FOR OUT-OF-PRINT BOOKS

We specialize in finding the unusual, the difficult and the out-of-print Book, and we offer the service of a special department for this purpose, to Librarians, Students and others. We are glad to receive offers of Second-hand Books and Journals, for which we are prepared to offer full market prices and pay cash; particularly complete sets or long runs of the following:—

American Journal of Physiology—Annales de l'Institut Pasteur—Bulletin de l'Institut Pasteur—Année Biologique—Archiv für Anatomie und Physiologie—Archiv für Entwicklungsmechanik: 1-52—Archiv für experimentelle Pathologie—Archiv für mikroskopische Anatomie—Archiv für Physiologie (Pflüger)—Archives d'Anatomie microscopique—BIOCHEMICAL JOURNAL—Archives internationales de Physiologie—

Journal of Anatomy and Physiology—Journal of Biological Chemistry—Journal of Pathology and Bacteriology—Journal of Physiology: vols. 6, 8, 9, 13, 22, 23, 27, 30 or complete set—Physiological Reviews—Physiological Abstracts—Quarterly Journal of Microscopical Science—Skandinavisches Archiv für Physiologie—Zeitschrift für Biologie, and many others.

A large stock of new and second-hand books always kept. English and Foreign Books supplied. Catalogues frequently issued and supplied post-free on request. Catalogue 309. Scientific Books and Publications of Learned Societies.

To be published in October

**LEADING LABORATORIES
USE JUDEX**

HIGHLY qualified research chemists personally supervise the manufacture of Judex analytical reagents, each of which is guaranteed to conform to A.R. standards. THAT IS why leading laboratories insist

upon Judex reagents. BEING actual manufacturers, we can supply in large or small quantities, and give our guarantee with a due sense of responsibility. WRITE for a copy of the Judex catalogue.

THE UNIVERSITY OF CHICAGO PRESS

The Rôle of the Scientific Societies in the Seventeenth Century. By MARTHA ORNSTEIN. \$3.00, post paid \$3.15.

With a fine appreciation of the historical and scientific problems involved, Miss Ornstein describes and evaluates just what the Societies of Italy, England, France and Germany accomplished in experimental work and what their contributions were to the progress of science.

The Newer Knowledge of Bacteriology and Immunology. Edited by E. O. JORDAN and I. S. FALK. \$10.00.

Eighty leading men of science have collaborated in the preparation of this summarization of the present status of knowledge and methods in bacteriology and immunology.

Laboratory Outlines in Bacteriology and Immunology. By JOHN F. NORTON and I. S. FALK. \$2.00.

Consists of exercises which are designed to acquaint the reader with a variety of the best methods, to give him practice in working with different groups of bacteria, and to illustrate types of immunologic phenomena.

Nutrition Work with Children. By LYDIA J. ROBERTS. \$3.50.

Dealing with the causes, effects, prevention, and treatment of malnutrition.

The Control of Hunger in Health and Disease. By A. J. CARLSON. \$2.50.

Rhus Dermatitis: Its Pathology and Chemotherapy. By JAMES B. MCNAIR. \$4.00.

General Cytology. A Textbook of Cellular Structure and Function for Students of Biology and Medicine. Edited by E. V. COWDRY. \$7.50.

Methods in Plant Histology. (Fourth Edition, Completely Revised.) By CHARLES JOSEPH CHAMBERLAIN. \$3.25.

“SCIENTIA,”

INTERNATIONAL REVIEW OF SCIENTIFIC SYNTHESIS
Published every month (each number containing 100 to 120 pages)

Editor: EUGENIO RIGNANO

IS THE ONLY REVIEW the contributors to which are really international.

IS THE ONLY REVIEW that has a really world-wide circulation.

IS THE ONLY REVIEW of scientific synthesis and unification that deals with the fundamental questions of all sciences: the history of the sciences, mathematics, astronomy, geology, physics, chemistry, biology, psychology and sociology.

IS THE ONLY REVIEW therefore which, while immediately interesting students of biology and physiology by its numerous and important articles and reports relating to these sciences, presents them also the means of knowing, in a summary and synthetic form, the chief problems of all the other branches of knowledge.

IS THE ONLY REVIEW that among its contributors can boast of the most illustrious men of science in the whole world. A list of more than 350 of these is given in each number.

The articles are published in the language of their authors, and every number has a supplement containing the French translation of all the articles that are not French. The review is thus completely accessible to those who know only French. (Write for a free copy to the General Secretary of “Scientia,” Milan, sending six pence in stamps of your country, merely to cover packing and postage.)

PHYSIOLOGICAL A B S T R A C T S

Monthly, price 5s. net.

Annual Subscription, post free, 42s.

This Journal is issued by the PHYSIOLOGICAL SOCIETY, acting in co-operation with numerous physiological organisations in Great Britain, America, and other countries. The Editor, Prof. J. MELLANBY, is assisted by a staff of competent abstractors both at home and abroad.

