

CONTENTS

Volume 248, No. 2, 1987

REVIEW ARTICLE

- Fluorescence and bioluminescence measurement of cytoplasmic free calcium
P. H. COBBOLD & T. J. RINK 313-328

FULL AND RAPID PAPERS

Proteins

- Purification, characterization and proteinase-inhibitory activity of a Clara-cell secretory protein from the pulmonary extracellular lining of rabbits
R. P. GUPTA, S. E. PATTON, A. M. JETTEN & G. E. R. HOOK 337-344
- Antigenic probes locate a serum-gelsolin-interaction site on the C-terminal part of actin
M. BOYER, J. FEINBERG, H.-K. HUE, J.-P. CAPONY, Y. BENYAMIN & C. ROUSTAN 359-364
- Amino acid sequences of cytochrome *c*-554(548) and cytochrome *c'* from a halophilic denitrifying bacterium of the genus *Paracoccus*
R. P. AMBLER, M. DANIEL, L. MCLELLAN, T. E. MEYER, M. A. CUSANOVICH & M. D. KAMEN 365-371
- Type VI collagen of the intervertebral disc. Biochemical and electron-microscopic characterization of the native protein
J.-J. WU, D. R. EYRE & H. S. SLAYTER 373-381
- Platelet-reactive sites in collagen. Collagens I and III possess different aggregatory sites
L. F. MORTON, C. M. FITZSIMMONS, J. RAUTERBERG & M. J. BARNES 483-487

Enzymes

- Metabolism of l-aminoethylphosphinate generates acetylphosphinate, a potent inhibitor of pyruvate dehydrogenase
B. LABER & N. AMRHEIN 351-358
- Active-site-directed inactivation of wheat-germ aspartate transcarbamoylase by pyridoxal 5'-phosphate
S. C. J. COLE & R. J. YON 403-408
- Reagents for reversible coupling of proteins to the active centres of trypsin-like serine proteinases
S. B. KALINDJIAN & R. A. G. SMITH 409-413
- The identification of the major excreted protein (MEP) from a transformed mouse fibroblast cell line as a catalytically active precursor form of cathepsin L
R. W. MASON, S. GAL & M. M. GOTTESMAN 449-454
- Demonstration of non-neural tryptophan 5-mono-oxygenase in mouse intestinal mucosa
H. HASEGAWA, M. YANAGISAWA, F. INOUE, N. YANAIHARA & A. ICHIYAMA 501-509
- Action of long-chain fatty acids *in vitro* on Ca²⁺-stimulatable, Mg²⁺-dependent ATPase activity in human red cell membranes
F. B. DAVIS, P. J. DAVIS, S. D. BLAS & M. SCHOENL 511-516
- Early conformational changes and activity modulation induced by guanidinium chloride on intestinal alkaline phosphatase
G. A. D. MIGGIANO, A. MORDENTE, M. G. PISCHIUTTA, G. E. MARTORANA & A. CASTELLI 551-556
- pH-activity curves for enzyme-catalysed reactions in which the hydron is a product or reactant
H. B. F. DIXON, K. BROCKLEHURST & K. F. TIPTON 573-578
- The effects of autolysis on the structure of chicken calpain II
C. CRAWFORD, A. C. WILLIS & J. GAGNON 579-588
- Inhibition of chicken calpain II by proteins of the cystatin superfamily and α_2 -macroglobulin
C. CRAWFORD 589-594
- Further theoretical refinement on the internal thermodynamics of perfect enzymes
G. TIAN 619-620

Carbohydrates

- Structural and compositional differences between intracellular and secreted mucin of rat small intestine
R. E. F. FAHIM, G. G. FORSTNER & J. F. FORSTNER 389-396

Nucleic acids and molecular genetics

- Identification of tonin in brain and exocrine tissues and in the cell-free translation products encoded by the mRNA of these tissues
C. WOODLEY-MILLER, J. CHAO & L. CHAO 477-481

Synthesis and degradation of macromolecules

- Neutral endopeptidase-24.11 (enkephalinase). Biosynthesis and localization in human fibroblasts
G. ZIJDERHAND-LORKOWSKI, J. E. BLEEKEMOLEN, E. G. ERDÖS, K. VON FIGURA & A. HASLIK 345-350

CONTENTS (continued)

