BIOCHEMISTRY OF MAMMALIAN REPRODUCTION

I: Gametes and Genital Tract Fluids II: Reproductive Endocrinology

by **L.J.D. Zaneveld**, *University of Illinois Medical Center*, and **R.T. Chatterton**, *Northwestern University Medical School*

Represents a summary of our knowledge regarding the biochemical aspects of the reproductive processes. Both the reproductive tract and the endocrinological aspects are covered.

The authors are not familiar with any other monograph that, in a single volume, covers the entire field of reproduction from a biochemical standpoint.

THE NATURAL COUMARINS: Occurrence, Chemistry and Biochemistry

by **R.D.H. Murray**, *Department of Chemistry, University of Glasgow*; **J. Mendez**, *Consejo Superior de Investigaciones Cientificas, Santiago de Compostela, Spain*, and **S.A. Brown**, *Department of Chemistry, Trent University, Peterborough, Ontario, Canada*

Brings together the current knowledge of natural coumarins to form a comprehensive volume which is interdisciplinary in its approach. Methods for isolation, characterisation and synthesis as well as physicochemical data, botanical sources, biosynthetic and other biochemical aspects are organised in a concise and accessible format. Methods are given for the identification of a new isolated coumarin whether it be of known or novel structure and this should greatly facilitate the reader's future research. All known sources of coumarins are tabulated. The book has an extensive reference section.

ENCYCLOPAEDIA OF THE TERPENOIDS

by **J.S. Glasby**, *ICI (Organics) Limited, Hexagon House, Blackley, Manchester*

This encyclopaedia lists, in alphabetical order, approximately 10,000 terpenoids covering the literature up to the end of 1979.

October 1982 approx. 2656pp

DYNAMICS OF BIOLOGICAL MEMBRANES:

Influence on Synthesis, Structure and Function

by **M.D. Houslay**, *Department of Biochemistry, UMIST, Manchester*, and **K.K. Stanley**, *European Molecular Biology Laboratory, Heidelberg, West Germany*

This textbook has a number of special features. The most important is that it relates the function of biological membranes with their dynamic structure.

The asymmetry of membrane components, reconstitution of functional membranes and the biosynthesis of membrane components also receive detailed attention. Where relevant, experimental methods and their interpretation are discussed.

ADVANCES IN THE TREATMENT OF INBORN ERRORS OF METABOLISM

edited by **M. d'A. Crawford**, **D.A. Gibbs** and **R.W.E. Watts**, *all of MRC Clinical Research Centre, Harrow, U.K., Division of Inherited Metabolic Diseases*

Multidisciplinary research in biochemistry, cell biology, paediatrics and genetics is identifying treatment methods through a number of different approaches, and this book emphasises those methods which are already clinically applicable, and those which it is hoped will modify clinical practice in the future.

TOPICS IN STEREOCHEMISTRY, Vol. 13

edited by **N.L. Allinger**, *University of Georgia*; **E.L. Eliel**, *University of North Carolina*, and **S.H. Wilen**, *City University of New York*

Provides in-depth coverage of organic stereochemistry. Topics examined include a discussion of Aldol diastereoselection under thermodynamic and kinetic control, enantioselection in Aldol Condensations involving chiral reactants, applications of molecular mechanics calculations to organic chemistry, and much more.

BIOCHEMICAL SOCIETY SYMPOSIA No. 46

Mobility and Migration of Biological Molecules

Edited by P. B. GARLAND and R. J. P. WILLIAMS

Mobility and Migration of Biological Molecules was the title of the Biochemical Society's Forty-sixth Symposium held in London in December 1980. The fifteen papers presented by leading biochemists involved in research studies of molecular movement are now published in this book. In particular, the aspects of intramolecular movements of proteins, movements of ions and reaction intermediates in proteins (including the structure and function of ion channels), rotational and lateral movements in biomembranes and movements of proteins across membranes are discussed in detail. *Mobility and Migration of Biological Molecules* offers the specialist a valuable review of the existing state of knowledge and useful signposts for the directions further research must take.

Writing a Scientific Paper & Speaking at Scientific Meetings

By Vernon Booth

Soft cover 48 pp.
£2.50 (US\$6.00)

To the newly revised and amplified fifth edition of *Writing a Scientific Paper*, the author has added the companion essay on *Speaking at Scientific Meetings*. Widely praised in its earlier editions, this concise compendium of advice is expected to receive renewed acclaim. By both the first-time writers of scientific papers and the alert 'old hand' it will be found of the greatest help in avoiding faults in writing and presenting papers.
