REVIEW ARTICLE

- Free-radical mechanisms in tissue injury T. F. SLATER 1-15

FULL AND RAPID PAPERS

Proteins

- Structural differences between two lectins from *Cytisus scoparius*, both specific for D-galactose and N-acetyl-D-galactosamine N. M. YOUNG, D. C. WATSON & R. E. WILLIAMS 41-48
- Comparison of apoprotein B of low density lipoproteins of human interstitial fluid and plasma J.-L. HONG, J. PFLUG & D. REICHL 49-55
- Demonstration of link protein in proteoglycan aggregates from human intervertebral disc A. TENGBLAD, R. H. PEARCE & B. J. GRIMMER 85-92
- Mode of action of a bactericidal protein induced in the haemolymph of *Sarcophaga peregrina* (flesh-fly) larvae M. OKADA & S. NATORI 119-124
- The brain isoform of a key ATP-regulating enzyme, creatine kinase, is a phosphoprotein L. C. MAHADEVAN, S. A. WHATLEY, T. K. C. LEUNG & L. LIM 139-144
- The amino acid sequence of the dihaem cytochrome c_4 from the bacterium *Azotobacter vinelandii* R. P. AMBLER, M. DANIEL, K. MELIS & C. D. STOUT 217-227

Enzymes

- Pulse-radiolysis studies on the interaction of one-electron reduced species with blue oxidases. Reduction of Type-2-copper-depleted ascorbate oxidase. P. O'NEILL, E. M. FIELDEN, L. AVIGLIANO, G. MARCOZZI, A. BALLINI & A. FINAZZI AGRÒ 65-70
- Pulse-radiolysis studies on the interaction of one-electron reduced species with blue oxidases. Reduction of native and Type-2-copper-depleted Vietnamese-lacquer-tree and Japanese-lacquer-tree laccases. P. O'NEILL, E. M. FIELDEN, L. MORPURGO & E. AGOSTINELLI 71-76
- Modification of hydroxymethylbilane synthase (porphobilinogen deaminase) by pyridoxal 5'-phosphate. Demonstration of an essential lysine residue G. J. HART, F. J. LEEPER & A. R. BATTERSBY 93-102
- An extension of Chou's graphic rules for deriving enzyme kinetic equations to systems involving parallel reaction pathways. G.-P. ZHOU & M.-H. DENG 169-176
- The metabolism of neuropeptides. Both phosphoramidon-sensitive metallopeptidases are present in the electric organ *Torpedo marmorata* A. J. TURNER & M. J. DOWDALL 255-259
- Cobalt-ion chelate affinity chromatography for the purification of brain neutral α -D-mannosidase and its separation from acid α -D-mannosidase R. MATHUR & A. S. BALASUBRAMANIAN 261-264

Carbohydrates

- The enzymic defect and storage products in canine fucosidosis D. ABRAHAM, W. F. BLAKEMORE, A. DELL, M. E. HERRTAGE, J. JONES, J. T. LITTLEWOOD, J. OATES, A. C. PALMER, R. SIDEBOTHAM & B. WINCHESTER 25-33
- A study of maturation events in jackbeans (*Canavalia ensiformis*) S. E. MARCUS, J. BURGESS, P. R. MAYCOX & D. J. BOWLES 265-268

Lipids

- Incorporation of serine into *Paramecium* ethanolamine phospholipid and phosphonolipid head groups D. F. MATESIC & E. S. KANESHIRO 229-233

Contents

Nucleic acids and molecular genetics

- Interaction of phenylthiolato-(2,2',2''-terpyridine)platinum(II) cation with DNA L. P. G. WAKELIN, W. D. MCFADYEN, A. WALPOLE & I. A. G. ROOS 203-215

Synthesis and degradation of macromolecules

- Protein synthesis in rat lung. Measurements *in vivo* based on leucyl-tRNA and rapidly turning-over procollagen I J. KELLEY, W. S. STIREWALT & L. CHRIN 77-83

Intermediary metabolism and metabolic control

- Cyclic AMP mediates β -adrenergic-induced increases in N-linked protein glycosylation in rat parotid acinar cells E. E. KOUSVELARI, S. R. GRANT, D. K. BANERJEE, M. J. NEWBY & B. J. BAUM 17-24
- Effects of compactin, mevalonate and low-density lipoprotein on 3-hydroxy-3-methylglutaryl-coenzyme A reductase activity and low-density-lipoprotein-receptor activity in the human hepatoma cell line Hep G2 L. H. COHEN, M. GRIFFIOEN, L. HAVEKES, D. SCHOUTEN, V. VAN HINSBERGH & H. J. KEMPEN 35-39
- Effects of phosphorylation on the kinetic properties of rat liver fructose-1,6-bisphosphatase D. W. MEEK & H. G. NIMMO 125-130
- The allosteric properties of rat liver fructose-1,6-bisphosphatase D. W. MEEK & H. G. NIMMO 131-138
- Metabolism of hypoxanthine in isolated rat hepatocytes M.-F. VINCENT, G. VAN DEN BERGHE & H.-G. HERS 145-155
- Inositol trisphosphate formation and calcium mobilization in Swiss 3T3 cells in response to platelet-derived growth factor M. J. BERRIDGE, J. P. HESLOP, R. F. IRVINE & K. D. BROWN 195-201
- Phosphorylation of a stromal enzyme protein in maize (*Zea mays*) mesophyll chloroplasts C. FOYER 247-253
- Specificity of inositol trisphosphate-induced calcium release from permeabilized Swiss-mouse 3T3 cells R. F. IRVINE, K. D. BROWN & M. J. BERRIDGE 269-272
- Vasopressin and angiotensin control the activity of liver phosphodiesterase S. KEPPENS & H. DE WULF 277-280

Bioenergetics and Transport

- Absorption and metabolism of fructose by rat jejunum P. A. H. HOLLOWAY & D. S. PARSONS 57-64

Membranes and receptors

- Activation of human platelet phospholipase C by ionophore A23187 is totally dependent upon cyclo-oxygenase products and ADP S. E. RITTENHOUSE 103-110
- Internalization and recycling of insulin receptors in hepatoma cells. Absence of regulation by receptor occupancy Y. CHVATCHKO, E. VAN OBBERGHEN & M. FEHLMANN 111-117
- Tight coupling of thrombin-induced acid hydrolase secretion and phosphatidate synthesis to receptor occupancy in human platelets H. HOLMSEN, C. A. DANGELMAIER & S. RONGVED 157-167
- N*⁶-(Phenylisopropyl)adenosine prevents glucagon both blocking insulin's activation of the plasma-membrane cyclic AMP phosphodiesterase and uncoupling hormonal stimulation of adenylate cyclase activity in hepatocytes A. V. WALLACE, C. M. HEYWORTH & M. D. HOUSLAY 177-182
- An assessment of the ability of insulin-stimulated cyclic AMP phosphodiesterases to decrease hepatocyte intracellular cyclic AMP concentrations C. M. HEYWORTH, A. V. WALLACE, S. R. WILSON & M. D. HOUSLAY 183-187
- Islet-activating protein blocks glucagon desensitization in intact hepatocytes C. M. HEYWORTH, E. HANSKI & M. D. HOUSLAY 189-194
- Two-dimensional polyacrylamide-gel electrophoresis of the proteins and glycoproteins of purified human platelet surface and intracellular membranes N. HACK & N. CRAWFORD 235-246
- Simulation of an inhibitory equilibrium system. Aberrant proteinic target sizes as obtained by radiation inactivation. S. SWILLENS 273-276
