

CONTENTS

Volume 218, No. 2, 1984

FULL AND RAPID PAPERS

Proteins

- Purification and characterization of testicular transferrin secreted by rat Sertoli cells
 Histone modification in early and late *Drosophila* embryos
- Immunochemical characterization of the androgen-dependent spermine-binding protein of the rat ventral prostate
- The heterogeneity of bovine growth hormone. Extraction from the pituitary of components with different biological and immunological properties
- Conformation, structure and activation of bovine cathepsin D. Unfolding and refolding studies
- Two individuals with elliptocytic red cells apparently lack three minor erythrocyte membrane sialoglycoproteins
- M. K. SKINNER, W. L. COSAND & M. D. GRISWOLD 313-320
- V. GIANCOTTI, E. RUSSO, F. DE CRISTINI, G. GRAZIOSI, F. MICALI & C. CRANE-ROBINSON 321-329
- R. A. HIIPAKKA, C. CHEN, K. SCHILLING, A. OBERHAUSER, A. SALTZMAN & S. LIAO 563-571
- I. C. HART, L. A. BLAKE, P. M. E. CHADWICK, G. A. PAYNE & A. D. SIMMONDS 573-581
- T. LAH, M. DROBNIČ-KOŠOROK, V. TURK & R. H. PAIN 601-608
- D. J. ANSTEE, S. F. PARSONS, K. RIDGWELL, M. J. A. TANNER, A. H. MERRY, E. E. THOMSON, P. A. JUDSON, P. JOHNSON, S. BATES & I. D. FRASER 615-619

Enzymes

- Radioimmunoassay of carbonic anhydrase III in rat tissues
- Conformational states of the (Na⁺ + K⁺)-transporting ATPase. Formation of 240000-M_r and 116000-M_r polypeptides in the presence of a bifunctional thiol probe
- Phosphorylation states of the (Na⁺ + K⁺)-transporting ATPase in preparations from lamb kidney and electric-eel (*Electrophorus electricus*) electric organ
- Modified uroporphyrinogen decarboxylase activity in a yeast mutant which mimics porphyria cutanea tarda
- Enzymic characteristics of the isoenzymes of rat epididymal neutral α-mannosidases and their changes during development *in vivo*
- The purification and properties of ox liver short-chain acyl-CoA dehydrogenase
- Butyryl-CoA dehydrogenase from *Megasphaera elsdenii*. Specificity of the catalytic reaction
- Specificity studies on the oligosaccharide neuraminidase of human fibroblasts
- A. SHIELS, S. JEFFERY, C. WILSON & N. CARTER 281-284
- W. E. HARRIS & W. L. STAHL 331-339
- W. E. HARRIS & W. L. STAHL 341-345
- J. RYTKA, T. BILINSKI & R. LABBE-BOIS 405-413
- P. DUTTA & G. C. MAJUMDER 489-494
- L. SHAW & P. C. ENGEL 511-520
- G. WILLIAMSON & P. C. ENGEL 521-529
- K. MENDLA & M. CANTZ 625-628

Carbohydrates

- Biosynthesis of arabinogalactan-protein in *Lolium multiflorum* (Italian ryegrass) endosperm cells. Subcellular distribution of galactosyltransferases
- A. SCHIBECI, A. PNJAK & G. B. FINCHER 633-636

Nucleic acids and molecular genetics

- The uptake and stability of simian-virus-40 DNA after calcium phosphate transfection of CV-1 cells
- Differences in sequence content of nuclear and cytoplasmic polyribosomal RNA from adenovirus-infected cells
- A. J. STRAIN & A. H. WYLLIE 475-482
- N. K. CHATTERJEE, C. TUCHOWSKI, G. E. EAGAN & T. M. HALEY 583-590

