LIPID-PROTEIN INTERACTIONS

edited by **P.C. Jost** and **O.H. Griffith**, *Institute of Molecular Biology and Department of Chemistry, University of Oregon, Eugene, Oregon*

It is the aim of these volumes to bring together advances in the molecular biology of protein associations with lipid, so that an investigator in any of these fields will be aware of fundamental developments.

Volume 1

Deals with water lipid-protein soluble complexes and the other focuses on membrane systems. Also included is a thorough compilation of data on the thermotropic behavior of phospholipids that is relevant to many of the experimental approaches to lipid-protein interactions in both water-soluble and membrane systems.

June 1982 approx. 376pp
0471 06457 2 approx. \$42.25/£25.55

Volume 2

Discusses the structural organization of myelin and lipid-protein interactions of both the small water insoluble protein, lipophyllin, and the water-soluble highly basic protein. It discusses the structure of membrane proteins and describes the results of spin labelling experiments in investigating the lipid dynamics and average lipid composition at the lipid interface. It considers the application and potential of nuclear magnetic resonance in the study of lipid-protein interactions in membranes. Examines the general properties of various classes of useful photoreactive species, some synthetic procedures, and the results of photochemical cross-linking studies on several membrane proteins. Also provides a quantitative treatment of the interaction of proteins with amphiphiles such as detergents.

May 1982 approx. 328pp
0471 06456 4 approx. \$42.25/£25.55

TRACING NEURAL CONNECTIONS WITH HORSERADISH PEROXIDASE

IBRO Handbook Series: Methods in the Neurosciences;
General Editor: **A.D. Smith**

edited by **M-Marsel Mesulam**, *Bullard and Denny-Brown Laboratories and Behavioral Neurology Section of the Harvard Neurology Department*

January 1982 268pp
0471 10028 5 (cloth) \$52.00/£22.00
0471 10029 3 (paper) \$26.00/£11.00

BIOLOGICAL ASPECTS OF SCHIZOPHRENIA AND ADDICTION

edited by **G. Hemmings**, *Honorary Secretary, The Schizophrenia Association of Great Britain*

June 1982 approx. 260pp
0471 10117 6 approx. \$42.00/£18.50

IRON-SULPHUR PROTEINS

edited by **T.G. Spiro**, *Princeton University*

The fourth volume in this series which surveys recent research into the structural chemistry at the biological sites where metal ions are found. It presents important findings on the proteins containing iron bound to inorganic sulfide and cysteine thiolate. Experts examine issues such as how to determine the type of iron-sulphur complex in a given protein; the role iron-sulfur proteins play in iron storage; the discovery of three-iron proteins, complementary to the well-known one-, two-, and four-iron classes; the resonance Raman (RR) spectra of iron-sulfur proteins and their analogs.

Metal Ions in Biology Series, Vol. 4

June 1982 approx. 480pp
0471 07738 0 approx. \$56.55/£31.45

METHODS OF BIOCHEMICAL ANALYSIS, Vol. 28

edited by **D. Glick**, *Stanford University Medical Center, California*

Each volume of this series will contain 10-15 chapters that deal with a particular determination or group of related determinations that are of great interest and use to biochemists. Chemical, physical, and biological assays will be included, as well as basic techniques and instrumentation for the determination of enzymes, vitamins, hormones, lipids, carbohydrates, proteins, minerals, antimetabolites, etc.

June 1982 approx. 416pp
0471 08370 4 approx. \$43.25/£24.05

CHEMISTRY OF HETEROCYCLIC COMPOUNDS IN FLAVOURS AND AROMAS

by **G. Vernin**, *Maitre de Recherche in Organic Chemistry, National Centre of Scientific Research, Marseille, France*
Preface written by **J. Metzger**

This comprehensive new treatise deals with the chemistry of all known heterocyclic flavouring and aroma compounds, their formation from precursors, their occurrence, and their utilisation.

May 1982 approx. 320pp
085312 263 6 approx. \$68.25/£35.00

BIOCHEMICAL SOCIETY SYMPOSIA No. 46

Mobility and Migration of Biological Molecules

Edited by P. B. GARLAND and R. J. P. WILLIAMS

Mobility and Migration of Biological Molecules was the title of the Biochemical Society's Forty-sixth Symposium held in London in December 1980. The fifteen papers presented by leading biochemists involved in research studies of molecular movement are now published in this book. In particular, the aspects of intramolecular movements of proteins, movements of ions and reaction intermediates in proteins (including the structure and function of ion channels), rotational and lateral movements in biomembranes and movements of proteins across membranes are discussed in detail. *Mobility and Migration of Biological Molecules* offers the specialist a valuable review of the existing state of knowledge and useful signposts for the directions further research must take.

Writing a Scientific Paper & Speaking at Scientific Meetings

By Vernon Booth

Soft cover 48 pp.
£2.50 (US\$6.00)

To the newly revised and amplified fifth edition of *Writing a Scientific Paper*, the author has added the companion essay on *Speaking at Scientific Meetings*. Widely praised in its earlier editions, this concise compendium of advice is expected to receive renewed acclaim. By both the first-time writers of scientific papers and the alert 'old hand' it will be found of the greatest help in avoiding faults in writing and presenting papers.

To order or to obtain details of discounts available for purchases in quantity write to:
