### Cellular Aspects

**Contents of Volume 200, No. 3, 1981**

#### Protein Biosynthesis/Molecular Genetics
- Glucocorticoid and developmental regulation of uteroglobin synthesis in rabbit lung
  - M. Lombardo & A. Nieto 487–494
- Independent biosynthesis of soluble and membrane-bound alkaline phosphatases in the suckling rat ileum

#### Metabolism, Regulation and Control Processes
- Calmodulin activation of rat lung adenylate cyclase is independent of the cytoplasmic factors modulating the enzyme
  - A. F. Opulue & M. S. Nijjar 475–480
- The metabolic origin of trigonelline in the rat
  - J. S. Sandhu & D. R. Fraser 495–500
- The dependence on Ca\(^{2+}\) of phosphatidylinositol breakdown and enzyme secretion in rabbit neutrophils stimulated by formylmethionylleucylphenylalanine or ionomycin
  - S. Cockcroft, J. P. Bennett & B. D. Gomperts 501–508
- Heterologous desensitization of the cyclic AMP-independent glycogenolytic response in rat liver cells
  - B. Bréant, S. Keppens & H. De Wulf 509–514
- Rat liver microsomes catalyse mannosyl transfer from GDP-d-mannose to retinyl phosphate with high efficiency in the absence of detergents
  - Y. Shidoji & L. M. De Luca 529–538
- Hepatic uptake of phospholipid-depleted chylomicrons *in vivo*. Comparison with the uptake of chylomicron remnants
  - J. Borensztajn & T. J. Kotlar 547–553
- The effect of chloroquine on the metabolism of \[^{35}S\]cystine in normal and cystinotic human skin fibroblasts
  - C. J. Danpure 555–563
- Hormonal regulation of retinoic acid-binding proteins in the mammary gland
  - R. G. Mehta & R. C. Moon 591–595
- Effect of NADH on hypoxanthine hydroxylation by native NAD\(^{+}\)-dependent xanthine oxidoreductase of rat liver, and the possible biological role of this effect
  - Z. W. Kamiński & M. M. Jeżewska 597–603
- The metabolism of L-tryptophan by liver cells prepared from adrenalectomized and streptozotocin-diabetic rats
  - S. A. Smith & C. I. Pogson 605–609
- Differences between tissues in response of S-adenosylmethionine decarboxylase to administration of polyamines
  - H. Pásó & A. E. Pegg 629–637
- Regulation of acetyl-CoA carboxylase in rat mammary gland. Effects of incubation with Ca\(^{2+}\), Mg\(^{2+}\) and ATP on enzyme activity in tissue extracts
  - E. M. McNeillie, R. A. Clegg & V. A. Zammit 639–644
- The effects of dietary lipid and phenobarbitone on the production and utilization of NADPH in the liver. A combined biochemical and quantitative cytochemical study
  - M. T. Smith & E. D. Wills 691–699
- Tricarboxylic acid cycle flux and enzyme activities in the isolated working rat heart
  - G. J. Cooney, H. Taegtmeyer & E. A. Newsholme 701–703
- Effect of premature weaning on amino acid uptake by the mammary gland of lactating rats

#### Cell Surfaces and Receptors
- Radioimmunoassay measurements of nuclear dehydrotestosterone in rat prostate. Relationship to androgen receptors and androgen-regulated responses
- Unoccupied binding sites for oestrogen in nuclei of a breast tumour cell line (MCF-7)
  - A. Geier, M. Haimsohn, Z. Malik & B. Lunenfeld 515–520
Developmental Biochemistry

Changes in the phospholipid catabolism of mitochondria and microsomes during the development of rat liver

J. K. Pollak & W. Harsas 521–528

Placental alkaline phosphatase isoenzyme expression by the non-HeLa DoT cervical-carcinoma cell line

Membranes, Transport, Bioenergetics and Photosynthesis

Parallel efflux of Ca\(^{2+}\) and P\(_i\) in energized rat liver mitochondria

M. Rugolo, D. Siliprandi, N. Siliprandi & A. Toninello 481–486

Steady-state H\(^+/O\) stoichiometry of liver mitochondria

M. K. Al-Shawi & M. D. Brand 539–546

Evidence for the extracellular reduction of ferricyanide by rat liver. A trans-plasma membrane redox system

M. G. Clark, E. J. Partick, G. S. Patten, F. L. Crane, H. Löw & C. Grebing 565–572

Quantitative measurements of the proton-motive force and its relation to steady state lactose accumulation in Escherichia coli

S. Ahmed & I. R. Booth 573–581

The effects of partial and selective reduction in the components of the proton-motive force on lactose uptake in Escherichia coli

S. Ahmed & I. R. Booth 583–589

Energization of the transport systems for arabinose and comparison with galactose transport in Escherichia coli

Involvement of the endogenous inhibitor protein in the MgATP-induced inhibition of soluble mitochondrial adenosine triphosphatase activity

P. N. Lowe & R. B. Beechey 655–661

Composition, stability and electrolyte permeability of Golgi membranes from lactating-rat mammary gland

M. D. White, S. Ward & N. J. Kuhn 663–669

Ca\(^{2+}\)-uptake properties of two populations of mitochondria from normal and denervated rat soleus muscle

M. Joffe, N. Savage & H. Isaacs 671–677

Alloxan-induced luminol luminescence as a tool for investigating mechanisms of radical-mediated diabetogenicity

K. Grankvist 685–690

B. J. Letter

Induction of 5-aminolaevulinate synthase in chick embryo liver by propylisopropylacetamide does not involve destruction of cytochrome P-450
