Volume 239, No. 3, 1986

FULL AND RAPID PAPERS

Proteins

- Influence of Ca²⁺ on the structure of reptilase-derived and thrombin-derived fibrin gels 513-516
M. E. CARR, JR., D. A. GABRIEL & J. McDONAGH
- Structural studies of a carbohydrate-containing immunoglobulin- λ -light-chain amyloid-fibril protein (AL) of variable subgroup III 545-551
E. HOLM, K. SLETTEN & G. HUSBY
- Molecular cloning of a cDNA and assignment of the C-terminal of sarcotoxin IA, a potent antibacterial protein of *Sarcophaga peregrina* 717-722
N. MATSUMOTO, M. OKADA, H. TAKAHASHI, Q. X. MING, Y. NAKAJIMA, Y. NAKANISHI, H. KOMANO & S. NATORI
- Phenotyping of human complement component C4, a class-III HLA antigen 763-767
E. SIM & S. J. CROSS
- Modification of human haemoglobin with glucose 6-phosphate enhances tetramer-dimer subunit dissociation 769-772
R. VALDES, JR.
- Determination of the molecular mass of apolipoprotein B-100. A chemical approach 777-780
C.-Y. YANG, F.-S. LEE, L. CHAN, D. A. SPARROW, J. T. SPARROW & A. M. GOTTO, JR.
- [γ -³²P]ATP as a tracer of the fragmentation of Ca-F-actin 801-803
E. GRAZI & G. TROMBETTA
- ### Enzymes
- Glucose dehydrogenase from the thermoacidophilic archaeobacterium *Sulfolobus solfataricus* 517-522
P. GIARDINA, M.-G. DE BIASI, M. DE ROSA, A. GAMBACORTA & V. BUONOCORE
- 6- β -Iodopenicillanate as a probe for the classification of β -lactamases 575-580
F. DE MEESTER, J.-M. FRÈRE, S. G. WALEY, S. J. CARTWRIGHT, R. VIRDEN & F. LINDBERG
- Properties of a class C β -lactamase from *Serratia marcescens* 581-586
B. JORIS, F. DE MEESTER, M. GALLEN, S. MASSON, J. DUSART, J.-M. FRÈRE, J. VAN BEEUMEN, K. BUSH & R. SYKES
- Purification and properties of a xylanase from *Streptomyces lividans* 587-592
R. MOROSOLI, J.-L. BERTRAND, F. MONDOU, F. SHARECK & D. KLUEPFEL
- The synthesis of peptidylfluoromethanes and their properties as inhibitors of serine proteinases and cysteine proteinases 633-640
P. RAUBER, H. ANGLIKER, B. WALKER & E. SHAW
- Inhibition by chlorogenic acid of haematin-catalysed retinoic acid 5,6-epoxidation 641-646
H. IWAHASHI, Y. NEGORO, A. IKEDA, H. MORISHITA & R. KIDO
- Purification and characterization of a novel NADPH(NADH)-dependent glyoxylate reductase from spinach leaves. Comparison of immunological properties of leaf glyoxylate reductase and hydroxypyruvate reductase 653-659
L. A. KLECZKOWSKI, D. D. RANDALL & D. G. BLEVINS
- Fractionation and purification of hepatic microsomal cytochrome P-450 isoenzymes from phenobarbital-pretreated rats by h.p.l.c. A convenient tool for screening of isoenzymes inactivated by allylisopropylacetamide 661-669
L. M. BORNHEIM & M. A. CORREIA
- Purification and characterization of 3-dehydroquinase from *Escherichia coli* 699-704
S. CHAUDHURI, J. M. LAMBERT, L. A. MCCOLL & J. R. COGGINS
- Renal neuraminidase. Characterization in normal rat kidney and measurement in experimentally induced nephrotic syndrome 705-710
W. H. BARICOS, S. CORTEZ-SCHWARTZ & S. V. SHAH
- Mechanism of enzymic isomerization and epimerization of D-erythrose 4-phosphate 739-743
S. HOSOMI, N. NAKAI, J. KOGITA, T. TERADA & T. MIZOGUCHI
- Intrinsic versus extrinsic coagulation. Kinetic considerations 757-762
B. J. WARN-CRAMER & S. P. BAJAJ
- Strain differences in the maintenance of cytochrome P-450 and mixed-function-oxidase activities in cultured rat hepatocytes. Effect of prostaglandins 785-788
M. H. GRANT, S. J. SMITH & M. D. BURKE
- Covalently bound pyrroloquinoline quinone is the organic prosthetic group in human placental lysyl oxidase 789-791
R. A. VAN DER MEER & J. A. DUINE
- Direct extraction and assay of bone tissue collagenase and its relation to parathyroid-hormone-induced bone resorption 793-796
Y. ECKHOUT, J.-M. DELAISSÉ & G. VAES
- Competitive inhibition of human skin collagenase by N-benzyloxy-carbonyl-L-alanyl-3-amino-2-oxopropyl-L-leucyl-L-alanyl-glycine ethyl ester 797-799
D. A. WALLACE, S. R. S. BATES, B. WALKER, G. KAY, J. WHITE, D. J. S. GUTHRIE, N. L. BLUMSOM & D. T. ELMORE

CONTENTS (continued)

