## BIOCHEMICAL NOMENCLATURE

AND

### RELATED DOCUMENTS

This compendium, previously published under the title of *Collected Tentative Rules and Recommendations of the Commission on Biochemical Nomenclature* has now been updated and published in its third edition for the International Union of Biochemistry by the Biochemical Society under the title: *Biochemical Nomenclature and Related Documents*.

The compendium, prepared by the IUB Committee of Editors of Biochemical Journals, collects together all the current rules and recommendations on nomenclature that have emanated from the IUPAC-IUB and IUB nomenclature committees. As such it is an indispensable part of the library of all biochemists.

The price is £3.50/US\$7.00, postage-paid (vi plus 223 pages, paper bound). A 20% discount is allowable on orders for 10 or more copies to a single address. Payment must accompany the order.

# Safety in Biological Laboratories

Edited by E.F. HARTREE and V.H. BOOTH

68 pp + xii

ISBN 0904498 05 0

£1.60 (U.S. \$ 3.00)

A concise, easily readable guide for workers in Life-Science Laboratories. Emphasis is on **SAFETY** rather than **DANGER**, on avoidance of risks, elimination of hazards, and on the need for safety consciousness for the benefit of others as well as the worker's own person. Among topics discussed are radiation, animals, pathogens, carcinogens and other dangerous substances, vacuum distillation, fire and electricity as well as such simple operations as emptying autoclaves and connecting plastic tubing to glass tubing. The booklet is intended for all who work in laboratories, from the newest assistant to the head of department (who may come to realize that some of their standard practices contain avoidable elements of danger). Generous discounts are offered for bulk purchase: 6-10 copies, less 10%; 11-20 copies, less 20%; 21-50 copies, less 30%; 51 copies or more, less 40%.

The booklet should help every reader to be more likely to survive and to pass on the message:  
**SAFETY IN BIOLOGICAL LABORATORIES**

# The Lymphocyte Cell Surface

Edited by **P. B. Garland** and **M. J. Crumpton**

pp. 124 (ISBN 0 904498 10 7) £15.00 (US\$35.00)

A Biochemical Society Symposium held in Cambridge in June 1979

The Biochemical Society's Forty-fifth Symposium held at Cambridge in June 1979 dealt with two areas of biomedical research currently regarded as among the most exciting and clinically important research interests: the molecular mechanics of the immune response and the biochemistry of the cell surface. Speakers at the Symposium reviewed results from this work and in addition gave emphasis to those research aspects providing greatest promise in future work with the lymphocyte. A number of the major contributions to the Symposium form the basis of this publication.
