	PAGE
CXII. Haemocyanin. Part V. The oxygen dissociation curve of haemocyanin from the snail ( <i>Helix pomatia</i> ) in dialysed solution. By E. STEDMAN and E. STEDMAN. (With four figures)	889
CXIII. The action of carbon monoxide on the autoxidation of sulphhydryl compounds. By M. DIXON. (With five figures)	902
CXIV. The action of ultra-violet rays on complement. By J. GORDON and A. WORMALL	909
CXV. The creatine-creatinine equilibrium. The apparent dissociation constants of creatine and creatinine. By R. K. CANNAN and A. SHORE. (With two figures)	920
CXVI. Guanidine studies. II. Distribution of guanidines in acute guanidine and parathyroprivia tetanies. By M. M. ELLIS	930
CXVII. Guanidine studies. III. Water content of certain tissues during acute guanidine and parathyroprivia tetanies. By M. M. ELLIS	937
CXVIII. Guanidine studies. IV. Changes in guanidine action and in parathyroprivia tetany produced by dextrose. By M. M. ELLIS	941
CXIX. A method for the estimation of the salt content from the $p_H$ value of apple juice, and some comparative analyses of the mineral content of the juice and whole apple. By D. HAYNES and J. W. BROWN. (With two figures)	947
CXX. The glucose metabolism of kidney tissue <i>in vitro</i> . II. By J. T. IRVING	964
CXXI. Tyramine oxidase. I. A new enzyme system in liver. By M. L. C. HARE. (With five figures)	968
CXXII. The examination of irradiated zymosterol for the presence of vitamin D. By E. M. HUME, H. H. SMITH and I. SMEDLEY-MACLEAN. (With Plate II)	980
CXXIII. The absorption spectrum of vitamin A. By R. A. MORTON and I. M. HEILBRON. (With six figures)	987
CXXIV. Studies on colour tests for sterols and for vitamin A. II. A spectroscopic study of the colorations attributed to vitamin A. By F. WOKES. (With three figures)	997
CXXV. The absorption of water by gelatin. Part II. The nitrate system. By D. JORDAN-LLOYD and W. B. PLEASS. (With nine figures)	1007
CXXVI. The assay of vitamin A. By K. H. COWARD and K. M. KEY. (With five figures)	1019
CXXVII. Uricase and its action. Part I. Preparation. By S. J. PRZYLECKI	1026
CXXVIII. The diurnal variation of the gaseous constituents of river waters. Part III. By R. W. BUTCHER, F. T. K. PENTELLOW and J. W. A. WOODLEY. (With eight figures)	1035
CXXIX. Studies on the cholesterol content of normal human plasma. Part III. On the so-called alimentary hypercholesterolaemia. By J. A. GARDNER and H. GAINSBOROUGH	1048
CXXX. On the pigment of the fat of certain rabbits. By S. G. WILLIMOTT	1057
CXXXI. Pancreatic extracts in relation to lactic acid formation in muscle. By E. M. CASE and D. R. McCULLAGH	1060
CXXXII. On the application of the Donnan equilibrium to the ionic relations of plant tissues. By G. E. BRIGGS and A. H. K. PETRIE	1071
CXXXIII. The isolation of pure <i>l</i> -proline. By B. W. TOWN	1083
CXXXIV. The fat, lipin and cholesterol constituents of adrenals and gonads in cases of mental disease. By D. L. WOODHOUSE. (With one figure)	1087
CXXXV. Vitamin A formation. The feeding of etiolated wheat shoots to rats kept in darkness. By T. MOORE. (With one figure)	1097
CXXXVI. The effect of arsenic upon some oxidation-reduction systems. By G. BARRY, E. BUNBURY and E. L. KENNAWAY	1102
CXXXVII. The liberation from yeast of substances giving the nitroprusside reaction. By Y. POURBAIX and E. L. KENNAWAY	1112
CXXXVIII. The effect of fluorides and iodides on the clotting of milk by pepsin. By W. M. CLIFFORD. (With one figure)	1128
CXXXIX. The colour reactions of substances containing vitamin D. By W. A. SEXTON	1133
CXL. Characterisation of very small quantities of proteins by Van Slyke's method. By N. NARAYANA and M. SRRENIVASAYA	1135
CXLI. The action of X-radiation upon vitamin D in activated ergosterol. By R. R. MORRISON, P. R. PEACOCK and S. WRIGHT	1138
CXLII. The iodine values of some sterols by Dam's method. By A. M. COPPING	1142
CXLIII. The selective fermentation of glucose and fructose by brewer's yeast. By R. H. HOPKINS	1145
CXLIV. The metabolism of tryptophan. II. Synthesis of 6-methyl- and 8-methyl-kynurenic acids. By W. ROBSON	1157
CXLV. The metabolism of tryptophan. III. The mode of formation of kynurenic acid from tryptophan. By W. ROBSON	1165
