REVIEW ARTICLE

The synaptic vesicle and the cytoskeleton

J. H. WALKER & D. V. AGOSTON 249-258

FULL AND RAPID PAPERS

Proteins

Regulation of calpactin I phospholipid binding by calpactin I light-chain binding and phosphorylation by p60^{v-src}

M. A. POWELL & J. R. GLENNEY 321-328

An extended-X-ray-absorption-fine-structure study of freeze-dried and solution ovotransferrin. Evidence for water co-ordination at the metal-binding sites

S. S. HASNAIN, R. W. EVANS,
R. C. GARRATT & P. F. LINDLEY 369-375

Differential effect of iodination of ovotransferrin and its two half-molecule domains on binding to transferrin receptors on chick embryo red blood cells

A. B. MASON & S. A. BROWN 417-425

The cross-linking of tyrosine residues in apo-ovotransferrin by treatment with periodate anions

J. J. HSUAN 467-473

Studies on fatty acid-binding proteins. The binding properties of rat liver fatty acid-binding protein

T. C. I. WILKINSON & D. C. WILTON 485-488

Enzymes

Relative effects of S-adenosylmethionine depletion on nucleic acid methylation and polyamine biosynthesis

D. L. KRAMER, J. R. SUFRIN &
C. W. PORTER 259-265

The role of the metal ion in the mechanism of the K⁺-activated aldehyde dehydrogenase of *Saccharomyces cerevisiae*

F. M. DICKINSON & G. W. HAYWOOD 377-384

The interaction of streptokinase-plasminogen activator complex, tissue-type plasminogen activator, urokinase and their acylated derivatives with fibrin and cyanogen bromide digest of fibrinogen. Relationship to fibrinolytic potency *in vitro*

R. CASSELS, R. FEARS & R. A. G. SMITH 395-400

Zinc cytochrome *c* fluorescence as a probe for conformational changes in cytochrome *c* oxidase

T. A. ALLEYNE & M. T. WILSON 475-484

Carbohydrates

The detection of substructures within proteoglycan molecules. Electron-microscopic immuno-localization with the use of Protein A-gold

J. K. SHEEHAN, A. RATCLIFFE, K. OATES &
T. E. HARDINGHAM 267-276

Differentiation-associated decrease in the proportion of fucosylated poly-lactosaminoglycans of CaCo-2 human colonic adenocarcinoma cells

A. YOUAKIM & A. HERSCOVICS 299-306

Nucleic acids and molecular genetics

A quantitative approach to sequence comparisons of nitrogenase MoFe protein α - and β -subunits including the newly sequenced *nifK* gene from *Klebsiella pneumoniae*

D. HOLLAND, A. ZILBERSTEIN, A. ZAMIR &
J. L. SUSSMAN 277-285

Nucleotide sequence of the *Klebsiella pneumoniae nifD* gene and predicted amino acid sequence of the α -subunit of nitrogenase MoFe protein

I. IOANNIDIS & M. BUCK 287-291

Effect of oxygen on levels of mRNA coding for reaction-centre and light-harvesting polypeptides of *Rhodobacter sphaeroides*

C. N. HUNTER, M. K. ASHBY &
S. A. COOMBER 489-492

Synthesis and degradation of macromolecules

Treatment of cartilage proteoglycan aggregate with hydrogen peroxide. Relationship between observed degradation products and those that occur naturally during aging

C. R. ROBERTS, J. S. MORT &
P. J. ROUGHLEY 349-357

Epidermal growth factor increases collagen production in granulation tissue by stimulation of fibroblast proliferation and not by activation of procollagen genes

M. LAATO, V.-M. KÄHÄRI, J. NIINIKOSKI &
E. VUORIO 385-388

CONTENTS (continued)

Intermediary metabolism and metabolic control

- Light-induced changes in the content of inositol phosphates in squid (*Loligo pealei*) retina
J. E. BROWN, D. C. WATKINS & C. C. MALBON 293-297
- Epidermal growth factor counteracts the glycogenic effect of insulin in parenchymal hepatocyte cultures
M. H. CHOWDHURY & L. AGIUS 307-314
- The influence of nanomolar calcium ions and physiological levels of thyroid hormone on oxidative phosphorylation in rat liver mitochondria. A possible signal amplification control mechanism
W. E. THOMAS, A. CRESPO-ARMAS & J. MOWBRAY 315-320
- Effect of graded doses of tri-iodothyronine on ventricular myosin ATPase activity and isomyosin profile in young and old rats
W. J. CARTER, W. F. KELLY, F. H. FAAS, M. E. LYNCH & C. A. PERRY 329-334
- Factors regulating the production of prostaglandin E₂ and prostacyclin (prostaglandin I₂) in rat and human adipocytes
B. RICHELSEN 389-394
- Short-term effect of a high-protein/low-carbohydrate diet on aminopeptidase in adult rat jejunioileum. Site of aminopeptidase response
F. RAUL, T. GODA, F. GOSSÉ & O. KOLDOVSKÝ 401-405
- Calcium-antagonists inhibit secretion of very-low-density lipoprotein from cultured rat hepatocytes
J. Ø. NOSSEN, A. C. RUSTAN & C. A. DREVON 433-439
- Evidence that the flux control coefficient of the respiratory chain is high during gluconeogenesis from lactate in hepatocytes from starved rats. Implications for the hormonal control of gluconeogenesis and action of hypoglycaemic agents
H. J. PRYOR, J. E. SMYTH, P. T. QUINLAN & A. P. HALESTRAP 449-457
- Interactions of insulin and dexamethasone in the control of pyruvate kinase activity and glucose metabolism in sheep adipose tissue
C. P. PLESTED, E. TAYLOR, D. N. BRINDLEY & R. G. VERNON 459-465

Bioenergetics and transport

- Uptake and efflux of copper-64 in Menkes'-disease and normal continuous lymphoid cell lines
S. M. HERD, J. CAMAKARIS, R. CHRISTOFFERSON, P. WOOKEY & D. M. DANKS 341-347
- Pyruvate transport by thermogenic-tissue mitochondria
M. O. PROUDLOVE, R. B. BEECHEY & A. L. MOORE 441-447

Membranes and receptors

- Quantitative analysis of the cytosolic-free-Ca²⁺-dependency of aldosterone production in bovine adrenal glomerulosa cells. Different requirements for angiotensin II and K⁺
A. M. CAPPONI, P. D. LEW & M. B. VALLOTTON 335-340
- Plant glycosides in a liposomal drug-delivery system
N. DAS, B. K. BACHHAWAT, S. B. MAHATO & M. K. BASU 359-361
- ADP-ribosylation of a 21-24 kDa eukaryotic protein(s) by C3, a novel botulinum ADP-ribosyltransferase, is regulated by guanine nucleotide
K. AKTORIES & J. FREVERT 363-368
- C-Terminal bombesin sequence requirements for binding and effects on protein synthesis in Swiss 3T3 cells
S. E. GARGOSKY, J. C. WALLACE, F. M. UPTON & F. J. BALLARD 427-432

Cell structure and function

- Differential permeabilization of membranes by saponin treatment of isolated rat hepatocytes. Release of secretory proteins
M. WASSLER, I. JONASSON, R. PERSSON & E. FRIES 407-415

BJ Letters

- Rat lens aldose reductase and polyol production
M. J. C. CRABBE & S. P. WOLFF 493-494
- Rat lens aldose reductase and polyol production: a reply
P. F. KADOR, J. H. KINOSHITA, D. STRIBLING, D. R. BRITTAIN, D. J. MIRRLEES & C. M. SENNITT 495-496
