Phytohemagglutinin, 79-150
PHA is a partially purified extract that will agglutinate erythrocytes of all human blood types as well as those of rabbit, dog, cat, mouse, sheep and guinea pig. PHA also possesses the ability to initiate mitoses. Each lot is provided with erythroagglutination and mitogenic activity titers.

Peanut Agglutinin, 79-151
Peanut agglutinin agglutinates lymphocytes from mouse, rat, guinea pig, and man only after treatment with neuraminidase. Treatment with β-galactosidase reduces agglutination of neuraminidase-treated lymphocytes.

ALSO AVAILABLE:
A wide range of Lectins in free and agarose-immobilized forms and as FITC-derivatives:

Concanavalin A and Con A Salts
Fucose Binding Protein (from lotus seed)
Soybean Agglutinin
Wheat Germ Agglutinin
Ferritin-Concanavalin A (for Electron microscopy)
Lens Culinaris Hemagglutinin A
Lens Culinaris Hemagglutinin B
Ricinus Communis Agglutinin—60
Ricinus Communis Agglutinin—120

More detailed descriptions of these products can be found in our new Biochemicals Catalog. If you don't have one, write the office nearest you for your free copy.
100 new labelled compounds

Our new Radiochemical Catalogue lists more than a hundred new additions to our established range of over 1200 labelled compounds and radionuclides.

Many compounds have improved specific activities and all are supplied to our usual high standards of purity.

Please write for your copy of our 1977/78 catalogue now, and remember that our compounds can be supplied to all parts of the world in 2-3 days.

CONTENTS

Editorial Review: Lactic acidosis: some physiological and clinical considerations By R. D. COHEN and R. A. ILES

Detection of Na+ and K+ in the rat adrenal cortex with the electron microprobe. By C. DECORZANT, A. M. RIONDEL,

Control of renal tubular phosphate reabsorption by parathyroid hormone in man. By D. A. WALKER, S. JOYCE

Davies, K. SIDDLE and J. S. WOODHEAD

Vitamin D metabolism in adult rats at low and normal calcium intake and the effect of cadmium exposure. By R.

LORENZON and S.-E. LARSSON

Decreased plasma renin activity and renin release in rats with phaeochromocytoma. By J. C. S. FRAY and P. V. H.

MAYER

The carriers of native vitamin B12 in normal human serum. By C. A. HALL

Interacellar pH and bicarbonate concentration as determined in biopsy samples from the quadriceps muscle of man

at rest. By K. SAHLIN, A. ALVISTRAND, J. BERGSTROM and E. HULTMAN

Some aspects of sodium movement across porcine aortic walls In vitro. By I. R. EDWARDS

Protein turnover, synthesis and breakdown before and after recovery from protein-energy malnutrition. By M. H. N.

GOLDEN, J. C. WATERLOW and D. PICOU

Arrested bone growth and mineral maturation in sub-totally nephrectomized rats. By J. M. LETTERI, R. M. BILTZ,

K. J. ELLIS, A. MARTINO, S. YASUMURA, D. BROOK, S. H. COHN and E. D. PELLEGRINO

Effects of analgesics and related compounds on renal metabolism in rats. By J. D. TANGE, B. D. ROSS and J. G. G.

LEDINGHAM

Urine electrolyte response to 18-hydroxy-11-deoxycorticosterone in normal man. By M. G. NICHOLLS, R. FRASER,

G. HAY, P. MASON and B. TORSNEY

SHORT COMMUNICATION

CORRESPONDENCE SECTION

Open-circuit method for measuring carbon dioxide tension in venous blood. By N. L. JONES, G. F. HEGENHAUSER,

E. J. M. CAMPBELL, REIAH AL-DULYMI and R. HAINESSWORTH

The subscription price is £35.00 (U.K.) £35.00 (Overseas) $120.00 (North America)

per annum, post free.

VOLUME 2

ESSAYS IN MEDICAL BIOCHEMISTRY

Edited by V. MARKS and C. N. HALEES

187 pp. £4.00 (US $8.00) by surface mail to overseas addresses

Volume 2 of Essays in Medical Biochemistry continues the practice established in the first of providing, in readable form, highly authoritative but personal reviews of topics that are of general interest to medical biochemists. The subjects chosen for review are those that have undergone growth as a result of major conceptual and technological advances, and include essays by acknowledged world experts on complement, trace metals, acquired disorders of haem synthesis and chronobiochemistry.

List of Contents and Authors:

The Human Complement System: Biochemistry, Biology and Pathobiology
By D. T. Fearon and K. F. Austen

The Clinical Value of Trace-Metal Measurements
By H. T. Delves

Acquired Disorders of Haem Synthesis
By G. H. Elder

A New Perspective: Chronobiochemistry
By H. W. Simpson

Still Available:

ESSAYS IN MEDICAL BIOCHEMISTRY VOLUME 1
131 pp. £2.00 (US $5.00)
