ADVANCES IN ENZYMOLOGY And Related Areas of Molecular Biology Vol. 46

edited by A. Meister, *Cornell University Medical College, New York.*

This series reviews the progress made in the various branches of this rapidly expanding science and has become essential to all those who wish to keep abreast of the literature.

In Press approx. 480 pages
0471 02993 9 approx. \$35.55/£21.00

APPLICATIONS OF ION SELECTIVE MEMBRANE ELECTRODES IN ORGANIC ANALYSIS

by G.E. Baiulescu, *Polytechnic Institute of Bucharest,*
and V.V. Cosofret, *Institute of Chemical and Pharmaceutical Research, Bucharest.*

This book contains the first complete coverage in English of ion-selective electrodes in organic analysis. Their use, unknown in routine analysis until recent years, has now become widespread and spectacular, especially since the discovery of gas-sensor, enzyme and other new electrodes, and has great potential for future development.

INTERMOLECULAR INTERACTIONS From Diatomics to Biopolymers

edited by B. Pullman, *Institut de Biologie Physico-Chimique, Fondation Edmond de Rothschild, Paris.*

The first volume of this series was devoted to quantum mechanics of molecular conformations, that is, to the study of intramolecular interactions. This present volume extends this subject to intermolecular interactions. (Series: Perspectives in Quantum Chemistry and Biochemistry Vol. 2, Series Editor: B. Pullman)

In Press approx. 456 pages
0471 99507 X approx. \$39.50/£20.00

TOPICS IN HORMONE CHEMISTRY Vol. 1

edited by W.R. Butt, *Director of the Department of Clinical Endocrinology, The Birmingham and Midland Hospital for Women.*

The first four chapters of this volume describe mammalian hormones of recent interest considered from physiological, biological and chemical standpoints. Two concluding chapters describe comparative research into insect and fungal hormones.

In Press approx. 272 pages
085312 067 6 approx. \$30.40/£16.00

Published by Ellis Horwood Ltd., Chichester, and distributed by John Wiley & Sons Ltd.

BIOLOGICALLY ACTIVE SUBSTANCES: Exploration and Exploitation

edited by D.A. Hems, *Department of Biochemistry, St. George's Hospital Medical School, Hyde Park Corner, London.*

This volume presents a brief survey of the many-faceted scientific career of Sir Ernst Chain. His achievements in the purification and therapeutic applications of penicillin, with Professor Howard Florey and others at Oxford, are reviewed, together with his contributions to the biochemistry of other antibiotics, ergot alkaloids, nucleic acids and insulin. Sir Ernst's work on the understanding of the biochemical mechanism of nerve impulse transmission is also discussed.

CHEMISTRY AND BIOLOGY OF THROMBIN

edited by R.L. Lundblad, *Department of Pathology, University of North Carolina, Chapel Hill;*
K.G. Mann, *Section for Hematology Research, Mayo Clinic and Foundation, Rochester, Minnesota,*
and J.W. Fenton, *New York State Department of Health, Division of Laboratory, Albany, New York.*

Proceedings of the 1977 Conference on the Chemistry and Biology of Thrombin.

This book covers advances in studies of the relationship between structure and function of thrombin, a pivotal enzyme in blood coagulation. It provides up-to-date coverage, including protein chemistry of thrombin, clinical aspects of thrombin and blood coagulation, and blood coagulation physiology.

In Press approx. 440 pages
0250 40160 6 approx. \$24.75/£15.10
Published by Ann Arbor Science Inc., and distributed by John Wiley & Sons Ltd.

ESSAYS IN NEUROCHEMISTRY AND NEUROPHARMACOLOGY Vol. 2

edited by M.B.H. Youdim, *Technion-Israel Institute of Technology, Haifa, Israel (formerly MRC Clinical Pharmacology Unit, Radcliffe Infirmary, Oxford);*

W. Lovenberg, *National Heart and Lung Institute, Bethesda, Maryland, USA;*

J.R. Lagnado, *Department of Biochemistry, Bedford College, University of London,*

and D.F. Sharman, *Institute of Animal Physiology, Babraham, Cambridge.*

The Essays in Neurochemistry and Neuropharmacology have been written for postgraduate students and researchers who wish to familiarize themselves with current specific problems in neurochemistry and neuropharmacology.

VOLUME 2

ESSAYS IN MEDICAL BIOCHEMISTRY

Edited by V. MARKS and C. N. HALES

187 pp. £4.00 (US \$8.00) by surface mail to overseas addresses

Volume 2 of *Essays in Medical Biochemistry* continues the practice established in the first of providing, in readable form, highly authoritative but personal reviews of topics that are of general interest to medical biochemists. The subjects chosen for review are those that have undergone growth as a result of major conceptual and technological advances, and include essays by acknowledged world experts on complement, trace metals, acquired disorders of haem synthesis and chronobiochemistry.

List of Contents and Authors:

The Human Complement System: Biochemistry, Biology and Pathobiology

By D. T. Fearon and K. F. Austen

The Clinical Value of Trace-Metal Measurements

By H. T. Delves

Acquired Disorders of Haem Synthesis

By G. H. Elder

A New Perspective: Chronobiochemistry

By H. W. Simpson

Still Available:

ESSAYS IN MEDICAL BIOCHEMISTRY VOLUME 1

131 pp. £2.00 (US \$5.00)

100 new labelled compounds

Our new Radiochemical Catalogue lists more than a hundred new additions to our established range of over 1200 labelled compounds and radionuclides.

Many compounds have improved specific activities and all are supplied to our usual high standards of purity.

Please write for your copy of our 1977/78 catalogue now, and remember that our compounds can be supplied to all parts of the world in 2-3 days.
