### FULL PAPERS

	PAGE		PAGE
<b>Proteins</b>		Incorporation of methionine-derived methyl groups into sirohaem by <i>Escherichia coli</i> .	
The separation and characterization of bronchial glycoproteins by density-gradient methods.		By L. M. Siegel, P. S. Davis & M. J. Murphy	669
By J. M. Creeth, K. R. Bhaskar, J. R. Horton, I. Das, M.-T. Lopez-Vidriero & L. Reid	557		
Enzymic and immunochemical properties of lysozyme. Accurate definition of the antigenic site around the disulphide bridge 30-115 (site 3) by 'surface simulation' synthesis.		<b>Enzymology</b>	
By C.-L. Lee and M. Z. Atassi	571	Purification, biochemical characterization and serological analysis of cellular deoxyribonucleic acid polymerases and a reverse transcriptase from spleen of a patient with myelofibrotic syndrome.	
Localization of sites for ionic interaction with lipid in the C-terminal third of the bovine myelin basic protein.		By P. Chandra & L. K. Steel	513
By A. J. S. Jones & M. G. Rumsby	583	Hydrolysis of synthetic pyrophosphoric esters by an isoenzyme of apyrase from <i>Solanum tuberosum</i> .	
Biosynthesis of the first component of complement by human fibroblasts.		By G. del Campo, J. Puente, M. A. Valenzuela, A. Traverso-Cori & O. Cori	525
By K. B. M. Reid & E. Solomon	647	Mixed-valence cytochrome oxidase-formate complex. A steady-state intermediate.	
The interaction of protein A and the Fc fragment of rabbit immunoglobulin G as probed by complement-fixation and nuclear-magnetic-resonance studies.		By T. Brittain, C. Greenwood & A. Johnson	531
By C. Wright, K. J. Willan, J. Sjö Dahl, D. R. Burton & R. A. Dwek	661	Chemical modification of a cellulase from <i>Aspergillus niger</i> .	
The reactivity of the thiol groups of the adenosine triphosphatase of sarcoplasmic reticulum and their location on tryptic fragments of the molecule.		By P. L. Hurst, P. A. Sullivan & M. G. Shepherd	549
By D. A. Thorley-Lawson & N. M. Green	739	The deoxyribonucleic acid polymerases from the diatom <i>Cylindrotheca fusiformis</i> . Partial purification and characterization of four distinct activities.	
The use of wheat-germ lectin-Sepharose for the purification of human haemopexin.		By T. W. Okita & B. E. Volcani	601
By P. Vretblad & R. Hjorth	759	The deoxyribonucleic acid polymerases from the diatom <i>Cylindrotheca fusiformis</i> . Sub-cellular distribution, exonuclease activity and heterogeneity of the enzymes.	
<b>Carbohydrates</b>		By T. W. Okita & B. E. Volcani	611
Interaction of cartilage proteoglycans with hyaluronic acid. The role of the hyaluronic acid carboxyl groups.		Human plasma uridine diphosphate galactose-glycoprotein galactosyltransferase. Purification, properties and kinetics of the enzyme-catalysed reaction.	
By J. E. Christner, M. L. Brown & D. D. Dziewiatkowski	711	By A. Bella, Jr., J. S. Whitehead & Y. S. Kim	621
<b>Small Molecules</b>		The degradation of cartilage proteoglycans and its susceptibility to proteolysis.	
Conjugated and unconjugated bilirubins in bile of humans and rhesus monkeys. Structure of adult human and rhesus-monkey bilirubins compared with dog bilirubins.		By P. J. Roughley & A. J. Barrett	629
By S. G. Blumenthal, D. B. Taggart, R. M. Ikeda, B. H. Ruebner & D. E. Bergstrom	535		

