THE BIOCHEMICAL SOCIETY

OFFICERS AND COMMITTEE, 1975–76

Chairman of the Committee
T. S. Work

Committee
G. B. Ansell

Treasurer
B. A. Askonas, F.R.S.

Botanical Secretary
H. S. Bachelard

H. M. Keir

K. Burton, F.R.S.

J. T. Dingle*

Publications Secretary
C. A. Fewson

R. M. C. Dawson

C. Green

Meetings Secretary
K. Griffiths

J. B. Lloyd

M. G. Harrington

H. F. Bradford

J. N. Hawthorne

Assistant Meetings Secretary
C. H. S. Hitchcock

*Ex Officio Member of Committee; representative of Editorial Board of the Biochemical Journal

Executive Secretary
A. I. P. Henton (7 Warwick Court, London WC1R 5DP)

The Biochemical Society exists to advance the science of biochemistry through meetings and publications. Several meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)].

The major publication of the Biochemical Society is the Biochemical Journal. Contributors (who need not be members of the Biochemical Society) may be interested to know that the Journal places emphasis on prompt publication of both full-length papers (on average about 6 months after receipt) and rapid papers (on average 10–12 weeks after receipt).

The Journal makes no manuscript handling charges, no page charges and no charges for plates.

Reprints are available at modest cost at about the same time as publication, and, if an author is a member of the Biochemical Society, 50 reprints are provided free of charge.
The Biochemical Journal is published and distributed by the Biochemical Society. It is published twice monthly, alternate issues being devoted to Molecular Aspects and to Cellular Aspects of biochemistry. It is planned that in 1976 eight volumes, each volume being made up of three issues, will be published according to the following schedule:

<table>
<thead>
<tr>

* Completes volume, and includes Indexes.

Biochemical Society Transactions. This is now a separate publication (see below). Volume 4 will be published in 1976, in six parts.

Subscription Rates to the Biochemical Journal. For non-members of the Biochemical Society the subscription in 1976 is £124.00. Subject to exchange variation the rate for U.S.A., Canada and Mexico is $320.00 (despatched by air freight).

Terms are cash with order or against proforma invoice. Orders and subscriptions should be sent to the Biochemical Society (Publications), P.O. Box 32, Commerce Way, Colchester CO2 8HP, Essex, or through your normal agent.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address given in the preceding paragraph. Claims cannot be entertained if they are received later than three months after the date of posting, plus such time as would be expected for transit by post.

Back Numbers. Enquiries for volumes 1–19 of the Journal should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts of the Journal, and also of Transactions, may be obtained on application to the Biochemical Society (Publications), P.O. Box 32, Commerce Way, Colchester CO2 8HP, Essex.

Microforms. The following versions are available.

(a) Microfilm (35mm): Volumes 1–101.
(b) Microfiche (98-image): Volumes 102–152.

Details and prices are available on request from the Biochemical Society's Colchester office.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)]. Copy is required eight weeks before publication date. Rate cards are available on request.

</table>
NOTES FOR CONTRIBUTORS

It is the policy of the Biochemical Journal to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary or inconclusive experiments should not generally be described.

Two types of paper are accepted by the editors. Full-length papers. Papers submitted for publication should be sent, preferably in duplicate, together with an extra copy of the synopsis, to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent.

Papers submitted should be written concisely. Special attention is directed to the sections below concerning the preparation of the typescript. Typescripts that are not concise or do not conform to the conventions of the Biochemical Journal will be returned to the authors for revision. If a paper that has been returned to an author for revision is not resubmitted within one month, it will, on resubmission, be deemed to be a new paper and the date of receipt altered accordingly. A revised paper containing a significant amount of new material will also be redated.

Submission of a paper to the Editorial Board implies that it has been approved by all the named authors, that it reports unpublished work, that it is not under consideration for publication elsewhere, and that if accepted the Biochemical Journal it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Papers should be headed by a concise but informative full title, by the names of the authors (preferably with one forename in full, with initials, for each author) and by the name and address of the establishment where the work was performed. Details of financial support appear in the acknowledgements at the end of the paper.

Before preparing papers authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. Papers should be in double-spaced typing throughout (including the references and legends of tables and figures) on sheets of uniform size with wide margins. The top copy should be submitted. Submission of a duplicate typescript in addition may avoid delay. It cannot be overemphasized that the need for revision of badly prepared typescripts inevitably leads to delays in publication.

Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the Journal. Sufficient information must be included to permit repetition of the experimental work.

Rapid Papers. Typescripts should be submitted in duplicate, written in English, and conform strictly to the form of the Journal as far as spelling and abbreviations are concerned. Each rapid paper should be provided with a short synopsis (normally not exceeding 50 words). Such papers should not exceed 2400 words in length inclusive of the title, references etc. Authors may include insertions (preferably not more than two) such as tables, figures or schemes; in these cases authors must assess what proportion of a page these insertions will occupy and reduce the number of text words accordingly at the rate of 700 words per full page of the Journal. Authors are advised that the preparation of tables and especially figures is liable to cause an increase in publication time. In no circumstances whatsoever can a complete rapid paper occupy more than four pages of the Journal. Papers should be complete in themselves: (1) the methods used in experimental work must be adequately described or sufficient reference given to allow repetition of the work; (2) sufficient indication of the results of experimental work must be included to justify the claims made. Rapid papers should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP.

Acetoacetate, effect of ischaemic limb injury on the rates of metabolism of 3-hydroxybutyrate and, in the starved rat (Barton, R. N.) 233–238

Acetoacetate, evidence for the conversion of, into acetoacetyl-coenzyme A in the cytosol fraction during lipogenesis from ketone bodies in rat cerebral cortex (Patel, M. S. & Owen, O. E.) 603–607

Acetoacetyl-coenzyme A, evidence for the conversion of acetoacetate into, in the cytosol fraction during lipogenesis from ketone bodies in rat cerebral cortex (Patel, M. S. & Owen, O. E.) 603–607

Acetylcholine, inhibition by botulinum toxin of the depolarization-evoked release of, from guinea-pig cerebral-cortex synaptosomes in vitro (Wonnacott, S. & Marchbanks, R. M.) 701–712

Adenine nucleotides, cytosolic and mitochondrial, phosphorylation state of, and of pyruvate dehydrogenase in isolated rat liver cells (Siess, E. A. & Wieland, O. H.) 91–102

Adenosine 3'-5' cyclic monophosphate, stimulation by prostaglandins and thyroliberin of the biosynthesis of prolactin and the formation of, in cultured rat pituitary-gland cells (Gautvik, K. M. & Kriz, M.) 111–117

Adenosine triphosphatase, calcium ion-activated, properties of, in rat mast-cell plasma membrane (Cooper, P. H. & Stanworth, D. R.) 691–700

Adenosine triphosphatase, inhibition by triphenylsulphonium ions, ethidium bromide of, in cultured rat liver cells (Suter, M., & Davies, J. & Davies, T. J.) 577–583

Adrenodrenal hyporesponsiveness, see Adrenocortical hyporesponsiveness

Adrenocortical hyporesponsiveness, see Adrenodrenal hyporesponsiveness

Adrenocortical insufficiency, see Adrenocortical hyporesponsiveness

Adrenocortical hyperfunction, see Adrenocortical hyperfunction

Adrenocortical hyporesponsiveness, see Adrenodrenal hyporesponsiveness

Adrenocortical hyperfunction, see Adrenocortical hyperfunction

Adrenocorticotropic hormone, see Adrenocortical hormone

Adrenocortical hormone, see Adrenocorticotropic hormone

Adrenocorticosteroids, see Adrenocortical hormone

Adrenocorticosteroids, see Adrenocortical hormone

Adrenocortical hyperfunction, see Adrenocortical hormone

Alkaloids, see Alkylguanidines

Alkylguanidines, comparison of the inhibitory effects of triphenylsulphonium ions, ethidium bromide and, on the activity of adenosine triphosphatase in ox heart mitochondria (Barrett, R. H. & Selwyn, M. J.) 315–322

Alloxan-diabetes, see Diabetes, alloxan-

Amino acids, contribution of, and other endogenous substrates to the respiratory fuel of rat spleen slices in vitro (Suter, D. & Wiedemann, M. J.) 119–127

Amino acids, effects of denervation on the transport of, in relation to the turnover of protein in rat skeletal muscle (Goldspink, D. F.) 71–80

Amino acids, 2-3H-labelled, sensitive method for the determination of the turnover of protein in duckweed based on the measurement of, in protein (Humphrey, T. J. & Davies, D. D.) 561–568

Ammonia, effect of glucose on the production of, during normal endogenous metabolism by rat spleen slices in vitro (Suter, D. & Wiedemann, M. J.) 119–127

Ammonium chloride, reversal by, of the glucose-induced inhibition of the activity of triphosphopyruvate oxidase in rat liver (Badawy, A. A.-B. & Evans, M.) 381–390

Anaemia, sickle-cell, exchange of calcium ions in erythrocytes from normal humans and from subjects with (Cameron, B. F. & Smariga, P. E.) 577–583

Androgens, evidence for a deoxyribonucleic acid-unwinding protein involved in the regulation by, of the biosynthesis of proteins in rat prostate gland (Mainwarin, W. I. P., Rennie, P. S. & Keen, J.) 253–264

Androgens, regulation by, of the activities of glycolytic enzymes in rat epididymis and epididymal spermatozoa (Brooks, D. E.) 527–537

Antimycin A, effects of az'-bypyridyl, colchicine and, on the secretory process for procollagen in chick-embryo tendon and cartilage cells (Harwood, R., Grant, M. E. & Jackson, D. S.) 81–90

Artemia salina, see Brie shrimp

Ascites-tumour cells, Ehrlich, biosynthesis of poly-adenylate-containing ribonucleic acid by mitochondria isolated from (Aujame, L. & Freeman, K. B.) 499–506

Barley (Hordeum vulgare) leaves, etiolated, subcellular localization and properties of ferrochelatase of (Little, H. N. & Jones, O. T. G.) 309–314

[14C]Bicarbonate, sodium, analysis of the complex curve for the disappearance of [14C] label during the turnover of a mixture of proteins in rat liver after the injection of (Garlick, P. J., Waterlow, J. C. & Swick, E. W.) 667–663

Bile acids, effects of clofibrate on microsomal hydroxylation reactions involved in the formation and metabolism of, in rat liver (Angelin, B., Bjorkhem, I. & Einarsson, K.) 445–448
Bile acids, equilibrium-dialysis studies of the interaction between, and rat liver 100000g supernatant preparations (Strange, R. C., Numno, I. A. & Percy-Robb, I. W.) 427-433

Biotin, mediation by, of the restoration of gluconeogenesis and the activity of pyruvate carboxylase activity in liver slices from chicks with fatty liver and kidney syndrome (Bannister, D. W.) 167-173

$\alpha\beta$-Bipyridyl, effects of colchicine, antimycin A and, on the secretory process for procollagen in chick-embryo tendon and cartilage cells (Harwood, R., Grant, M. E. & Jackson, D. S.) 81-90

Botulinum toxin, inhibition by, of the depolarization-evoked release of acetylcholine from guinea-pig cerebral-cortex synaptosomes in vitro (Wonnacott, S. & Marchbanks, R. M.) 701-712

Brain cortex, guinea-pig, inhibition by botulinum toxin of the depolarization-evoked release of acetylcholine from synaptosomes from, in vitro (Wonnacott, S. & Marchbanks, R. M.) 701-712

