

CONTENTS

Volume 217, No. 2, 1984

REVIEW ARTICLE

- Kinetics of protein modification reactions E. T. RAKITZIS 341-351

FULL AND RAPID PAPERS

Proteins

- Isolation of tropoelastin a from lathyrctic chick aortae C. B. RICH & J. A. FOSTER 581-584

Enzymes

- Rat liver Golgi galactosyltransferases. Distinct enzymes for glycolipid and glycoprotein acceptor substrates F. KAPLAN & P. HECHTMAN 353-364

- 16S acetylcholinesterase of the extracellular matrix is assembled within mouse muscle cells in culture N. C. INESTROSA 377-381

- Arylthallium(III) reagents for protein modification. Inhibition of lactate dehydrogenase from various sources by *o*-carboxyphenylthallium(III) bistrifluoroacetate M. A. BUNNI & K. T. DOUGLAS 383-390

- Organization of a multifunctional protein in pyrimidine biosynthesis. A domain hypersensitive to proteolysis P. C. RUMSBY, P. C. CAMPBELL, L. A. NISWANDER & J. N. DAVIDSON 435-440

- Structural requirements of thiol compounds in the inhibition of human liver iodothyronine 5'-deiodinase R. HARBOTTLE & S. J. RICHARDSON 485-491

- Studies on synthesis and degradation rates and some molecular properties of guinea-pig muscle acylphosphatase G. LIGURI, P. NASSI, G. CAMICI, G. MANAO, G. CAPPUGI, M. STEFANI, A. BERTI & G. RAMPONI 499-505

- Purification of human adult and foetal intestinal alkaline phosphatases by monoclonal antibody immunoaffinity chromatography J. VOCKLEY & H. HARRIS 535-541

- Cysteine-dependent inactivation of hepatic ornithine decarboxylase Y. MURAKAMI, T. KAMEJI & S.-I. HAYASHI 573-580

Synthesis and degradation of macromolecules

- Effect of protein-free diet on muscle protein turnover and nitrogen conservation in euthyroid and hyperthyroid rats W. J. CARTER, W. S. VAN DER W. BENJAMIN & F. H. FAAS 471-476

- Protein turnover and growth in the whole body, liver and kidney of the rat from the foetus to senility D. F. GOLDSPINK & F. J. KELLY 507-516

- Pre- and post-natal growth and protein turnover in smooth muscle, heart and slow- and fast-twitch skeletal muscles of the rat S. E. M. LEWIS, F. J. KELLY & D. F. GOLDSPINK 517-526

- Protein synthesis during the developmental growth of the small and large intestine of the rat D. F. GOLDSPINK, S. E. M. LEWIS & F. J. KELLY 527-534

Intermediary metabolism and metabolic control

- Proton-nuclear-magnetic-resonance studies of serum, plasma and urine from fasting normal and diabetic subjects J. K. NICHOLSON, M. P. O'FLYNN, P. J. SADLER, A. F. MACLEOD, S. M. JUUL & P. H. SÖNKSEN 365-375

- Microsomal and lysosomal enzymes of triacylglycerol metabolism in rat placenta R. A. COLEMAN & E. B. HAYNES 391-397

- Uptake and output of various forms of choline by organs of the conscious chronically catheterized sheep B. S. ROBINSON, A. M. SNOSWELL, W. B. RUNCIMAN & R. N. UPTON 399-408

Phenylhydrazine-mediated induction of haem oxygenase activity in rat liver and kidney and development of hyperbilirubinaemia inhibition by zinc-protoporphyrin	M. D. MAINES & J. C. VELTMAN	409-417
The hepatic defect in glycogen synthesis in chronic diabetes involves the G-component of synthase phosphatase	M. BOLLEN & W. STALMANS	427-434
Persistence of the effect of insulin on pyruvate dehydrogenase activity in rat white and brown adipose tissue during the preparation and subsequent incubation of mitochondria	R. M. DENTON, J. G. MCCORMACK & S. E. MARSHALL	441-452
Effects of vasopressin and corticosterone on fatty acid metabolism and on the activities of glycerol phosphate acyltransferase and phosphatidate phosphohydrolase in rat hepatocytes	A. D. POLLARD & D. N. BRINDLEY	461-469
Distinct effects of glucagon and vasopressin on proline metabolism in isolated hepatocytes. The role of oxoglutarate dehydrogenase	J. M. STADDON & J. D. MCGIVAN	477-483
Ethanol modulation of the hormonal and nutritional regulation of glucose 6-phosphate dehydrogenase activity in primary cultures of rat hepatocytes	D. S. KELLEY & R. F. KLETZIEN	543-549
A study of the malolcoholic fermentation pathway in <i>Schizosaccharomyces pombe</i>	E. MACONI, P. L. MANACHINI, F. ARAGOZZINI, C. GENNARI & G. S. RICCA	585-588
Bioenergetics and transport		
Membrane potential of mitochondria in intact lymphocytes during early mitogenic stimulation	M. D. BRAND & S. M. FELBER	453-459
Influence of ubiquinone on the inhibitory effect of adriamycin on mitochondrial oxidative phosphorylation	H. MUHAMMED & C. K. R. KURUP	493-498
Cytochrome <i>c</i> -mediated electron transfer between ubiquinol-cytochrome <i>c</i> reductase and cytochrome <i>c</i> oxidase. Kinetic evidence for a mobile cytochrome <i>c</i> pool	R. J. FROUD & C. I. RAGAN	551-560
Cytochrome <i>c</i> -mediates electron transfer between ubiquinol-cytochrome <i>c</i> reductase and cytochrome <i>c</i> oxidase by free diffusion along the surface of the membrane	R. J. FROUD & C. I. RAGAN	561-571
Cell structure and function		
<i>cis</i> -Unsaturated fatty acids uncouple mitochondria and stimulate glycolysis in intact lymphocytes	P. ARSLAN, A. N. CORPS, T. R. HESKETH, J. C. METCALFE & T. POZZAN	419-425