	PAGE		PAGE
The degradation of cartilage proteoglycans by tissue proteinases. Proteoglycan heterogeneity and the pathway of proteolytic degradation. By P. J. Roughley	639	The nature of the circular-dichroic spectra of complexes between ribonuclease A and nucleotides. By S. M. Dudkin, L. V. Karabashyan, M. Ya. Karpeisky, S. N. Mikhailov, N. Sh. Padyukova & V. G. Sakharovsky	749
The properties of a carboxylesterase from the peach-potato aphid, <i>Myzus persicae</i> (Sulz.), and its role in conferring insecticide resistance. By A. L. Devonshire	675	The separation and characterization of marmoset kidney $\beta$ -D-galactosidase and $\beta$ -D-glucosidase. By R. J. Pierce, R. G. Price & J. S. L. Fowler	765
Fungal degradation of aromatic nitriles. Enzymology of C-N cleavage by <i>Fusarium solani</i> . By D. B. Harper	685	Proteoglycan-degrading enzymes. A radiochemical assay method and the detection of a new enzyme, cathepsin F. By J. T. Dingle, A. M. J. Blow, A. J. Barrett & P. E. N. Martin	775
Purification and properties of the hexosaminidase A-activating protein from human liver. By P. Hechtman & D. LeBlanc	693	Steady-state kinetic studies of the negative co-operativity and flip-flop mechanism for <i>Escherichia coli</i> alkaline phosphatase. By R. D. Waight, P. Leff & W. G. Bardsley	787
Partial purification and properties of purine nucleoside phosphorylase from rabbit erythrocytes. By B. Savage & N. Spencer	703	Benzofuroxan as thiol-specific reactivity probe. Kinetics of its reactions with papain, ficin, bromelain and low-molecular-weight thiols. By M. Shipton & K. Brocklehurst	799
Preparation and characterization of substrates suitable for the study of stereospecific secondary alkylsulphohydrolases of detergent-degrading micro-organisms. By G. W. J. Matcham & K. S. Dodgson	717	Degradation of myofibrillar proteins by cathepsins B and D. By W. N. Schwartz & J. W. C. Bird	811
Purification, properties and cellular localization of the stereospecific CS2 secondary alkylsulphohydrolase of <i>Comamonas terrigena</i> . By G. W. J. Matcham, K. S. Dodgson & J. W. Fitzgerald	723	<b>General Methods</b> Changes in apparent pH on freezing aqueous buffer solutions and their relevance to biochemical electron-paramagnetic-resonance spectroscopy. By D. L. Williams-Smith, R. C. Bray, M. J. Barber, A. D. Tsopanakis & S. P. Vincent	593
Heterogeneity of rabbit muscle creatine kinase and limited proteolysis by proteinase K. By J. Williamson, J. Greene, S. Chérif & E. J. Milner-White	731		

## RAPID PAPERS

	PAGE		PAGE
<b>Proteins</b>			
The immunological similarity of rat glandular kallikriens. By D. Proud, G. S. Bailey, K. Nustad & K. M. Gautvik	835	Rate-limiting steps in the cytidine pathway for the synthesis of phosphatidylcholine and phosphatidylethanolamine. By J. P. Infante	847
The first step in the activation of chicken pepsinogen is similar to that of prochymosin. By H. Keilova, V. Kostka & J. Kay	855	<b>Carbohydrates</b> A simple and rapid method for isolation of reduced carbohydrate fragments from the linkage region of cartilage keratan sulphate. By F. J. Kieras	851
<b>Lipids</b>		<b>Enzymology</b> The arrangement of substrate and organophosphorus-inhibitor leaving groups in acetylcholinesterase active site. By J. Järv, A. Aaviksaar, N. Godovikov & D. Lobanov	823
Phospholipase A activity associated with the membranes of human polymorphonuclear leucocytes. By R. Franson, J. Weiss, L. Martin, J. K. Spitznagel & P. Elsbach	839		

	PAGE		PAGE
Phosphorus nuclear-magnetic-resonance studies of a transition-state analogue complex of creatine kinase. <i>By</i> E. J. Milner-White & D. S. Rycroft	827	The mechanisms of action of primary alkylsulphohydrolase and arylsulphohydrolase from a detergent-degrading micro-organism. <i>By</i> J. M. Cloves, K. S. Dodgson, D. E. Games, D. J. Shaw & G. F. White	843
The active site of $\beta$ -glucosidase from <i>Botryodiplodia theobromae</i> . Effects of pH and dioxan on enzyme-catalysed reactions. <i>By</i> G. M. Umezurike	831	The pH-dependence of second-order rate constants of enzyme modification may provide free-reactant $pK_a$ values. <i>By</i> K. Brocklehurst & H. B. F. Dixon	859

