The Principles of Plant Biochemistry

Part 1

By MURIEL WHELDALE ONSLOW, M.A.

This book, which deals only with the higher plants, is intended for the student and for the beginner in research. The problems here considered are, in the main, those concerned with the biochemistry of the sugars and the nitrogen compounds; the former when they take part in cell-wall formation and in respiration, the latter chiefly in connection with the synthesis and the break-down of protein. Oxidising systems are also included, but only such as are known to be characteristic of the above-mentioned group of plants.

B.D.H. VITAMIN-FREE DIET
(FOR FEEDING RATS)
The demand for a vitamin-free diet ready for use in rat feeding experiments as carried out in testing for Vitamin A and Vitamin B has led to the introduction of the B.D.H. Vitamin-free Diet. The Diet consists of inactivated casein, starch, a hardened vegetable oil, and a mixture of salts. Every batch is biologically tested in the B.D.H. Physiological Laboratories before it is passed for issue.

ANGLE CENTRIFUGES
SWEDISH MANUFACTURE

C1139a. Angle Centrifuge, Hand Driven, Type B, with nickel-plated bonnet arranged for 4–15 ml. tubes, either round, oval or flat, which can be inserted at an angle of 25° for the separation of blood or other liquids difficult of separation, or at an angle of 45° for treating urine and similar fluids which are easily separated. The pressed aluminium tube holders are detachable, and the centrifuge can easily be worked up to a speed of 3000 r.p.m. (1½ revolution per second of the handle = 2800 r.p.m. of the crank shaft.)

£4.5.0

C1140. Angle Centrifuge, Type BE-EM, as described under C1139a, but electrically driven, with motor suitable for direct or alternating current. Speed 3000 r.p.m. Complete with Regulating Rheostat and Connecting Plug.

£7.15.0

All Motor Centrifuges are provided with Universal Motors for both D.C. and A.C. current, of all usual voltages and frequencies.

This Journal is issued by the PHYSIOLOGICAL SOCIETY, acting in co-operation with numerous physiological organisations in Great Britain, America, and other countries. The Editor, Prof. J. MELLANBY, is assisted by a staff of competent abstractors both at home and abroad.

The Journal aims at issuing promptly abstracts of the papers published throughout the world, in physiological and allied sciences (including Plant Physiology).

A number is published at the beginning of each month. Vol. XVI will begin with the April (1931) issue.

Subscriptions are only taken for April to March of the next year, and are payable in advance.

Back numbers, excepting some which are out of print, may be obtained from the Publishers, or any Bookseller. An extra charge is made for some numbers the stock of which is nearly exhausted. Prices on application.

Binding Cases, price 2s. net, are supplied by the Publishers, who can also arrange for binding; prices on application.
