

Cellular Aspects

Contents of Volume 176, No. 2, 1978

FULL PAPERS

	PAGE		PAGE
Biosynthesis and Degradation			
Oxidation of glycine by <i>Phaseolus</i> leghaemoglobin with associated catabolic reactions at the haem. By P. Lehtovaara	351	The hydrolysis of phosphatidylinositol by lysosomal enzymes of rat liver and brain. By R. F. Irvine, N. Hemington & R. M. C. Dawson	475
Bile-pigment formation from different leg-haemoglobins. Methine-bridge specificity of coupled oxidation. By P. Lehtovaara & U. Perttilä	359	Growth and muscle protein turnover in the chick. By K. Maruyama, M. L. Sunde & R. W. Swick	573
Effect of modeccin on the steps of peptide-chain elongation. By L. Montanaro, S. Sperti, M. Zamboni, M. Denaro, G. Testoni, A. Gasperi-Campani & F. Stirpe	371	Bioenergetics	
Turnover of muscle protein in the fowl (<i>Gallus domesticus</i>). Rates of protein synthesis in fast and slow skeletal, cardiac and smooth muscle of the adult fowl. By G. J. Laurent, M. P. Sparrow, P. C. Bates & D. J. Millward	439	The regulation of extramitochondrial free calcium ion concentration by rat liver mitochondria. By D. G. Nicholls	463
<i>Appendix:</i> An analysis of errors in estimation of the rate of protein synthesis by constant infusion of a labelled amino acid. By P. J. Garlick	402	Characterization of an <i>Escherichia coli</i> K12 mutant that is sensitive to chlorate when grown aerobically. By G. Giordano, L. Grillet, R. Rosset, J. H. Dou, E. Azoulay & B. A. Haddock	553
Turnover of muscle protein in the fowl. Changes in rates of protein synthesis and breakdown during hypertrophy of the anterior and posterior latissimus dorsi muscles. By G. J. Laurent, M. P. Sparrow & D. J. Millward	407	Subcellular Structures	
Turnover of muscle protein in the fowl. Collagen content and turnover in cardiac and skeletal muscles of the adult fowl and the changes during stretch-induced growth. By G. J. Laurent, M. P. Sparrow, P. C. Bates & D. J. Millward	419	A rapid method for the preparation of relatively pure metabolically competent synaptosomes from rat brain. By R. F. G. Booth & J. B. Clark	365
Ovalbumin digestion by human pepsins 1, 3 and 5. By V. Walker & W. H. Taylor	429	Effect of various methods of preparation on the apparent protein composition of eukaryotic ribosomes. An essential preliminary to stoichiometric measurements. By P. Huvos, S. Fey & P. M. D. Hardwicke	381
Participation of cysteine and cystine in inactivation of tyrosine aminotransferase in rat liver homogenates. By W. T. Buckley & L. P. Milligan	449	The acidic ribosomal phosphoprotein of eukaryotes and its relationship to ribosomal proteins L7 and L12 of <i>Escherichia coli</i> . By D. P. Leader & A. A. Coia	569
Studies on the fate of pulmonary surfactant in the lung. By R. Desai, T. D. Tetley, C. G. Curtis, G. M. Powell & R. J. Richards	455	Cellular Interactions and Control Processes	
		Regulation of prostaglandin synthesis and of the selective release of lysosomal hydrolases by mouse peritoneal macrophages. By R. J. Bonney, P. D. Wightman, P. Davies, S. J. Sadowski, F. A. Kuehl, Jr. & J. L. Humes	433
		Systematic variations in the content of the purine nucleotides in the steady-state perfused rat heart. Evidence for the existence of controlled storage and release of adenine nucleotides. By D. J. Bates, D. Perrett & J. Mowbray	485

	PAGE		PAGE
Hyperglycaemic activity and metabolic effects of 3-aminopicolinic acid. By M. J. MacDonald, M.-T. Huang & H. A. Lardy	495	Effect of alloxan-diabetes on gluconeogenesis and ureogenesis in isolated rabbit liver cells. By J. Zaleski & J. Bryła	563
Effects of cholera toxin and guanosine 5'-[β -imido]triphosphate on β -adrenergic-receptor affinity. By J. Fischer & G. W. G. Sharp	505	A method for measuring relative changes in guanosine 3':5'-cyclic monophosphate in mouse neuroblastoma cells on muscarinic cholinergic stimulation. By P. G. Strange	583
The oestrogen receptor in the rat uterus in relation to intra-uterine devices and the oestrous cycle. By L. Myatt, G. Chaudhuri, M. G. Elder & L. Lim	523	Development	
Interaction of progestins with steroid receptors in human uterus. By A. Kasid, K. Buckshee, V. Hingorani & K. R. Laumas	531	The metabolism of high-molecular-weight ribonucleic acid in hypothalamic and cortical regions of the developing female rat brain. By C. Hall & L. Lim	511
Calcium-activated hydrolysis of phosphatidyl- <i>myo</i> -inositol 4-phosphate and phosphatidyl- <i>myo</i> -inositol 4,5-bisphosphate in guinea-pig synaptosomes. By H. D. Griffin & J. N. Hawthorne	541	Metabolism in Whole Organisms	
		Biliary excretion of cyclohexylphenyl 4-[35 S]-sulphate in the guinea pig. By G. M. Powell, A. H. Olavesen & C. G. Curtis	443

RAPID PAPERS

	PAGE		PAGE
Biosynthesis and Degradation		Opposite effects of starvation on oxidation of [14 C]adenosine and adenosine-induced insulin release by isolated mouse pancreatic islets. By A. Andersson	619
The effects of food deprivation on protein turnover and nucleic acid concentrations of active and immobilized extensor digitorum longus muscles of the rat. By D. F. Goldspink	603	The role of phosphoenolpyruvate carboxy-kinase in amino acid metabolism in muscle. By E. A. Newsholme & T. Williams	623
Initiation of transcription in normal and phosphorylated rat liver nucleosomes. By M. G. Ord & L. A. Stocken	615	Activation of pyruvate dehydrogenase in the perfused rat liver by vasopressin. By D. A. Hems, J. G. McCormack & R. M. Denton	627
Subcellular Structures		Control of phosphatidylcholine synthesis and the regulatory role of choline kinase in rat liver. Evidence from essential-fatty acid-deficient rats. By J. P. Infante & J. E. Kinsella	631
Proteinase-sensitive release of enzymes from pancreatic microsomal fraction. By P. D. Pearce, B. K. May & W. H. Elliott	611	Utilization of D-3-hydroxy[3- 14 C]butyrate for lipogenesis <i>in vivo</i> in lactating rat mammary gland. By A. M. Robinson & D. H. Williamson	635
Cellular Interactions and Control Processes		Metabolism in Whole Organisms	
Malonaldehyde formation in intact platelets is catalysed by thromboxane synthase. By R. M. McMillan, D. E. MacIntyre, A. Booth & J. L. Gordon	595	An improved 11 α -hydroxylation of progesterone by <i>Aspergillus ochraceus</i> TS. By T. B. Samanta, N. Roy & S. Chattopadhyay	593
Recognition of the beta-subunit of human chorionic gonadotropin and sub-determinants by target tissue receptors. By S. Ramakrishnan, C. Das & G. P. Talwar	599		
Rat adipose-tissue glycerol phosphate acyl-transferase can be inactivated by cyclic AMP-dependent protein kinase. By H. G. Nimmo & B. Houston	607
