Biochemical and Clinical Aspects of Pteridines · Volume 1
Cancer · Immunology · Metabolic Diseases
Proceedings · First Winter Workshop on Pteridines, March 7–10, 1982, St. Christoph, Arlberg, Austria

Contents (Main topics)
Fundamental Chemistry for Analysis and the Biochemistry of Naturally-Occurring Pteridines · Quantitative Chemical Analysis of Pteridines · Pteridines in Cancer Detection and Monitoring · Pteridines in Immunology · Pteridines in Proliferation and Differentiation · Pteridines in Metabolic Diseases · Subject Index · Author Index

Price is subject to change
This compendium, previously published under the title of *Collected Tentative Rules and Recommendations of the Commission on Biochemical Nomenclature* has now been updated and published in its third edition for the International Union of Biochemistry by the Biochemical Society under the title: *Biochemical Nomenclature and Related Documents*.

The compendium, prepared by the IUB Committee of Editors of Biochemical Journals, collects together all the current rules and recommendations on nomenclature that have emanated from the IUPAC-IUB and IUB nomenclature committees. As such it is an indispensable part of the library of all biochemists.

The price is £3.50/US$7.00, postage-paid (vi plus 223 pages, paper bound). A 20% discount is allowable on orders for 10 or more copies to a single address. Payment must accompany the order.

Messenger RNA and Ribosomes in Protein Synthesis

Edited by C. F. PHELPS and H. R. V. ARNSTEIN

The Biochemical Society's Forty-Seventh Symposium, held in London in December 1981, assembled some of the leading workers in this area of biochemistry. The subjects for discussion were chosen for their timeliness and distinctiveness, and included accounts of ribosome and messenger RNA structure and function, initiation factors, caps and ribonucleoproteins, as well as consideration of the processes leading to the distribution of newly synthesized proteins within the cell. The papers presented are now published in this volume.

List of contents and authors:

213 pp. ISBN 0 904498 14 X £25.00 (US$57.50)

Whichever way you look at it ...

More than 25 years of careful biochemical production means —

Reagents which measure up to the Gold Seal Standard
Development of advanced techniques in virus detection
The capabilities to lead the way in Molecular Biology
