

First the good news

for all of you who
use the following biochemicals:

ADP
AMP
ATP
DL-Alanine
L-Alanine
ADH
L-Aspartic acid

Cholesterol Esterase
Cholesterol Oxidase
CK
Collagenase
CoA
Creatine Phosphate
Dithiothreitol

GOD
G-6-P
G-6-PDH
GK
HK
LDH
MDH

NADH
NAD
NADP
NADPH
POD
Urease
Uricase
XOD

**And now
the better
NEWS!**

All of the above come to you at
really competitive prices. Order to-day
and/or request further information from:

Plus many other nucleotides
and substrates from our research
chemical catalogue.

Cambrian are pleased to
announce the introduction of this
new range of biochemicals, from the
world's leading manufacturers, for
use in research and clinical
chemistry. The specifications of
these products equal or exceed
those of current U.K. suppliers and
together with our by return service,
in-house Q.C. and technical support,
add up to a major advance in
biochemistry.

CAMBRIAN CHEMICALS

**[³H]-
thymidine**

**The Radiochemical Centre
Amersham**

Full information is available on request.
The Radiochemical Centre Limited, Amersham,
England. Telephone: 024-04-4444.
In the U.S.A. and Canada: Amersham Corporation,
Illinois 60005. Telephone: 312-364-7100
and 800/323-9750 (Tollfree).
In W. Germany: Amersham Buchler GmbH & Co KG,
Braunschweig. Telephone: 05307-4691.

What's new with tritiated thymidine?

- A wide choice of specific activities from 2-100 Ci/mmol
- A choice of solvent in most cases; aqueous solution or aqueous solution containing ethanol
- A wide choice of position of the label — in every case the specificity of labelling has been checked by tnmr

All our batches are purified by HPLC ensuring consistently high purities and good stability.

Amersham also supplies the hottest [¹⁴C]Thymidine — our current batch is at 559 mCi/mmol.

For the best range of labelled thymidines — call Amersham

BIOCHEMICAL NOMENCLATURE

AND

RELATED DOCUMENTS

This compendium, previously published under the title of *Collected Tentative Rules and Recommendations of the Commission on Biochemical Nomenclature* has now been updated and published in its third edition for the International Union of Biochemistry by the Biochemical Society under the title: *Biochemical Nomenclature and Related Documents*.

The compendium, prepared by the IUB Committee of Editors of Biochemical Journals, collects together all the current rules and recommendations on nomenclature that have emanated from the IUPAC-IUB and IUB nomenclature committees. As such it is an indispensable part of the library of all biochemists.

The price is £3.50/US\$7.00, postage-paid (vi plus 223 pages, paper bound). A 20% discount is allowable on orders for 10 or more copies to a single address. Payment must accompany the order.

Order from The Biochemical Society Book Depot, P.O. Box 32, Commerce Way, Colchester CO2 8HP Essex, U.K.

Meldola blue—the New breakthrough in:

Histochemical demonstration of
dehydrogenases (SDH, LDH, G6P-DH)

Colorimetric determination of Ascorbic acid

Isoenzyme staining after electrophoresis

Determination of reduced pyridine Co-factors

Colorimetric determination of
dehydrogenases

Several important advantages over PMS

It is not light sensitive—No need to protect
from light during use.

It is non-auto-oxidisable—Meldola blue is a
more sensitive catalyst than PMS.

It is more economical in use—saves you
money

For more details about Meldola Blue and its
uses, please contact our Technical
Department on Lewes (07916) 71611

BCL, Bell Lane, Lewes,
East Sussex BN7 1LG