### FULL PAPERS

	PAGE		PAGE
<b>Proteins</b>		<b>Lipids</b>	
Enzymically iodinated human salivary proteins. Fractionation and characterization by column chromatography and electrofocusing. <i>By S. S. Sarimo &amp; J. Tenovuo</i>	23	Characterization of the serum lipoproteins and their apoproteins in hypercholesterolaemic guinea pigs. <i>By M. J. Chapman &amp; G. L. Mills</i>	9
Electron-paramagnetic-resonance studies on a photochemically produced species of horse-radish peroxidase Compound I. <i>By A. R. McIntosh &amp; M. J. Stillman</i>	31	<b>Carbohydrates</b>	
Griseofulvin-induced aggregation of microtubule protein. <i>By A. Roobol, K. Gull &amp; C. I. Pogson</i>	39	Characterization of lipid A and polysaccharide moieties of the lipopolysaccharides from <i>Vibrio cholerae</i> . <i>By S. Raziuddin</i>	147
The state of aggregation of red deer ( <i>Cervus elaphus</i> L.) $\beta$ -lactoglobulin preparations near neutral pH. <i>By E. I. McDougall &amp; J. C. Stewart</i>	45	Free and lipid <i>myo</i> -inositol in tissues from rats with acute and less severe streptozotocin-induced diabetes. <i>By K. P. Palmano, P. H. Whiting &amp; J. N. Hawthorne</i>	229
Self-association of troponin. <i>By S. J. Lovell &amp; D. J. Winzor</i>	131	<b>Small Molecules</b>	
Solvent accessibilities in glycyl, alanyl and seryl dipeptides. <i>By P. Manavalan, P. K. Ponnuswamy &amp; A. R. Srinivasan</i>	171	The isolation and further characterization of the bilirubin tetrapyrroles in bile-containing human duodenal juice and dog gall-bladder bile. <i>By E. R. Gordon, T.-H. Chan, K. Samodai &amp; C. A. Goresky</i>	1
The amino acid sequence of rabbit slow-muscle troponin I. <i>By R. J. A. Grand &amp; J. M. Wilkinson</i>	183	<b>Enzymology</b>	
The subunit and polypeptide-chain structure of rabbit secretory immunoglobulin A. Isolation of a proteolytic fragment suitable for sequence studies on the variable region of $\alpha$ -chain. <i>By A. P. Johnstone &amp; L. E. Mole</i>	245	Interaction of aspartate aminotransferase with mercurochrome. Relationship of an exposed thiol group of the enzyme to the active centre. <i>By T. G. Kalogerakos, N. G. Oikonomakos, C. G. Dimitropoulos, I. A. Karni-Katsadima &amp; A. E. Evangelopoulos</i>	53
Sequence studies on the heavy chain of rabbit immunoglobulin A of different $\alpha$ -locus allotypes. <i>By A. P. Johnstone &amp; L. E. Mole</i>	255	Use of isoelectric focusing and a chromophoric organomercurial to monitor urea-induced conformational changes of yeast phosphoglycerate kinase. <i>By R. A. Stinson</i>	65
<b>Nucleic acids</b>		Purification and subunit structure of argininosuccinate lyase from <i>Chlamydomonas reinhardtii</i> . <i>By R. F. Matagne &amp; J.-P. Schlösser</i>	71
Methylated nucleotide sequences in HeLa-cell ribosomal ribonucleic acid. Correlation between the results from 'fingerprinting' hydrolysates obtained by digestion with T <sub>1</sub> ribonuclease and with T <sub>1</sub> plus pancreatic ribonucleases. <i>By B. E. H. Maden &amp; M. S. N. Khan</i>	211	Tritium effect in peroxidation of ethanol by liver catalase. <i>By S. E. Damgaard</i>	77

