<b>Proteins</b>			
The gross architecture of an antibody-combining site as determined by spin-label mapping. By B. J. Sutton, P. Gettins, D. Givol, D. Marsh, S. Wain-Hobson, K. J. Willan & R. A. Dwek	177	Glutamine as a precursor to <i>N</i> -terminal pyrrolid-2-one-5-carboxylic acid in mouse immunoglobulin $\lambda$ -type light chains. Amino acid-sequence variability at the <i>N</i> -terminal extra piece of $\lambda$ -type light-chain precursors. By Y. Burstein & I. Schechter	347
Comparison of the dimensions of the combining sites of the dinitrophenyl-binding immunoglobulin A myeloma proteins MOPC 315, MOPC 460 and XRPC 25 by spin-label mapping. By K. J. Willan, D. Marsh, C. A. Sunderland, B. J. Sutton, S. Wain-Hobson, R. A. Dwek & D. Givol	199	<b>Nucleic Acids</b>	
The combining site of the dinitrophenyl-binding immunoglobulin A myeloma protein MOPC 315. By S. K. Dower, S. Wain-Hobson, P. Gettins, D. Givol, W. R. C. Jackson, S. J. Perkins, C. A. Sunderland, B. J. Sutton, C. E. Wright & R. A. Dwek	207	Characterization of double-stranded ribonucleic acid sequences present in the initial transcription products of rat liver chromatin. By E. Pays	237
<i>Appendix:</i> Application of ring-current theory based on the Johnson-Bovey equation to the aromatic amino acids. By S. J. Perkins, S. K. Dower, P. Gettins, S. Wain-Hobson & R. A. Dwek	223	The aminoacylation of transfer ribonucleic acid. Recognition of methionine by <i>Escherichia coli</i> methionyl-transfer ribonucleic acid synthetase. By J. M. Old & D. S. Jones	367
Specificity of interactions of hapten side chains with the combining site of the myeloma protein MOPC 315. By S. Wain-Hobson, S. K. Dower, P. Gettins, D. Givol, A. C. McLaughlin, I. Pecht, C. A. Sunderland & R. A. Dwek	227	<b>Carbohydrates</b>	
Properties of soluble somatostatin-binding protein. By N. Ogawa, T. Thompson, H. G. Friesen, J. B. Martin & P. Brazeau	269	Specificity of flavobacterial glycuronidases acting on disaccharides derived from glycosaminoglycans. By P. Hovingh & A. Linker	287
Fragments produced by digestion of human immunoglobulin G subclasses with pepsin in urea. By D. M. Parr	303	<b>Enzymology</b>	
Subtilisin modification of monodeamidated ribonuclease-A. By B. N. Manjula, A. S. Acharya & P. J. Vithayathil	337	Purification and properties of histidinol dehydrogenases from psychrophilic, mesophilic and thermophilic bacilli. By J. A. Lindsay & E. H. Creaser	247

	PAGE		PAGE
Microbial metabolism of aromatic nitriles. Enzymology of C-N cleavage by <i>Nocardia</i> sp. ( <i>Rhodochrous</i> group) N.C.I.B. 11216. By D. B. Harper	309	The structure of L-lactate oxidase from <i>Mycobacterium smegmatis</i> . By P. A. Sullivan, Y. S. Choong, W. J. Schreurs, J. F. Cutfield & M. G. Shepherd	375
Acetyl-coenzyme A and coenzyme A analogues. Their effects on rat brain choline acetyltransferase. By J. Rossier	321	Modification of lactate oxidase with diethyl pyrocarbonate. Evidence for an active-site histidine residue. By Y. S. Choong, M. G. Shepherd & P. A. Sullivan	385
Variable-temperature magnetic-circular-dichroism spectra of cytochrome <i>c</i> oxidase and its derivatives. By A. J. Thomson, T. Brittain, C. Greenwood & J. P. Springall	327	The soluble methane mono-oxygenase of <i>Methylococcus capsulatus</i> (Bath). Its ability to oxygenate <i>n</i> -alkanes, <i>n</i> -alkenes, ethers and alicyclic, aromatic and heterocyclic compounds. By J. Colby, D. I. Stirling & H. Dalton	395
Kinetic properties of a magnesium ion- and calcium ion-stimulated adenosine triphosphatase from the outer-membrane fraction of rat spleen mitochondria. By E. K. Vijayakumar & M. J. Weidemann	355		

#### RAPID PAPERS

	PAGE		PAGE
<b>Small Molecules</b>		<b>Enzymology</b>	
The high-performance liquid-chromatographic analysis of ficaprenol and dolichol. By R. W. Keenan, N. Rice & R. Quock	405	Aldolase-like imine formation in the mechanism of action of phosphonoacetaldehyde hydrolase. By J. M. La Nauze, J. R. Coggins & H. B. F. Dixon	409
		Chromous ion reduction of mammalian cytochrome oxidase and some of its derivatives. By C. Greenwood, T. Brittain, M. Brunori & M. T. Wilson	413