Brain cortex, rat, evidence for the conversion of acetoacetate into acetyl-coenzyme A in the cytosol fraction during lipogenesis from ketone bodies in (Patel, M. S. & Owen, O. E.) 603-607

Brain, rat, developing, effects of treatment with Pronase and neuraminidase on a myelin-associated glycoprotein from (Quarles, R. H.) 143-150

Brain, rat, enzymic hydrolysis of myelin basic protein and other proteins in, and lymph nodes from normal and demyelinating animals (Buletz, G. F., Jr. & Smith, M. E.) 627-633

Brain, rat, metabolism and transport of glutamate and glutamine in mitochondria from (Dennis, S. C., Land, J. M. & Clark, J. B.) 323-331

Brine shrimp (Artemia salina), effects on the steps of peptide chain elongation during inhibition by crotins and ricin of the biosynthesis of protein in vitro by ribosomes from (Sperti, S., Montanaro, L., Mattioli, A., Testoni, G. & Sterfe, F.) 7-13

Butyrate, effects of glucagon and, on gluconeogenesis in isolated lamb liver cells (Clark, M. G., Filsell, O. H. & Jarrett, I. G.) 671-680

Calcium ions, conductance of, across the inner membrane of rat liver mitochondria and determination of the electrochemical gradient for calcium ions (Heaton, G. M. & Nicholls, D. G.) 635-646

Calcium ions, control by glycolysis of the transport of, and its relevance to the stimulus-secretion coupling of the glucose-induced release of insulin by rat pancreatic islets of Langherhans (Sener, A., Levy, J. & Malaise, W. J.) 521-525

Calcium ions, dissociation by ionophores of excocytosis dependent on, and stimulation of respiration in guinea-pig and human leukocytes (Zabucchi, G. & Romeo, D.) 209-213

Calcium ions, effects of nucleotides and theophylline on the uptake of, by subcellular fractions of mouse islets of Langherhans (Sahlin, J.) 63-69

Calcium ions, exchange of, in normal and sickle-cell anaemia human erythrocytes (Cameron, B. F. & Smariga, P. E.) 577-583

Calcium ions, intravesicular and membrane-bound, formation of adenosine triphosphate during the release of, from passively loaded rabbit skeletal-muscle sarcoplasmic reticulum (Vale, M. G. P., Osório e Castro, V. R. & Carvalho, A. P.) 239-244

Calcium ions, production of, 1,2-diacylglycerol and phosphatidate in human erythrocytes treated with ionophore A 23187 and (Allan, D., Watts, R. & Michell, R. H.) 225-232

Carbohydrates, contribution of, and other endogenous substrates to the respiratory fuel of rat spleen slices in vitro (Suter, D. & Wiedemann, M. J.) 119-127

Carbon tetrachloride, effect of the administration of, on the uptake of plasma unesterified fatty acids by liver of ethanol-treated rats (Abrams, M. A. & Cooper, C.) 47-54

Cartilaginous cells, chick-embryo, effects of $\alpha\beta$-bipyridyl, colchicine and antimycin A on the secretory process for procollagen in, and tendon cells (Harwood, R., Grant, M. E. & Jackson, D. S.) 81-90

Cartilaginous cells, chick-embryo, isolated, hydroxylation of lysine and glycosylation of hydroxylysine during the biosynthesis of collagen in (Oikarinen, A., Anttinen, H. & Kivirikko, K. I.) 545-551

Casein, incorporation of valine, leucine, histidine and phenylalanine into, by isolated perfused lactating guinea-pig mammary gland (Davis, S. R. & Mepham, T. B.) 553-560

Cells, ascites-tumour, Ehrlich, biosynthesis of polyadénylate-containing ribonucleic acid by mitochondria isolated from (Aujamme, L. & Freeman, K. B.) 499-506

Cells, cartilaginous, chick-embryo, isolated, hydroxylation of lysine and glycosylation of hydroxylysine during the biosynthesis of collagen in (Oikarinen, A., Anttinen, H. & Kivirikko, K. I.) 545-551

Cells, hepatoma, Reuber H35, selective control of the degradation of normal and aberrant proteins in (Knowles, S. E. & Ballard, F. J.) 609-617

Cells, leukaemic, mouse, isolation of a Golgi-apparatus-enriched fraction from (Warely, A. & Cook, G. M. W.) 245-251

Cells, liver, rat, isolated, phosphorylation state of cytosolic and mitochondrial adenine nucleotides and of pyruvate dehydrogenase in (Siess, E. A. & Wieland, O. H.) 91-102

Cells, pituitary-gland, rat, cultured, stimulation by prostatandin G and thyroliberin of the biosynthesis of prolactin and the formation of adenosine 3':5'-cyclic monophosphate in (Gautvik, K. M. & Kriz, M.) 111-117

Cells, tendon and cartilage, chick-embryo, effects of $\alpha\beta$-bipyridyl, colchicine and antimycin A on the secretory process for procollagen in (Harwood, R., Grant, M. E. & Jackson, D. S.) 81-90

Central nervous system, see Nervous system, central

Cerebral cortex, guinea-pig, inhibition by botulinum toxin of the depolarization-evoked release of acetylcholine from synaptosomes from, in vitro (Wonnacott, S. & Marchbanks, R. M.) 701-712

Cerebral cortex, rat, evidence for the conversion of acetooacetate into acetyl-coenzyme A in the cytosol fraction during lipogenesis from ketone bodies in (Patel, M. S. & Owen, O. E.) 603-607

1976
INDEX OF SUBJECTS

Chenodeoxycholate 7-sulphate, biosynthesis of, and other bile acid monosulphates by isolated perfused rat kidney (Summerfield, J. A., Gollan, J. L. & Billing, B. H.) 339–345
Chick, biotin-mediated restoration of gluconeogenesis and the activity of pyruvate carboxylase in liver slices from, with fatty liver and kidney syndrome (Bannister, D. W.) 167–173
Chick embryo, effects of az‘-bipyridyl, colchicine and antimycin A on the secretory process for procollagen in tendons and cartilage cells (Harwood, R., Grant, M. E. & Jackson, D. S.) 81–90
Chick embryo, hydroxylation of lysine and glycosylation of hydroxylsine during the biosynthesis of collagen in cartilage cells isolated from (Oikarinen, A., Anttinen, H. & Kivirikko, K. I.) 545–551
Chick, multiple binding sites for progesterone in vivo in oviduct nuclei of, and the transcriptional response (Spelsberg, T. C.) 391–398
Children, binding of progesterone to multiple sites in oviduct nuclei from, in vitro (Pikler, G. M., Webster, R. A. & Spelsberg, T. C.) 399–408
Children, role of acidic chromatin proteins in the high-affinity binding of progesterone in oviduct nuclei from (Webster, R. A., Pikler, G. M. & Spelsberg, T. C.) 409–418
Chloride ion carrier, evidence for the involvement of, and of a chloride ion-independent carrier in the transport of pyruvate and lactate into human erythrocytes (Halestrap, A. P.) 193–207
Chloroplast grana, development of the intense circular-diachroic signal during the formation of, in greening etiolated maize leaves (Demeter, S., Mustardy, L., Machowicz, E. & Gregory, R. P. F.) 469–472
Cholesterol, effects of clofibrate on microsomal hydroxylation reactions involved in the formation of bile acids from, in rat liver (Angelini, B., Björkhem, I. & Einarssohn, K.) 445–448
Cholic acid, equilibrium-dialysis studies of the interaction between, and rat liver 100000g supernatant preparations (Strange, R. C., Nimmo, I. A. & Percy-Robb, I. W.) 427–433
Chromatin, liver and kidney, rat, effects of the administration of sublethal doses of cycloheximide on the biosynthesis of the protein components of (Rothblum, L. I., Devlin, T. M. & Ch'ih, J. J.) 151–157
Chromatin, role of acidic proteins of, in the high-affinity binding of progesterone in chicken oviduct nuclei (Webster, R. A., Pikler, G. M. & Spelsberg, T. C.) 409–418
Citriulline, effects of pent-4-enoate, propionate and other short-chain fatty acids on the biosynthesis of, in rat liver mitochondria (Glasgow, A. M. & Chase, H. P.) 301–307
Clearing-factor lipase, see Lipase, clearing-factor
Clofibric acid [ethyl ar‘-chlorophenoxy]isobutyrate], effects of, on microsomal hydroxylation reactions involved in the formation and metabolism of bile acids in rat liver (Angelini, B., Björkhem, I. & Einarssohn, K.) 445–448
Coagulating gland, rat, accumulation of myo-inositol in, and other organs after its injection into the male animal (Lewin, L. M., Yannai, Y., Sulimovici, S. & Kraicer, P. F.) 375–380
Coenzyme A, role of adenosine triphosphate and, in the regulation of the biosynthesis of phosphatidylcholine in rat liver endoplasmic reticulum (Sribney, M., Knowles, C. L. & Lyman, E. M.) 507–514
Colchicine, effects of az‘-bipyridyl, colchicine and antimycin A and, on the secretory process for procollagen in chick-embryo tendon and cartilage cells (Harwood, R., Grant, M. E. & Jackson, D. S.) 81–90
Collagen, hydroxylation of lysine and glycosylation of hydroxylsine during the biosynthesis of, in isolated chick-embryo cartilage cells (Oikarinen, A., Anttinen, H. & Kivirikko, K. I.) 545–551
Collagen, pro-, effects of az‘-bipyridyl, colchicine and antimycin A on the secretory process for, in chick-embryo tendon and cartilage cells (Harwood, R., Grant, M. E. & Jackson, D. S.) 81–90
Columba livia, see Pigeon
Cortisol, influence of, on the stimulation by leucocyte endogenous mediator on the biosynthesis of ribonucleic acid and of plasma acute-phase globulins in rat liver (Thompson, W. L., Abeles, F. B., Beall, F. A., Dinterman, R. E. & Wannemacher, R. W., Jr.) 25–32
Corynebacterium sp. B6 N.C.I.B. 11220, initiation by L-threonine 3-dehydrogenase of the degradation of L-threonine by, and other bacteria (Bell, S. C. & Turner, J. M.) 449–458
Crotons, effects on the steps of peptide chain elongation during inhibition by ricin and, of the biosynthesis of protein in vitro by rat liver and Artemia salina ribosomes (Spreti, S., Montanaro, L., Mattioli, A., Testoni, G. & Stirpe, F.) 7–13
Crotons, inhibition by curcin and, of the biosynthesis of protein in vitro by rabbit reticuloocyte lysate (Stirpe, F., Pression-Brizzi, A., Lorenzoni, E., Strocchi, P., Montanaro, L. & Spreti, S.) 1–6
Croton tiglium, inhibition by toxic seed proteins from Jatropha curcas and, of the biosynthesis of protein in vitro by rabbit reticuloocyte lysate (Stirpe, F., Pession-Brizzi, A., Lorenzoni, E., Strocchi, P., Montanaro, L. & Spreti, S.) 1–6
α-Cyanocinnamate, mechanism of the inhibition by derivatives of, of the activity of the rat liver mitochondrial pyruvate transporter (Halestrap, A. P.) 181–183
Cyclic adenosine 3':5'-monophosphate, see Adenosine 3':5'-cyclic monophosphate
Cyclic nucleotide phosphodiesterase, long-term effects of high concentrations of glucose on the activity of, in isolated mouse pancreatic islets of Langerhans (Berne, C. & Andersson, A.) 461–463
Cycloheximide, effects of the administration of sublethal doses of, on the biosynthesis of protein in rat liver and kidney (Rothblum, L. I., Devlin, T. M. & Ch'ih, J. J.) 151–157
Cytochromes, proposal of a mechanism for the translocation of hydrogen ions during the reduction of, by nitrite in Nitrobacter winogradskyi electron-transport particles (Coble, J. G.) 493–498