The Journal aims at issuing promptly abstracts of the papers published throughout the world, in physiological and allied sciences (including Plant Physiology).

A number is published at the beginning of each month. Vol. XIII began with the April (1928) issue.

Subscriptions are only taken for April to March of the next year, and are payable in advance.

Back numbers, excepting some which are out of print, may be obtained from the Publishers, or any Bookseller. An extra charge is made for some numbers the stock of which is nearly exhausted. Prices on application.

Binding Cases, price 2s. net, are supplied by the Publishers, who can also arrange for binding; prices on application.

PHYSIOLOGICAL REVIEWS

PUBLISHED BY THE
AMERICAN PHYSIOLOGICAL SOCIETY

UNDER THE EDITORIAL DIRECTION OF

W. H. HOWELL, BALTIMORE

A. J. CARLSON, CHICAGO

LEO LOEB, ST LOUIS

P. A. SHAFFER, ST LOUIS

J. J. R. MACLEOD, ABERDEEN, SCOTLAND TORALD SOLLMANN, CLEVELAND

D. R. HOOKER, *Managing Editor*, BALTIMORE

Containing short but comprehensive articles dealing with the recent literature in Physiology, using this term in a broad sense to include Bio-Chemistry, Bio-Physics, Experimental Pharmacology and Experimental Pathology.

TENTATIVE CONTENTS OF VOLUME VIII, 1928

Additional Articles will be announced later

KENNETH J. FRANKLIN: Physiology and pharmacology of veins

CHARLES C. MACKLIN: The physiology of the bronchial tree from the anatomical view-point

S. A. ASDELL: The growth and function of the corpus luteum

HENRY LAURENS: Physiological responses to light

O. R. LANGWORTHY: The control of posture by the central nervous system

S. L. WARREN: Physiological action of X-rays

J. A. GARDNER: Origin and significance of cholesterol

GEORGE B. WALLACE: Specificity in the reaction of drugs

C. E. FERREE: Color vision

H. M. VERNON: Industrial fatigue

FLORENCE R. SABIN: Bone marrow

L. N. KATZ: Significance of the T wave of the electrocardiogram

H. B. VICKERY AND T. B. OSBORNE: Protein molecule

C. P. STEWART AND G. H. PERCIVAL: Calcium metabolism

B. P. BABKIN: Gastric digestion

HENRI FREDERICQ AND M. LAPICQUE: Chronaxie

MRS EDWARD MELLANBY: The influence of diet on tooth formation

H. S. RAPER: The aerobic oxydases

HERBERT S. GASSER: Muscle contraction

E. V. MCCOLLUM: Isolation of vitamins

ADOLF MEYER: Aphasia

PERCY M. DAWSON: Recent literature on physiological effects of exercise

ROBERT FAHREUS: Suspension stability of blood

JOSEPH HOET: Rigor mortis

COMPLETE SETS OF APPARATUS FOR THE DETERMINATION OF HYDROGEN ION CONCENTRATION

As described by S. W. Cole
in "Practical Physiological
Chemistry," 7th Edition, 1926.

- A. With two Gold Electrodes for Quinhydrone (as illustration).
- B. With Double Hydrogen Electrode.
- C. With Gold Electrode for Quinhydrone and Calomel Electrode.
- D. With Hydrogen Electrode and Calomel Electrode.

Prices and further particulars on application.

14-15 CROSS STREET HATTON GARDEN LONDON E.C.1

Vitamin-free protein

Physiological Caseinogen AB is made and tested in the Glaxo Research Laboratory. It is also examined in the Vitamin-Testing Department of the Pharmacological Laboratories of the Pharmaceutical Society of Great Britain, appointed by the Accessory Food Factors Committee of the Medical Research Council and the Lister Institute to carry out an identical independent test.

The test itself was drawn up by the Accessory Food Factors Committee, and has been modified from time to time to incorporate improvements in vitamin-testing technique. Every batch of caseinogen is issued with a certificate from the Pharmaceutical Society's Laboratory, guaranteeing that it has given a satisfactory test.

The product is prepared to provide investigators, who wish to be spared the time and labour involved in freeing commercial caseinogen from Vitamins A and B, with a caseinogen consistently free from significant amounts of these substances. It has been supplied to workers in 35 Laboratories at University Departments and Research Institutions.

Full particulars of the test will be supplied to any enquirer.

An "Ashless" Casein C, containing under 0.2% of calcium and suitable for experiments in mineral metabolism, can also be supplied.

PHYSIOLOGICAL CASEINOGEN AB

Tested for freedom from fat-soluble A and from water-soluble B.

6s. 6d. per lb. for 28 lbs.
7s. per lb. for 14 lbs.
7s. 6d. per lb. for smaller quantities.

"ASHLESS" CASEIN C

2s. 6d. per lb. for 28 lbs.
3s. per lb. for smaller quantities.

*Special terms quoted
for yearly contracts.*