Carbohydrates

- Isolation and identification of uridine(5')-diphospho(1)-2,3-diacetamido-2,3-dideoxy-*a*-D-glucopyranuronic acid from *Pseudomonas aeruginosa* P1-III S. OKUDA, S. MURATA & N. SUZUKI 733-738

Lipids

- Activation of hypolipidaemic drugs to acyl-coenzyme A thioesters M. BRONFMAN, L. AMIGO & M. N. MORALES 781-784

Synthesis and degradation of macromolecules

- Rapid inactivation of the plasminogen-activator inhibitor upon secretion from cultured human endothelial cells T. KOOISTRA, E. D. SPRENGERS & V. W. M. VAN HINSBERGH 497-503

- Biosynthesis of the third component of complement (C3) by the human monocytic-cell line U-937. Induction by phorbol myristate acetate S. BENGIO, D. GILBERT, P. PEULVE, M. DAVEAU & M. FONTAINE 711-716

Intermediary metabolism and metabolic control

- Epidermal growth factor mimics insulin effects in rat hepatocytes F. BOSCH, B. BOUSCAREL, J. SLATON, P. F. BLACKMORE & J. H. EXTON 523-530

- Hormonal control of fructose 2,6-bisphosphate concentration in the HT29 human colon adenocarcinoma cell line. α_2 -Adrenergic agonists counteract effect of vasoactive intestinal peptide C. DENIS, H. PARIS & J.-C. MURAT 531-536

- Regulation of the pentose phosphate cycle. Cofactor that controls the inhibition of glucose-6-phosphate dehydrogenase by NADPH in rat liver M. NOGUEIRA, G. GARCIA, C. MEJUTO & M. FREIRE 553-558

- Regulation of ketogenesis, gluconeogenesis and the mitochondrial redox state by dexamethasone in hepatocyte monolayer cultures L. AGIUS, M. H. CHOWDHURY & K. G. M. M. ALBERTI 593-601

- Diurnal variations in the effects of an unsaturated-fat-containing diet on fatty acid and cholesterol synthesis in rat hepatocytes G. F. GIBBONS & C. R. PULLINGER 617-623

- Inhibition of microsomal oxidation of ethanol by pyrazole and 4-methylpyrazole *in vitro*. Increased effectiveness after induction by pyrazole and 4-methylpyrazole D. E. FEIERMAN & A. I. CEDERBAUM 671-677

- Diacylglycerol induces deacylation of phosphatidylinositol and mobilization of arachidonic acid in mouse macrophages. Comparison with induction by phorbol diester A. EMILSSON, J. WIJKANDER & R. SUNDLER 685-690

- IMP production and energy metabolism during exercise in rats in relation to age H. G. WESTRA, A. DE HAAN, J. E. VAN DOORN & E. J. DE HAAN 751-755

- The ornithine requirement of urea synthesis. Formation of ornithine from glutamine in hepatocytes P. LUND & D. WIGGINS 773-776

Bioenergetics and transport

- Intramitochondrial regulation of fatty acid β -oxidation occurs between flavoprotein and ubiquinone. A role for changes in the matrix volume A. P. HALESTRAP & J. L. DUNLOP 559-565

Membranes and receptors

- Renal plasma membrane receptors for certain modified serum albumins. Evidence for participation of a heparin receptor P. N. RANGANATHAN & J. L. MEGO 537-543

- Guanine nucleotide binding protein involved in muscarinic responses in the pig coronary artery is insensitive to islet-activating protein T. SASAGURI, M. HIRATA, T. ITOH, T. KOGA & H. KURIYAMA 567-574

- Trypsin-induced increase in cyclic AMP concentration in rat thymocytes. An effect independent of calcium and calmodulin J. SEGAL 603-607

- Cell-surface insulin receptor cycling and its implication in the glyco-genic response in cultured foetal hepatocytes P. SOUBIGOU, E. PRINGAULT & C. PLAS 609-615

- Modulation of lipid fluidity of small- and large-intestinal antipodal membranes by Ca^{2+} T. A. BRASITUS & P. K. DUDEJA 625-631

- Characterizaion of the *N*-linked high-mannose oligosaccharides of the insulin pro-receptor and mature insulin receptor subunits A. MCELDUFF, A. WATKINSON, J. A. HEDO & P. GORDEN 679-683

- Five enzymes of the glycolytic pathway serve as substrates for purified epidermal-growth-factor-receptor kinase N. REISS, H. KANETY & J. SCHLESSINGER 691-697

- Further evidence for the involvement of a phosphoprotein in the respiratory burst oxidase of human neutrophils P. G. HEYWORTH & A. W. SEGAL 723-731

- Amiloride added together with bumetanide completely blocks mouse 3T3-cell exit from G0/G1-phase and entry into S-phase R. PANET, D. SNYDER & H. ATLAN 745-750

CONTENTS (continued)

Cell structure and function

An inhibitory role for the protein kinase C pathway in ovarian steroidogenesis. Studies with cultured swine granulosa cells	J. D. VELDHUIS & L. M. DEMERS	505-511
The development of cytochrome b_{-245} in maturing human macrophages	R. C. GARCIA, A. R. CROSS & A. W. SEGAL	647-651

BJ Letters

Carbohydrate and protein conformation	D. C. KILPATRICK	805-806
---------------------------------------	------------------	---------