Vol. 156
Cytosol, cerebral-cortex, rat, evidence for the conversion of acetooacetate into acetooacetyl-coenzyme A in, during lipogenesis from ketone bodies in the tissue (Patel, M. S. & Owen, O. E.) 603–607
Cytosol, liver, rat, effect of phenobarbitone on the transport of ribonucleic acid from rat liver nuclei to, in vitro (Hazaran, N. & McCauley, R.) 665–670
Cytosol, liver, rat, phosphorylation state of adenine nucleotides in, and mitochondria and its relationship to the phosphorylation state of pyruvate dehydrogenase (Siess, E. A. & Wieland, O. H.) 91–102
Cytosol preparations, liver, rat, equilibrium-dialysis studies of the interaction between cholic acid and (Strange, R. C., Nimmo, I. A. & Percy-Robb, I. W.) 427–433

Dehydroandrosterone 3-sulphate, 16β-hydroxylation of, by homogenates of foetal human liver (Wynne, K. N. & Renwick, A. G. C.) 419–425
Denervation, effects of, on the turnover of protein in rat skeletal muscle (Goldspink, D. F.) 71–80
Deoxyribonucleic acid, evidence for the absence of a dark-repair mechanism for, in Halobacterium catullum N.R.C. 34001 (Grey, V. L. & Fitt, P. S.) 569–575
Deoxyribonucleic acid-unwinding protein, evidence for, involved in the androgenic regulation of the biosynthesis of proteins in rat prostate gland (Mainwaring, W. I. P., Rennie, P. S. & Keen, J.) 233–264
Deoxyribonucleoside triphosphates, size of the pools of, in vitamin B12-deficient Euglena gracilis strain Z (Carell, E. F. & Goetz, G. H.) 473–475
Development, effects of treatment with Pronase and neuraminidase on a myelin-associated glycoprotein obtained from rat brain during (Quarles, R. H.) 143–150
Diabetes, alloxan-, effect of, on the phosphorylation state of cytosolic and mitochondrial adenine nucleotides and of pyruvate dehydrogenase in isolated rat liver cells (Siess, E. A. & Wieland, O. H.) 91–102
1,2-Diacylglycerol, production of phosphatidate and, in human erythrocytes treated with calcium ions and ionophore A23187 (Allan, D., Watts, R. & Michell, R. H.) 225–229
Diglyceride, see Diacylglycerol

Duckweed (Lemma minor), sensitive method for the determination of the turnover of proteins in, based on the measurement of 2-3H-labelled amino acids in protein (Humphrey, T. J. & Davies, D. D.) 561–568

Ehrlich ascites-tumour cells, biosynthesis of polyadenylate-containing ribonucleic acid by mitochondria isolated from (Aujaime, L. & Freeman, K. B.) 499–506
Electrochemical gradient, conductance of calcium ions across the inner membrane of rat liver mitochondria and determination of, for calcium ions (Heaton, G. M. & Nicholls, D. G.) 635–646
Electron-transport particles, Nitrobacter winogradskyi, proposal of a mechanism for the translocation of hydrogen ions during the reduction of cytochromes by nitrite in (Coble, J. G.) 493–498
Electron-transport particles, phosphorylating, Nitrobacter winogradskyi, activation of the oxidation of nitrite by the electrical component of the protonotive force in energy-conserving reactions in (Coble, J. G.) 481–491

Elongation factor, see Peptide chain elongation factor
Embryo, chick, effects of αα'-bipyridyl, colchicine and antimycin A on the secretory process for procollagen in tendon and cartilage cells from (Harwood, R., Grant, M. E. & Jackson, D. S.) 81–90
Endometrium, uterine, rabbit, effects of oestradiol-17β and progesterone on the metabolism of [1,2-3H]-progesterone by, and myometrium (Verma, U. & Laumas, K. R.) 55–62
Endoplasmic reticulum, see Reticulum, endoplasmic
Epididymis, rat, regulation by androgens of the activities of glycolytic enzymes in, and epididymal spermatozoa (Brooks, D. E.) 527–537

Erythrocytes, human, evidence for the involvement of the chloride ion carrier and of a chloride ion-independent carrier in the transport of pyruvate and lactate into (Halestrap, A. P.) 193–207
Erythrocytes, human, normal and sickle-cell-anaemia, exchange of calcium ions in (Cameron, B. F. & Smazriga, P. E.) 577–583
Erythrocytes, human, production of 1,2-diacylglycerol and phosphatidate in, treated with calcium ions and ionophore A23187 (Allan, D., Watts, R. & Michell, R. H.) 225–232
Erythrocytes, human, titration studies of the binding of hydrogen ions to the membrane of (Hallam, C. & Wrigglesworth, J. M.) 159–165
Escherichia coli, glucose transport as the rate-limiting step in the growth of, on glucose (Herbert, D. & Kornberg, H. L.) 477–480
Estradiol, see Oestradiol

Estrogens, see Oestrogens
Ethanol, mechanism of the increased uptake of plasma unesterified fatty acids by liver of rats treated with (Abrams, M. A. & Cooper, C.) 47–54
Ethanol, quantitative analysis of the metabolism of triacylglycerol in liver of rat treated with (Abrams, M. A. & Cooper, C.) 33–46
Ethanol, rate of induction by, of the activity of rat liver mitochondrial aldehyde dehydrogenase (Horton, A. A. & Barrett, M. C.) 177–179
Ethidium bromide, comparison of the inhibitory effects of triphenylsulphonium ions, ethidium bromide and, on the activity of adenosine triphosphatase in ox heart mitochondria (Barrett, R. H. & Selwyn, M. J.) 315–322

Ethyl αα-(p-chlorophenoxy)isobutyrate (clofibrate), effects of, on microosomal hydroxylation reactions involved in the formation and metabolism of bile acids in (Angelin, B., Björkhem, I. & Einarsen, K.) 445–448
Etioplasts, barley-leaf, subcellular localization of ferrochelatase in, and properties of the enzyme (Little, H. N. & Jones, O. T. G.) 309–314
Euglena gracilis strain Z, vitamin B12-,deficient, size of the pools of deoxyribonucleoside triphosphates in (Carell, E. F. & Goetz, G. H.) 473–475
Exercise, sparing effect of increased concentrations of fatty acids in plasma on the concentrations of glycogen in rat skeletal muscle and liver during (Rennie, M. J., Winder, W. W. & Holloszy, J. O.) 647–655
Exocytosis, dissociation by ionophores of, and stimulation of respiration in guinea-pig and human leucocytes (Zabucchi, G. & Romeo, D.) 209–213

1976

INDEX OF SUBJECTS
Fatty acids, biosynthesis of, in perfused liver of adrenalectomized rats (Kirk, C. J., Verrinder, T. R. & Hems, D. A.) 593–602
Fatty acids, short-chain, effects of, on the biosynthesis of citrulline in rat liver mitochondria (Glasgow, A. M. & Chase, H. P.) 301–307
Fatty acids, sparing effect of increased concentrations of, in plasma on the concentrations of glycogen in skeletal muscle and liver of the exercising rat (Rennie, M. J., Winder, W. W. & Holloszy, J. O.) 647–655
Fatty acids, unesterified, plasma, rat, mechanism of the increased uptake of, by liver of ethanol-treated animals (Abrams, M. A. & Cooper, C.) 47–54
Fatty acids, unesterified, plasma, rat, quantitative analysis of the incorporation of, into triacylglycerol in liver of ethanol-treated animals (Abrams, M. A. & Cooper, C.) 33–46
Fatty liver and kidney syndrome, biotin-mediated restoration of gluconeogenesis and the activity of pyruvate carboxylase in liver slices from chicks with (Bannister, D. W.) 167–173
Ferrochelatase, subcellular localization and properties of, of etiolated barley leaves (Little, H. N. & Jones, O. T. G.) 309–314
Fructose, reversal by, of the glucose- and nicotinamide-induced inhibition of the activity of tryptophan pyrroline in rat liver (Badawy, A. A.-B. & Evans, M.) 381–390
Globulins, acute-phase, plasma, influence of glucocorticoids on the stimulation by leucocyte endogenous mediator on the biosynthesis of ribonucleic acid and, in rat liver (Thompson, W. L., Abeles, F. B., Beall, F. A., Dinterman, R. E. & Wannemacher, R. W., Jr.) 25–32
Glucagon, big, purification and biological properties of, from ox pancreas (O'Connor, K. J. & Lazarus, N. R.) 265–277
Glucagon, effects of butyrate and, on gluconeogenesis in isolated lamb liver cells (Clark, M. G., Filsell, O. H. & Jarrett, I. G.) 671–680
Glucagon, properties of hormones of the tobacco-hornworm neurosecretory system that are similar to insulin and, in the rat (Tager, H. S., Markese, J., Kramer, K. J., Speirs, R. D. & Childs, C. N.) 515–520
Glucocorticoid hormones, role of, in stimulation of the biosynthesis of fatty acids in rat liver (Kirk, C. J., Verrinder, T. R. & Hems, D. A.) 593–602
Glucocorticoid hormones, role of, in stimulation of the deposition of glycogen in rat liver (Whitton, P. D. & Hems, D. A.) 585–592
Glucocorticoids, influence of, on the stimulation by leucocyte endogenous mediator on the biosynthesis of ribonucleic acid and of plasma acute-phase globulins in rat liver (Thompson, W. L., Abeles, F. B., Beall, F. A., Dinterman, R. E. & Wannemacher, R. W., Jr.) 25–32
Glucocorticoids, influence of, on the biosynthesis of, and properties of, rat liver (Whitton, P. D. & Hems, D. A.) 585–592
Glucocorticoids, influence of, on the stimulation by leucocyte endogenous mediator on the biosynthesis of ribonucleic acid and of plasma acute-phase globulins in rat liver (Thompson, W. L., Abeles, F. B., Beall, F. A., Dinterman, R. E. & Wannemacher, R. W., Jr.) 25–32
Glucocorticoids, influence of, on the stimulation by leucocyte endogenous mediator on the biosynthesis of ribonucleic acid and of plasma acute-phase globulins in rat liver (Thompson, W. L., Abeles, F. B., Beall, F. A., Dinterman, R. E. & Wannemacher, R. W., Jr.) 25–32
Glucagon, big, purification and biological properties of, from ox pancreas (O'Connor, K. J. & Lazarus, N. R.) 265–277
Glucagon, effects of butyrate and, on gluconeogenesis in isolated lamb liver cells (Clark, M. G., Filsell, O. H. & Jarrett, I. G.) 671–680
Glucagon, control by glycosylation of the transport of calcium ions and its relevance to the stimulus-secretion coupling of the induction by, of the release of insulin by rat pancreatic islets of Langerhans (Sener, A., Levy, J. & Malaisse, W. J.) 521–525
Glucagon, effects of, on normal endogenous metabolism by rat spleen slices in vitro (Suter, D. & Weidemann, M. J.) 119–123
Glucagon, effects of, on the administration of, on the regulation by reduced nicotinamide-adenine dinucleotide (phosphate) of the activity of tryptophan pyrroline in rat liver (Badawy, A. A.-B. & Evans, M.) 381–390
Glucagon, glucose transport as the rate-limiting step in the growth of Escherichia coli on (Herbert, D. & Kornberg, H. L.) 477–480
Glucagon, long-term effects of high concentrations of, on the activity of cyclic nucleotide phosphodiesterase in isolated mouse pancreatic islets of Langerhans (Berne, C. & Andersson, A.) 461–463
Glutamate, metabolism and transport of glutamine and, in rat brain mitochondria (Dennis, S. C., Land, J. M. & Clark, J. B.) 323–331
Glutamine, metabolism and transport of glutamate and, in rat brain mitochondria (Dennis, S. C., Land, J. M. & Clark, J. B.) 323–331
Glycine, compartmentation of serine and, in the biosynthesis of plasma albumin and ferritin in rat liver (Fern, E. B. & Garlick, P. J.) 189–192
Glycogen, biosynthesis of, in perfused liver of adrenalectomized rats (Whitton, P. D. & Hems, D. A.) 585–592
Glycogen, contribution of, and other endogenous substrates to the respiratory fuel of rat spleen slices in vitro (Suter, D. & Weidemann, M. J.) 119–123
Glycogen, evidence for the existence of a pathway for the biosynthesis of, in rat skin (Peters, R. F. & White, A. M.) 465–468
Glycogen, sparing effect of increased concentrations of fatty acids in plasma on the concentrations of, in skeletal muscle and liver of the exercising rat (Rennie, M. J., Winder, W. W. & Holloszy, J. O.) 647–655
Glycogen, control by, of the transport of calcium ions and its relevance to the stimulus-secretion coupling of the glucose-induced release of insulin by rat pancreatic islets of Langerhans (Sener, A., Levy, J. & Malaisse, W. J.) 521–525
Glycogen, regulation by androgens of the activities of enzymes involved in, in rat epididymis and epididymal spermatozoa (Brooks, D. E.) 527–537
Glycocprotein galactosyltransferase, presence of, in a Golgi-apparatus-enriched fraction from mouse leukemic cells (Warely, A. & Cook, G. M. W.) 245–251
Glycoprotein galactosyltransferase, purification and properties of, from rat liver and serum (Fraser, I. H. & Mookerjea, S.) 347–355
Glycoprotein, myelin-associated, brain, rat, developing, effects of treatment with Pronase and neuraminidase on (Quarles, R. H.) 143–150
INDEX OF SUBJECTS

