

A BIOCHEMIST IS REQUIRED

for the Medical Research Institute

IN NIGERIA

CANDIDATES should not be over 35 years of age. They should hold a good degree in chemistry and have had suitable experience of biochemical work. An officer with a medical qualification in addition would be preferred. The selected officer will be required to undertake independent investigation and to co-operate with the staff of the Institute in any researches which require the assistance of a biochemist.

EMOLUMENTS: £800 a year rising by annual increments of £40 to £960 a year, together with seniority allowance (payable only in West Africa) at the rate of £72 a year. When the officer has served for three years on £960 he will be eligible (if recommended) to be placed on the scale of £1,000 a year, rising by annual increments of £50 to £1,150 a year, together with seniority allowance at the rate of £100 a year. An officer with a medical qualification would receive Staff Pay at the rate of £150 a year in addition to salary and seniority allowance.

FREE QUARTERS or allowance in lieu provided; also free first class passages on first appointment and when proceeding on, or returning from, leave. Leave is normally granted after 18 months' residential service on the basis of seven days in England in respect of every completed month of service exclusive of voyages.

REQUESTS FOR FORMS of application should be addressed in writing to *The Private Secretary (Appointments), Colonial Office, 2 Richmond Terrace, Whitehall, S.W.1.*

COMPLETED APPLICATIONS should be received by the Private Secretary not later than the 31st of March.

MONOGRAPHS ON BIOCHEMISTRY

ROYAL 8VO

Edited by R. H. A. PLIMMER, D.Sc., and SIR F. G. HOPKINS, M.A., M.B., D.Sc., F.R.S.

LECITHIN AND ALLIED SUBSTANCES: *The Lipins*

By HUGH MACLEAN, M.D., D.Sc., Professor of Medicine in the University of London, St Thomas's Hospital; and IDA SMEDLEY MACLEAN, D.Sc., F.I.C.

SECOND EDITION. 10s. 6d. net

THE NATURE OF ENZYME ACTION

By SIR W. M. BAYLISS, M.A., D.Sc., LL.D., F.R.S., late Professor of General Physiology, University College, London.

FIFTH EDITION. 9s. net

THE VEGETABLE PROTEINS

By THOMAS B. OSBORNE, Ph.D., Sc.D., Research Chemist in the Connecticut Agricultural Experiment Station, New Haven, Connecticut.

With Diagrams. SECOND EDITION. 9s. net

NUCLEIC ACIDS: *Their Chemical Properties and Physiological Conduct*

By WALTER JONES, Ph.D., Professor of Physiological Chemistry in the Johns Hopkins Medical School, Baltimore.

With Figures. SECOND EDITION. 9s. net

ALCOHOLIC FERMENTATION

By ARTHUR HARDEN, Ph.D., D.Sc., F.R.S., Professor of Biochemistry, London University; Head of the Biochemical Department, Lister Institute, Chelsea.

THIRD EDITION. 6s. 6d. net

THE CHEMISTRY OF UREA: *The Theory of its Constitution, and the Origin and Mode of its Formation in Living Organisms*

By EMIL A. WERNER, M.A., Sc.D., F.I.C., Professor of Applied Chemistry in the University of Dublin.

THE UNIVERSITY OF CHICAGO PRESS

The Rôle of the Scientific Societies in the Seventeenth Century. By MARTHA ORNSTEIN. \$3.00, post paid \$3.15.

With a fine appreciation of the historical and scientific problems involved, Miss Ornstein describes and evaluates just what the Societies of Italy, England, France and Germany accomplished in experimental work and what their contributions were to the progress of science.

The Newer Knowledge of Bacteriology and Immunology. Edited by E. O. JORDAN and I. S. FALK. \$10.00.

Eighty leading men of science have collaborated in the preparation of this summarization of the present status of knowledge and methods in bacteriology and immunology.

Laboratory Outlines in Bacteriology and Immunology. By JOHN F. NORTON and I. S. FALK. \$2.00.

Consists of exercises which are designed to acquaint the reader with a variety of the best methods, to give him practice in working with different groups of bacteria, and to illustrate types of immunologic phenomena.

Nutrition Work with Children. By LYDIA J. ROBERTS. \$3.50.

Dealing with the causes, effects, prevention, and treatment of malnutrition.

The Control of Hunger in Health and Disease. By A. J. CARLSON. \$2.50.

Rhus Dermatitis: Its Pathology and Chemotherapy. By JAMES B. MCNAIR. \$4.00.

General Cytology. *A Textbook of Cellular Structure and Function for Students of Biology and Medicine.* Edited by E. V. COWDRY. \$7.50.

Methods in Plant Histology. (Fourth Edition, Completely Revised.) By CHARLES JOSEPH CHAMBERLAIN. \$3.25.

“SCIENTIA,,

INTERNATIONAL REVIEW OF SCIENTIFIC SYNTHESIS
Published every month (each number containing 100 to 120 pages)

Editor: EUGENIO RIGNANO

IS THE ONLY REVIEW the contributors to which are really international.

IS THE ONLY REVIEW that has a really world-wide circulation.

IS THE ONLY REVIEW of scientific synthesis and unification that deals with the fundamental questions of all sciences: the history of the sciences, mathematics, astronomy, geology, physics, chemistry, biology, psychology and sociology.