	PAGE		PAGE
The equilibrium constant and the reversibility of the reaction catalysed by nicotinamide-adenine dinucleotide kinase from pigeon liver. By D. K. Apps & A. C. Nairn	87	Degradation of ( $\pm$ )-synephrine by <i>Arthrobacter synephrinum</i> . Oxidation of 3,4-dihydroxyphenylacetate to 2-hydroxy-5-carboxymethylmuconate semialdehyde. By R. Krishnan Kutty, N. Abitha Devi, M. Veeraswamy, S. Ramesh & P. V. Subba Rao	163
Affinity chromatography of the <i>Neurospora</i> NADP-specific glutamate dehydrogenase, its mutational variants and hybrid hexamers. By D. H. Watson & J. C. Wootton	95	Reaction of the aminic form of aspartate transaminase with difluoro-oxaloacetate. By P. A. Briley, R. Eisenthal, R. Harrison & G. D. Smith	193
Interaction of lipoprotein lipase with heparin-Sepharese. Evaluation of conditions for affinity binding. By G. Bengtsson & T. Olivecrona	109	Synthesis and use of bifunctional chloromethyl-alkanedione derivatives of variable chain length for cross-linking thiol groups in oligomeric proteins. Specific cross-linking in glyceraldehyde 3-phosphate dehydrogenase. By D. P. Bloxham	201
The substrate specificity and stereochemistry, reversibility and inhibition of the 3-oxo steroid $\Delta^4$ - $\Delta^2$ -isomerase component of cholesterol oxidase. By A. G. Smith & C. J. W. Brooks	121	Kinetic studies of the phenol sulphate-phenol sulphotransferase of <i>Aspergillus oryzae</i> . By G. R. J. Burns, E. Galanopoulou & C. H. Wynn	223
Purification and properties of myosin light-chain kinase from fast skeletal muscle. By E. M. V. Pires & S. V. Perry	137	The reactions of 1,10-phenanthroline with yeast alcohol dehydrogenase. By F. M. Dickinson & S. Berrieman	237
The purification and properties of <i>p</i> -cresol-(acceptor) oxidoreductase (hydroxylating), a flavocytochrome from <i>Pseudomonas putida</i> . By D. J. Hopper & D. G. Taylor	155		

### RAPID PAPERS

	PAGE		PAGE
<b>Proteins</b>			
Prediction and confirmation by synthesis of two antigenic sites in human haemoglobin by extrapolation from the known antigenic structure of sperm-whale myoglobin. By A. L. Kazim & M. Z. Atassi	275	Variation in the distribution of two human heart ferritin species. Isoferritin profile and subunit composition in normal and iron-overloaded subjects. By A. Bomford, Y. Lis, I. G. McFarlane & R. Williams	309
Chemical differences between thyrotropin isohormones. By K. M. M. Davy, J. S. Fawcett & C. J. O. R. Morris	279	<b>Enzymology</b>	
A second activation peptide from bovine cationic trypsinogen. By D. Webster & R. E. Offord	285	The involvement of the bridging imidazolate in the catalytic mechanism of action of bovine superoxide dismutase. By M. E. McAdam, E. M. Fielden, F. Lavelle, L. Calabrese, D. Cocco & G. Rotilio	271
<i>Appendix:</i> The production of the second activation peptide from trypsinogen isolated from individual pancreases. By P. C. Mahony & R. E. Offord	287	Lysostaphin endopeptidase-catalysed transpeptidation reactions of the imino-transfer type. By G. L. Sloan, E. C. Smith & J. H. Lancaster	293
Correction of partial amino acid sequence of erabutoxins. By N. Maeda & N. Tamiya	289	Adenosine triphosphatase and adenosine diphosphate/adenosine triphosphate isotope-exchange activities of the chromaffin-granule membrane. By D. K. Apps & G. A. Reid	297
The effect of matrix on the binding of albumin to immobilized Cibacron Blue. By S. Angal & P. D. G. Dean	301		