Hydrogen ions, titration studies of the binding of, to human erythrocyte membrane (Hallam, C. & Wrigglesworth, J. M.) 159–165

Hydrogen peroxide, role of ubiquinone in the generation of, by ox heart mitochondria (Boveris, A., Cadenas, E. & Stoppani, A. O. M.) 435–444

3-Hydroxybutyrate, effect of ischaemic limb injury on the rates of metabolism of acetocetate and, in the starved rat (Barton, R. N.) 233–238

16β-Hydroxydehydroepiandrosterone 3-sulphate, identification of, as a metabolite of dehydroepiandrosterone 3-sulphate formed by homogenates of foetal human liver (Wynne, K. N. & Renwick, A. G. C.) 419–425

Hydroxylsine, hydroxylation of lysine and glycosylation of, during the biosynthesis of collagen in isolated chick-embryo cartilage cells (Oikarinen, A., Anttinen, H. & Kivirikko, K. I.) 545–551

Immunoagglutulins, studies on the biosynthesis of J chain in mouse plasmacytomas producing (Kaji, H.) 681–684

Injury, limb, ischaemic, effect of, on the rates of metabolism of ketone bodies in the starved rat (Barton, R. N.) 233–238

myo-Inositol, distribution of, in various organs after its injection into the male rat (Lewin, L. M., Yannai, Y., Sulimovici, S. & Kraicer, P. F.) 375–380

Insulin, control by glycolysis of the transport of calcium ions and its relevance to the stimulus–secretion coupling of the glucose-induced release of, by rat pancreatic islets of Langerhans (Sener, A., Levy, J. & Malaisse, W. J.) 521–525

Insulin, control by prolactin and, of the activity of pyruvate dehydrogenase in lactating rat mammary gland (Field, B. & Coore, H. G.) 333–337

Insulin, properties of hormones of the tobacco-hornworm neurosecretory system that are similar to glucagon and (Tager, H. S., Markese, J., Kramer, K. J., Speirs, R. D. & Childs, C. N.) 515–520

Insulin, selective control by, and other agents of the degradation of normal and aberrant proteins in Reuber H35 hepatoma cells (Knowles, S. E. & Ballard, F. J.) 609–617

Ionophore A23187, production of 1,2-diacetyl glycerol and phosphatidate in human erythrocytes treated with calcium ions and (Allan, D., Watts, R. & Michell, R. H.) 225–232

Ionophore X-537A, effect of, on the formation of adenine triphosphate and the release of intravesicular and membrane-bound calcium ions from passively loaded rabbit skeletal-muscle sarcoplasmic reticulum (Vale, M. G. P., Osorio e Castro, V. R. & Carvalho, A. P.) 239–244

Ionophores, dissociation by, of exocytosis and stimulation of respiration in guinea-pig and human leucocytes (Zabucchi, G. & Romeo, D.) 209–213

Ischaemic limb injury, effect of, on the rates of metabolism of ketone bodies in the starved rat (Barton, R. N.) 233–238

Islets of Langerhans, mouse, isolated, effects of nucleotides and theophylline on the uptake of calcium ions by subcellular fractions of (Sehlin, J.) 63–69

Glycosyltransferases, presence of, in a Golgi-apparatus-enriched fraction from mouse leukaemic cells (Warley, A. & Cook, G. M. W.) 245–251

Golgi apparatus, isolation of a subcellular fraction enriched in, from mouse leukaemic cells (Warley, A. Cook, G. M. W.) 245–251

Grana, chloroplast, development of the intense circular-dichroic signal during the formation of, in greening etiolated maize leaves (Demeter, S., Mustardy, L., Machowicz, E. & Gregory, R. P. F.) 469–472

Haematocrit value, effect of concentration of oxygen and, on perfusion blood on the redox state and metabolism of perfused rat liver (Mayes, P. A. & Felts, J. M.) 685–689

Halobacterium cutirubrum N.R.C. 34001, evidence for the absence of a dark-repair mechanism for deoxyribonucleic acid in (Grey, V. L. & Fitt, P. S.) 569–575

Heart, ox, effect of tryptic digestion on the structure and catalytic properties of mitochondrial reduced nicotinamide-adenine dinucleotide dehydrogenase from (Ragan, I.) 367–374

Heart, ox, inhibition by triphenylsulphonium ions of oxidative phosphorylation and the activity of adenine triphosphatase in mitochondria from (Barrett, R. H. & Selwyn, M. J.) 315–322

Heart, ox, role of ubiquinone in the generation of hydrogen peroxide by mitochondria from (Boveris, A., Cadenas, E. & Stoppani, A. O. M.) 435–444

Heart, rat, inhibitory effect of the administration of Triton WR-1339 on the activity of clearing-factor lipase in, and other tissues (Borensztajn, J., Rone, M. S. & Kotlar, T. J.) 539–543

Hen, see Chicken

Hepatocytes, lamb, isolated, effects of glucagon and butyrate on gluconeogenesis in (Clark, M. G., Filsell, O. H. & Jarrett, I. G.) 671–680

Hepatocytes, rat, isolated, phosphorylation state of cytosolic and mitochondrial adenine nucleotides and of pyruvate dehydrogenase in (Sliess, E. A. & Wieland, O. H.) 91–102

Hepatoma cells, Reuber H35, selective control of the degradation of normal and aberrant proteins in (Knowles, S. E. & Ballard, F. J.) 609–617

Histidine, metabolism of valine, leucine, phenylalanine and, by isolated perfused lactating guinea-pig mammary gland (Davis, S. R. & Mepham, T. B.) 553–560

Hordeum vulgare, see barley

Hormones, glucagon-like and insulin-like, properties of, of the tobacco-hornworm neurosecretory system (Tager, H. S., Markese, J., Kramer, K. J., Speirs, R. D. & Childs, C. N.) 515–520

Hydrocortisone, see Cortisol

Hydrodictyon africanum, composition of the phospholipids of the plasma membrane of (Bailey, D. S. & Northcote, D. H.) 295–300

Hydrogen ions, proposal of a mechanism for the translocation of, during the reduction of cytochromes by nitrite in Nitrobacter winogradskyi electron-transport particles (Coble, J. G.) 493–498

Immunoglobulins, studies on the biosynthesis of J chain in mouse plasmacytomas producing (Kaji, H.) 681–684

Ischaemic, limb, ischaemic, effect of, on the rates of metabolism of ketone bodies in the starved rat (Barton, R. N.) 233–238

Islets of Langerhans, mouse, isolated, effects of nucleotides and theophylline on the uptake of calcium ions by subcellular fractions of (Sehlin, J.) 63–69
INDEX OF SUBJECTS

Islets of Langerhans, pancreatic, mouse, isolated long-term effects of high concentrations of glucose on the activity of cyclic nucleotide phosphodiesterase in (Berne, C. & Anderson, A.) 461–463

Islets of Langerhans, pancreatic, pigeon, isolated, biosynthesis of glucagon in (O'Connor, K. J. & Lazarus, N. R.) 279–288

Islets of Langerhans, pancreatic, rat, control by glycolysis of the transport of calcium ions and its relevance to the stimulus–secretion coupling of the glucose-induced release of insulin by (Sener, A., Levy, J. & Malaisse, W. J.) 521–525

J chain, studies on the biosynthesis of, in mouse plasmacytomas producing immunoglobulins (Kaji, H.) 681–684

Jatropha curcas, inhibition by toxic seed proteins from Croton tiglium and, of the biosynthesis of protein in vitro by rabbit reticulocyte lysate (Stirpe, F., Pession-Brizzi, A., Lorenzoni, E., Strocchi, P., Montanaro, L. & Sperti, S.) 1–6

Ketone bodies, effect of ischaemic limb injury on the rates of metabolism of, in the starved rat (Barton, R. N.) 233–238

Ketone bodies, evidence for the conversion of acetocetate into acetyl-coenzyme A in the cytosol fraction during lipogenesis from, in rat cerebral cortex (Patel, M. S. & Owen, O. E.) 603–607

Kidney, rat, effects of the administration of sublethal doses of cycloheximide on the biosynthesis of protein in and liver (Rothblum, L. I., Devlin, T. M. & Ch'ih, J. J.) 151–157

Lactate, evidence for the involvement of the chloride ion carrier and of a chloride ion-independent carrier in the transport of pyruvate and, into human erythrocytes (Halestrap, A. P.) 193–207

Lactation, control by insulin and prolactin of the activity of pyruvate dehydrogenase in rat mammary gland during (Field, B. & Coore, H. G.) 333–337

Lactation, metabolism of valine, leucine, histidine and phenylalanine by perfused guinea-pig mammary gland isolated during (Davis, S. R. & Mephum, T. B.) 553–560

Leaves, barley, etiolated, subcellular localization and properties of ferrochelatase of (Little, H. N. & Jones, O. T. G.) 309–314

Leaves, maize, etiolated, greening, development of the intense circular-dichroic signal during the formation of chloroplast grana in (Demeter, S., Mustardy, L., Machowicz, E. & Gregory, R. P. F.) 469–472

