The identification AND FULL ARTICLE REVIEW Volume 246, use Protein engineering. The design, synthesis and characterization of facitious proteins

**FULL AND RAPID PAPERS**

**Proteins**

The use of monoclonal antibodies to distinguish several chemically modified forms of human \( \alpha \)-proteinase inhibitor

The identification of epitopic sites in human \( \alpha \)-proteinase inhibitor

Chemical modification of human \( \alpha \)-proteinase inhibitor by tetranitromethane. Structure–function relationship

Identification of the ligand-exchange process in the alkaline transition of horse heart cytochrome \( c \)

The 48 kDa Ca\(^{2+}\)-binding protein of bovine brain

Effect of cations and temperature on kinetics of desmin assembly

The amino acid sequence of the cytochrome \( c_1 \) from the phototrophic bacterium *Rhodopseudomonas globiformis*

On the disulphide bonds of rhodopsins

Complement Factor H-binding protein of Raji cells and tonsil B lymphocytes

Studies on chemical modification of cold agglutinin from the snail *Achatina fulica*

Purification of smooth-muscle myosin free of calmodulin and myosin light-chain kinase. Susceptibility to oxidation

**Enzymes**

The inhibition of glucokinase and glycero kinase from *Bacillus stearothermophilus* by the triazine dye Procion Blue MX-3G

Proteins of the kidney microvillar membrane. Enzymic and molecular properties of aminopeptidase W

Purification and characterization of glutathione \( S \)-transferases of human kidney

Ionic regulation of adenylate cyclase from the cilia of *Paramecium tetraurelia*

Characterization of \( \alpha \)-amylase and pullulanase activities of *Clostridium thermohydrosulfuricum*. Evidence for a novel thermostable amylase

Interaction of Zn\(^{2+}\) and Eu\(^{3+}\) with bovine liver glutamate dehydrogenase

Chemically-induced formation of an inhibitor of hepatic uroporphyrinogen decarboxylase in inbred mice with iron overload

**Nucleic acids and molecular genetics**

Participation of ATP in the binding of a yeast replicative complex to DNA

The binding of the cyclic AMP receptor protein to synthetic DNA sites containing permutations in the consensus sequence TGTGA

Induction of mRNA for phosphoenolpyruvate carboxykinase (GTP) by dexamethasone in cultured rat hepatocytes requires on-going protein synthesis

CONTENTS (continued)

Synthesis and degradation of macromolecules
Identification and partial characterization of two major proteins of Mr 47000 synthesized by bovine retinal endothelial cells in culture
Mechanisms of leucine- and theophylline-stimulated insulin biosynthesis in isolated rat pancreatic islets

A. E. CANFIELD, A. M. SCHOR, D. C. WEST, S. L. SCHOR & M. E. GRANT 121–129
N. WELSH, M. WELSH, D. F. STEINER & C. HELLERSTRÖM 245–248

Intermediary metabolism and metabolic control
Stimulation by d-glucose of mitochondrial oxidative events in islet cells
Metabolism of d-myoinositol 1,3,4,5-tetrakisphosphate by rat liver, including the synthesis of a novel isomer of myo-inositol tetrakisphosphate
A 31P-n.m.r. study of the acute effects of β-blockade on the bioenergetics of skeletal muscle during contraction
Insulin reverses effects of starvation on the activity of pyruvate dehydrogenase kinase in cultured hepatocytes
Effects of fasting on tissue glucose utilization in conscious resting rats. Major glucose-sparing effect in working muscles

A. SENER & W. J. MALAISSE 89–95
R. A. J. CHALLISS, D. J. HAYES & G. K. RADDA 163–172
T. ISSAD, L. PÉNICAUD, P. FERRÉ, J. KANDEL, M.-A. BAUDON & J. GIRARD 241–244

Bioenergetics and transport
Mitogenic stimulation transiently increases the exchangeable mitochondrial calcium pool in rat thymocytes

P. L. LAKIN-THOMAS & M. D. BRAND 173–177

Membranes and receptors
Characterization of a monoclonal antibody that probes the functional domains of the glucocorticoid receptor
An intracellular simian malarial parasite (Plasmodium knowlesi) induces stage-dependent alterations in membrane phospholipid organization of its host erythrocyte
Formation and metabolism of inositol 1,4,5-trisphosphate in human platelets

P. JOSHI, G. P. DUTTA & C. M. GUPTA 103–108
J. L. DANIEL, C. A. DANGEMLAER & J. B. SMITH 109–114
