VOLUME 2

ESSAYS IN MEDICAL BIOCHEMISTRY

Edited by V. MARKS and C. N. HALES

187 pp. £4.00 (US $8.00) by surface mail to overseas addresses

Volume 2 of Essays in Medical Biochemistry continues the practice established in the first of providing, in readable form, highly authoritative but personal reviews of topics that are of general interest to medical biochemists. The subjects chosen for review are those that have undergone growth as a result of major conceptual and technological advances, and include essays by acknowledged world experts on complement, trace metals, acquired disorders of haem synthesis and chronobiochemistry.

List of Contents and Authors:
The Human Complement System: Biochemistry, Biology and Pathobiology
  By D. T. Fearon and K. F. Austen

The Clinical Value of Trace-Metal Measurements
  By H. T. Delves

Acquired Disorders of Haem Synthesis
  By G. H. Elder

A New Perspective: Chronobiochemistry
  By H. W. Simpson

Still Available:
ESSAYS IN MEDICAL BIOCHEMISTRY VOLUME 1
131 pp. £2.00 (US $5.00)

Vitamin D

Biochemical, Chemical and Clinical
Aspects related to Calcium Metabolism
Proceedings of the Third Workshop on Vitamin D, Asilomar, Pacific Grove, California, USA, January 1977

1977. Large-octavo. XLI, 1006 pages.
With numerous illustrations.
Bound DM 175,- ISBN 3110069180

This book gives a survey of present knowledge and research on numerous facets of calcium and bone metabolism. The problems are presented and discussed from various standpoints (biochemists, clinicians, osteologists). In addition, a report is made on the latest vitamin D research. The main point of these proceedings is the timeliness of each single contribution as well as the very informative summary of current problems of calcium metabolism, especially in reference to clinical aspects and perspectives. This book is of interest to those engaged in calcium metabolism, vitamin D research, problems of chronic kidney insufficiency, general osteologic problems, and endocrinology.