	PAGE		PAGE
A direct assay for urinary kallikrein. <i>By N. B. Oza</i>	305	Hydroxylation of aromatic compounds by reduced nicotinamide-adenine dinucleotide and phenazine methosulphate requires hydrogen peroxide and hydroxyl radicals, but not superoxide. <i>By B. Halliwell</i>	317
Preparation and properties of co-reticulated invertase supported by an ultrafiltration membrane. <i>By M. Cantarella, L. Gianfreda, R. Palescandolo &amp; V. Scardi</i>	313	<b>Intermolecular Organization</b> Release of alkaline phosphatase from membranes by a phosphatidylinositol-specific phospholipase C. <i>By M. G. Low &amp; J. B. Finean</i>	281

## Contents of Volume 167, No. 2, 1977

<b>Proteins</b>		<b>Enzymology</b>	
Characterization and serology of the matrix protein from a nuclear-polyhedrosis virus of <i>Trichoplusia ni</i> before and after degradation by an endogenous proteinase. <i>By D. A. Eppstein &amp; J. A. Thoma</i>	321	Identification and partial characterization of an inhibitor of collagenase from rabbit bone. <i>By A. Sellers &amp; J. J. Reynolds</i>	353
The sites of phosphorylation of rabbit cardiac troponin I by adenosine 3':5'-cyclic monophosphate-dependent protein kinase. Effect of interaction with troponin C. <i>By A. J. G. Moir &amp; S. V. Perry</i>	333	Fructose 1,6-bisphosphate aldolase from rabbit muscle. The isomerization of the enzyme-dihydroxyacetone phosphate complex. <i>By E. Grazi &amp; M. Blanzieri</i>	361
Inactivation of $\alpha$ - and $\beta$ -thrombin by anti-thrombin-III, $\alpha_2$ -macroglobulin and $\alpha_1$ -proteinase inhibitor. <i>By R. Machovich, A. Borsodi, G. Blaskó &amp; S. A. Orakzai</i>	393	A subunit-sized butyrylcholinesterase present in high concentrations in pooled rabbit serum. <i>By A. R. Main, S. C. McKnelly &amp; S. K. Burgess-Miller</i>	367
Electron-paramagnetic-resonance studies of leghaemoglobins from soya-bean and cowpea root nodules. Identification of nitrosyl-leghaemoglobin in crude leghaemoglobin preparations. <i>By C. S. Maskall, J. F. Gibson &amp; P. J. Dart</i>	435	Studies on C3 convertases. Inhibition of C5 convertase formation by peptides containing aromatic amino acids. <i>By A. Kossorotow, W. Opitz, E. Etschenberg &amp; U. Hadding</i>	377
<b>Carbohydrates</b>		The histidine residues of phospholipase C from <i>Bacillus cereus</i> . <i>By C. Little</i>	399
Synthesis of glycosaminoglycans by human embryonic lung fibroblasts. Different distribution of heparan sulphate, chondroitin sulphate and dermatan sulphate in various fractions of the cell culture. <i>By I. Sjöberg &amp; L.-Å. Fransson</i>	383	Affinity chromatography of aminoacyl-transfer ribonucleic acid synthetases. Small organic ligands. <i>By C. M. Clarke &amp; J. R. Knowles</i>	405
		Affinity chromatography of aminoacyl-transfer ribonucleic acid synthetases. Cognate transfer ribonucleic acid as a ligand. <i>By C. M. Clarke &amp; J. R. Knowles</i>	419

	PAGE		PAGE
Activation studies of the multiple forms of prochymosin (prorennin). By N. Asato & A. G. Rand, Jr.	429	Evidence for the role of vitamin B-6 as a cofactor of lysyl oxidase. By J. C. Murray & C. I. Levene	463
The electron-transfer reaction between azurin and the cytochrome <i>c</i> oxidase from <i>Pseudomonas aeruginosa</i> . By S. R. Parr, D. Barber, C. Greenwood & M. Brunori	447	Pre-steady-state kinetic studies on cytoplasmic sheep liver aldehyde dehydrogenase. By A. K. H. MacGibbon, L. F. Blackwell & P. D. Buckley	469
Nitrogenase of <i>Klebsiella pneumoniae</i> . Distinction between proton-reducing and acetylene-reducing forms of the enzyme: effect of temperature and component protein ratio on substrate-reduction kinetics. By R. N. F. Thorneley & R. R. Eady	457	A model for the allosteric regulation of pH-sensitive enzymes. By J. S. Shindler & K. F. Tipton	479
		<b>Intermolecular Organization</b>	
		The effect of bovine tendon glycoprotein on the formation of fibrils from collagen solutions. By J. C. Anderson, R. I. Labeledz & M. A. Kewley	345