Synthesis and degradation of macromolecules

- Effect of thioacetamide on cytochrome *P*-450 synthesis in rat liver
S. SATYABHAMA & G. PADMANABAN 371-377
- The metabolic state of muscle in the isolated perfused rat hemicorpus in relation to rates of protein synthesis
V. R. PREEDY, V. M. PAIN & P. J. GARLICK 429-440
- Intermediary metabolism and metabolic control**
- Characterization of the protein kinase activities of human platelet supernatant and particulate fractions
S. E. SALAMA & R. J. HASLAM 285-294
- Phosphorylation of skeletal-muscle troponin I and troponin T by phospholipid-sensitive Ca^{2+} -dependent protein kinase and its inhibition by troponin C and tropomyosin
G. J. MAZZEI & J. F. KUO 361-369
- Time-dependence of inhibition of carnitine palmitoyltransferase I by malonyl-CoA in mitochondria isolated from livers of fed or starved rats. Evidence for transition of the enzyme between states of low and high affinity for malonyl-CoA
V. A. ZAMMIT 379-386
- Phosphoenolpyruvate carboxylase from pennywort (*Umbilicus rupestris*). Changes in properties after exposure to water stress
P. P. DANIEL, J. A. BRYANT & F. I. WOODWARD 387-393
- Preparation of rat enterocyte mitochondria
B. MASOLA & D. F. EVERED 441-447
- The oxidation of glutamine and glutamate in relation to anion transport in enterocyte mitochondria
D. F. EVERED & B. MASOLA 449-458
- The effect of glucose on the activity of phosphofructokinase in the mucosa of rat small intestine
A. JAMAL, G. L. KELLETT & J. P. ROBERTSON 459-464
- Insensitivity of cardiac phosphofructokinase to adrenergic activation in Zucker rats. A post-receptor defect
G. S. PATTEN, S. RATTIGAN, O. H. FILSELL & M. G. CLARK 483-488
- Decreased enzymic protection and increased sensitivity to oxidative damage in erythrocytes as a function of cell and donor aging
G. A. GLASS & D. GERSHON 531-537
- Antizyme to ornithine decarboxylase is present in the liver of starved rats
K. FUJITA, S. MATSUFUJI, Y. MURAKAMI & S.-I. HAYASHI 557-562
- The role of calcium in luteinizing hormone-releasing hormone agonist (ICI 118630)-stimulated steroidogenesis in rat Leydig cells
M. H. F. SULLIVAN & B. A. COOKE 621-624
- Inhibition of phospholipid methylation by a cytosolic factor
V. ALVAREZ CHIVA & J. M. MATO 637-639
- Transfer of intestine-derived diamines into tumour cells during treatment of Ehrlich-ascites-carcinoma-bearing mice with polyamines and anti-metabolites
A. KALLIO, P. NIKULA & J. JÄNNE 641-644
- Effects of insulin *in vitro* on lipogenesis and fatty acid uptake in white adipose tissue of Zucker rats aged 10 days
I. DE WAZIERS & E. PLANCHE 653-655
- Bioenergetics and transport**
- An assessment of the calcium content of rat liver mitochondria *in vivo*
P. H. REINHART, E. VAN DE POL, W. M. TAYLOR & F. L. BYGRAVE 415-420
- Spermine binding to submitochondrial particles and activation of adenosine triphosphatase
G. SOLAINI & B. TADOLINI 495-499
- The effects of oxygen solubility and high concentrations of salts on photosynthetic electron transport in chloroplast membranes
B. THOMASSET, J.-N. BARBOTIN & D. THOMAS 539-545
- Membranes and receptors**
- Proteolysis of ankyrin and of band 3 protein in chemically induced cell fusion. Ca^{2+} is not mandatory for fusion
R. D. A. LANG, C. WICKENDEN, J. WYNNE & J. A. LUCY 295-305
- Quantitative studies of the rate of insulin internalization in isolated rat hepatocytes
B. DRAZNIN, M. TROWBRIDGE & L. FERGUSON 307-312
- Characterization of the vitamin D-dependent Ca^{2+} -binding sites in rat intestinal Golgi-enriched membrane fractions
J. R. F. WALTERS & M. M. WEISER 347-354

Relationship of non-esterified fatty acids to vitamin D-dependent Ca^{2+} binding by rat intestinal Golgi-enriched membrane fractions	J. R. F. WALTERS & M. M. WEISER	355-360
Thermodynamics of steroid binding to the human glucocorticoid receptor	P. H. ELIARD & G. G. ROUSSEAU	395-404
Sodium/calcium exchange in smooth-muscle microsomal fractions	N. MOREL & T. GODFRAIND	421-427
Developmental regulation of neuraminidase-sensitive lectin-binding glycoproteins during myogenesis of rat L_6 myoblasts	P. C. HOLLAND, S. D. J. PENNA & C. W. GUERIN	465-473
Biochemical and cytochemical localization of inosine-5'-diphosphatase in rat liver microsomal fractions	J. S. LITTLE	501-510
Characterization of the C1q receptor on a human macrophage cell line, U937	J. ARVIEUX, A. REBOUL, J.-C. BENZA & M. G. COLOMB	547-555
Membrane retrieval in the guinea-pig neurohypophysis. Isolation and characterization of secretory vesicles and coated microvesicles after radiolabel incorporation <i>in vivo</i>	T. SAERMARK, P. M. JONES & I. C. A. F. ROBINSON	591-599
Calmodulin antagonists decrease the binding of epidermal growth factor to transformed, but not to normal, human fibroblasts	P. V. BODINE & J. T. TUPPER	629-632
Methods		
Direct measurement of the self-exchange rate of stellacyanin by a novel e.p.r. method	S. DAHLIN, B. REINHAMMAR & M. T. WILSON	609-614
Adsorbed soluble [^3H]elastin as substrate for proteinase activity. A new microassay technique	H. S. JENSEN	645-648
A problem in the radiochemical assay of glucose-6-phosphatase in muscle	R. LACKNER, R. A. J. CHALLISS, D. WEST & E. A. NEWSHOLME	649-651
