Authors

The Biochemical Journal places emphasis on the prompt publication of Full-length Papers (on average about 6 months after receipt), Rapid Papers (on average within 3 months of receipt), Reviews and BJ Letters. It is the Journal's policy to publish papers in English in all fields of biochemistry, provided that they make a significant contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary or inconclusive experiments should not be described.

Papers are accepted from non-members and members of the Biochemical Society. Prospective authors should note that the Biochemical Journal offers rapid publication and makes no manuscript handling charges, no page charges and no charges for plates (except colour). Fifty reprints are provided free of charge; further copies are available at modest cost.

The paragraphs below are a summarized version of information provided in the Biochemical Society's Policy of the Journal and Instructions to Authors [Biochem. J. (1987) 241, 1-24]. Copies are available from the Editorial Office.

The following types of submission are considered by the Editorial Board.

1. Full-length Papers (normally eight printed pages maximum)
2. Rapid Papers (four printed pages maximum)
3. Letters (two printed pages maximum)
4. Reviews (usually solicited)

Full-length Papers and Rapid Papers

Full-length Papers should not normally exceed eight printed pages, including figures and tables. Longer papers may be acceptable if their content justifies their length. Indeed, the Board's desire to restrict the length of papers should not lead authors to split their work into two or more shorter papers. For example, a single paper consisting justifiably of ten printed pages will normally be considered more favourably than two papers each of six pages dealing with the same material. Authors should remember that short papers are generally published with the least delay.

All papers that can be accommodated in four pages of the Journal will be treated as Rapid Papers. They receive priority treatment and it is aimed for their publication to be within 3 months of receipt. However, the criteria of reviewing and the appearance of Rapid Papers in the Journal are identical with those of Full-length Papers. In order to achieve the accelerated schedule, reviewers are asked to deal with the paper within 48 h and proofs of accepted Rapid Papers are not normally supplied to authors. However, authors are given details of any editing of Rapid Papers at the same time that the typescripts are sent to the printer, with a request that any essential amendments be sent to the Editorial Secretary as soon as possible. The scientific editorial staff in the Editorial Office check the proofs to ensure that they tally exactly with the edited typescripts and make any necessary alterations indicated by the authors.

Papers submitted for publication should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP, U.K. Three copies of the typescript should be submitted. The typescript should bear the name and address of the person to whom correspondence (including proofs) should be sent. An additional copy of the synopsis should be enclosed. The top copy should be accompanied by the original artwork (see the Appendix to Policy of the Journal and Instructions to Authors for advice on the preparation of figures).

Photocopies of line drawings are acceptable for the other two copies but glossy prints (not photocopies) of all the halftone figures must be provided.

It is helpful if the author encloses copies of relevant preceding papers, especially if these were not published in the Biochemical Journal. If the paper submitted refers to a paper 'in the press' in another journal the reviewers will not have access to this material and it is important that the author should include photocopies of the relevant typescript together with documentary evidence that it has been accepted for publication. Any reference to a 'personal communication' must be supported by documentary evidence from the individual quoted showing that agreement with the quotation is given.

Before preparing papers, authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. Typescripts should be in double-spaced typing throughout (including the references and legends of tables and figures) on sheets of uniform size with wide margins. Full-length Papers should not normally exceed 7000 words in length, and Rapid Papers must not exceed 3500 words, each inclusive of title, summary and references. Authors must assess what proportion of a page insertions (such as tables, figures and schemes) will occupy and reduce the number of text words accordingly at the rate of 1000 words per full page of the Journal.

Authors should state under which section of the contents list they wish their paper to appear:

- Proteins
- Enzymes
- Carbohydrates
- Lipids
- Nucleic acids and molecular genetics
- Synthesis and degradation of macromolecules
- Intermediary metabolism and metabolic control
- Bioenergetics and transport
- Membranes and receptors
- Cell structure and function

Methods

Subscribers

The Biochemical Journal is published and distributed by the Biochemical Society. It is published twice monthly; in 1987 eight volumes (241-248) of three parts each will appear. An Annual Index is supplied to all subscribers as soon as possible after publication of the year's volumes.

Subscription rates

For non-members of the Biochemical Society the subscription rates for 1987 are shown below.

Subscribers to the Biochemical Society can subscribe additionally to Biochemical Society Transactions on a joint subscription, costing £15.00 (U.K. and Overseas) or $25.00 (N. America). The methods of despatch of both publications are shown below.

The subscription rates for North America and Japan include elements for airfreight and Accelerated Surface Post respectively. Subscribers may opt for air-mail delivery at additional cost; details are available on application.

Terms are cash with order (£ sterling for subscribers other than in North America or U.S. S equivalent payment of exchange) or against proforma invoice. Orders and subscriptions should be sent to the address below, or through your usual agent.

Advertisements

Applications for advertising space should be sent to the Advertising Department at the Society's London address. Copy is required eight weeks before publication date. Rate cards are available on request.

Microfiche

Volumes 102-240 of the Biochemical Journal are available on microfiche. Further details are available from the address below.

Subscription Department

The Biochemical Society Book Depot, P.O. Box 32, Commerce Way, Colchester CO2 8HP, Essex, U.K.

Librarians

Preliminary pages: The preliminary pages in each issue have been arranged and paginated so that they can be assembled to give a set of volume preliminary pages; pages (i) and (ii) are the volume title pages supplied with part 1 of each volume, pages (iii)-(v), (vi)-(vii) and (xv)-(xvii) are the contents pages from parts 1, 2 and 3 respectively, and pages (xvi) and (xvii) are the volume author index supplied in part 3 of each volume.
