Writing a Scientific Paper & Speaking at Scientific Meetings
By Vernon Booth

To the newly revised and amplified fifth edition of Writing a Scientific Paper, the author has added the companion essay on Speaking at Scientific Meetings. Widely praised in its earlier editions, this concise compendium of advice is expected to receive renewed acclaim. By both the first-time writers of scientific papers and the alert ‘old hand’ it will be found of the greatest help in avoiding faults in writing and presenting papers.

Soft cover 48 pp.
£2.50 (US$6.00)

Messenger RNA and Ribosomes in Protein Synthesis

Edited by C. F. PHELPS and H. R. V. ARNSTEIN

The Biochemical Society’s Forty-Seventh Symposium, held in London in December 1981, assembled some of the leading workers in this area of biochemistry. The subjects for discussion were chosen for their timeliness and distinctiveness, and included accounts of ribosome and messenger RNA structure and function, initiation factors, caps and ribonucleoproteins, as well as consideration of the processes leading to the distribution of newly synthesized proteins within the cell. The papers presented are now published in this volume.

List of contents and authors:

213 pp. ISBN 0 904498 14 X £25.00 (US$57.50)

All-Polypropylene/Polyethylene Disposable Syringes

Offered by Aldrich — the only all-polypropylene/polyethylene syringe available.

Most disposable syringes have rubber plungers that can contaminate organic solutions. These syringes consist of a polyethylene plunger and a polypropylene barrel with a tapered Luer connector, and are useful for:

1) Transferring air-sensitive reagents dissolved in organic solvents
2) Weighing solutions for titrimetric or spectroscopic analysis
3) Sampling liquids
4) Delivering small gas samples for GC or IR analysis
5) Sampling where trace-metal contamination must be avoided (use with Teflon needles; also available from Aldrich)
6) Replacing breakable glass syringes.

The stainless steel needles are equipped with all-polypropylene Luer-fitting hubs.

Needles and syringes are sterilized and are individually packaged.