Lechithin, see Phosphatidylcholine

Lemna minor, see Duckweed

Leucine, effects of the administration of sublethal doses of cycloheximide on the incorporation of, into protein in rat liver and kidney (Rothblum, L. I., Devlin, T. M. & Ch'ih, J. J.) 151–157

Leucine, metabolism of valine, histidine, phenylalanine and, by isolated perfused lactating guinea-pig mammary gland (Davis, S. R. & Mephum, T. B.) 553–560

Leucocytes, guinea-pig and human, dissociation by ionophores of exocytosis and stimulation of respiration in (Zabucchi, G. & Romeo, D.) 209–213

Leucocytes, polymorphonuclear, rabbit, influence of glucocorticoids on the stimulation by endogenous mediating factor from, on the biosynthesis of ribonucleic acid and of plasma acute-phase globulins in rat liver (Thompson, W. L., Abeles, F. B., Beall, F. A., Dinterman, R. E. & Wannemacher, R. W., Jr.) 25–32

Leukaeamic cells, mouse, isolation of a Golgi-apparatus-enriched fraction from (Warley, A. & Cook, G. M. W.) 245–251

Limb injury, ischaemic, effect of, on the rates of metabolism of ketone bodies in the starved rat (Barton, R. N.) 233–238

Lipase, clearing-factor, heart, skeletal-muscle and adipose-tissue, rat, inhibitory effect of the administration of Triton WR-1339 on the activity of (Borenstajn, J., Rose, M. S. & Kotlar, T. J.) 539–543

Lipids, adipose-tissue, guinea-pig, maternal, metabolism and mobilization of, and the accumulation of triacylglycerol in the liver of the foetus during pregnancy (Jones, C. T.) 357–365

Lipids, composition and biosynthesis of, and electrophoretic profiles of proteins of heavy and light rat liver mitochondrial fractions (Satav, J. G., Kattyare, S. S., Patterparker, P. & Sreenivasan, A.) 215–223

Lipids, contribution of, and other endogenous substrates to the respiratory fuel of rat spleen slices in vitro (Suter, D. & Weidemann, M. J.) 119–127

Lipids, evidence for the conversion of acetocetate into acetyl-coenzyme A in the cytosol fraction during the biosynthesis of, from ketone bodies in rat cerebral cortex (Patel, M. S. & Owen, O. E.) 603–607

Lipogenesis, evidence for the conversion of acetocetate into acetyl-coenzyme A in the cytosol fraction during, from ketone bodies in rat cerebral cortex (Patel, M. S. & Owen, O. E.) 603–607

Lipogenesis in perfused liver of adrenalectomized rats (Kirk, C. J., Verrinder, T. R. & Hems, D. A.) 593–602

Lipoprotein lipase, see Lipase, clearing-factor

Lithocholate 3-sulphate, biosynthesis of, and other bile acid monosulphates by isolated perfused rat kidney (Summerfield, J. A., Gollan, J. L. & Billing, B. H.) 339–345

Liver cells, lamb, isolated, effects of glucagon and butyrate on gluconeogenesis in (Clark, M. G., Milsell, O. H. & Jarrett, I. G.) 671–680

Liver cells, rat, isolated, phosphorylation state of cytosolic and mitochondrial adenine nucleotides and of pyruvate dehydrogenase in (Siess, E. A. & Wieland, O. H.) 91–102

Liver, chick, biotin-mediated restoration of gluconeogenesis and the activity of pyruvate carboxylase in slices of, from animals with fatty liver and kidney syndrome (Bannister, D. W.) 167–173

Liver, guinea-pig, foetal, metabolism and mobilization of maternal adipose-tissue lipids and the accumulation of triacylglycerol in, during pregnancy (Jones, C. T.) 357–365

Vol. 156
Liver, human, foetal, 16β-hydroxylation of dehydroepiandrosterone 3-sulphate by homogenates of (Wyne, K. N. & Renwick, A. G. C.) 419-425

Liver, rat, analysis of the complex curve for the disappearance of 14C label during the turnover of a mixture of proteins in, after the injection of sodium [14C]bicarbonate (Garlick, P. J., Waterlow, J. C. & Swick, R. W.) 657-663

Liver, rat, compartmentation of the biosynthesis of plasma albumin and ferritin in (Fern, E. B. & Garlick, P. J.) 189-192

Liver, rat, composition and biosynthesis of lipids and electrophoretic profiles of proteins of heavy and light mitochondrial fractions from (Satav, J. G., Katyare, S. S., Fatterpaker, P. & Sreenivasan, A.) 215-223

Liver, rat, conductance of calcium ions across the inner membrane of mitochondria from, and determination of the electrochemical gradient for calcium ions (Heaton, G. M. & Nicholls, D. G.) 635-646

Liver, rat, effect of phenobarbitone on the transport of ribonucleic acid from nuclei to cytosol fraction from, in vitro (Hazen, N. & McCauley, R.) 665-670

Liver, rat, effects of clofibrate on microsomal hydroxylation reactions involved in the formation and metabolism of bile acids in (Angelin, B., Björkhem, I. & Einarsson, K.) 445-448

Liver, rat, effects of elongation factor 2 and of adenosine diphosphate ribosylated elongation factor 2 on the translocation of peptidyl-transfer ribonucleic acid on ribosomes from (Montanaro, L., Sperti, S., Testoni, G. & Mattioli, A.) 15-23

Liver, rat, effects of pent-4-enoate, propionate and other short-chain fatty acids on the biosynthesis of citrulline in mitochondria from (Glasgow, A. M. & Chase, H. P.) 301-307

Liver, rat, effects of the administration of glucose or nicotinamide on the regulation by reduced nicotinamide-adenine dinucleotide (phosphate) of the activity of tryptophan pyrrolase in (Badawy, A. A.-B. & Evans, M.) 381-390

Liver, rat, effects of the administration of sublethal doses of cycloheximide on the biosynthesis of protein in, and kidney (Rothblum, L. I., Devlin, T. M. & Ch'ih, J. J.) 151-157

Liver, rat, effects on the steps of peptide chain elongation during inhibition by cotrin and ricin of the biosynthesis of protein in vitro by ribosomes from (Sperti, S., Montanaro, L., Mattioli, A., Testoni, G. & Stirpe, F.) 7-13

Liver, rat, equilibrium-dialysis studies of the interaction between cholic acid and 100000g supernatant preparations from (Strange, R. C., Nimmo, I. A. & Percy-Robb, I. W.) 427-433

Liver, rat, extraction of messenger ribonucleic acid for phosphoenolpyruvate carboxykinase (guanosine triphosphate) from, and its translation in vitro by a cell-free system from rabbit reticulocytes (Tilghman, S. M., Fisher, L. M., Reshef, L., Ballard, F. J. & Hanson, R. W.) 619-626

Liver, rat, influence of glucocorticoids on the stimulation by leucocyte endogenous mediator on the biosynthesis of ribonucleic acid and of plasma acute-phase globulins in (Thompson, W. L., Abeles, F. B., Beall, F. A., Dinteman, R. E. & Wannemacher, R. W., Jr.) 25-32

Liver, rat, mechanism of the increased uptake of plasma unesterified fatty acids by, of ethanol-treated animals (Abrams, M. A. & Cooper, C.) 47-54

Liver, rat, mechanism of the inhibition by α-cyanoiminaminate derivatives of the activity of the mitochondrial pyruvate transporter of (Halestrap, A. P.) 181-183

Liver, rat, perfused, biosynthesis of fatty acids in, after adrenalectomy (Kirk, C. J., Verrinder, T. R. & Hems, D. A.) 593-602

Liver, rat, perfused, biosynthesis of glycogen in, after adrenalectomy (Whitton, P. D. & Hems, D. A.) 585-592

Liver, rat, perfused, effect of haematocrit value and concentration of oxygen of perfusion blood on the redox state and metabolism of (Mayes, P. A. & Felts, J. M.) 685-689

Liver, rat, purification and properties of uridine diphosphate galactose-glycoprotein galactosyltransferase from, and serum (Fraser, I. H. & Mookerjea, S.) 347-355

Liver, rat, quantitative analysis of the metabolism of triacylglycerol in, of ethanol-treated animals (Abrams, M. A. & Cooper, C.) 33-46

Liver, rat, rate of induction by ethanol of the activity of mitochondrial aldehyde dehydrogenase in (Horton, A. A. & Barrett, M. C.) 177-179

Liver, rat, regulation of the biosynthesis of phosphatidylcholine in endoplasmic reticulum of (Sribney, M., Knowles, C. L. & Lyman, E. M.) 507-514

Liver, rat, sparing effect of increased concentrations of fatty acids in plasma on the concentrations of glycogen in, and skeletal muscle during exercise (Rennie, M. J., Winder, W. W. & Holloszy, J. O.) 647-655

Liver, rat, stimulation by thyroxine of peptide elongation by a cell-free system containing polyribosomes from (Carter, W. J., Faas, F. H. & Wynn, J. O.) 713-717

Lymph node, mesenteric, pig, composition of the lipid fraction of the plasma membrane of lymphocytes from (Levis, G. M., Evangelatos, G. P. & Crompton, M. J.) 103-110

Lymph nodes, rat, enzymic hydrolysis of myelin basic protein and other proteins in, and central nervous system from normal and demyelinating animals (Buletza, G. F., Jr. & Smith, M. E.) 627-633

Lymphoblasts, leukemic, mouse, isolation of a Golgi-apparatus-enriched fraction from (Warley, A. & Cook, G. M. W.) 245-251

Lymphocytes, lymph-node, mesenteric, pig, composition of the lipid fraction of the plasma membrane of (Levis, G. M., Evangelatos, G. P. & Crompton, M. J.) 103-110

Lysine, hydroxylation of, and glycosylation of hydroxylysine during the biosynthesis of collagen in isolated chick-embryo cartilage cells (Oikarinen, A., Anttinen, H. & Kivirikko, K. I.) 545-551

Maize (Zea mays) leaves, etiolated, greening, development of the intense circular-dichroic signal during the formation of chloroplast grana in (Demeter, S., Mustardy, L., Machowicz, E. & Gregory, R. P. F.) 469-472

Mammary gland, guinea-pig, lactating, perfused, isolated, metabolism of valine, leucine, histidine and phenylalanine by (Davis, S. R. & Mepham, T. B.) 553-560
Mammary gland, rat, lactating, control by insulin and prolactin of the activity of pyruvate dehydrogenase in (Field, B. & Coore, H. G.) 333–337

*Manduca sexta*, see Tobacco hornworm

Mast cells, rat, properties of calcium ion-activated adenosine triphosphatase in plasma membrane of (Cooper, P. H. & Stanworth, D. R.) 691–700

Membrane, erythrocyte, human, evidence for the involvement of the chloride ion carrier and of a chloride ion-independent carrier in the transport of pyruvate and lactate across (Halestrap, A. P.) 193–207

Membrane, erythrocyte, human, titration studies of the binding of hydrogen ions to (Hallam, C. & Wrigglesworth, J. M.) 159–165

Membrane, inner, mitochondrial, rat, conductance of calcium ions across, and determination of the electrochemical gradient for calcium ions (Heaton, G. M. & Nichols, D. G.) 635–646

Membrane, plasma, lymphocyte, pig, composition of the thiol fraction of (Levis, G. M., Evangelatos, G. P. & Crumpton, M. J.) 103–110

Membrane, plasma, mast-cell, rat, properties of calcium ion-activated adenosine triphosphatase in (Cooper, P. H. & Stanworth, D. R.) 691–700