## RAPID PAPERS

	PAGE		PAGE
<b>Proteins</b>		<b>Small Molecules</b>	
A quantitative analysis of histone H1 in rabbit thymus nuclei. By G. H. Goodwin, R. H. Nicolas & E. W. Johns	485	Electrochemical analysis of the <i>carboxy</i> - <sup>14</sup> C-labelled aliphatic carboxylic acid metabolites resulting from tracer studies. By G. H. Walker & D. E. Hathway	505
A cystine-rich protein fraction from oxidized $\alpha$ -keratin. By J. H. Buchanan	489	<b>Enzymology</b>	
The reaction of Fe(III) myoglobin fluoride with reducing agents. By R. P. Cox	493	Inhibition of the membrane-bound adenosine triphosphatase of <i>Escherichia coli</i> by dicyclohexylcarbodi-imide. By D. L. Feinstein & R. J. Fisher	497
The molecular size of <i>N</i> -methylglutamate dehydrogenase of <i>Pseudomonas aminovorans</i> . By C. W. Bamforth & P. J. Large	509	A simple radioassay for angiotensin-converting enzyme. By J. W. Ryan, A. Chung, C. Ammons & M. L. Carlton	501

## Contents of Volume 167, No. 3, 1977

<b>Proteins</b>		Biosynthesis of the first component of complement by human fibroblasts. By K. B. M. Reid & E. Solomon	647
The separation and characterization of bronchial glycoproteins by density-gradient methods. By J. M. Creeth, K. R. Bhaskar, J. R. Horton, I. Das, M.-T. Lopez-Vidriero & L. Reid	557	The interaction of protein A and the Fc fragment of rabbit immunoglobulin G as probed by complement-fixation and nuclear-magnetic-resonance studies. By C. Wright, K. J. Willan, J. Sjö Dahl, D. R. Burton & R. A. Dwek	661
Enzymic and immunochemical properties of lysozyme. Accurate definition of the antigenic site around the disulphide bridge 30-115 (site 3) by 'surface simulation' synthesis. By C.-L. Lee and M. Z. Atassi	571	The reactivity of the thiol groups of the adenosine triphosphatase of sarcoplasmic reticulum and their location on tryptic fragments of the molecule. By D. A. Thorley-Lawson & N. M. Green	739
Localization of sites for ionic interaction with lipid in the C-terminal third of the bovine myelin basic protein. By A. J. S. Jones & M. G. Rumsby	583		

