THE UNIVERSITY OF CHICAGO PRESS

The Rôle of the Scientific Societies in the Seventeenth Century. By MARTHA ORNSTEIN. $3.00, post paid $3.15.
With a fine appreciation of the historical and scientific problems involved, Miss Ornstein describes and evaluates just what the Societies of Italy, England, France and Germany accomplished in experimental work and what their contributions were to the progress of science.

The Newer Knowledge of Bacteriology and Immunology. Edited by E. O. JORDAN and I. S. FALK. $10.00.
Eighty leading men of science have collaborated in the preparation of this summarization of the present status of knowledge and methods in bacteriology and immunology.

Laboratory Outlines in Bacteriology and Immunology. By JOHN F. NORTON and I. S. FALK. $2.00.
Consists of exercises which are designed to acquaint the reader with a variety of the best methods, to give him practice in working with different groups of bacteria, and to illustrate types of immunologic phenomena.

Dealing with the causes, effects, prevention, and treatment of malnutrition.

The Control of Hunger in Health and Disease. By A. J. CARLSON. $2.50.

Rhus Dermatitis: Its Pathology and Chemotherapy. By JAMES B. MCNAIR. $4.00.

INTERNATIONAL REVIEW OF SCIENTIFIC SYNTHESIS
Published every month (each number containing 100 to 120 pages)
Editor: EUGENIO RIGNANO

"SCIENTIA,"
IS THE ONLY REVIEW the contributors to which are really international.
IS THE ONLY REVIEW that has a really world-wide circulation.
IS THE ONLY REVIEW of scientific synthesis and unification that deals with the fundamental questions of all sciences: the history of the sciences, mathematics, astronomy, geology, physics, chemistry, biology, psychology and sociology.
IS THE ONLY REVIEW therefore which, while immediately interesting students of biology and physiology by its numerous and important articles and reports relating to these sciences, presents them also the means of knowing, in a summary and synthetic form, the chief problems of all the other branches of knowledge.
IS THE ONLY REVIEW that among its contributors can boast of the most illustrious men of science in the whole world. A list of more than 350 of these is given in each number.
The articles are published in the language of their authors, and every number has a supplement containing the French translation of all the articles that are not French. The review is thus completely accessible to those who know only French. (Write for a free copy to the General Secretary of "Scientia." Milan, sending six pence in stamps of your country, merely to cover packing and postage.)

PHYSIOLOGICAL ABSTRACTS

Monthly, price 5s. net. Annual Subscription, post free, 42s.

This Journal is issued by the PHYSIOLOGICAL SOCIETY, acting in co-operation with numerous physiological organisations in Great Britain, America, and other countries. The Editor, Prof. J. MELLANBY, is assisted by a staff of competent abstractors both at home and abroad.

The Journal aims at issuing promptly abstracts of the papers published throughout the world, in physiological and allied sciences (including Plant Physiology).

A number is published at the beginning of each month. Vol. XIII began with the April (1928) issue.

Subscriptions are only taken for April to March of the next year, and are payable in advance.

Back numbers, excepting some which are out of print, may be obtained from the Publishers, or any Bookseller. An extra charge is made for some numbers the stock of which is nearly exhausted. Prices on application.

Binding Cases, price 2s. net, are supplied by the Publishers, who can also arrange for binding; prices on application.

PHYSIOLOGICAL REVIEWS
PUBLISHED BY THE
AMERICAN PHYSIOLOGICAL SOCIETY

UNDER THE EDITORIAL DIRECTION OF

W. H. HOWELL, BALTIMORE
CHARLES W. EDMUNDS, ANN ARBOR
WALTER J. MEEK, MADISON
D. R. HOOKER, Managing Editor, BALTIMORE

A. J. CARLSON, CHICAGO
LAWRENCE J. HENDERSON, CAMBRIDGE, MASS.
E. B. KRUMBHAAR, PHILADELPHIA

Containing short but comprehensive articles dealing with the recent literature in Physiology, using this term in a broad sense to include Bio-Chemistry, Bio-Physics, Experimental Pharmacology and Experimental Pathology.

TENTATIVE CONTENTS OF VOLUME VIII, 1928

Additional Articles will be announced later

Kenneth J. Franklin: Physiology and pharmacology of veins
Charles C. Macklin: The physiology of the bronchial tree from the anatomical view-point
S. A. Asdell: The growth and function of the corpus luteum
Henry Laurens: Physiological responses to light
O. R. Langworthy: The control of posture by the central nervous system
S. L. Warren: Physiological action of X-rays
J. A. Gardner: Origin and significance of cholesterol
George B. Wallace: Specificity in the reaction of drugs
C. E. Ferree: Color vision
H. M. Vernon: Industrial fatigue
Florence R. Sabin: Bone marrow

L. N. Katz: Significance of the T wave of the electrocardiogram
H. B. Vickery and T. B. Osborne: Protein molecule
C. P. Stewart and G. H. Percival: Calcium metabolism
B. P. Babkin: Gastric digestion
Henri Fredericq and M. Lapicque: Chronaxie
Dr and Mrs Edward Mellanby: The influence of diet on tooth formation
H. S. Raper: The aerobic oxydases
Herbert S. Gasser: Muscle contracture
E. V. McCollum: Isolation of vitamins
Adolf Meyer: Aphasie
Percy M. Dawson: Recent literature on physiological effects of exercise
Robert Fahren: Suspension stability of blood
Joseph Hoet: Rigor mortis

The New KLETT Bio-Colorimeter

This Instrument shows a radical change in construction from any other colorimeter, has no equal in convenience and speed, besides eliminating the chance of error to a minimum. Its optical and mechanical features are such that it met with the highest praise by the best authorities of biological chemistry.

FULL PARTICULARS TOGETHER WITH PRICES SENT ON APPLICATION

Standard Rats for Research Workers

Investigators in the biological sciences now recognise that rigorously inbred animals are essential to trustworthy experiments.

In this country, rats of the Tyler strain, originating from the Wistar Institute, Philadelphia, and closely inbred for 30 generations, have been supplied, both for breeding stock and for experimental purposes, to:

16 University and College Departments
7 Research Institutes
5 Commercial Laboratories

These rats are directly descended from 15 animals imported in 1924 by

THE GLAXO RESEARCH LABORATORY
56 OSNABURGH STREET, LONDON, N.W. 1

Special terms for orders from research workers at Universities and Research Institutes for quantities of a dozen or more. Particulars on application.