Messenger ribonucleic acid, see Ribonucleic acid, messenger

Microsomal fraction, islet-of-Langerhans, mouse, effects of nucleotides and theophylline on the uptake of calcium ions by (Sehlin, J.) 63–69

Microsomal fraction, liver, rat, effects of cloforbate on hydroxylation reactions in, involved in the formation and metabolism of bile acids (Angelin, B., Björkhem, I. & Einarsson, K.) 445–448

Microsomal fraction, liver, rat, purification and properties of uridine diphosphate galactose–glycoprotein galactosyltransferase from, and serum (Fraser, I. H. & Mookerjea, S.) 347–355

Microsomal fraction, liver, rat, regulation of the biosynthesis of phosphatidylcholine in (Sribney, M., Knowles, C. L. & Lyman, E. M.) 507–514

Mitochondria, brain, rat, metabolism and transport of glutamate and glutamine in (Dennis, S. C., Land, J. M. & Clark, J. B.) 323–331

Mitochondria, Ehrlich-asites-tumour-cell, isolated, biosynthesis of polyadenylate-containing ribonucleic acid by (Aujame, L. & Freeman, K. B.) 499–506

Mitochondria, heart, ox, effects of tryptic digestion on the structure and catalytic properties of reduced nicotinamide–adenine dinucleotide dehydrogenase from (Ragan, C. I.) 367–374

Mitochondria, heart, ox, inhibition by triphenylsulphonium ions of oxidative phosphorylation and the activity of adenosine triphosphatase in (Barrett, R. H. & Selwyn, M. J.) 315–322

Mitochondria, heart, ox, role of ubiquinone in the generation of hydrogen peroxide by (Boveris, A., Cadenas, E. & Stoppani, A. O. M.) 435–444

Mitochondria, liver, rat, conductance of calcium ions across the inner membrane of, and determination of the electrochemical gradient for calcium ions (Heaton, G. M. & Nichols, D. G.) 635–646

Mitochondria, liver, rat, effects of pent-4-enoate, propionate and other short-chain fatty acids on the biosynthesis of citrulline in (Glasgow, A. M. & Chase, H. P.) 301–307

Mitochondria, liver, rat, mechanism of the inhibition by α-cyanocinnamate derivatives of the activity of the pyruvate transporter of (Halestrap, A. P.) 181–183

Mitochondria, liver, rat, phosphorylation state of adenine nucleotides in, and cytosol and its relationship to the phosphorylation state of pyruvate dehydrogenase (Sieß, E. A. & Wieland, O. H.) 91–102

Mitochondria, liver, rat, rate of induction by ethanol of the activity of aldehyde dehydrogenase of (Horton, A. A. & Barrett, M. C.) 177–179

Muscle, skeletal, rabbit, formation of adenosine triphosphate during the release of intravesicular and membrane-bound calcium ions from passively loaded sarcoplasmic reticulum from (Vale, M. G. P., Osório e Castro, V. R. & Carvalho, A. P.) 239–244

Muscle, skeletal, rat, effects of denervation on the turnover of protein in (Goldspink, D. F.) 71–80

Muscle, skeletal, rat, inhibitory effect of the administration of Triton WR-1339 on the activity of clearing-factor lipase in, and other tissues (Borensztajn, J., Rome, M. S. & Kotlar, T. J.) 539–543

Muscle, skeletal, rat, relative importance of the biosynthesis and degradation of protein in, in the regulation of muscle mass (Millward, D. J., Garlick, P. J., Nnayelugo, D. O. & Waterlow, J. C.) 185–188

Muscle, skeletal, rat, sparing effect of increased concentrations of fatty acids in plasma on the concentrations of glycogen in, and liver during exercise (Rennie, M. J., Winder, W. W. & Holloszy, J. O.) 647–655

Myelin, brain, rat, developing, effects of treatment with Pronase and neuraminidase on a glycoprotein associated with (Quarles, R. H.) 143–150

Myelin, enzymic hydrolysis of the basic protein of, and of other proteins in central nervous system and lymphoid tissues from normal and demyelinating rats (Buletz, G. F., Jr. & Smith, M. E.) 627–633

Myometrium, uterine, rabbit, effects of oestriadiol-17β and progesterone on the metabolism of [1,2-3H]progesterone by, and endometrium (Verma, U. & Laumas, K. R.) 55–62

Nerves, effects of section of, on the turnover of protein in rat skeletal muscle (Goldspink, D. F.) 71–80

Nervous system, central, rat, enzymic hydrolysis of myelin basic protein and other proteins in, and lymph nodes from normal and demyelinating animals (Buletz, G. F., Jr. & Smith, M. E.) 627–633

Neuraminidase, effects of treatment with Pronase and, on a myelin-associated glycoprotein from developing rat brain (Quarles, R. H.) 143–150

Neurosecretory system, tobacco-hornworm properties of the glucagon-like and insulin-like hormones of (Tager, H. S., Markese, J., Kramer, K. J., Speirs, R. D. & Childs, C. N.) 515–520
Nicotinamide-adenine dinucleotide (phosphate), reduced, effects of the administration of glucose or nicotinamide on the regulation by, of the activity of tryptophan pyrrolase in rat liver (Badawy, A. A.-B. & Evans, M.) 381–390
Nicotinamide-adenine dinucleotide (reduced) dehydrogenase, mitochondrial, heart, ox, effects of tryptic digestion on the structure and catalytic properties of (Ragan, C. I.) 367–374
Nicotinamide, effects of the administration of, on the regulation by reduced nicotinamide-adenine dinucleotide (phosphate) of the activity of tryptophan pyrrolase in rat liver (Badawy, A. A.-B. & Evans, M.) 381–390
Nitrite, activation of the oxidation of, by the electrical component of the proton motive force in energy-conserving reactions in Nitrobacter winogradskyi phosphorylating electron transport particles (Coblej, J. G.) 481–491
Nitrite, proposal of a mechanism for the translocation of hydrogen ions during the reduction of cytochromes by, in Nitrobacter winogradskyi electron transport particles (Coblej, J. G.) 493–498
Nitrobacter winogradskyi, activation of the oxidation of nitrite by the electrical component of the proton motive force in energy-conserving reactions in phosphorylating electron transport particles from (Coblej, J. G.) 481–491
Nitrobacter winogradskyi, proposal of a mechanism for the translocation of hydrogen ions during the reduction of cytochromes by nitrite in electron transport particles from (Coblej, J. G.) 493–498
Nuclei, liver and kidney, rat, effects of the administration of sublethal doses of cycloheximide on the biosynthesis of the proteins of (Rothblum, L. I., Devlin, T. M. & Ch'ih, J. J.) 151–157
Nuclei, liver, rat, effect of phenobarbital on the transport of ribonuclease acid from, to rat liver cytosol in vitro (Hazan, N. & McCauley, R.) 665–670
Nuclei, nuclear components responsible for the retention of steroid-receptor complexes by, of various mammalian tissues (Mainwaring, W. I. P., Symes, E. K. & Higgins, S. J.) 129–141
Nuclei, oviduct, chick, multiple binding sites for progesterone in vitro in, and the transcriptional response (Spelsberg, T. C.) 391–398
Nuclei, oviduct, chicken, binding of progesterone to multiple sites in, in vitro (Pikler, G. M., Webster, R. A. & Spelsberg, T. C.) 399–408
Nuclei, oviduct, chicken, role of acidic chromatin proteins in the high-affinity binding of progesterone in (Webster, R. A., Pikler, G. M. & Spelsberg, T. C.) 409–418
Nucleotides, effects of theophylline and, on the uptake of calcium ions by subcellular fractions of mouse islets of Langerhans (Sehlin, J.) 63–69
Oestradiol-17β, effects of progesterone and, on the metabolism of [1,2-3H]progesterone by rabbit uterine endometrium and myometrium (Verma, U. & Laumas, K. R.) 55–62
Oestrogen-receptor complex, nuclear components responsible for the retention of, by nuclei of rat uterus (Mainwaring, W. I. P., Symes, E. K. & Higgins, S. J.) 129–141
Oviduct, chick, multiple binding sites for progesterone in vivo in nuclei of, and the transcriptional response (Spelsberg, T. C.) 391–398
Oviduct, chicken, binding of progesterone to multiple sites in nuclei from, in vitro (Pikler, G. M., Webster, R. A. & Spelsberg, T. C.) 399–408
Oviduct, chicken, role of acidic chromatin proteins in the high-affinity binding of progesterone in nuclei from (Webster, R. A., Pikler, G. M. & Spelsberg, T. C.) 409–418
Oxidative phosphorylation, see Phosphorylation, oxidative
Oxygen, effect of haematocrit value and concentration of, of perfusion blood on the redox state and metabolism of perfused rat liver (Mayes, P. A. & Felts, J. M.) 685–689
Pancreas, mouse, effects of nucleotides and theophylline on the uptake of calcium ions by subcellular fractions of islets of Langerhans isolated from (Sehlin, J.) 63–69
Pancreas, mouse, long-term effects of high concentrations of glucose on the activity of cyclic nucleotide phosphodiesterase in islets of Langerhans isolated from (Berne, C. & Andersson, A.) 461–463
Pancreas, ox, purification and biological properties of big glucagon from (O'Connor, K. J. & Lazarus, N. R.) 265–277
Pancreas, pigeon, biosynthesis of glucagon in islets of Langerhans isolated from (O'Connor, K. J. & Lazarus, N. R.) 279–288
Pancreas, rat, control by glycolysis of the transport of calcium ions and its relevance to the stimulus-secretion coupling of the glucose-induced release of insulin by islets of Langerhans of (Sener, A., Levy, J. & Malaisse, W. J.) 521–525
Pantetheine, role of adenosine triphosphate and, in the regulation of the biosynthesis of phosphatidylcholine in rat liver endoplasmic reticulum (Sibney, M., Knowles, C. L. & Lyman, E. M.) 507–514
Pepsin-endo, effects of, and other short-chain fatty acids on the biosynthesis of cytochrome in rat liver mitochondria (Glasgow, A. M. & Chase, H. P.) 301–307
Peptide chain elongation factor 2, effects of, and of adenosine diphosphate ribosylated peptide chain elongation factor 2 on the translocation of peptidyl-transfer ribonucleic acid on rat liver ribosomes (Montanaro, L., Sperti, S., Testoni, G. & Mattioli, A.) 15–23
Peptide chain elongation factors, effects on steps involving, during inhibition by crotons and ricin of the biosynthesis of protein in vitro by rat liver and Artemia salina ribosomes (Sperti, S., Montanaro, L., Mattioli, A., Testoni, G. & Stirpe, F.) 7–13
Peptide elongation, stimulation by thyroxine of, by a cell-free system containing rat liver polyribosomes (Carter, W. J., Faas, F. H. & Wynn, J. O.) 713–717
Peptidyl-transfer ribonucleic acid, effects of elongation factor 2 and of adenosine diphosphate ribosylated elongation factor 2 on the translocation of, on rat liver ribosomes (Montanaro, L., Sperti, S., Testoni, G. & Mattioli, A.) 15–23
 Peroxide, hydrogen, role of ubiquinone in the generation of, by ox heart mitochondria (Boveris, A., Cadenas, E. & Stoppani, A. O. M.) 435–444

