Volume 249, No. 2, 1988

REVIEW ARTICLE

The structure and mechanism of neurotransmitter receptors. Implications for the structure and function of the central nervous system

P. G. STRANGE 309-318

FULL AND RAPID PAPERS

Proteins

Antibody-independent activation of the complement system by mitochondria is mediated by cardiolipin

M. C. PEITSCH, J. TSCHOPP, A. KRESS & H. ISLIKER 495-500

Secreted proteins of human monocytes. Analysis by two-dimensional gel electrophoresis and effect of lipopolysaccharide

J. R. PANUSKA, K. FUKUI & C. W. PARKER 501-511

Formaldehyde adducts of glutathione. Structure elucidation by two-dimensional n.m.r. spectroscopy and fast-atom-bombardment tandem mass spectrometry

S. NAYLOR, R. P. MASON, J. K. M. SANDERS, D. H. WILLIAMS & G. MONETI 573-579

The complete amino acid sequence of human complement factor H

J. RIPOCHE, A. J. DAY, T. J. R. HARRIS & R. B. SIM 593-602

Enzymes

Sequencing and overexpression of the *Escherichia coli* *aroE* gene encoding shikimate dehydrogenase

I. A. ANTON & J. R. COGGINS 319-326

Activation of human neutrophil gelatinase by endogenous serine proteinases

M. C. M. VISSERS & C. C. WINTERBOURN 327-331

Myeloperoxidase-oxidase oxidation of cysteamine

B. E. SVENSSON & S. LINDVALL 521-530

Modulation of polyamine-biosynthetic activity by *S*-adenosyl-methionine depletion

D. L. KRAMER, J. R. SUFRIN & C. W. PORTER 581-586

Lipids

Δ^6 -Desaturase activity in liver microsomes of rats fed diets enriched with cholesterol and/or ω 3 fatty acids

M. L. GARG, E. SEBOKOVA, A. B. R. THOMSON & M. T. CLANDININ 351-356

Gene structure and expression

Isoprenaline-induced transcription of 4 β -galactosyltransferase is inhibited by both cycloheximide and actinomycin D in rat parotid acinar cells

M. G. HUMPHREYS-BEHER 357-362

Pseudouridine distribution in mammalian 18 S ribosomal RNA. A major cluster in the central region of the molecule

B. E. H. MADEN & J. A. WAKEMAN 459-464

The complete sequence of a frog α -tubulin gene and its regulated expression in mouse L-cells

D. J. SMITH 465-472

Cloning of cDNA to rat mammary-gland fatty acid synthase mRNA. Evidence for the expression of two mRNA species during lactation

M. BRADDOCK & D. G. HARDIE 603-607

Nucleotide sequence for the *hemD* gene of *Escherichia coli* encoding uroporphyrinogen III synthase and initial evidence for a *hem* operon

P. M. JORDAN, B. I. A. MGBEJE, S. D. THOMAS & A. F. ALWAN 613-616

Synthesis and degradation of macromolecules

Regulation of protein metabolism and DNA synthesis by fibroblast growth factor in BHK-21 cells

M. ROSS & F. J. BALLARD 363-368

Subcellular localization of two porphyrin-synthesis enzymes in *Pisum sativum* (pea) and *Arum* (cuckoo-pint) species

A. G. SMITH 423-428

Induction of hepatic metallothioneins determined at isoprotein and messenger RNA levels in glucocorticoid-treated rats

L. D. LEHMAN-MCKEEMAN, G. K. ANDREWS & C. D. KLAASSEN 429-433

Haem synthesis during cytochrome *P*-450 induction in higher plants. 5-Aminolaevulinic acid synthesis through a five-carbon pathway in *Helianthus tuberosus* tuber tissues aged in the dark

D. WERCK-REICHHART, O. T. G. JONES & F. DURST 473-480

Synthesis of lipoprotein lipase in the liver of newborn rats and localization of the enzyme by immunofluorescence

S. VILARÓ, M. LLOBERA, G. BENGTSOON-OLIVECRONA & T. OLIVECRONA 549-556

Effect of hyperoxic exposure on protein synthesis in the rat

F. J. KELLY 609-612

Intermediary metabolism and metabolic control

Different insulin-secretory responses to calcium-channel blockers in islets of lean and obese (*ob/ob*) mice

M. A. BLACK, L. A. FOURNIER, H. M. HEICK & N. BÉGIN-HEICK 401-407

CONTENTS (continued)

