

## Cellular Aspects

### Contents of Volume 212, No. 1, 1983

#### Review Article

- |                                                                                                                                                                                           |                                                                                             |         |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|---------|
| Regulation of photosynthesis by reversible phosphorylation of the light-harvesting chlorophyll <i>a/b</i> protein                                                                         | J. BENNETT                                                                                  | 1-13    |
| <b>Protein Biosynthesis/Molecular Genetics</b>                                                                                                                                            |                                                                                             |         |
| Chloramphenicol stimulates acid phosphatase activity in germinating cotton ( <i>Gossypium hirsutum</i> ) embryos                                                                          | R. BHARGAVA & R. C. SACHAR                                                                  | 73-77   |
| Biosynthesis of intestinal microvillar proteins. Processing of aminopeptidase N by microsomal membranes                                                                                   | E. M. DANIELSEN, O. NORÉN & H. SJÖSTRÖM                                                     | 161-165 |
| Identification of the mRNA and polypeptide subunit for prostaglandin endoperoxide synthase from mouse mastocytoma P-815 cells                                                             | M. KONDO, Y. KOSHIHARA, M. KAWAMURA & S. MUROTA                                             | 219-222 |
| <b>Protein Turnover</b>                                                                                                                                                                   |                                                                                             |         |
| A cell-cycle-dependent protein of <i>Physarum polycephalum</i> revealed by two-dimensional gel electrophoresis                                                                            | M. PAHLIC & J. J. TYSON                                                                     | 245-247 |
| <b>Metabolism, Regulation and Control Processes</b>                                                                                                                                       |                                                                                             |         |
| Fluorescence-microscopic measurement of intracellular cytochrome <i>P</i> -450 enzyme activity (ethoxyresorufin <i>O</i> -de-ethylation) in unfixed liver sections                        | M. D. BURKE, G. I. MURRAY & G. M. LEES                                                      | 15-24   |
| Methane oxidation by <i>Nitrosomonas europaea</i>                                                                                                                                         | M. R. HYMAN & P. M. WOOD                                                                    | 31-37   |
| The effect of cysteine oxidation on isolated hepatocytes                                                                                                                                  | J. VIÑA, G. T. SAEZ, D. WIGGINS, A. F. C. ROBERTS, R. HEMS & H. A. KREBS                    | 39-44   |
| Induction and repression of the major phenobarbital-induced cytochrome <i>P</i> -450 measured by radioimmunoassay                                                                         | I. R. PHILLIPS, E. A. SHEPHARD, R. M. BAYNEY, S. F. PIKE, B. R. RABIN, R. HEATH & N. CARTER | 55-64   |
| Glucose- and insulin-dependent induction of ATP citrate lyase in primary cultures of rat hepatocytes                                                                                      | N. R. KATZ & S. GIFFHORN                                                                    | 65-71   |
| Stimulation of [ $1-^{14}\text{C}$ ]oleate oxidation to $^{14}\text{CO}_2$ in isolated rat hepatocytes by the catecholamines, vasopressin and angiotensin. A possible mechanism of action | M. C. SUGDEN & D. I. WATTS                                                                  | 85-91   |
| Disturbance of lysosomal glycogen metabolism by liposomal anti- $\alpha$ -glucosidase and some anti-inflammatory drugs                                                                    | R. GEDDES, D. E. OTTER, G. K. SCOTT & J. A. TAYLOR                                          | 99-103  |
| Modulation of active $\text{Ca}^{2+}$ uptake by the islet-cell endoplasmic reticulum                                                                                                      | J. R. COLCA, N. KOTAGAL, P. E. LACY & M. L. MCDANIEL                                        | 113-121 |
| Novel mannose carrier in the trypanosomatid <i>Crithidia fasciculata</i> behaving as a short $\alpha$ -saturated polyprenyl phosphate                                                     | L. A. QUESADA-ALLUE & A. J. PARODI                                                          | 123-128 |
| The effect of glucocorticoids on insulin-stimulated lipogenesis in primary cultures of rat hepatocytes                                                                                    | J. M. AMATRUDA, S. A. DANAHY & C. L. CHANG                                                  | 135-141 |
| Effect of starvation and refeeding on polyamine concentrations and ornithine decarboxylase antizyme in mammary gland of lactating rats                                                    | M. E. BROSNAN, R. FARRELL, H. WILANSKY & D. H. WILLIAMSON                                   | 149-153 |
| The interaction between lipid peroxidation and prostaglandin synthesis in rabbit kidney-medulla slices                                                                                    | Y. FUJIMOTO, H. TANIOKA, I. KESHI & T. FUJITA                                               | 167-171 |
| Heterogeneity of very-low-density lipoprotein remnants bound and taken up by liver of starved rat <i>in vivo</i>                                                                          | M. M. ITTMANN & C. COOPER                                                                   | 173-182 |

Transport and metabolism of glucose by rat small intestine	T. J. NICHOLLS, H. J. LEESE & J. R. BRONK	183-187
Glucagon inhibition of insulin-stimulated 2-deoxyglucose uptake by rat adipocytes in the presence of adenosine deaminase	A. GREEN	189-195
Interrelationships in trace-element metabolism in metal toxicities in nickel-resistant strains of <i>Neurospora crassa</i>	P. MARUTHI MOHAN & K. SIVARAMA SASTRY	205-210
Metabolic effects of vasopressin infusion in the starved rat. Reversal of ketonaemia	A. M. ROFE & D. H. WILLIAMSON	231-239
Involvement of calcium ions in the activation of ornithine decarboxylase by isoprenaline evaluated 'in situ' in the perfused rat heart	C. GUARNIERI, F. FLAMIGNI, C. MUSCARI & C. M. CALDARERA	241-243
<b>Cell Surfaces and Receptors</b>		
Elucidation of the quaternary structure of the insulin receptor	M. D. BARON & P. H. SÖNKSEN	79-84
<b>Developmental Biochemistry</b>		
Metabolic fate of non-esterified fatty acids in isolated hepatocytes from newborn and young pigs. Evidence for a limited capacity for oxidation and increased capacity for esterification	J. P. PÉGORIER, P. H. DUÉE, J. GIRARD & J. PERET	93-97
Biosynthesis of medium-chain fatty acids by mammary epithelial cells from virgin rats	S. SMITH, D. PASCO & S. NANDI	155-159
Changes in the activity of acetyl-CoA carboxylase during rape-seed formation	E. TURNHAM & D. H. NORTHCOTE	223-229
<b>Membranes, Transport, Bioenergetics and Photosynthesis</b>		
Uncouplers can shuttle between localized energy-coupling sites during photophosphorylation by chromatophores of <i>Rhodospseudomonas capsulata</i> N22	G. D. HITCHENS & D. B. KELL	25-30
Ribulose biphosphate carboxylase/oxygenase in toluene-permeabilized <i>Rhodospirillum rubrum</i>	I. STORRØ & B. A. MCFADDEN	45-54
The use of valinomycin, nigericin and trichlorocarbanilide in control of the protonmotive force in <i>Escherichia coli</i> cells	S. AHMED & I. R. BOOTH	105-112
Novel prostaglandin dehydrogenase in rat skin	N. FINCHAM & R. CAMP	129-134
The metabolism and hormonal responses of human eccrine sweat glands isolated by collagenase digestion	T. KEALEY	143-148
Inhibition by sporidesmin of hepatocyte bile acid transport	S. J. CORDINER & T. W. JORDAN	197-204
Sugar transport in rat liver lysosomes. Direct demonstration by using labelled sugars	G. A. MAGUIRE, K. DOCHERTY & C. N. HALES	211-218