1976
Phenobarbitone, effect of, on the transport of ribonucleic acid from rat liver nuclei to rat liver cytosol in vitro (Hazan, N. & McCauley, R.) 665–670
Phenobarbitone, effect of the administration of, on the interaction between cholic acid and rat liver 100000 g supernatant preparations (Strange, R. C., Nimmo, I. A. & Percy-Robb, I. W.) 427–433
Phenyllalanine, metabolism of, valine, leucine, histidine and, by isolated perfused lactating guinea-pig mammary gland (Davis, S. R. & Mephem, T. B.) 553–560
Phosphatidate, production of, 1,2-diacylglycerol and, in human erythrocytes treated with calcium ions and iodonophore A23187 (Allan, D., Watts, R. & Michell, R. H.) 225–232
Phosphatidylcholine, regulation of the biosynthesis of, in rat liver endoplasmic reticulum (Sribney, M., Knowles, C. L. & Lyman, E. M.) 507–514
Phosphodiesterase, long-term effects of high concentrations of glucose on the activity of, in isolated mouse pancreatic islets of Langerhans (Berne, C. & Andersson, A.) 461–463
Phosphoenolpyruvate carboxykinase (guanosine triphosphate), extraction of messenger ribonucleic acid for, from rat liver and its translation in vitro by a cell-free system from rabbit reticulocytes (Tilghman, S. M., Fisher, L. M., Reshef, L., Ballard, F. J. & Hanson, R. W.) 619–626
Phospholipids, composition and biosynthesis of, and other lipids and electrophoretic profiles of proteins of heavy and light rat liver mitochondrial fractions (Satz, J. G., Katyare, S. S., Fattetpaker, P. & Sreerivasan, A.) 215–223
Phospholipids, composition of, and other lipids of pig lymphocyte plasma membrane (Levis, G. M., Evangelatos, G. P. & Crumpton, M. J.) 103–110
Phospholipids, composition of, of the plasma membrane of Hydrodictyon africanum (Bailey, D. S. & Northcote, D. H.) 295–300
Phosphorylation, oxidative, activation of the oxidation of nitrite by the electrical component of the proton motive force in energy-conserving reactions during, in Nitro-bacter winogradskyi electron-transport particles (Cobley, J. G.) 481–491
Phosphorylation, oxidative, inhibition by triphenyl-sulphonium ions of, and the activity of adenosine triphosphatase in ox heart mitochondria (Barrett, R. H. & Selwyn, M. J.) 315–322
Pigeon, biosynthesis of glucagon in isolated pancreatic islets of Langerhans from (O'Connor, K. J. & Lazarus, N. R.) 279–288
Pituitary-gland cells, rat, cultured, stimulation by prostaglandins and thyrolobin of the biosynthesis of prolactin and the formation of adenosine 3'-S'-cyclic monophosphate in (Gautvik, K. M. & Kriz, M.) 111–117
Plasma albumin, see Albumin, plasma
Plasma membrane, see Membrane, plasma
Plasma, rat, mechanism of the increased uptake of unesterified fatty acids from, by liver of ethanol-treated animals (Abrams, M. A. & Cooper, C.) 47–54
Plasma, rat, quantitative analysis of the incorporation of unesterified fatty acids from, into triacylglycerol in liver of ethanol-treated animals (Abrams, M. A. & Cooper, C.) 33–46
Plasma, rat, sparing effect of increased concentrations of fatty acids in, on the concentrations of glycogen in skeletal muscle and liver during exercise (Rennie, M. J., Winder, W. W. & Holloszy, J. O.) 647–655
Plasmacytomas, mouse, studies on the biosynthesis of J chain in, producing immunoglobulins (Kaji, H.) 681–684
Polyadenylate, biosynthesis of ribonucleic acid containing, by isolated Ehrlich-ascites-tumour-cell mitochondria (Auajame, L. & Freeman, K. B.) 499–506
Polypeptide N-acetylgalactosaminyltransferase, presence of, in a Golgi-apparatus-enriched fraction from mouse leukaemic cells (Warley, A. & Cook, G. M. W.) 245–251
Polyphenylalanine chains, nascent, ribosome-bound, prevention by, of the functional interaction of T-2 toxin with its receptor site during the biosynthesis of polyphenylalanine by rabbit reticulocyte lysates (Cannon, M., Smith, K. E. & Carter, C. J.) 289–294
Polyphenylalanine, prevention by ribosome-bound nascent polyphenylalanine chains of the functional interaction of T-2 toxin with its receptor site during the biosynthesis of, by rabbit reticulocyte lysates (Cannon, M., Smith, K. E. & Carter, C. J.) 289–294
Polyribosomes, liver, rat, stimulation by thyroxine of peptide elongation by a cell-free system containing (Carter, W. J., Faas, F. H. & Wynn, J. O.) 713–717
Polyribosomes, reticulocyte, rabbit, extraction of messenger ribonucleic acid for phosphoenolpyruvate carboxykinase (guanosine triphosphate) from rat liver and its translation in vitro by a cell-free system containing (Tilghman, S. M., Fisher, L. M., Reshef, L., Ballard, F. J. & Hanson, R. W.) 619–626
Polysomes, see Polyribosomes
Potassium ions, inhibition by botulinum toxin of the release of acetylcholine from guinea-pig cerebral-cortex synaptosomes in vitro stimulated by (Wonnacott, S. & Marchbanks, R. M.) 701–712
Pregnancy, metabolism and mobilization of maternal guinea-pig adipose-tissue lipids and the accumulation of triacylglycerol in the liver of the foetus during (Jones, C. T.) 357–365
Procollagen, effects of aa'-bipyridyl, colchicine and antimycin A on the secretory process for, in chick-embryo tendon and cartilage cells (Harwood, R., Grant, M. E. & Jackson, D. S.) 81–90
Progesterone, binding of, to multiple sites in chicken oviduct nuclei in vitro (Pikler, G. M., Webster, R. A. & Spelsberg, T. C.) 399–408
Progesterone, effects of oestradiol-17β and, on the metabolism of [1,2-3H]progesterone by rabbit uterine endometrium and myometrium (Verma, U. & Laumas, K. R.) 55–62
Progesterone, multiple binding sites for, in chick oviduct nuclei in vitro and the transcriptional response (Spelsberg, T. C.) 391–398
Progesterone, effects of oestradiol-17β and, on the metabolism of [1,2-3H]progesterone by rabbit uterine endometrium and myometrium (Verma, U. & Laumas, K. R.) 55–62
Progesterone, receptor complex, nuclear components responsible for the retention of, by nuclei of guinea-pig uterus (Mainwarig, W. I. P., Symes, E. K. & Higgins, S. J.) 129–141

Vol. 156
Protein, stimulation by thyroxine of peptide elongation during the biosynthesis of, by a cell-free system containing rat liver polyribosomes (Carter, W. J., Faas, F. H. & Wynn, J. O.) 713–717

Proteins, analysis of the complex curve for the disappearance of $^{14}$C label during the turnover of a mixture of, in rat liver after the injection of sodium $[^4$C]bicarbonate (Garlick, P. J., Waterlow, J. C. & Swick, R. W.) 657–663

Proteins, chromatin, acidic, role of, in the high-affinity binding of progesterone in chicken oviduct nuclei (Webster, R. A., Pikler, G. M. & Spelsberg, T. C.) 409–418

Proteins, composition and biosynthesis of lipids and electrophoretic profiles of, of heavy and light rat liver mitochondrial fractions (Satav, J. G., Kayare, S. S., Fatterpaker, P. & Sreenivasan, A.) 215–223

Proteins, evidence for a deoxyribonucleic acid-unwinding protein involved in the androgenic regulation of the biosynthesis of, in rat prostate gland (Mainwaring, W. I. P., Rennie, P. S. & Keen, J.) 253–264

Proteins, normal and aberrant, selective control of the degradation of, in Reuber H35 hepatoma cells (Knowles, S. E. & Ballard, F. J.) 609–617

Proteins, seed, toxic, Croton tiglium and Jatropha curcas, inhibition by, of the biosynthesis of protein in vitro by rabbit reticulocyte lysate (Stirpe, F., Pession-Brizzi, A., Lorenzoni, E., Strocchi, P., Montanaro, L. & Sperti, S.) 1–6

Proton motive force, activation of the oxidation of nitrite by the electrical component of, in energy-conserving reactions in Nitrobacter winogradskyi phosphorylating electron-transport particles (Cobley, J. G.) 481–491

Protons, proposal of a mechanism for the translocation of, during the reduction of cytochromes by nitrite in Nitrobacter winogradskyi electron-transport particles (Cobley, J. G.) 493–498

Protons, titration studies of the binding of, to human erythrocyte membrane (Hallam, C. & Wrigglesworth, J. M.) 159–165

Pyruvate carboxylase, biotin-mediated restoration of gluconeogenesis and the activity of, in liver slices from chicks with fatty liver and kidney syndrome (Bannister, D. W.) 167–173

Pyruvate dehydrogenase, control by insulin and prolactin of the activity of, in lactating rat mammary gland (Field, B. & Coore, H. G.) 333–337

Pyruvate dehydrogenase, phosphorylation state of cytosolic and mitochondrial adenine nucleotides and of, in isolated rat liver cells (Sliess, E. A. & Wieland, O. H.) 91–102

Pyruvate, evidence for the involvement of the chloride ion carrier and of a chloride ion-independent carrier in the transport of lactate and, into human erythrocytes (Halestrap, A. P.) 193–207

Pyruvate transporter, mitochondrial, liver, rat, mechanism of the inhibition by z-cyanocinnamate derivatives of the activity of (Halestrap, A. P.) 181–183

Red blood cells, see Erythrocytes

Redox state, effect of haematocrit value and concentration of oxygen of perfusion blood on, and metabolism of perfused rat liver (Mayes, P. A. & Felts, J. M.) 685–689

1976
Respiration, dissociation by ionophores of exocytosis and stimulation of, in guinea-pig and human leucocytes (Zabucchi, G. & Romeo, D.) 209–213

Respiration, nature of the endogenous substrates and their contribution to the fuel for, by rat spleen slices in vitro (Suter, D. & Weidemann, M. J.) 119–127

Reticulocytes, rabbit, extraction of messenger ribonucleic acid for phosphoenolpyruvate carboxykinase (guanosine triphosphate) from rat liver and its translation in vitro by a cell-free system from (Tilghman, S. M., Fisher, D. M., Reshef, L., Ballard, F. J. & Hanson, R. W.) 619–626

Reticulocytes, rabbit, inhibition by crotins and curcin of the biosynthesis of protein in vitro by lysate of (Stirpe, F., Pession-Brizzi, A., Lorenzoni, E., Strocchi, P., Montanaro, L. & Sperti, S.) 1–6

Reticulocytes, rabbit, prevention by ribosome-bound nascent polyphenylalanine chains of the functional interaction of T-2 toxin with its receptor site during the biosynthesis of polyphenylalanine by lysates of (Cannon, M., Smith, K. E. & Carter, C. J.) 289–294

Reticulum, endoplasmic, liver, rat, regulation of the biosynthesis of phosphatidylcholine in (Sribney, M., Knowles, C. L. & Lyman, E. M.) 307–314

Reticulum, sarcoplasmic, skeletal-muscle, rabbit, formation of adenosine triphosphate during the release of intravesicular and membrane-bound calcium ions from (Vale, M. G. P., Osório e Castro, V. R. & Carvalho, A. P.) 239–244

Reuber H35 hepatoma cells, selective control of the degradation of normal and aberrant proteins in (Knowles, S. E. & Ballard, F. J.) 609–617