IS THE ONLY REVIEW *therefore which, while immediately interesting students of biology and physiology by its numerous and important articles and reports relating to these sciences, presents them also the means of knowing, in a summary and synthetic form, the chief problems of all the other branches of knowledge.*

IS THE ONLY REVIEW that among its contributors can boast of the most illustrious men of science in the whole world. A list of more than 350 of these is given in each number.

The articles are published in the language of their authors, and every number has a *supplement containing the French translation of all the articles that are not French.* The review is thus completely accessible to those who know only French. (*Write for a free copy to the General Secretary of "Scientia," Milan, sending six pence in stamps of your country, merely to cover packing and postage.*)

PHYSIOLOGICAL REVIEWS

PUBLISHED BY THE
AMERICAN PHYSIOLOGICAL SOCIETY

UNDER THE EDITORIAL DIRECTION OF

W. H. HOWELL, BALTIMORE

A. J. CARLSON, CHICAGO

CHARLES W. EDMUNDS, ANN ARBOR LAWRENCE J. HENDERSON, CAMBRIDGE,
MASS.

WALTER J. MEEK, MADISON

E. B. KRUMBHAAR, PHILADELPHIA

D. R. HOOKER, *Managing Editor*, BALTIMORE

Containing short but comprehensive articles dealing with the recent literature in Physiology, using this term in a broad sense to include Bio-Chemistry, Bio-Physics, Experimental Pharmacology and Experimental Pathology.

TENTATIVE CONTENTS OF VOLUME VIII, 1928

Additional Articles will be announced later

KENNETH J. FRANKLIN: Physiology and pharmacology of veins

CHARLES C. MACKLIN: The physiology of the bronchial tree from the anatomical view-point

S. A. ASDELL: The growth and function of the corpus luteum

HENRY LAURENS: Physiological responses to light

O. R. LANGWORTHY: The control of posture by the central nervous system

S. L. WARREN: Physiological action of X-rays

J. A. GARDNER: Origin and significance of cholesterol

GEORGE B. WALLACE: Specificity in the reaction of drugs

C. E. FERREE: Color vision

H. M. VERNON: Industrial fatigue

FLORENCE R. SABIN: Bone marrow

L. N. KATZ: Significance of the T wave of the electrocardiogram

H. B. VICKERY AND T. B. OSBORNE: Protein molecule

C. P. STEWART AND G. H. PERCIVAL: Calcium metabolism

B. P. BABKIN: Gastric digestion

HENRI FREDERICQ AND M. LAPICQUE: Chronaxie

DR AND MRS EDWARD MELLANBY: The influence of diet on tooth formation

H. S. RAPER: The aerobic oxydases

HERBERT S. GASSER: Muscle contracture

E. V. MCCOLLUM: Isolation of vitamins

ADOLF MEYER: Aphasia

PERCY M. DAWSON: Recent literature on physiological effects of exercise

ROBERT FAHREUS: Suspension stability of blood

JOSEPH HOET: Rigor mortis

PHYSIOLOGICAL A B S T R A C T S

Monthly, price 5s. net.

Annual Subscription, post free, 42s.

This Journal is issued by the **PHYSIOLOGICAL SOCIETY**, acting in co-operation with numerous physiological organisations in Great Britain, America, and other countries. The Editor, Prof. J. MELLANBY, is assisted by a staff of competent abstractors both at home and abroad.

The Journal aims at issuing promptly abstracts of the papers published throughout the world, in physiological and allied sciences (including Plant Physiology).

A number is published at the beginning of each month.

Vol. XIII will begin with the April (1928) issue.

Subscriptions are only taken for April to March of the next year, and are payable in advance.

Back numbers, excepting some which are out of print, may be obtained from the Publishers, or any Bookseller. An extra charge is made for some numbers the stock of which is nearly exhausted. Prices on application.

Binding Cases, price 2s. net, are supplied by the Publishers, who can also arrange for binding; prices on application.

The New KLETT Bio-Colorimeter

THIS Instrument shows a radical change in construction from any other colorimeter, has no equal in convenience and speed, besides eliminating the chance of error to a minimum. Its optical and mechanical features are such that it met with the highest praise by the best authorities of biological chemistry.

BASAL DIETS

Vitamin-free constituents of experimental diets have hitherto been unobtainable save by tedious processes of purification conducted in the laboratory of the investigator, who has also himself had to carry out the necessary animal tests.

The Glaxo Research Laboratory now supplies a Physiological Caseinogen AB, under a guarantee of test both at that laboratory and by an independent investigator appointed by the Accessory Food Factors Committee of the Medical Research Council and the Lister Institute. The conditions of the test have been laid down by that Committee. Full particulars will be sent to any enquirer.

An "Ashless" Casein C, containing under 0.1% of calcium and suitable for experiments in mineral metabolism, can also be supplied.

PHYSIOLOGICAL CASEINOGEN AB

Tested for freedom from fat-soluble A and from water soluble B.

6s. 6d. per lb. for 28 lbs.

7s. per lb. for 14 lbs.

7s. 6d. per lb. for smaller quantities.

"ASHLESS" CASEIN C

2s. 6d. per lb. for 28 lbs.

3s. per lb. for smaller quantities.
