Cellular Aspects

Contents of Volume 204, No. 3, 1982

Protein Biosynthesis/Molecular Genetics
Biosynthesis of intestinal microvillar proteins. Pulse–chase labelling studies on aminopeptidase N and sucrase–isomaltase
Labelling of prolyl hydroxylase tetrameric subunits in freshly isolated chick-embryo tendon cells and in certain chick-embryo tissues in vivo

E. M. Danielsen 639–645

K. Majamaa & J. Oikarinen 737–742

Protein Turnover
Effect of corticosterone treatment on muscle protein turnover in adrenalectomized rats and diabetic rats maintained on insulin
Failure of leucine to stimulate protein synthesis in vivo

B. R. Odedra & D. J. Millward 663–672

M. A. McNurlan, E. B. Fern & P. J. Garlick 831–838

Metabolism, Regulation and Control Processes
A macromolecular inhibitor of the antizyme to ornithine decarboxylase
Effects of adenosine, 2-deoxyadenosine and N<sup>6</sup>-phenylisopropyladenosine on rat islet function and metabolism
Inhibition of the synthesis of polyamines and macromolecules by 5'-methylthioadenosine and 5'-alkylthiotubercidins in BHK21 cells
Glucocorticoid–receptor interactions. Discrimination between glucocorticoid agonists and antagonists by means of receptor-binding kinetics
Effects of adrenaline on ketogenesis from long- and medium-chain fatty acids in starved rats
Changes in the proportion of acetyl-CoA carboxylase in the active form in rat liver. Effect of starvation, lactation and weaning
The control of glucose 1,6-bisphosphate by developmental state and hormonal stimulation in cultured muscle tissue
DL-a-Monofluoromethylputrescine is a potent irreversible inhibitor of <i>Escherichia coli</i> ornithine decarboxylase
Uptake and utilization of 5'-methylthioadenosine by cultured baby-hamster kidney cells
Lutropin increases phosphorylation of a 33,000-dalton ribosomal protein in rat tumour Leydig cells
Preliminary characterization of a heat-stable protein from rat adipose tissue whose phosphorylation is stimulated by insulin
Complement proteins C2, C4 and factor B. Effect of glycosylation on their secretion and catabolism
Effect of 5'-deoxy-5'-S-isobutylthioadenosine on putrescine uptake and polyamine biosynthesis by chick embryo fibroblasts
Effect of inhibition of fatty acid oxidation on neonatal liver carnitine content

K. Fujita, Y. Murakami & S. Hayashi 647–652

I. L. Campbell & K. W. Taylor 689–696

A. Raina, K. Tuomi & R.-L. Pajula 697–703

T. R. Jones & P. A. Bell 721–729

V. A. Zammit & C. G. Corstorphine 757–764

M. J. O. Wakelam & D. Pette 765–769

A. Kallio, P. P. McCann & P. Bey 771–775

T. O. Eloranta, K. Tuomi & A. M. Raina 803–807

P. J. Blackshear, R. A. Nemenoff & J. Avruch 817–824

F. Lawrence, U. Bachrach & M. Robert-Géro 853–859

S. C. Frost & M. A. Wells 861–863
Cell Surfaces and Receptors
Oestrogen and progesterone receptors in chick oviduct chromatin after administration of oestradiol, progesterone or anti-oestrogen
H. Tanaka, E. Abe, C. Miyaura, T. Kuribayashi, K. Konno, Y. Nishii & T. Suda

1α,25-Dihydroxycholecalciferol and a human myeloid leukaemia cell line (HL-60). The presence of a cytosol receptor and induction of differentiation
N. Murakami, S. P. Healy & V. K. Moudgil

Interaction of rat liver glucocorticoid receptor with sodium tungstate
I. C. Madley, M. J. Cook & B. D. Hames

Cell-surface discoidin in aggregating cells of Dictyostelium discoideum

Developmental Biochemistry
Comparative developmental analysis of the parotid, submandibular and sublingual glands in the neonatal rat
M. G. Humphreys-Beher, D. L. Hollis & D. M. Carlson

Non-co-ordinate development of β-adrenergic receptors and adenylate cyclase in chick heart

Relationship between lipogenesis and glycogen synthesis in maternal and foetal tissues during late gestation in the rat. Effect of dexamethasone
M. Benito, M. Lorenzo & J. M. Medina

Membranes, Transport, Bioenergetics and Photosynthesis
An Fc-receptor activity of plasma membranes from guinea-pig peritoneal polymorphonuclear leucocytes
S. Tsunawaki, D. Mizuno, K. Kakinuma & M. Kasahara

Hydrolysis of nicotinamide-adenine dinucleotide by purified renal brush-border membranes. Mechanism of NAD+ inhibition of brush-border membrane phosphate-transport activity
H. S. Tenenhouse & Y. L. Chu

Alternative-substrate inhibition and the kinetic mechanism of the β-galactoside/proton symport of Escherichia coli
M. G. P. Page & I. C. West

The effects of high concentrations of salts on photosynthetic electron transport in spinach (Spinacia oleracea) chloroplasts
A. C. Stewart

H+ production by antimycin-inhibited mitochondria
J. M. Wrigglesworth & P. Nicholls

Properties and regulation of a trans-plasma membrane redox system in rat liver
M. G. Clark, E. J. Partick & F. L. Crane

Localization of cyclo-oxygenase and thromboxane synthetase in human platelet intracellular membranes
F. Carey, S. Menashi & N. Crawford

General Methods
A procedure for the rapid preparation of mitochondria from rat liver
P. H. Reinhard, W. M. Taylor & F. L. Bygrave