Activity of a gelsolin-like actin modulator in rat skeletal muscle under protein catabolic conditions	J. D'HAESE, M. RUTSCHMANN, B. DAHLMANN & H. HINSSEN	397-402
Short-term effects of corticosterone treatment on muscle protein synthesis in relation to the response to feeding	P. J. GARLICK, I. GRANT & R. T. GLENNIE	439-442
The role of C-4-substituted mannose analogues in protein glycosylation. Effect of the guanosine diphosphate esters of 4-deoxy-4-fluoro-D-mannose and 4-deoxy-D-mannose on lipid-linked oligosaccharide assembly	W. MCDOWELL, T. J. GRIER, J. R. RASMUSSEN & R. T. SCHWARZ	523-531
Biosynthesis of rat liver pI-6.1 esterase, a carboxylesterase of the cisternal space of the endoplasmic reticulum	M. ROBBI & H. BEAUFAY	545-550
Intermediary metabolism and metabolic control		
Characterization of rat preadipocytes from normal rat adipose tissue by their effector response	E. SWIERCZEWSKI, J.-Y. PELLO, C. ARAPINIS, Y. ARON & R. KRISHNAMOORTHY	383-387
Inhibition of catalase-dependent ethanol metabolism in alcohol dehydrogenase-deficient deer mice by fructose	J. A. HANDLER, B. U. BRADFORD, E. B. GLASSMAN, D. T. FORMAN & R. G. THURMAN	415-421
Role of activation of myocardial branched-chain 2-oxo acid dehydrogenase complex in the regulation of leucine decarboxylation during cardiac work <i>in vitro</i>	E. HILDEBRANDT & M. S. OLSON	423-428
Stimulation of glycogen synthesis and lipogenesis by glutamine in isolated rat hepatocytes	A. LAVOINNE, A. BAQUET & L. HUE	429-437
Inhibition of hepatic deiodination of thyroxine is caused by selenium deficiency in rats	G. J. BECKETT, S. E. BEDDOWS, P. C. MORRICE, F. NICOL & J. R. ARTHUR	443-447
Extracellular metabolites in suspensions of isolated hepatocytes	E. VAN SCHAFTINGEN, L. HUE & H.-G. HERS	517-521
The effects of selenium and copper deficiencies on glutathione S-transferase and glutathione peroxidase in rat liver	J. R. ARTHUR, P. C. MORRICE, F. NICOL, S. E. BEDDOWS, R. BOYD, J. D. HAYES & G. J. BECKETT	539-544
Effect of ethanol on the redox state of the coenzyme bound to alcohol dehydrogenase studied in isolated hepatocytes	T. CRONHOLM	567-572
Inhibition of peroxisomal fatty acyl-CoA oxidase by antimycin A	J. VAMECQ, L. SCHEPERS, G. PARMENTIER & G. P. MANNAERTS	603-607
Bioenergetics and transport		
Proton-linked L-fucose transport in <i>Escherichia coli</i>	S. A. BRADLEY, C. R. TINSLEY, J. A. R. MUIRY & P. J. F. HENDERSON	495-500
Renal transport of neutral amino acids. Cation-dependent uptake of L-alanine by luminal-membrane vesicles	K. E. JØRGENSEN & M. I. SHEIKH	533-538
Measurement of the matrix free Ca ²⁺ concentration in heart mitochondria by entrapped fura-2 and quin2	G. L. LUKÁCS & A. KAPUS	609-613
Membranes and receptors		
Characterization of the inositol 1,4,5-trisphosphate-induced Ca ²⁺ release in pancreatic β -cells	T. NILSSON, P. ARKHAMMAR, A. HALLBERG, B. HELLMAN & P.-O. BERGGREN	329-336
Dexamethasone-induced alterations in lipid composition and fluidity of rat proximal-small-intestinal brush-border membranes	T. A. BRASITUS, P. K. DUDEJA, R. DAHIYA & A. HALLINE	455-461
Formation of inositol phosphate isomers in GH ₃ pituitary tumour cells stimulated with thyrotropin-releasing hormone. Acute effects of lithium ions	P. J. HUGHES & A. H. DRUMMOND	463-470
Thrombin and C-kinase activators potentiate calcium-stimulated arachidonic acid release in human platelets	S. P. HALENDA & A. G. REHM	471-475
Turkey erythrocytes possess a membrane-associated inositol 1,4,5-trisphosphate 3-kinase that is activated by Ca ²⁺ in the presence of calmodulin	A. J. MORRIS, C. P. DOWNES, T. K. HARDEN & R. H. MICHELL	489-493
Human β -adrenergic receptors. Simultaneous purification of β_1 - and β_2 -adrenergic-receptor peptides	S. W. BAHOUTH & C. C. MALBON	557-566
Heterogeneity of D ₂ dopamine receptors in different brain regions	M. N. LEONARD, C. A. MACEY & P. G. STRANGE	595-602