	PAGE		PAGE
The use of wheat-germ lectin-Sepharose for the purification of human haemopexin. By P. Vretblad & R. Hjorth	759	Human plasma uridine diphosphate galactose-glycoprotein galactosyltransferase. Purification, properties and kinetics of the enzyme-catalysed reaction. By A. Bella, Jr., J. S. Whitehead & Y. S. Kim	621
<b>Carbohydrates</b>		The degradation of cartilage proteoglycans and its susceptibility to proteolysis. By P. J. Roughley & A. J. Barrett	629
Interaction of cartilage proteoglycans with hyaluronic acid. The role of the hyaluronic acid carboxyl groups. By J. E. Christner, M. L. Brown & D. D. Dziewiatkowski	711	The degradation of cartilage proteoglycans by tissue proteinases. Proteoglycan heterogeneity and the pathway of proteolytic degradation. By P. J. Roughley	639
<b>Small Molecules</b>		The properties of a carboxylesterase from the peach-potato aphid, <i>Myzus persicae</i> (Sulz.), and its role in conferring insecticide resistance. By A. L. Devonshire	675
Conjugated and unconjugated bilirubins in bile of humans and rhesus monkeys. Structure of adult human and rhesus-monkey bilirubins compared with dog bilirubins. By S. G. Blumenthal, D. B. Taggart, R. M. Ikeda, B. H. Ruebner & D. E. Bergstrom	535	Fungal degradation of aromatic nitriles. Enzymology of C-N cleavage by <i>Fusarium solani</i> . By D. B. Harper	685
Incorporation of methionine-derived methyl groups into sirohaem by <i>Escherichia coli</i> . By L. M. Siegel, P. S. Davis & M. J. Murphy	669	Purification and properties of the hexosaminidase A-activating protein from human liver. By P. Hechtman & D. LeBlanc	693
<b>Enzymology</b>		Partial purification and properties of purine nucleoside phosphorylase from rabbit erythrocytes. By B. Savage & N. Spencer	703
Purification, biochemical characterization and serological analysis of cellular deoxyribonucleic acid polymerases and a reverse transcriptase from spleen of a patient with myelofibrotic syndrome. By P. Chandra & L. K. Steel	513	Preparation and characterization of substrates suitable for the study of stereospecific secondary alkylsulphohydrolases of detergent-degrading micro-organisms. By G. W. J. Matcham & K. S. Dodgson	717
Hydrolysis of synthetic pyrophosphoric esters by an isoenzyme of apyrase from <i>Solanum tuberosum</i> . By G. del Campo, J. Puente, M. A. Valenzuela, A. Traverso-Cori & O. Cori	525	Purification, properties and cellular localization of the stereospecific CS2 secondary alkylsulphohydrolase of <i>Comamonas terrigena</i> . By G. W. J. Matcham, K. S. Dodgson & J. W. Fitzgerald	723
Mixed-valence cytochrome oxidase-formate complex. A steady-state intermediate. By T. Brittain, C. Greenwood & A. Johnson	531	Heterogeneity of rabbit muscle creatine kinase and limited proteolysis by proteinase K. By J. Williamson, J. Greene, S. Chérif & E. J. Milner-White	731
Chemical modification of a cellulase from <i>Aspergillus niger</i> . By P. L. Hurst, P. A. Sullivan & M. G. Shepherd	549	The nature of the circular-dichroic spectra of complexes between ribonuclease A and nucleotides. By S. M. Dudkin, L. V. Karabashyan, M. Ya. Karpeisky, S. N. Mikhailov, N. Sh. Padyukova & V. G. Sakharovsky	749
The deoxyribonucleic acid polymerases from the diatom <i>Cylindrotheca fusiformis</i> . Partial purification and characterization of four distinct activities. By T. W. Okita & B. E. Volcani	601	The separation and characterization of marmoset kidney $\beta$ -D-galactosidase and $\beta$ -D-glucosidase. By R. J. Pierce, R. G. Price & J. S. L. Fowler	765
The deoxyribonucleic acid polymerases from the diatom <i>Cylindrotheca fusiformis</i> . Subcellular distribution, exonuclease activity and heterogeneity of the enzymes. By T. W. Okita & B. E. Volcani	611		

	PAGE		PAGE
Proteoglycan-degrading enzymes. A radiochemical assay method and the detection of a new enzyme, cathepsin F. By J. T. Dingle, A. M. J. Blow, A. J. Barrett & P. E. N. Martin	775	Degradation of myofibrillar proteins by cathepsins B and D. By W. N. Schwartz & J. W. C. Bird	811
Steady-state kinetic studies of the negative co-operativity and flip-flop mechanism for <i>Escherichia coli</i> alkaline phosphatase. By R. D. Waight, P. Leff & W. G. Bardsley	787	<b>General Methods</b>	
Benzofuroxan as thiol-specific reactivity probe. Kinetics of its reactions with papain, ficin, bromelain and low-molecular-weight thiols. By M. Shipton & K. Brocklehurst	799	Changes in apparent pH on freezing aqueous buffer solutions and their relevance to biochemical electron-paramagnetic-resonance spectroscopy. By D. L. Williams-Smith, R. C. Bray, M. J. Barber, A. D. Tsopanakis & S. P. Vincent	593