Role of carnitine palmitoyltransferase I in the regulation of hepatic ketogenesis during the onset and reversal of chronic diabetes	B. D. GRANTHAM & V. A. ZAMMIT	409-414
Factors influencing the altered thermogenic response of rat brown adipose tissue in streptozotocin-diabetes	Z. JAMAL & E. D. SAGGERSON	415-421
Amino acid metabolism in tumour-bearing mice	S. RIVERA, J. AZCÓN-BIETO, F. J. LÓPEZ-SORIANO, M. MIRALPEIX & J. M. ARGILÉS	443-449
Regulation of GDP binding and uncoupling-protein concentration in brown-adipose-tissue mitochondria. The effects of cold-acclimation, warm-reacclimation and noradrenaline	T. PEACHEY, R. R. FRENCH & D. A. YORK	451-457
Glutamine and ketone-body metabolism in the gut of streptozotocin-diabetic rats	M. S. M. ARDAWI	565-572
Bioenergetics and transport		
<i>NN'</i> -Dicyclohexylcarbodi-imide-sensitivity of bovine heart mitochondrial NADH: ubiquinone oxidoreductase. Inhibition of activity and binding to subunits	P. T. VUOKILA & I. E. HASSINEN	339-344
Inhibition by nucleosides of glucose-transport activity in human erythrocytes	S. M. JARVIS	383-389
Nucleoside transport in rat cerebral-cortical synaptosomes. Evidence for two types of nucleoside transporters	C. W. LEE & S. M. JARVIS	557-564
Membranes and receptors		
The action of the protein kinase C inhibitor, staurosporine, on human platelets. Evidence against a regulatory role for protein kinase C in the formation of inositol trisphosphate by thrombin	S. P. WATSON, J. MCNALLY, L. J. SHIPMAN & P. P. GODFREY	345-350
Lateral heterogeneity of rat liver plasma membranes analysed by counter-current distribution	P. GIEROW, B. JERGIL & P.-Å. ALBERTSSON	369-375
Changes in adenosine receptors during differentiation of 3T3-F442A cells to adipocytes	K. RAVID & J. M. LOWENSTEIN	377-381
Lactotransferrin receptor of mouse small-intestinal brush border. Binding characteristics of membrane-bound and Triton X-100-solubilized forms	W.-L. HU, J. MAZURIER, G. SAWATZKI, J. MONTREUIL & G. SPIK	435-441
Homogeneity of [³ H]ouabain-binding sites in rat soleus muscle	K. KJELSDEN	481-485
Possible physiological role of guanosine triphosphate and inositol 1,4,5-trisphosphate in Ca ²⁺ release in macrophages stimulated with chemotactic peptide	Y. KIMURA, M. HIRATA, T. HAMACHI & T. KOGA	531-536
Treatment of streptozotocin-diabetic rats with metformin restores the ability of insulin to inhibit adenylate cyclase activity and demonstrates that insulin does not exert this action through the inhibitory guanine nucleotide regulatory protein G _i	D. GAWLER, G. MILLIGAN & M. D. HOUSLAY	537-542
Resensitization of hepatocyte glucagon-stimulated adenylate cyclase can be inhibited when cyclic AMP phosphodiesterase inhibitors are used to elevate intracellular cyclic AMP concentrations to supra-physiological values	G. J. MURPHY & M. D. HOUSLAY	543-547
Epidermal growth factor is synergistic with phorbol esters and vasopressin in stimulating arachidonate release and prostaglandin production in renal glomerular mesangial cells	B. L. MARGOLIS, J. V. BONVENTRE, S. G. KREMER, J. E. KUDLOW & K. L. SKORECKI	587-592
Cell structure and function		
Interleukin 2 and a lactogen regulate proliferation and protein phosphorylation in Nb2 cells	E. J. RAYHEL, T. J. FIELDS, J. W. ALBRIGHT, T. DIAMANTSTEIN & J. P. HUGHES	333-338
Role of hydrogen peroxide in the cytotoxicity of the xanthine/xanthine oxidase system	E. M. LINK & P. A. RILEY	391-399
Comparison of the effects of phorbol 12-myristate 13-acetate and prostaglandin E ₁ on calcium regulation in human platelets	K. YOSHIDA, F. STARK & V. T. NACHMIAS	487-493
Sodium valproate inhibits the movement of secretory vesicles in rat hepatocytes	M. E. BELLRINGER, K. RAHMAN & R. COLEMAN	513-519
BJ LETTERS		
The possible contribution of glucose autoxidation to protein modification of diabetes	J. J. HARDING & H. T. BESWICK	617-618
Aldehydes and dicarbonyls in non-enzymic glycosylation of proteins	S. P. WOLFF & R. T. DEAN	618-619