Ribonucleic acid, effect of phenobarbital on the transport of, from rat liver nuclei to rat liver cytosol in vitro (Hazen, N. & McCauley, R.) 665–670

Ribonucleic acid, influence of glucocorticoids on the stimulation by leucocyte endogenous mediator on the biosynthesis of, and of plasma acute-phase globulins in rat liver (Thompson, W. L., Abeles, F. B., Beall, F. A., Dintelman, R. E. & Wannemacher, R. W., Jr.) 25–32

Ribonucleic acid, messenger, phosphoenolpyruvate carboxykinase (guanosine triphosphate), extraction of, from rat liver and its translation in vitro by a cell-free system from rabbit reticulocytes (Tilghman, S. M., Fisher, L. M., Reshef, L., Ballard, F. J. & Hanson, R. W.) 619–626

Ribonucleic acid, polyadenylate-containing, biosynthesis of, by isolated Ehrlich-ascites-tumour-cell mitochondria (Aujame, L. & Freeman, K. B.) 499–506

Ribonucleic acid polymerases, multiple binding sites for progesterone in chick oviduct nuclei in vitro and correlation with effects of the hormone on the activities of (Spelsberg, T. C.) 391–398

Ribonucleic acid, transfer, peptidy-, effects of elongation factor 2 and of adenosine diphosphate ribosylated elongation factor 2 on the translocation of, on rat liver ribosomes (Montanaro, L., Sperti, S., Testoni, G. & Mattioli, A.) 15–23

Ribosomes, liver, rat, effects on the steps of peptide chain elongation during inhibition by crotins and ricin of the biosynthesis of protein in vitro by Artemia salina ribosomes and (Sperti, S., Montanaro, L., Mattioli, A., Testoni, G. & Stirpe, F.) 7–13

Ribosomes, prevention by nascent polyphenylalanine chains bound to, of the functional interaction of T-2 toxin with its receptor site during the biosynthesis of polyphenylalanine by rabbit reticulocyte lysates (Cannon, M., Smith, K. E. & Carter, C. J.) 289–294

Ribosomes, skeletal-muscle, rat, involvement of, in the effects of denervation on the turnover of protein (Goldspink, D. F.) 71–80

Ricin, effects on the steps of peptide chain elongation during inhibition by crotins and, of the biosynthesis of protein in vitro by rat liver and Artemia salina ribosomes (Sperti, S., Montanaro, L., Mattioli, A., Testoni, G. & Stirpe, F.) 7–13

Sarcoplasmic reticulum, see Reticulum, sarcoplasmic

Seeds, Croton tiglium and Jatropha curcas, inhibition by total proteins from, of the biosynthesis of protein in vitro by rabbit reticulocyte lysate (Stirpe, F., Pession-Brizzi, A., Lorenzoni, E., Strocchi, P., Montanaro, L. & Sperti, S.) 1–6

Seminal vesicle, rat, accumulation of myo-inositol in, and other organs after its injection into the male animal (Lewin, L. M., Yannai, Y., Sulimovici, S. & Kraicer, P. F.) 375–380

Serine, compartmentation of glycine and, in the biosynthesis of plasma albumin and ferritin in rat liver (Fern, E. B. & Garlick, P. J.) 189–192

Serum albumin, see Albumin, plasma

Serum, rat, purification and properties of uridine diphosphate galactose-glycoprotein galactosyltransferase from, and liver (Fraser, I. H. & Mookerjea, S.) 347–355

Sickle-cell anaemia, see Anaemia, sickle-cell

Skeletal muscle, see Muscle, skeletal

Skin, rat, evidence for the existence of a pathway for the biosynthesis of glycogen in (Peters, R. F. & White, A. M.) 465–468

Sodium [14C]bicarbonate, analysis of the complex curve for the disappearance of 14C label during the turnover of a mixture of proteins in rat liver after the injection of (Garlick, P. J., Waterlow, J. C. & Swick, R. W.) 657–663

Spermatooza, epididymal, rat, regulation by androgens of the activities of glycolytic enzymes in, and epididymis (Brooks, D. E.) 527–537

Spleen, rat, nature of the endogenous substrates and their contribution to the respiratory fuel of slices of, in vitro (Suter, D. & Weidemann, M. J.) 119–127

Starvation, effect of ischaemic limb injury on the rates of metabolism of ketone bodies in the rat during (Barton, R. N.) 233–238

Starvation, effect of, on the phosphorylation state of cytosolic and mitochondrial adenine nucleotides and of pyruvate dehydrogenase in isolated rat liver cells (Siess, E. A. & Wieland, O. H.) 91–102

Steroid–receptor complexes, nuclear components responsible for the retention of, by nuclei of various mammalian tissues (Mainwaring, W. I. P., Symes, E. K. & Higgins, S. J.) 129–141

Vol. 156
Steroids, androgenic, evidence for a deoxyribonucleic acid-unwinding protein involved in the regulation by, of the biosynthesis of proteins in rat prostate gland (Mainwaring, W. J. P., Rennie, P. S. & Keen, J.) 253–264

Steroids, androgenic, regulation by, of the activities of glycolytic enzymes in rat epididymis and epididymal spermatozoa (Brooks, D. E.) 527–537

Steroids, glucocorticoid, influence of, on the stimulation by leucocyte endogenous mediator on the biosynthesis of ribonucleic acid and of plasma acute-phase globulins in rat liver (Thompson, W. L., Abeles, F. B., Beall, F. A., Dinterman, R. E. & Wannemacher, R. W., Jr.) 25–32

Steroids, glucocorticoid, role of, in stimulation of the biosynthesis of fatty acids in rat liver (Kirk, C. J., Verrinder, T. R. & Hems, D. A.) 593–602

Steroids, glucocorticoid, role of, in stimulation of the deposition of glycogen in rat liver (Whitton, P. D. & Hems, D. A.) 585–592

Supernatant fraction, see Cytosol

Superoxide ions, role of ubiquinone in the generation of, and hydrogen peroxide by ox heart mitochondria (Boveris, A., Cadenas, E. & Stoppani, A. O. M.) 435–444

Synaptosomes, cerebral-cortex, guinea-pig, inhibition by botulinum toxin of the depolarization-evoked release of acetylcholine from, in vitro (Wonnacott, S. & Marchbanks, R. M.) 701–712

Tendon cells, chick-embryo, effects of αα'–bipyridyl, colchicine and antimycin A on the secretory process for procollagen in, and cartilage cells (Harwood, R., Grant, M. E. & Jackson, D. S.) 81–90

Testosterone, evidence for a deoxyribonucleic acid-unwinding protein involved in the regulation by, of the biosynthesis of proteins in rat prostate gland (Mainwaring, W. I. P., Rennie, P. S. & Keen, J.) 253–264

Testosterone, regulation by, of the activities of glycolytic enzymes in rat epididymis and epididymal spermatozoa (Brooks, D. E.) 527–537

Theophylline, effects of nucleotides and, on the uptake of calcium ions by subcellular fractions of mouse islets of Langerhans (Solin, J.) 63–69

L-Threonine 3-dehydrogenase, initiation by, of the degradation of L-threonine in various bacteria (Bell, S. C. & Turner, J. M.) 449–458

L-Threonine, initiation by L-threonine 3-dehydrogenase of the degradation of, in various bacteria (Bell, S. C. & Turner, J. M.) 449–458

Thymidine, evidence for the absence of a dark-repair mechanism for the incorporation of, into deoxyribonucleic acid in Halobacterium cutirubrum N.R.C. 34001 (Grey, V. L. & Fitt, P. S.) 569–575

Thyroid gland, rat, accumulation of myo-inositol in, and other organs after its injection into the male animal (Lewin, L. M., Yannai, Y., Sulimovici, S. & Kraicer, P. F.) 375–380

Thyroliberin, stimulation by prostaglandins and, of the biosynthesis of prolactin and the formation of adenosine 3'-5'-cyclic monophosphate in cultured rat pituitary-gland cells (Gautvik, K. M. & Kriz, M.) 111–117

Thyrotropin-releasing factor, see Thyroliberin

Thyroxine, stimulation by, of peptide elongation by a cell-free system containing rat liver polyribosomes (Carter, W. J., Faas, F. H. & Wynn, J. O.) 713–717

Tobacco hornworm (Manduca sexta), properties of glucagon-like and insulin-like hormones of the neurosecretory system of (Tager, H. S., Markese, J., Kramer, K. J., Speirs, R. D. & Childs, C. N.) 515–520

Toxin, botulinum, inhibition by, of the depolarization-evoked release of acetylcholine from guinea-pig cerebral-cortex synaptosomes in vitro (Wonnacott, S. & Marchbanks, R. M.) 701–712

T-2 toxin, prevention by ribosome-bound nascent poly-phenylalanine chains of the functional interaction of, with its receptor site during the biosynthesis of polyphenylalanine by rabbit reticulocyte lysates (Cannon, M., Smith, K. E. & Carter, C. J.) 289–294

Transfer ribonucleic acid, see Ribonucleic acid, transfer

Triacylglycerol, metabolism and mobilization of maternal guinea-pig adipose-tissue lipids and the accumulation of, in the liver of the foetus during pregnancy (Jones, C. T.) 357–365

Triacylglycerol, quantitative analysis of the metabolism of, in liver of ethanol-treated rats (Abrams, M. A. & Cooper, C.) 33–46

Triglyceride, see Triacylglycerol

Triphenylsulphonium ions, inhibition by, of oxidative phosphorylation and the activity of adenosine triphosphatase in ox heart mitochondria (Barrett, R. H. & Selwyn, M. J.) 315–322

Triton WR-1339, inhibitory effect of the administration of, on the activity of clearing-factor lipase in various rat tissues (Borensztajn, J., Rone, M. S. & Kotlar, T. J.) 539–543

Tryptophan pyrrolase, effects of the administration of glucose or nicotinamide on the regulation by reduced nicotinamide–adenine dinucleotide (phosphate) of the activity of, in rat liver (Badawy, A. A.-B. & Evans, M.) 381–390

Tumours, mouse, studies on the biosynthesis of J chain in, producing immunoglobulins (Kaji, H.) 681–684

Tyrosinase, relative importance of the biosynthesis of protein measured by the incorporation of, and the degradation of protein in rat skeletal muscle in the regulation of muscle mass (Millward, D. J., Garlick, P. J., Nnanyelugo, D. O. & Waterlow, J. C.) 185–188

Ubiquinone, role of, in the generation of hydrogen peroxide by ox heart mitochondria (Boveris, A., Cadenas, E. & Stoppani, A. O. M.) 435–444

Uridine diphosphate galactose-glycoprotein galactosyltransferase, purification and properties of, from rat liver and serum (Fraser, I. H. & Mookerjea, S.) 347–355

Uterus, rabbit, effects of oestradiol-17β and progesterone on the metabolism of [1,2-3H]progesterone by endometrium and myometrium from (Verma, U. & Laumas, K. R.) 55–62

Uterus, rat and guinea-pig, nuclear components responsible for the retention of steroid–receptor complexes by nuclei of, and other mammalian tissues (Mainwaring, W. I. P., Symes, E. K. & Higgins, S. J.) 129–141

Valine, metabolism of leucine, histidine, phenylalanine and, by isolated perfused lactating guinea-pig mammary gland (Davis, S. R. & Mepham, T. B.) 553–560

Vitamin B12, size of the pools of deoxyribonucleoside triphosphates in Euglena gracilis strain Z deficient in (Carell, E. F. & Goetz, G. H.) 473–475

Zea mays, see Maize

1976
