-iron protein of <i>Klebsiella pneumoniae</i> nitrogenase. Evidence for non-identical subunits from peptide 'mapping'. By C. Kennedy, R. R. Eady, E. Kondorosi & D. K. Rekosh	383	The structures of the carbohydrate moieties of the $\alpha$ subunit of human chorionic gonadotrophin. By J. F. Kennedy & M. F. Chaplin	303
		<b>Small Molecules</b>	
		Bilirubin conjugates in bile of man, rat and dog. Semi-quantitative analysis of bile composition by thin-layer chromatography. By B. A. Noir	365

	PAGE		PAGE
Synthesis and separation by thin-layer chromatography of bilirubin-IX isomers. Their identification as tetrapyrroles and dipyrrolic ethyl anthranilate azo derivatives. By N. Blanckaert, K. P. M. Heirwegh & F. Compennolle	405	Human lysosomal elastase. Catalytic and immunological properties. By P. M. Starkey & A. J. Barrett	265
<b>Enzymology</b>		Human cathepsin G. Catalytic and immunological properties. By P. M. Starkey & A. J. Barrett	273
A cyanogen bromide fragment of $\beta$ -galactosidase from <i>Escherichia coli</i> with $\alpha$ -donor activity in complementation of the enzyme from mutant M15. By D. V. Marinkovic & J. N. Marinkovic	209	Separation of rat muscle aminopeptidases. By M. E. Parsons & R. J. T. Pennington	375
Isolation and properties of $\alpha$ -D-mannosidase from human kidney. By D. V. Marinkovic & J. N. Marinkovic	217	Observations on the different substrate behaviour of tropocollagen molecules in solution and intermolecularly cross-linked tropocollagen within insoluble polymeric collagen fibrils. By F. S. Steven	391
The concerted inactivation of <i>Escherichia coli</i> uridine diphosphate galactose 4-epimerase by sugar nucleotide together with a free sugar. By P. Blackburn & W. Ferdinand	225	Selective inactivation of the transacylase components of the 2-oxo acid dehydrogenase multienzyme complexes of <i>Escherichia coli</i> . By J. P. Brown & R. N. Perham	419
The purification of human enterokinase by affinity chromatography and immunoabsorption. Some observations on its molecular characteristics and comparisons with the pig enzyme. By D. A. W. Grant & J. Hermon-Taylor	243	Spin-label study of the mobility of enzyme-bound lipoic acid in the pyruvate dehydrogenase multienzyme complex of <i>Escherichia coli</i> . By M. C. Ambrose & R. N. Perham	429
Neutral proteinases of human spleen. Purification and criteria for homogeneity of elastase and cathepsin G. By P. M. Starkey & A. J. Barrett	255	Phosphonomethyl analogues of hexose phosphates. By D. Webster, W. R. Jondorf & H. B. F. Dixon	433
		<i>Appendix: A simplified preparation of 2-hydroxy-4-phosphonobutyric acid.</i> By H. B. F. Dixon & M. J. Sparkes	440

## RAPID PAPERS

	PAGE		PAGE
<b>Proteins</b>		The computation of hyperbolic dependences in enzyme kinetics. By R. K. Airas	449
The use of ninhydrin as a reagent for the reversible modification of arginine residues in proteins. By M. F. Chaplin	457	Kinetic studies on the binding of cyanide to oxygenated cytochrome <i>c</i> oxidase. By T. Brittain & C. Greenwood	453
<b>Enzymology</b>		Preferential inhibition by poly(adenylic acid) of minus-strand synthesis by bacteriophage Q $\beta$ ribonucleic acid replicase. By M. Kondo	461
The effect of some analogues of disulfiram on the aldehyde dehydrogenases of sheep liver. By T. M. Kitson	445		

## Contents of Volume 155, No. 3
