

# Cellular Aspects

## Contents of Volume 198, No. 1, 1981

**Review Article**

The red cell membrane and its cytoskeleton

W. B. GRATZER

1-8

**Protein Turnover**O-(4-Diazo-3,5-di[<sup>125</sup>I]iodobenzoyl)sucrose, a novel radioactive label for determining organ sites of catabolism of plasma proteins

A. S. H. DE JONG, J. M. W. BOUMA &amp; M. GRUBER

45-51

Protein turnover in pulmonary macrophages. Utilization of amino acids derived from protein degradation

J. A. HAMMER, III &amp; D. E. RANNELS

53-65

Selective depletion of small basic non-glycosylated proteins in diabetes

F. C. SAMANIEGO, F. BERRY &amp; J. F. DICE

149-157

**Metabolism, Regulation and Control Processes**

New form of acid phosphatase during lysosome biogenesis

G. R. RAO, H. N. AITHAL, F. G. TOBACK &amp; G. S. GETZ

9-15

Evidence for the stimulation of dolichol and mannosid synthesis by glucocorticoids in HeLa cells

C. K. RAMACHANDRAN, C. E. HIGNITE, S. L. GRAY &amp; G. MELNYKOVYCH

23-28

The effect of bromodeoxyuridine and dibutyryl cyclic AMP on the induction of placental alkaline phosphatase in human choriocarcinoma cells

T. A. HAMILTON &amp; H. H. SUSSMAN

29-35

Mono- and poly-ADP-ribosylation of protein in mouse kidney after castration and testosterone treatment

A. GARTEMANN, R. BREDEHORST, K. WIELCKENS, W. H. STRÄTLING &amp; H. HILZ

37-44

V. A. ZAMMIT

75-83

Regulation of hepatic fatty acid metabolism. The activities of mitochondrial and microsomal acyl-CoA :sn-glycerol 3-phosphate O-acyltransferase and the concentrations of malonyl-CoA, non-esterified and esterified carnitine, glycerol 3-phosphate, ketone bodies and long-chain acyl-CoA esters in livers of fed or starved pregnant, lactating and weaned rats

C. T. TENG &amp; C. S. TENG

85-90

Changes in quantities of high-mobility-group protein 1 in oviduct cellular fractions after oestrogen stimulation

S. ONISHI, N. KAWADE, S. ITOH, K. ISOBE, S. SUGIYAMA, T. HASHIMOTO &amp; H. NARITA

107-112

C. C. WINTERBOURN

125-131

Kinetics of biliary excretion of the main two bilirubin photoproducts after injection into Gunn rats

S. BJÖRNSSON &amp; D. HEINEGÅRD

141-148

W. K. PALMER, R. A. CARUSO &amp;

159-166

L. B. OSCAI

N. D. LALWANI, M. K. REDDY, M. MANGKORNKANOK/MARK &amp;

177-186

J. K. REDDY

Induction, immunochemical identity and immunofluorescence localization of an 80 000-molecular-weight peroxisome-proliferation-associated polypeptide (polypeptide PPA-80) and peroxisomal enoyl-CoA hydratase of mouse liver and renal cortex

P. MARTYN &amp; I. A. HANSEN

187-192

Initiation of lipogenic enzyme activities in rat mammary glands

A. V. M. JONES, J. L. HARWOOD, M. R. L. STRATFORD &amp; P. K. STUMPF

193-198

N. KATOH, B. C. WISE, R. W. WRENN &amp; J. F. KUO

199-205

Inhibition by adriamycin of calmodulin-sensitive and phospholipid-sensitive calcium-dependent phosphorylation of endogenous proteins from heart
